KREOLITE

Throughout the Automotive Industry

That Kreolite Wood Blocks have met the exacting floor requirements of the automobile industry is evidenced by the number of repeat orders received from the leading automobile manufacturers.

Over 9 million square feet of Kreolite Wood Block Floors are in use in automobile factories throughout the country today.

Laid with the tough end grain uppermost they give the ultimate in strength, durability, service and economy in any factory.

Our Kreolite Engineers will study your needs and make recommendations without any obligation on your part.

"Please Hurry!"

TRAGEDY in its darkest aspect cast a gloom over the past week. The sinking of the submarine S-4 a week before Christmas off Provincetown darkened many a day. Once again, as when the S-51 was sunk two years ago, the nation waited in breathless suspense for a word of hope that the men entombed in the sunken vessel might be saved from certain fate. Once again there came reports only of impotent groping of divers around the deep-lying hulk. A few despairing messages were rapped out in hammer code by the doomed men, and then came silence—hours before a bit of air could be pumped into the prison chamber through a single small pipe. There were no air locks for entrance to the torpedo room or escape of those confined in it, no hooks or rings by which the hulk could be raised, no device by which a sister submarine could bridge across. Built to destroy, the submarine had no life-saving element in its make-up. And, worse yet, the Navy had no rescue provisions in its equipment. Perhaps this must be so, but the lay mind refuses to believe it; just as it insists that private industry shall not dispense with safety measures, so it feels now that the Navy can and ought to retrieve its name from a black record of steadily repeated disaster by proving that it is able to guard the lives of its men. After such a tragic occurrence as the sinking of the S-4, it is meet that the keenest minds from different walks of life be called together officially to join in thought for future submarine safety. But, of course, that is not to be. Obedient to the dictates of tradition, the Navy itself will investigate the fate of the S-4. May the deliberations of the board be urged on by memory of the dead men's call, *"Please hurry!"* and the helpless answer of those outside, *"We are doing everything possible."*

Sewage Chlorination

STUDIES of sewage chlorination have been numerous of late. In this country they have extended from New England to Texas with rumors of similar investigations in California. Abroad, engineers in Singapore, prompted by the account in our columns of the earlier series of investigations at Schenectady, N. Y., started the use of chlorine immediately and sent this journal a report of results within a year of the time that news from Schenectady reached them. Elsewhere in this issue we present three articles on chlorination studies at as many places. Most of the eight studies thus far reported have been on a working scale, usually with the co-operation of state departments of health. The results promise a rapid increase in the use of sewage chlorination for a wide range of objects: Control of offensive odors, foaming, the fly nuisance, nozzle clogging, ponding of filter beds, as well as for bacterial reduction. Except for fly control, as to which there is some doubt, sewage chlorination seems to have been successful for all the purposes named. More light is needed as to its effect upon nitrification in filter beds, experience and opinion as to this being somewhat conflicting. More cost data are also needed, especially as bearing upon chlorination with little or no pre-treatment. In the latter respect, engineers will need to balacne high cost of chlorine and low capital charges for equipment against the operating and capital charges of pre-treatment works. A great advantage of chlorination is its flexibility. It may be discontinued for days, weeks or months, chlorine saved and no costly equipment left standing idle. Finally, while it is not to be expected that sewage chlorination will increase rapidly as has water chlorination, its wide use in the near future seems assured.

Not Reassuring

ACCORDING to the coroner's jury which has just brought in a belated verdict on the great gasholder explosion in Pittsburgh on Nov. 14, the explosion was an accident. It is by no means a reassuring verdict. It says something about leaky valves, though it does not explain why the leakage of these valves had not been detected at an earlier stage of the repair work on the holder. All in all, it throws no useful light on the circumstances or origin of the explosion. Unless our logic is seriously at fault, the verdict which characterizes the occurrence as an "accident" means that it was an unpreventable happening, such a thing as we must expect every now and then despite reasonable care. Is this possible? Does a constant, imminent hazard of grave accident attach to gas production and storage? The past record of the gas industry does not support the charge of such hazard. It would be criminal to permit gasholders in the midst of city populations if they were subject to unforeseen explosions, sure to devastate a wide territory. Since the coroner's verdict leaves the matter in this uncertain condition, the authorities of the city of Pittsburgh and the State of Pennsylvania, and also such technical representatives of the industry as the American Gas Association, owe the world a more adequate exploration of the causes of the accident. If the causes are found to be of the preventable class, it will be possible—and obviously necessary—to frame rules of safety. Should it prove that they are quite fortuitous, on the other hand, it will be certain that cities are exposed to a great unguarded danger, one which ought promptly to be removed by isolation in a distant location. The question at issue is altogether too big to be left in a state of doubt. Let the facts be brought to light.

Six Young Lawyers

THE investigation of charges against the president of Queens Borough, New York City, noted in these columns last week, promises to be the most thoroughgoing of any coming out of charges of city misgovernment in the United States. The governor, on receiving the charges summarized on p. 1021 of our last issue, delegated the trial to a supreme court judge of high standing who promptly "drafted" as chief investigator a New York lawyer who has made a reputation in such matters. The investigator immediately announced the engagement of six young lawyers, accustomed to investigation team work under him, as lieutenants. To gain public interest and confidence in the investigation, the names, scholastic and legal training of these six lawyers were speedily announced—and given front-page space in the daily press. All six graduated from leading universities, half of them with the Phi Beta Kappa key. All but one have either been Rhodes scholars at Oxford or else taken post-graduate law courses in America, and one did both. One has been editor and another editor-in-chief of a law school journal. Three resigned positions as assistant United States district attorneys to enter on the Queens investigation. All this about six young lawyers is set forth in appreciation of how a lawyer, attacking a huge civic problem, loses no time to give due credit to his legal assistants. How many engineers in like positions would do the same for their engineer-lieutenants? Inasmuch as the charges thus far made originated in allegations of collusion, high cost and incompetence in carrying on an immense engineering project and the investigation is likely to take up highway and other public works, it is safe to assume that engineers will be engaged to assist in the work. It will be interesting to see whether like publicity will be given to them by their chief, whether he be lawyer or engineer, and by the daily press.

Tunnel Lining Machines

TUNNEL lining with concrete is developing extraordinarily large mobile plant units. The lining traveler described in this isue as employed at Musconetcong is an example. Here is an outfit of size and weight that places it among the largest mobile units used in construction and whose many functions make it virtually a factory for producing tunnel lining in place. It is not a unique example, either in size or complexity. At the Cascade tunnel half a dozen lining machines, each as large and all much more comprehensive as to functions performed, are now in use. Indeed any modern tunneling operation of which concrete lining is a part exhibits similar plants, less or greater than those mentioned, as the occasion demands. In general the change is universal from the older practice of building the lining in stages with separate forms for each stage and the forms not mobile but merely portable. What does the change promise? It is probable that experience is not yet ready to give the answer. Certainly it seems plain that practice has not got beyond the cut-and-try period of development. Some are using steel forms and some forms of wood; some are mixing the concrete on the lining traveler and some are hauling it mixed to the traveler; some are stressing pneumatic placing and others are keeping it down to the least amount, and all are contemplating improvements, large or small, when the next traveler is built and the service to it is planned. There is in this condition a resemblance to that preceding the standardizing of traveling plant for laying concrete pavement. In the end the large and heavy mobile unit equipped to perform all fabricating processes was broken down into several units operating in succession with a great simplification of operations. As one regards the enormous lining travelers at Musconetcong and at other tunnels, the question arises whether a breaking-down process might not be as advantageous in tunnel lining as it has proved to be in concrete paving.

Road Convention Improvement

ALREADY culminating every year in a larger exhibition than in previous years of road building equipment and materials, the efforts of the managers of the American Road Builders Association are being turned toward developing a meeting for technical papers and discussions which is commensurate in interest and popularity. This determination is timely. Born of the A.R.B.A. convention, the road show has grown far beyond the stature of its progenitor. It is each year the greatest exhibition of its kind and one of the greatest of any kind. Equal distinction is not true of the convention.

The convention has not failed. Every year its program becomes longer and the aggregate attendance perhaps a little larger and possibly the papers read a little wider in range and a little richer in information, but the technical meeting is not great in quality and in attendance as the exhibition is great. Perhaps this should be regarded as inevitable. The science and technique of an industry naturally appeal to fewer than does its commerce, arouse less personal concern and admit of less showmanship. But even this philosophy does not explain the situation which prevails; much less does it excuse quiescence under the situation. It is imperative that it be changed.

How? By better papers and their presentation in a better way? By better leadership of the sessions? By better showmanship? By better convention mechanism in general? All these, it may be answered, but considerably more. The exhibitors have the greater part to play. Directly and indirectly they can increase the convention attendance and stiffen up its programs. The highway engineer and contractor members of the A.R.B.A. are not confessing helplessness by asking the co-operation of the exhibitor nor is the exhibitor intruding beyond his rightful functions in extending co-operation.

Road equipment and materials are engineering products and their efficient and wise use is construction engineering of the highest character. There is not a large exhibitor at the road show whose staff of engineers does not contain men who have not only expert knowledge of the use of machines and materials but sound experience and wise opinion on broad policies and practices of road building and maintenance. These men have as much to give the technical meetings as they have to give the road show visitors to their exhibits. They have the great possibility of inducting into the convention thinking that element of equipment consciousness which is essential in modern construction engineering. They are experts to whom the individuals of the convention audiences go often to learn: what they do well for individuals they can do in some fashion at least for convention assemblages of individuals. They should be encouraged by the convention program makers and delegated by their employers to do it. Incidentally the exhibitor might stress this effort somewhat by bearing down less on the distractions of his entertainment program.

Paying for Flood Control

WITH extremely few exceptions those who live in the Mississippi Valley south of Cairo express themselves in no uncertain terms as to who shall bear the cost of flood control. In that large section of the country which is most vitally affected, therefore, the suggestion of the Chief of Engineers in his recent report that 20 per cent of the cost of flood control be borne locally has been received with violent opposition. The principle of states' rights, so long a tenet held to in this section with religious fervor, has been thrown to the winds. Argument concerning the subject dwells only briefly on economic principles, but soon turns to the human-interest factors involving protection of life and homes, and these factors are then pressed in such a way that few individuals are willing to pursue the opposition argument lest they be accused of heartlessness.

Nevertheless the subject has an economic side, and General Jadwin is to be commended for bringing it out and facing the situation squarely and firmly. As he says so succinctly, "the question must be viewed from the standpoint not only of those in the valley needing flood protection but also of the taxpayers in other parts of the country, including the regions from which the flood waters come, who suffer indirectly from flood disasters and on whom the bulk of the burden of federal expenditures must fall." Recognizing the humanitarian viewpoint, justification of any financial plan must be capable of being put into tangible figures.

Values in the valley are placed at $5,000,000,000. This total includes $2,700,000,000 for farm and small-town values, $800,000,000 for New Orleans, and $1,500,000,000 for movable property. The Jadwin plan of control calls for an expenditure of six per cent of the valuation; or, if spread over the acreage only, it represents an average of $25 per acre. The cost of permanent protection, $300,000,000, is only 50 per cent in excess of the $200,000,000 estimated loss in the 1927 flood alone!

These are the basic figures, and from them the simple question evolves whether it is good business to spend $3 once, to save recurring losses of $2 plus. If the losses are frequent enough, it would seem good business indeed, on the simple money-back basis. The report does not go into probable future flood frequency, and so the dollars-and-cents argument cannot be followed much farther. However, General Jadwin declares that the expenditures are justified even if the 1927 flood should recur but once in 150 years.

Immediately comes the question as to who will get this money back, where will the benefit be felt, and who therefore should bear the original cost.

Obviously such a large part of the saving through the protection to be obtained is local that there can be no question of the reasonableness of local participation. The valley states accept that argument for the moment, but come back with the rejoinder that they have already done their share. The Chief of Engineers deals with this argument by presenting a table showing that 63 per cent of the $238,000,000 total spent on flood control since 1882 has been furnished by the states, under the present Flood Control Act provisions requiring the local interests to pay one-third the cost of the levees. Actually, of the completed levees, including rights of way and property damages, the states have borne their one-third.

The Chief of Engineers recognizes that a larger share should be borne by the federal government, but he still feels that something should be borne by local interests, and accordingly suggests an 80-20 split on the cost of structures, to give them "proprietary interest and watchfulness." This is not where the shoe pinches. The cost of right-of-way, easements and property damages in the past has been such as to make the local expenses double that of the government even though the latter paid two-thirds construction cost; in consequence the recommended 80 per cent participation by the government in structure costs may not be so generous as it appears. Without estimates of these property costs it is difficult to determine what is fair as to apportionment.

Surely the states must bear some portion of the cost, though there does not appear a mathematical basis on which to determine that percentage. Past experience with the Reclamation Service may be appealed to as an example of full federal financing; but the impoverishing outcome of that financial adventure has been so disastrous that the Valley States cannot deliberately seek to repeat the experience.

Another factor of importance not taken into account in the report is some estimate of the prospective values which the protection will create. In any one case this may possibly be worked out. In land reclamation by a drainage district its financial backers can reasonably foretell where the project will stand financially in say five, ten or twenty years. Where will flood protection put the cotton growers of Tallulah, or the planters in the "Sugar Bowl," or the muskrat trappers of the lower valley? Are not the cotton and sugar growers going to have so much more produce grown that after all their in-pocket yield is not increased but actually decreased? Such was the case with many cotton planters when they compared 1926 with 1927. Three million bales of cotton were grown in 1926 in excess of 1927, reducing the price below production costs. If that is going to be the result local interests may not be better off and better able to bear their share in five years than now.

Three million farmers migrated to the cities in the last five years. Millions of acres of pasture land were plowed up and put in crops during the war and 5,000,000 acres of forest were cleared for crops. Not one-half of this acreage was needed; so in the next five years 31,000,000 acres of farm land went out of use. Here are significant facts of farm economics. Should not farm economists be brought in to confer with the engineers to determine how much land really is needed out of the 12,000,000 acres it is proposed to protect in the Mississippi Delta?

When thousands of square miles of farm land throughout the country have been abandoned, is it fair to tax the remainder for $300,000,000 to put 12,000,000 acres actively into competition with it? Some one should balance the delta land with the upland areas as to relative fertility, nearness to market and other economic agricultural factors. Such economic questions have vital bearing on the cost apportionment question, if the ability-to-pay principle is to govern. And this latter is virtually what the states are setting up in their accentuated pleas of poverty. Such pleas lead one fast to the not-worth-saving idea.

In general, then, one must conclude that the 80-20 apportionment in the report is, as the report states, only a suggestion to Congress. It is not based on mathematical deduction—nor can it be, with the available information. Economic surveys are essential and future developments should be predicted, all viewed and tempered in the light of the agricultural needs of the nation as a whole.

Three Studies of Sewage Chlorination

Laboratory Tests on Digestion at Harvard University and Field Studies at Independence, Kan., and Bridgeport, Conn., on Odor Control and on Effect of Chlorination on Screened Sewage

The results of three independent studies upon sewage chlorination are given in the following articles. Laboratory tests at Harvard University indicate that pre-chlorination of sewage favors rapid digestion of settled solids. Field studies at Independence, Kansas, show that effective odor control can be obtained by pre-chlorination at a cost of $3.32 per m.g.d. At Bridgeport, Conn., studies made by the Connecticut State Health Department show the need of 10 to 15 p.p.m. of chlorine and frequent ortho-tolidin tests.—EDITOR.

Effect of Chlorination Upon the Digestion of Sewage Solids

Laboratory Tests Indicate That Pre-chlorination of Sewage Favors Rapid Digestion of the Settled Solids

BY GORDON M. FAIR AND C. L. CARLSON
Assistant Professor of Sanitary Engineering / Research Assistant in Sanitary Engineering
Harvard University, Cambridge, Mass.

THE introduction of chlorine to the crude sewage at the entrance to, or ahead of, clarification tanks for the purpose of disinfection on the one hand, or correction of odors from sprinkling filters on the other, raises the question as to what effect pre-chlorination of sewage exerts upon the subsequent digestion of the settled solids.

In answer to this question it may be said that the information available from plants in which the influent to settling tanks is being chlorinated indicates that chlorination does not interfere with the operation of the digestion processes and, if anything, seems to be an aid to normal digestion. Such reports as are obtainable shed very little light, however, upon the difference in behavior of the digesting solids settled from chlorinated and unchlorinated sewage. To answer the question more fully, therefore, we must turn to laboratory experiments that permit a comparison between the course of digestion taken by the chlorinated and unchlorinated solids. It is the purpose of this article to report upon two series of experiments that were carried out on samples of sludge obtained from the sewage-works of Schenectady, N. Y., where pre-chlorination of sewage for odor and fly control is being studied on a plant scale. The plant studies at Schenectady have been discussed in *Engineering News-Record*, Aug. 11, 1927, p. 229.

Experimental Methods—On two occasions, with a period of 44 days intervening, parallel samples were taken for purposes of experimentation, one from an Imhoff tank operating without chlorination, the other from an adjacent tank the influent of which was receiving a dose of 10 p.p.m. of chlorine. (The experimental technique used by the authors is fully described in *Journal* Boston Soc. C.E., Vol. 14, 1927.) This dosage was intentionally increased to an excess of that normally required for either disinfection or odor control and was sufficient, at the time of sampling, to leave a chlorine residual of 1.5 p.p.m. at the outlet of the tank. The samples were collected by suspending several buckets over the slots for 24 hr. and then preparing a proportioned, composite sample of the solids collected. The samples were shipped during cold weather to the Laboratory of Sanitary Engineering at Harvard University, and experiments upon their digestion characteristics were begun within 48 hr. after their collection. Analyses of the samples are shown by Table I.

TABLE I—ANALYSES OF SAMPLES OF CHLORINATED AND UNCHLORINATED SLUDGE

	Series I		Series II	
	Unchlorinated	Chlorinated	Unchlorinated	Chlorinated
Date of collection	Feb. 15, 1927		March 30, 1927	
Per cent solids	6.10	4.58	7.77	7.46
Per cent water	93.90	95.42	92.23	92.54
Per cent loss on ignition	64.7	64.9	59.6	63.3
pH	5.6	5.7	5.2	5.4

The samples of fresh sewage solids were seeded with well-digested sludge in a ratio of about 1¼ parts of fresh sludge to one of well-digested sludge on the basis of organic solids in each. The sludge used for seeding was obtained from the Fitchburg (Mass.) Imhoff tanks and analyzed as follows in percentages: solids, 15.9; water, 84.1; loss on ignition, 29.1. The pH value was 7.2. The sludge had all the characteristics of a well-digested sludge.

Methane production and hydrogen-ion concentration were used as the criteria of digestion. The amounts of methane evolved from the beginning of the experiment were measured and are plotted in the accompanying figure against the time elapsed. The slope of the curves thus obtained indicates the rate of gas production at any given instant. Since reaction is such an important factor in digestion, the changes in pH of the sludge mixtures prior to and during digestion are recorded in Table II.

As seen in the figure, the general course of digestion for each pair of samples was quite similar in both series. During the first three or four weeks the chlorinated sample gasified at a more rapid rate than did the unchlorinated sample. At the end of this initial period, however, the rate of methane production by the chlorinated sample slowed down, whereas that of the unchlorinated sample speeded up. At the end of four and six weeks respectively the gas curves of the unchlorinated samples passed those of the chlorinated ones and continued at steeper slopes until the end of the experiment. Turning to the variations in pH of the digesting sludges, it is seen that the chlorinated solids maintain themselves initially at slightly higher values than did the unchlorinated ones. Well-stabilized sludges were produced in both cases.

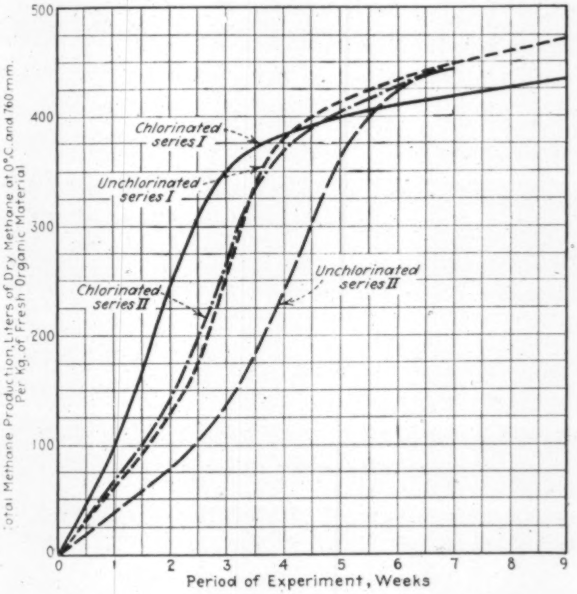
Discussion of Results—It appears that pre-chlorination of settling sewage results in more rapid gasification during the initial stages (four to six weeks) of digestion, but that the ultimate yield of methane is slightly lower. These facts are conceivably due to the following causes: (1) Chlorination stabilizes the finely divided, colloidal or dissolved organic material which is subject to most rapid fermentation and which is probably responsible for the quick initial drop in pH commonly experienced in the digestion of sewage sludge. Thus, since slight variations in pH will produce marked differences in the rate of digestion, chlorination, by keeping the pH slightly higher, would result in more rapid initial methane production. At the same time, however, pre-chlorination did slightly reduce the ultimate yield of the chlorinated sludge. (2)

TABLE II.—HYDROGEN-ION CONCENTRATION OF THE DIGESTING SLUDGES

Temperature maintained uniformly at 20 deg. C.

	Series I			Series II	
Elapsed Days	Unchlorinated pH	Chlorinated pH	Elapsed Days	Unchlorinated pH	Chlorinated pH
0	6.4	6.5	0	6.0	6.4
1	6.3	6.4	1	6.0	6.4
3	6.3	6.5	2	5.9	6.4
5	6.3	6.4	3	6.0	6.3
7	6.5	6.5	4	6.1	6.3
10	6.6	6.7	5	6.2	6.2
13	6.7	6.8	7	6.1	6.3
17	6.7	6.8	9	6.3	6.5
24	6.7	6.9	11	6.5	6.6
31	6.8	6.7	14	6.5	6.8
38	7.0	6.9	18	6.8	6.8
45	7.0	6.9	20	6.8	6.8
52	6.9	6.9	23	6.8	7.0
59	7.0	7.0	30	6.8	7.0
66	7.0	7.0	34	7.0	...
68	7.2	7.0	37	7.0	7.0
			44	7.1	7.0
			49	7.1	7.1

Chlorination may cause the coagulation and precipitation of finely divided, colloidal or dissolved organic matter that does not settle out in ordinary sedimentation. This, being easily digestible, would increase the initial rate of gas production. (3) Chlorination destroys much of the life associated with fresh sewage solids. Thus the acid-producing organisms and great numbers of other aërobic bacteria and protozoa which *probably* impede or inhibit activity of the methane-producing organisms in the digesting sludge would be largely eliminated. This would result in more rapid digestion and methane production in the early stages of the process. The second possibility may seem contrary to the first idea, but is supported in part by the analyses of the sludges, which show a slightly greater organic content for the chlorinated materials. The more rapid initial gasification, however, may be due to a combination of all three of the factors named.



METHANE PRODUCED BY CHLORINATED AND UNCHLORINATED SEWAGE SOLIDS DIGESTING AT 20 DEG. C.

The slope of the curves indicates the rate of gas production at any given time.

The authors are indebted to Morris M. Cohn, superintendent of sewage disposal, Schenectady, N. Y., for his co-operation in collecting the samples of sludge.

Odor Control by Chlorination at Independence, Kan.

Pre-chlorination at Cost of $3.32 per M.G.D. Effective at Sewage-Works Consisting of Tanks and Sprinkling Filters

By Glen H. Hackmaster
City Engineer, Independence, Kan.

APPLICATION of chlorine to the crude sewage of Independence, Kan., during the summer of 1927, eliminated the odor trouble current for several years past. The average quantity of chlorine required to produce operation without nuisance was 3.32 p.p.m. Pre-chlorination was found to be more effective than post-chlorination.

The sewage of Independence, a city of 15,000 people, is treated by Imhoff tanks, sprinkling filters and secondary settling tanks. The sewage reaches the plant through two outfall sewers converging ahead of a "wet well," from which it is lifted to the adjacent Imhoff tanks. The average flow is 1 m.g.d. The plant was put in use in May, 1924. Before many months of operation we were besieged with complaints of odors from many sections of the city. The odor seemed to be most noticeable in the late afternoon and early evening. We were therefore forced to bypass the sprinkling filters during the night. Although the plant apparently was functioning properly, bypassing the filters seemed to reduce the odor nuisance, so this procedure was continued every summer until July 1, 1927.

Experimental work, begun July 1, 1927, showed that chlorination stopped the odors. Likewise it appeared that certain improvements in plant conditions should effect a reduction in the chlorine required. Deposits of solids in the corners and center of the square "wet well" were causing a somewhat septic sewage. The cleaning of this well was laborious and time consuming. In the center of the well a brick and mortar "island" was constructed. Thereafter, the sewage entered at one corner of the well and the current around the sides materially reduced the deposition of solids. The result was a fresher crude sewage having a lessened chlorine demand at the point of chlorination, which was near the intake of the pump suction line.

The Imhoff tanks contained the conventional cross-baffles at the inlet and outlet ends of the flow chambers. Tests indicated that the incoming sewage, diverted in a downward direction by these baffles, flowed the length of the tank well, beneath the liquid surface, and rose behind the outlet baffle. The liquid displacement was poor, the upper strata were dead and the fresh sewage was sweeping out foul liquor from the lower part of the flow chambers. To remedy this, openings were cut through the cross-end-baffles so that the sewage flowed across the tank near the surface. Wooden "stilling" baffles were constructed across each flow-chamber at the center point. These extended downward to a point 6 ft. below the liquid surface and were constructed of 4-in. boards spaced 1 in. apart, with the end boards flush against the vertical septum walls, thus resembling a picket fence. Wooden scum boards prevented floating material from entering the siphon chamber. This arrangement produced a uniform flow of *fresh* sewage across the tanks and an effluent containing a very small quantity of suspended solids. The effluent was there-

* Especially accurate results obtained from separate analysis of macerated settled solids and supernatant liquor.

after much less impregnated with the septic liquid from the lower zone of the flow chamber and the hydrogen sulphide in the effluent was reduced, which in turn allowed for a reduction of chlorine applied. Even so, the hydrogen sulphide content of the unchlorinated effluent was frequently above 3 p.p.m.

After the changes were completed, chlorine was applied in the "wet well" as before. Application was begun at the rate of 30 lb. per 24 hr. and gradually increased to 70 lb. and its effect upon the sewage checked by determinations of hydrogen sulphide concentration at various points throughout the tanks and in the effluent. The concentration of hydrogen sulphide in the effluent decreased with increasing chlorine dosage. Reducing the hydrogen sulphide content of the effluent to less than 1 p.p.m. reduced the odors from the filters sufficiently to prevent nuisance. Larger dosages of chlorine were even more effective, but such refinement in operation was considered neither necessary nor economical.

Later it was shown to be good practice to vary the rate of chlorine application during the 24-hr. period. During the day and after 11 p.m. a rate of 30 lb. per day was found satisfactory. From 4 p.m. to 10 or 11 p.m. the rate was increased to the maximum, 70 lb. per 24 hr. This dosage gave residual chlorine in the tank influent after 6 p.m. Thereafter, during the odor period, residual chlorine to the extent of 0.5 p.p.m. was maintained in the influent crude sewage. During all other periods no attempt was made to secure residual chlorine in the influent. No attempt was ever made to secure residual chlorine in the tank effluent.

Experimental work was next conducted, applying the chlorine to the tank effluent. More chlorine was consumed, more hydrogen sulphide was found in the chlorinated sewage, and odor reduction was not satisfactory, so pre-chlorination was adopted as the permanent operating procedure.

On July 20 the plant was turned over to the plant operator, who kept accurate records of sewage pumped, chlorine applied, atmospheric conditions, odor intensity, and complaints. During the periods when the sewage was much diluted by infiltration or leakage, or when the wind blew away from the city, the chlorine was completely shut off. At other times the chlorine was applied at a rate of 25 to 40 lb. per 24 hr. from 11 p.m. to 4 a.m., and raised to 40 to 80 lb. per 24 hr. between 4 a.m. and 11 p.m. The average flows of sewage and chlorine dosage recorded in routine operation were:

Period	Rate of Flow M.G.D.	Chlorine Dosage, P.P.M.	Residual Chlorine, P.P.M.
8 a.m. to 4 p.m.	1.2	3.2	0.0
4 p.m. to 11 p.m.	0.85	10.5	0.2
11 p.m. to 8 a.m.	0.65	6.0	0.0-0.5

COST OF CHLORINATION

The cost of chlorination depends largely upon the conscientiousness of the plant operator. The degree of freshness of the sewage reaching the plant has an important bearing on the chlorine demand of the crude sewage. The condition of the pump sumps scattered over the sewer system and the condition of the tanks have a great effect upon the chlorine requirement. A dirty plant or sewer system in which solids are permitted to accumulate and become septic will result in increased chlorine demands. Finally, the operator should be alert to take advantage of shifts in wind direction or other effects which may warrant reduction of chlorine applied.

At Independence the average chlorine consumption for the 56-day test period was 27.7 lb. per 24 hr. An average sewage flow of 1 m.g.d. was treated, making a satisfactory dosage of but 3.32 p.p.m. Chlorine delivered

TABLE II—SEWAGE CHLORINATION RESULTS WITH DECREASING CHLORINE DOSAGE

Chlorine Applied, P.P.M.	Average Number of Bacteria per C.C. 37.5 Deg. C. for Chlorine Contact: Screened Sewage Not Chlorinated	Period in Minutes: 5	10	15	20	60	Unlimited	Average Number of B. * Especially accurate results obtained from separate analysis of macerated settled solids and supernatant liquor.

at the sewage plant, including freight and drayage in both directions, costs $12 per 100 lb. The cost of chlorination was therefore $3.32 per 24 hr. or p.m.g. If the plant were larger, the purchase of chlorine in multi-unit car-lot shipments would reduce the cost to less than one-half the present cost.

The results of the test period have been highly gratifying. We have made a canvass of the neighborhood troubled by odors and have found no person willing to file a complaint since chlorination was started. Independence will continue chlorination as part of the routine plant operation during periods of odor nuisance.

Acknowledgment is due Ernest Boyce, chief engineer, and staff, State Department of Health, for the services rendered the city in solving this odor problem. The Chlorine Institute supplied the initial shipment of chlorine and the Wallace & Tiernan Company the chlorinator. L. H Enslow, of the Chlorine Institute, arranged for the experiment and offered valuable suggestions during the experimental period.

Chlorination of Screened Sewage at Bridgeport, Conn.

State Health Department Studies Show Need of 10 to 15 P.P.M. of Chlorine and Frequent Ortho-Tolidin Tests

By Warren J. Scott and Charles L. Pool
Director Assistant Engineer
Bureau of Sanitary Engineering, Connecticut State Department of Health, Hartford, Conn.

The Connecticut State Department of Health has been interested in chlorination of screened sewage, particularly in view of the large fine-screening plant at Bridgeport, Conn., and the possibility of other installations where chlorination would be an added safeguard to bathers. As a method of complete treatment, fine screens and chlorination have probably a limited field of usefulness, since fine screens remove a rather low percentage of suspended solids.

The Bridgeport screening plant consists of two Riensch-Wurl screens with $\frac{3}{64}$-in. slots. The present flow is about 8 m.g.d. The sewage is of medium strength as compared with that of other Connecticut cities. It is affected by considerable amounts of factory wastes and by infiltration of large amounts of salt water at high tide.

A tap was made in the force main from the pumps discharging the screened sewage to the harbor. A short length of pipe arranged with a minimum number of bends and interferences to further break up the solids carried the sewage to two barrels with inlets and outlets suitably arranged for a constant flow of sewage past the experimental chlorination plant and through the barrels. To cover the variations in the character of the sewage, half-hourly test runs of about 8 hr. were made on fourteen days extending over the period from October, 1926, to April, 1927. Sunday as well as week-day flows were represented to avoid inclusion of the factory wastes, and all conditions to tidal variations were covered. Bacterial examinations were made of 153 sets of samples, each set comparing the chlorinated with the unchlorinated sewage. Occasional abnormally low bacterial counts on the unchlorinated sewage are undoubtedly due to the germicidal effect of occasional discharges of industrial wastes.

The experiments were made to obtain information on the following questions: (1) Penetration of the solids in the screened effluent by the chlorine, (2) period of contact required, (3) effectiveness of ortho-tolidin control, (4) approximate dosage required for Bridgeport screened sewage.

The method of determining the penetration of the solids by the chlorine was to settle for two hours in Imhoff cones the screened and chlorinated sewage, remove samples of the supernatant liquor and the settled sludge to separate bottles, then thoroughly macerate the solids with pestle and mortar and examine the emulsion bacteriologically.

The contact period between chlorine and sewage was controlled by the addition of enough sodium thiosulphate to samples of the chlorinated sewage to destroy any residual chlorine and chlorine substitution products and insure a tenfold excess of thiosulphate. Experiments have demonstrated that this addition of sodium thiosulphate has no inhibiting effect upon the growth of bacteria at the usual temperatures. Intervals of contact with chlorine of 5, 10, 15, 20, 25, 30, 40 and 60 min. were employed, and some samples represented unlimited contact, varying from several hours to 24 hr.

Tests for free chlorine were made with ortho-tolidin and by the starch-iodide method upon chlorinated samples corresponding to those examined bacteriologically. The starch-iodide test did not appear to be so useful quantitatively as the ortho-tolidin test, although when used with acetic acid it was of value in detecting the presence of chlorine, which is apparently held in loose combination with organic matter and, therefore, probably becomes slowly available. The readings for free chlorine (Table I) represent the maximum color produced by adding 1 c.c. of ortho-tolidin to samples of sewage in 1-oz. bottles. Where 0.3 p.p.m. of residual chlorine was present after a 10-min. contact, fairly satisfactory bacterial results were obtained.

As indicated by Tables I and II, where chlorine concentrations were too low, higher bacterial results followed examination after maceration of solids, due presumably to breaking up clumps of bacteria. The results indicate a penetration of these clumps by the chlorine, since with sufficient dosage and contact the analyses are satisfactory when the chlorine has been neutralized and the clumps have been broken up. Both tables show that little improvement occurs by providing a longer period of contact than 10 min. where sufficient residual chlorine is present. Some of the figures showing longer periods of contact and low dosages were omitted from the tables, because of less relative significance.

Table II shows that a dosage of 15 p.p.m. (125 lb. per m.g.) was required to produce acceptable results during the periods covered for the Bridgeport sewage. Assuming a cost of 7.5c. per lb., this would amount to $9.38 per m.g., but if chlorine were purchased in ton containers the cost could be reduced to about 4.5c. per lb., or $5.63 per m.g. On certain days it was possible to secure satisfactory results with lower dosages.

The results of the work to date at Bridgeport seem to warrant the following conclusions:

1. For effective and dependable disinfection of the Bridgeport fine screen effluent, 0.3 p.p.m. of residual chlorine after a period of 10 min. was required. A residual of 0.5 p.p.m., however, is preferable. A 15-min. period of contact may afford some slight improvement, but beyond that it does not seem necessary to go, provided the proper residual is maintained.

2. When 0.3 p.p.m. of residual chlorine and 10 min. contact were provided, the suspended solids were effectively penetrated and the colon bacilli were satisfactorily reduced within the solids passing $\frac{3}{64}$-in. openings in fine screens.

3. The chlorine dosage required to effect a residual of 0.3 p.p.m. after 10 min. varied in the case of the Bridgeport effluent between 10 and 15 p.p.m. The upper limit was necessary to take care of all conditions covered, but such requirements will vary for different sewages and doubtless for the same sewage at different seasons of the year.

4. If satisfactory efficiency of chlorination of sewages is to be held at a minimum cost, chlorine control by the ortho-tolidin test should be made as frequently as practicable.

It must be borne in mind, however, that the character of the effluent from a fine-screening plant changes rapidly over short intervals of time and changes in rates of dosage below the upper limit must be carried out with due regard to this fact.

The writers wish to express their appreciation of the advice and assistance of L. H. Enslow of the Chlorine Institute, and the co-operation of the Bridgeport city officials, in making this work possible.

Foundation Plans Changed After Water Enters Excavation

When Water Inflow Softened Hardpan, Piers Were Carried to Underlying Rock by Pneumatic System

By W. S. Wolfe and D. R. Martin
Head of Structural Department, Smith, Hinchman & Grylls.
Superintendent, Smith, Hinchmann & Grylls.
Detroit, Mich.

Unusual foundation conditions and methods were involved in the construction of the Greater Penobscot Building, at Fort and Griswold Sts., Detroit, Mich., a structure which will be 565 ft. high and will have foundations designed to support approximately 100,000 tons. There is to be a large banking room on the second floor, over which the office floors will be carried by girders about 45 ft. long. The columns which support these girders deliver foundation loads of over 2,500 tons each.

As originally designed and contracted for, the foundations consisted of open wells or caissons having large bells at their bottoms resting on hardpan at about 120 ft. below grade, the large area of the bell giving a maximum load of 8 tons per square foot. Previous experience in Detroit indicated that caissons could be put down to hardpan by the open well method without any serious water difficulties, but that if an attempt were made to go through the hardpan to rock a short distance below, sulphur water under a head of approximately 110 ft. would be encountered. It was because of this serious water condition that the foundations were not designed for rock in the first place. [Foundation work in this sulphur-water stratum was described in *Engineering News-Record*, Sept. 15, 1927, p. 424, but in that case open wells were used instead of the pneumatic system.—Editor.]

Work progressed rapidly on the job until the hardpan was reached in the first well, 6 ft. 9 in. in diameter, and the bell was more than half excavated, when water rushed in from the side and bottom, apparently through an opening or crack in the hardpan. Within twenty minutes the water had risen 10 ft. and in twelve hours it was 100 ft. deep in the caisson. It was considered inadvisable to attempt to pump out such a large flow of water, for fear that this might cause settlement of adjoining buildings. Furthermore, the hardpan is somewhat softened and broken up by the water, making it doubtful if a good bottom could be obtained with so much water present. It was therefore decided to omit the bells, use compressed air and push the caissons down to rock. The general foundation arrangement, with a section at one of the bore holes, is shown in Fig. 1.

The necessary equipment was obtained but work was slowed up by the high head of water and the high air pressure required to combat it, a maximum pressure of 51 lb. per sq.in. being required. Even with this high pressure considerable amounts of water came into some of the wells. This water was ejected by the use of a small pipe extending from the bottom of the well up past the air lock to the top. The air pressure in the caissons was sufficient to force the water, with a certain amount of air, through this pipe and out over the top of the well.

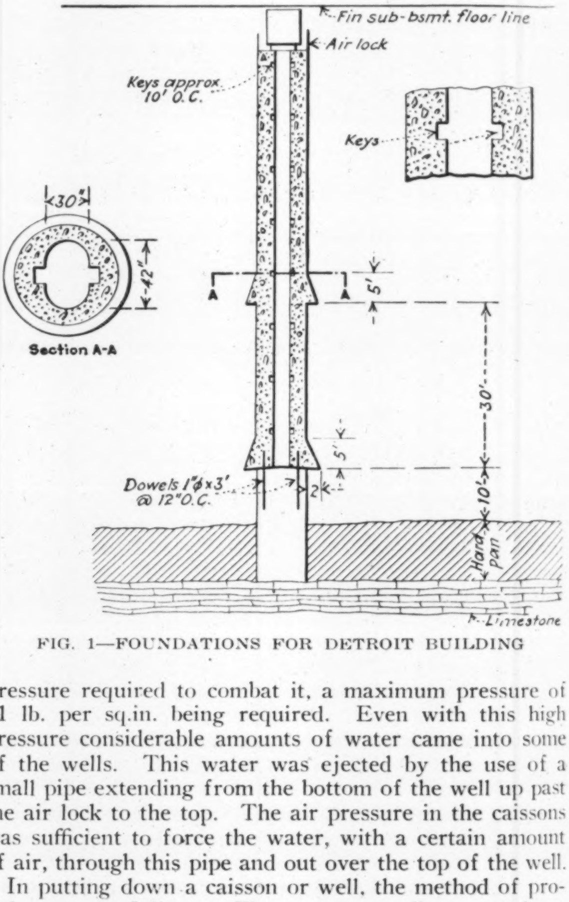

FIG. 1—FOUNDATIONS FOR DETROIT BUILDING

In putting down a caisson or well, the method of procedure was as follows: First, an open well was put down somewhat more than half way to rock. In this well a concrete shell was poured, its outside diameter being the size of the caisson and the shaft inside being large enough for the passage of men and materials. Two collars or small bells were cast on this shell, one at the bottom and the other a number of feet higher up. This is shown typically in Fig. 2, but the dimensions varied in different shafts. After the concrete of the shell had set, the airlock was bolted on its top and the excavation continued below the shell, air pressure being put on as required. The small bells or collars prevented the shell from slipping down when excavation was continued below it. They also helped to prevent the air from forcing the shell upward when a high pressure was required. After rock was reached, the well below the shell was filled with concrete, and when this had set the shaft inside the shell was also filled, making a solid concrete shaft or pier from top to bottom.

It was found that a large part of the water came up through cracks in the rock; and there was some concern regarding the effect of the sulphur water on the concrete caissons. The decision was therefore made to sink 6-in. well casings from the ground level down to rock and then drill with a well driller into the rock until a flow of sulphur water was encountered. Cement grout was then forced down the well casings and into the cracks in the rock under pressures as high as 125 lb. per square inch. It took 388 sacks of cement to fill the crevice tapped by one of the holes, and several took as many as 200 sacks. In all 1,846 sacks of cement were used in the eight grout holes.

These grout holes were distributed as evenly as possible around the job. The grouting was successful in reducing the amount of water encountered and permitted the maximum air pressure to be greatly reduced. The saving in cost by being able to put the wells down with a lower air pressure, and the consequent saving in time, more than offset the cost of the grouting operation. It is also felt that with the cracks in the rock sealed by the grout, there is less danger of the sulphur water disintegrating the concrete of the piers.

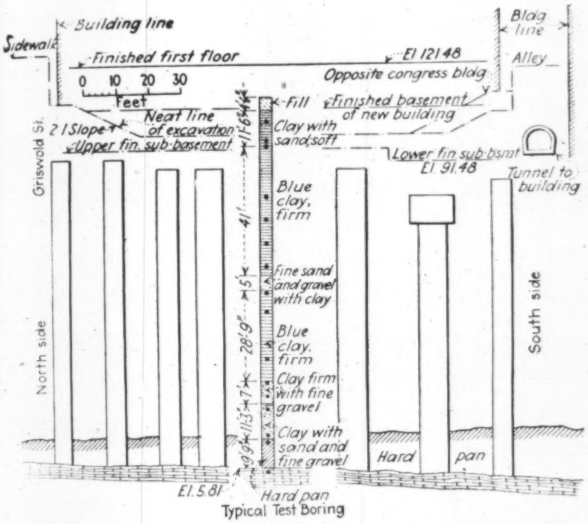

FIG. 2—TYPICAL FOUNDATION WELL FOR PIER
Note shell from air lock to shaft, with collars to anchor it in position.

One of the interesting features in this foundation work was the high strength of concrete. Concrete of at least 3,000 lb. ultimate strength was specified, but many of the test specimens ran over twice this strength and the average of all 28-day breaks was more than 5,000 lb. per square inch. Of 188 cylinders broken at 28 days, the highest and lowest strengths were 7,552 lb. and 2,830 lb. for 167 cylinders broken at seven days, the highest and lowest figures were 6,049 lb. and 1,539 lb. The averages were 5,286 lb. for the 28-day and 3,683 lb. for the 7-day breaks.

An inundator was used for a large percentage of the concrete poured, but toward the latter half of the job, because of interference, all concrete could not be advantageously poured through the inundator plant and two additional batch mixers were used. From a careful check of materials and results from both methods it was found that the same results could be obtained without the inundator plant by proper design, supervision and care. However, the use of the inundator did reduce the chance for error and the required supervision. The time of mixing averaged about two minutes per batch. A total of 9,820 cu.yd. of concrete was poured and 70,929 sacks of cement were used for this concrete, or a grand average of 7.222 sacks per yard of concrete.

TESTS OF FOUNDATION CONCRETE

28-day cylinders			7-day cylinders

The Greater Penobscot Building is being built by the Simon J. Murphy Company. Smith, Hinchman & Grylls, Detroit, are the architects and engineers, with Donaldson & Meier as advisory architects. Walbridge-Aldinger & Company, Detroit, had the contract for the foundations.

Explorations in Alaska

The Interior Department announces the completion of the field work of another exploratory expedition in Alaska by the Geological Survey and the bringing back of maps and information regarding a tract of more than 2,000 square miles in the Alaska Range and adjacent country on the west side of Cook Inlet, in the environs of Mount Spurr, that has hitherto been shown as a blank area on all authoritative maps. This exploration is one of the series that the Geological Survey has been making throughout the last 30 years. The party consisted of S. R. Capps, geologist in charge, R. H. Sargent, topographic engineer, and four camp men. Transportation in the field of the necessary provisions, supplies, and equipment for 100 days was furnished by a pack train of fifteen horses. From the time when the party landed at Trading Bay, on the west side of Cook Inlet, about the middle of June, until it returned to that place at the end of the field season, about the middle of September, the members were entirely out of communication with the rest of the world and saw no human beings other than one another. The results of the expedition are now being worked up for publication, but as it will be many months before the reports are completed, it may be of present value to give in advance a statement of some of the notes of greatest general interest regarding the work of the party. Among the many items reported are the discovery and mapping of a large river, numerous lakes, glaciers, and mountains, and an active volcano. The newly discovered river is the Chakachatna, whose drainage basin covers an area of more than 1,100 square miles. This stream is a roaring torrent far too swift and too deep to be forded even with horses; in fact, measurement of its current at several places showed that it was flowing at an average speed of 15 miles an hour. This river rises in Lake Chakachamna, 23 miles long, which is hemmed in between lofty mountains and impounded behind a great glacier that lies athwart the general trend of the valley.

SECOND OF TWO ARTICLES—

Tunneling at Musconetcong Now and Fifty Years Ago

Comparison of Tunneling Methods Employed in 1874 with Those of Today on Virtually Identical Tunnels for the Lehigh Valley R.R.

The first article comparing the tunneling methods employed in the new Musconetcong tunnel with those used in the old tunnel appeared in Engineering News-Record, Dec. 22, 1927, p. 988.—EDITOR.

INGERSOLL drills were selected at old Musconetcong as representing rock drill design in about its highest development. This drill had been put on the market by Simon Ingersoll in 1870. A section of the drill, from an illustration of the period, shows its main characteristics. It has a 5-in. piston, which indicates altogether a pretty sizable and hefty contrivance, but it was selected because, among other reasons, it was lighter and handier than the older Burleigh drills used at Hoosac and at Nesquehoning. At new Musconetcong the drills are Lyner-Ingersoll drifters—R 72, weighing 164 lb. Direct comparison is impossible because a change of principle is represented—the old drill is a piston drill; the new is a water hammer drill. Roughly, the new drill is eight times as fast and requires half as many man-hours for shifting.

On the old tunnel all drills, both for bench and heading holes, were carriage-mounted, the practice and the general design of the carriages being taken directly from the Hoosac tunnel work. Sketches from old records indicate the drill mountings and the drill-hole arrangement. In the new tunnel the drills are mounted on columns for the heading holes and on tripods for the bench holes. A view in the new tunnel heading and the drill-hole arrangement are given by the illustrations. Comparing the number, depths and footage of holes, they were for heading in the old tunnel as follows:

Designation	Number	Depth Ft.	Total Footage Ft.
Cut C	12	10½	126
First square-up (1)	8	12	96
Second square-up (2)	8	12	96
Third square-up (3)	6	12	72
Extra roof holes	2	10 & 8	18
Total	36		408

The roof holes were drilled only when needed. In the new tunnel the heading holes proper, were:

Designation	Number	Depth	Total Feet
Rib holes (*R*)	10	11	110
Relievers (*Re*)	18	11	198
Lifters (*L*)	8	11	88
Cut holes (*C*)	6	13	78
Total	42		474

Adding the 7 down-holes *D* used only when necessary to break down the top edge of the bench and drilled in the heading round, we have 7 × 6 = 42 ft., making the total footage 516 ft. In the old tunnel the bench drilling comprised 6 down-holes 12 to 13 ft. deep, a total, say, of 72 ft., and 4 toe-holes 10 ft. deep, making a grand total of 112 ft. of bench drilling. In the new tunnel the bench drilling comprised 20 bench-holes 11 ft. long and 5 toe-holes 5 ft. long, or a total of 245 ft. Drilling rates cannot be compared with the records, as they are only partial for the old tunnel and incomplete for the new tunnel. Very little, too, has been told of the drill servicing at the old tunnel, but hand-sharpening was employed at an ordinary blacksmith forge and drill conditioning was a process of doing what was necessary only when it was necessary. In comparison, the servicing equipment at the new tunnel as shown by several views stands out in sharp contrast.

Blasting performance like drill performance, and for the same reason, is not in condition for comparison. On the new tunnel, of course, electric firing and dynamite are being employed, with all the recent perfection of cartridges, exploders and electric blasting, and all the modern finesse of delay firing. On the old tunnel it is interesting, then, to note that dynamite and electric firing were used throughout for the first time in tunneling in America. So revolutionary was the practice that contemporary writings on the old tunnel work enter into elaborate argument defending it. Indeed, the accomplishment of dynamite at old Musconetcong deserves notice; for 82,000 cu.yd. excavated the average was 1.71 lb. of dynamite per cubic yard.

Timbering and Mucking—Timbering was a particular problem in both tunnels in the soft ground and, to a less extent, in loose rock. In the seamy rock at the east end of the new tunnel where only roof falls had to be guarded against, only a plain segmental timbering was required. The soft-ground problem was much more complex. The ground is very unstable when wet and in the new tunnel workings it developed enormous pressures. Comparable pressures in the old tunnel are not indicated by any of the contemporaneous accounts. Indeed, in the English system of timbering, used in that tunnel generally, all the timbering usually saved was saved, and only occasionally was it found impossible to pull the crown bars ahead. Either of these procedures would be virtually impossible with the pressures existing in the new tunnel workings. Here 16-in. fir segments set close were split and shattered, and 12-in. diameter posts were broken. The normal timbering is 12x12-in. posts and arch segments set close, increased to 12x6-in. posts and segments in heavier ground and in the worst places reinforced by an inner "timbering" of steel beam posts and segments as shown by accompanying drawings.

In the old tunnel the excavation and timbering followed very closely the typical English system, as the drawings make apparent. About 20 ft. of tunnel was excavated to full cross-section and then it was lined; then another length was excavated and the lining was built. As stated before, the process involved no particular complications and apparently required no more than ordinary good care.

In planning the work through soft ground for the new operation it was thought best to drive a crown drift and two wall plate drifts, making enlargement from these drifts, then placing wall plates and segmental roof timber. A power shovel was then to be used to take out the center of the remaining core down to grade, leaving a bench on each side to support the wall plates. These benches were to be taken out as the plumb posts were erected. The pressures developed soon put a check on the planned procedure and the plan was changed to that shown by the drawings. This gave an opportunity for placing plumb posts, wall plates and bottom arch segments and bracing them against the core. The crown drift similarly gave opportunity for placing, and stulling to the core, the top crown bars. The drifts then left uncompleted timbering only at the haunches, which were then widened out right and left from the crown drift by placing one crown bar after another, stulling them to the core and driving polling-board lugging. Finally, under the crown bars and lagging the remaining arch segments were placed. All processes can be very clearly visualized from the drawings and views; scarcely a detail needs further explanation.

There are in the drifts and core about the following yardages of excavation:

Drifts	Size	Volume per Foot
Crown	12½ x 11½ ft.	5.3 cu.yd.
Wall plate (two)	8½ x 11½ ft.	7.2 cu.yd.
Plumb post (two)	11½ x 10½ ft.	9.0 cu.yd.
Enlargement, both haunches		10.0 cu.yd.
Center core		16.0 cu.yd.
Total		47.5 cu.yd.

All but the core excavation is by hand, the muck being taken out in small push cars, the cores being taken out by a 1½-cu.yd. capacity crawler-traction shovel equipped for air operation. Otherwise the earth mucking methods are like those of the east end in rock where the heaviest mucking has to be done. This core excavation by power shovel is the major distinction, in mucking methods in earth, between the old and the new tunnels.

In rock at the east end, the full excavation was handled by power shovel—the shovel used on the east approach cut changed to operate by compressed air. Two tracks were laid into the tunnel; the shovel was operated on one and the outgoing muck trains on the other. The incoming empty trains came into the tunnel on the shovel track, an air hoist on the rear of the shovel being used to shift the cars to the loading track. At the west end where a crawler-traction shovel is employed, the car shifting is done by gas and electric locomotives, but an improvised traveler carrying an air hoist will be installed. For handling the shovel excavation, the regular 5-cu.yd. dump cars for the open-cut work were used. They were spotted by a 7-ton electric locomotive and hauled to and from the waste dumps by 16-ton gas locomotives.

Lining—In the old tunnel, only the 770 ft. from the

This represents a type of failure in the temporary timbering which occurred during excavation for placement of permanent timbering.

west portal in through the soft ground and the 263 ft. through loose rock were lined. The lining was masonry, coursed rubble walls and a brick arch. The sketch in the group drawing also indicates the type of arch centering employed. The mortar was 1:1, of Rosendale cement. Virtually the only equipment, besides masons' tools, used in lining work was the hand derrick illustrated. Two men, it is stated, could raise a ton block of stones with this derrick. That credit may go to an old-time contractor's superintendent, it is mentioned that the derrick was designed by Jacob Snyder, a mason superintendent for Charles McFadden, the contractor.

The lining of the new tunnel is portland cement concrete, of which about 25,000 cu.yd. will be required. Besides the concrete, some 2,500,000 ft.b.m. of timber and 550 tons of steel are required. In 1875, the year when the old Musconetcong tunnel was completed, David O. Saylor put the first American-made portland cement on the market. Probably not 15,000 bbl. a year were produced for the next five years. As a considerable construction material, portland cement concrete has come into being since the first Musconetcong tunnel was completed; and by the same token all concrete-making machinery is new. We have, then, in mixing and placing plants for the new tunnel a type of equipment unthought-of when the old tunnel was lined. This equipment is shown clearly by the drawing and views.

The lining of the new tunnel is shown by several of the drawings, and the notable feature is the steel frames set inside the timbering in heavy ground and embedded in the concrete. Where the steel frames are not used the concrete lining is reinforced. The particular interest of the lining work lies in the mixing and placing plants, which

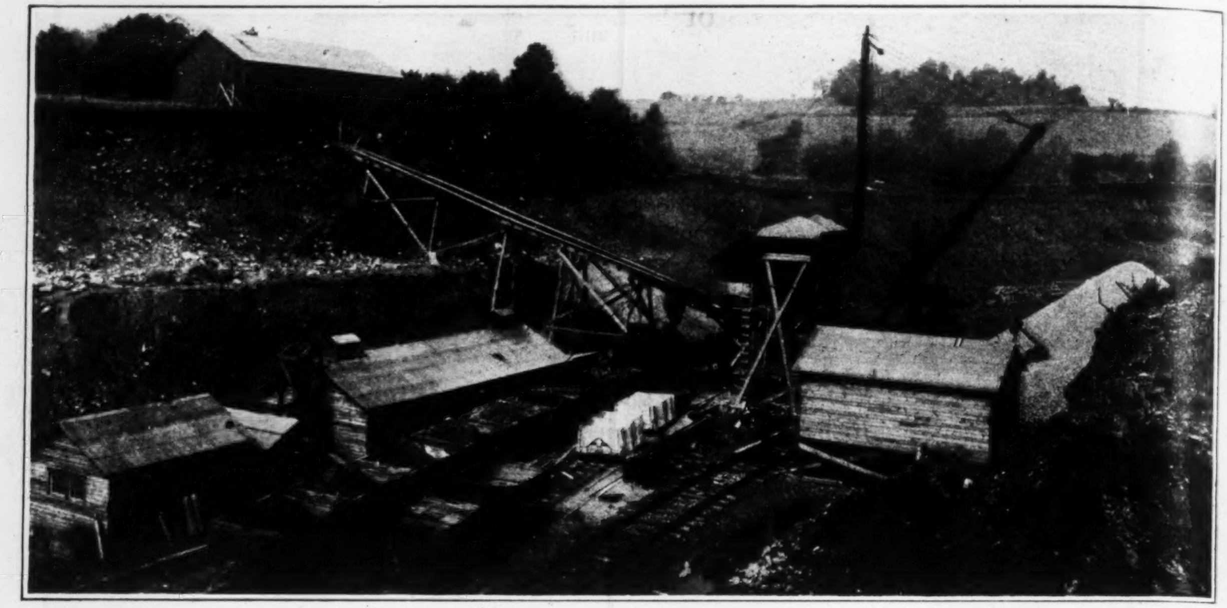
Note the use of steel screw columns to which the drills are clamped by a universal column arm for drilling face holes. Drills were tripod-mounted for drilling bench holes.



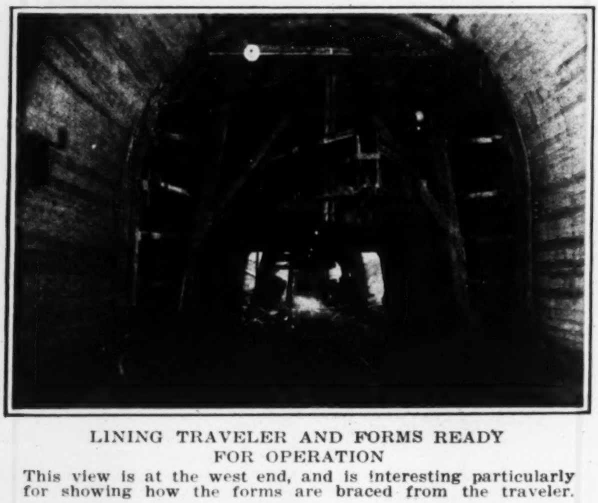
CONCRETE MIXING PLANT AT WEST END OF NEW TUNNEL

Concrete was a rare construction material in the time of old Musconetcong. David O. Saylor in 1875, the year the tunnel was finished, began manufacturing the first portland cement to be made on the American Continent.

are essentially alike at both ends. The drawing shows the mixing plant arrangement at the west end. The arrangement is ordinary; derricks unload from cars into stock-pile or overhead steel batch-measuring bins; a 1-cu.yd. cube mixer is under the bins and right- and left-gate batch cars on surface tracks take the concrete to the tunnel. A 1:2:4 concrete is used for lining.

The notable feature is the manner of placing the lining. Briefly, all but the crown section of the lining is placed by gravity from a traveler and the key section is placed pneumatically by a Ransome 14-ft. pneumatic placer. The general arrangement of the traveler is shown by the drawing. Its functions and operation are amply explained by the legends on the drawings. A traveler is installed in each end of the tunnel.

Direction and Labor—The direction of the old tunnel work included men whose names have since become known in engineering and contracting. Robert H. Sayre was chief engineer, Calvin C. Brodhead was principal assistant engineer, and Henry S. Drinker was resident engineer. The contractor was Charles McFadden of Philadelphia, Pa., who had regularly on the work about 1,000 men who lived, an old account says, in a "settlement of several hundred shanties on each side of the mountain." The men were mostly Irish but at one time the contractor brought up some Virginia negroes and the resulting race riot set a record for pay-day battles—three negroes and one Irishman killed. It is told that "liquor shanties" gave considerable trouble on the old work. Today the contractor has a deputy-sheriff to keep bootleggers off the job. The old work excelled the new in spectacular accidents—less than such going unnoted. Once a boiler blew up and killed three men and on two occasions quantities of the new explosives "went off," and killed no one.



LINING TRAVELER AND FORMS READY FOR OPERATION

This view is at the west end, and is interesting particularly for showing how the forms are braced from the traveler.

The term shanties used above probably tells perfectly the kinds of laborers' camps at old Musconetcong. On the new work the contractor houses about 200 men at each end in substantial bunk houses heated and screened and having bathing facilities, and he has dining halls, camp stores, engineer's and contractor's offices, and all the usual services of a modern construction camp. The lighting is by electricity. Water is piped to sump and job and electric pumps are provided for fire pressures. Job service buildings are equally substantial and comprise sawmills, drill sharpening and blacksmith shops, and cement and store houses all modernly equipped. Aside from the improved construction equipment with which to work, probably no difference between the operations of 1874 and 1927 would appear more astounding to the workmen on the old tunnel than the living accommodations and commissary provided for their kind at the new tunnel.

The new tunnel is being built for the Lehigh Valley R.R., G. T. Hand, chief engineer, and W. H. Ramsey resident engineer on the work. The contractor is Bates & Rogers Construction Co., Chicago, Ill., with R. E. Ross district manager in charge of the work.

Arc Welding Used on One Story Building Two Acres in Area

Field Welding, Shipping 60 Per Cent of Material Direct From Mill to Job, and Continuous Purlin Detail Effect Savings

By Gilbert D. Fish
Consulting Structural Engineer, Westinghouse Electric & Manufacturing Co., East Pittsburgh, Pa.

A KILN tunnel building one story high and two acres in area was recently completed at the Derry, Pa., Works of the Westinghouse High Voltage Insulator Co. Apart from bolting for assembly and erection, all connections were made by arc welding. Of the 337 tons of steel, 40 per cent was fabricated, and the balance was shipped plain from mill to job. All welding was done in the field, about three-eighths of it in assembly welding on the ground before erection and the remainder in place after erection. The ground welding could have been done in a shop, and under different circumstances might have been so done.

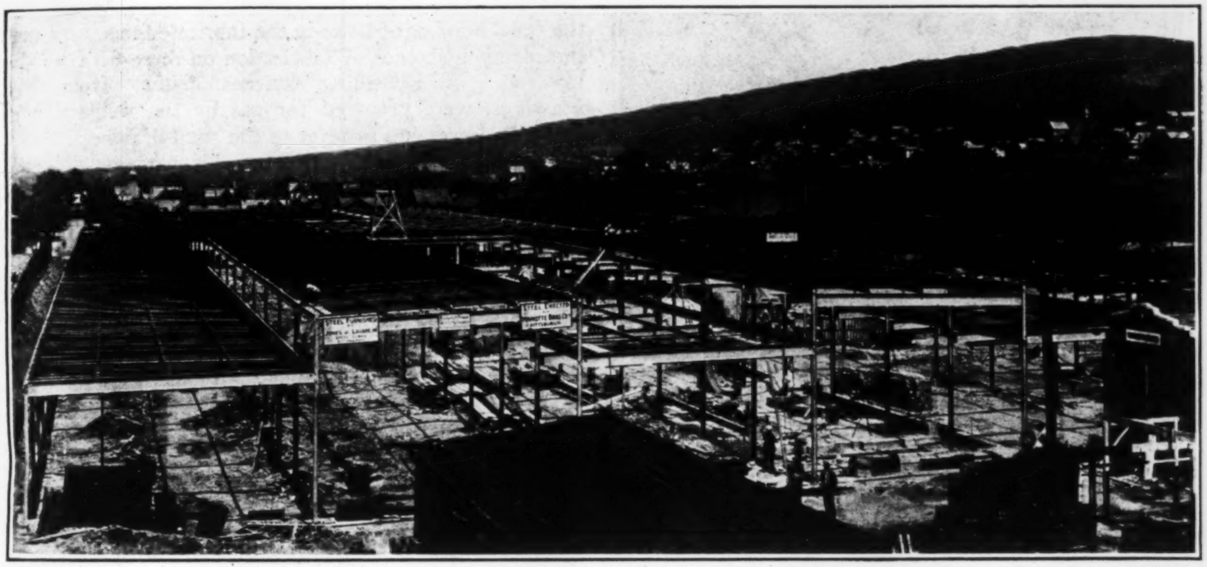


FIG. 1—ARC-WELDED TWO-ACRE BUILDING UNDER CONSTRUCTION

The contract was awarded at a lump sum of $26,582, the sum of the contractor's estimates, which may be divided as follows:

Plain material, on cars at building	200 tons	at	$42.20 =	$8,440
Fabricated material, on cars at building	137 tons	at	63.00 =	8,630
Erecting and painting	337 tons	at	18.49 =	6,232
Ground welding	858 feet	at	1.45 =	1,240
Welding in place	1,402 feet	at	.88 =	1,240
Welding sketches and special engineering				800
Contract price				$26,582

Welding Time—The detail of welding time and labor directly connected with welding is given in the accompanying table. In explanation of the columns in the table, "welding" refers to paid hours of work by welding operators other than time spent on moving equipment or on laying out work; the time in the "welding" column includes all time lost waiting for erectors to handle steel to and from the stocks where ground welding was performed, and all other lost time except for moving the welding machines. "Layout" refers to the time which the welding operator who acted as foreman spent on measuring and placing connection angles ready for welding and on supervision and direction of welding operators. "Helping" refers to 252 hours by one man who was employed throughout the job as a general unskilled helper for the welders, and to 146½ hours spent by welding operators and casual helpers in moving equipment and on odd jobs which could not be classed as welding or as layout, but which were connected with the welding operation. The average speed of welding, based on the welding hours shown in the table, was 3.5 lineal feet per hour in the case of ground welding, and 4.2 lineal feet or cubic inches per hour for welding in place. The time records did not distinguish between fillet welding and butt welding, and it should not be assumed that one lineal foot of fillet weld corresponded very closely in time with one cubic inch of butt weld. However, it is believed that the units are roughly comparable, because the 0.6 cu.in. of weld metal in a $\frac{5}{16}$-in. bead 1 ft. long is generally deposited at a slower rate per pound of metal than a simple butt weld deposited downward in a trough.

In estimating the time required to perform a job, the basis for butt welding may be cubic inches or pounds, but for fillet welding it should be lineal feet of welds for each size of fillet.

Description of Building—The building is L-shaped, the main body being 460 ft. x 150 ft., and the outstanding leg 142 ft. x 120 ft. The main area has 23 column spaces at 20 ft. the long way, and 5 spaces at 30 ft. the other way. The leg area has three spaces at 30 ft. and one at 52 ft. the long way, and six spaces at 20 ft. the other way. There are, altogether, 133 panels at 20 ft. x 30 ft. and 6 panels at 20 ft. x 52 ft., making the total ground area enclosed by wall column center lines 86,040 sq.ft. The total steel per square foot is 7.83 lb. The steel list

LABOR HOURS ON 2-ACRE 1-STORY ARC-WELDED BUILDING

	Hours, Labor				
Location	Welding	Layout	Helping	Total	Welding Done
On ground	246	143½	261½	651	858 lin.ft. fillet welds, ¼ and $\frac{5}{16}$ in., lengths ½ in. to 4 in.
In place...	333½	42	137	512½	1,080 lin.ft. fillet welds, mostly $\frac{5}{16}$ in. in 5 in. lengths; 322 cu.in. butt welds.
Total...	579½	185½	398½	1163½	1,938 lin.ft. fillet welds, ¼ and $\frac{5}{16}$ in.; 322 cu.in. butt welds.

is made up almost entirely of 6-in. and 8-in. H-columns, 18-in. and 24-in. I-beam rafters, 7-in. I-beam purlins, and built-up spandrels of various sections. The roof is flat except for slight drainage pitch, and alternates high and low in alternate bays in most of the area. The roof is poured-in-place gypsum with wire-mesh reinforcement.

The purlins, 7-in. I-beams at 15.3 lb., on 20 ft. spans, spaced about 7 ft. 6 in. on centers, rest on top of rafters except where the rafters are high, as at outer walls. Except at ends of rows, the purlins are continuous, this condition having been produced by welding tension plates to their top flanges and by butt-welding between bottom flanges at the joints. Except for this continuity, 8-in. I's would have been required. The typical rafters, which are on 30 ft. span from column to column, are 18-in. I-beams 54.7 lb., and, in general, are slightly pitched for roof slope. They are connected to the columns by side angles, one at each end, and are not continuous because consecutive rafters are at different elevations.

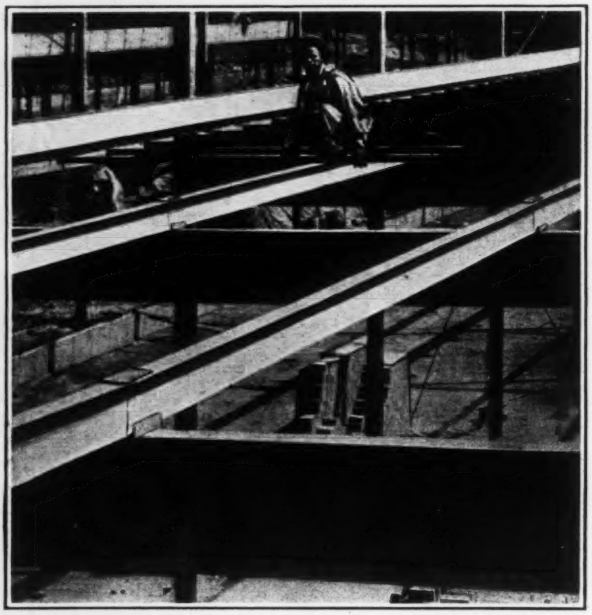

FIG. 2—PURLINS MADE CONTINUOUS BY WELDED PLATE ON TOP FLANGE AND BUTT WELD ON BOTTOM FLANGE

Welding Procedure—To suit the contractor's convenience, it was arranged to do all welding in the field. All columns were milled and punched, the punching being for erection bolts only. Spandrel beams were punched for erection bolts, and also for assembling where composed of two or more members, and also for bolts to attach wood facias where required. Rafters and purlins were shipped from mill to jib without fabrication.

A typical rafter detail, with column connections and support for purlins on top flange, is shown in Fig. 3. Since there was no opportunity for continuity of rafters, there was no object in using a rafter-to-column connection having a high bending strength. On the other hand, the deflection of the rafter under full load would be likely to crack a weld joining the web of the rafter to the flange of the column. The natural choice therefore lay between a seat connection and a side-angle connection; the latter was selected because it afforded a high and a low erection bolt with a minimum of field labor. It should be noted that the welding is arranged to allow twisting of the connection angle, without distortion of the welds, when the rafter sags under load. The small channel seats for purlins, as well as the end connection angles, were welded to the rafters before erection. Wood templets and a steel tape were used by the foreman welder and his helper in locating the connection members before welding, C-clamps holding the small parts in place until welded. In spite of the different angles of pitch, and the different distances back to back of connection angles, no errors were made in locating the parts, the rafters all going accurately into place when erected. No erection bolts were provided for purlins, which were lowered into the channel receptacles without any fastening. All bolts used for shop assembly of spandrel beams and for field erection were left in place after welding, because they were not considered worth the cost of removal. All painting was done after erection.

Shop drawings were simpler and cheaper to prepare than for a corresponding riveted structure, because of the small number of holes in the fabricated members, and the complete absence of fabrication on three-fifths of the material. Field welding sketches, distinct from shop drawings, were prepared for use by the welders, who rarely had occasion to refer to the shop drawings.

Unit stresses for design of welds were as follows: $\frac{1}{4}$-in. fillet welds in longitudinal shear, 2,000 lb. per in.; $\frac{5}{16}$-in. fillets, 2,500 lb. per in.; butt welds in compression, same as rolled steel (18,000 lb. per sq.in.). On this job, butt welds in tension or shear, and fillet welds in transverse shear, were not used. Where there was eccentricity in connections, as in the single side angles supporting rafters, it was allowed for.

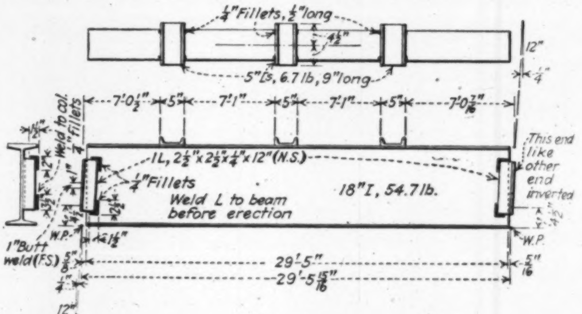

FIG. 3—TYPICAL RAFTER DETAIL SHOWING COLUMN AND PURLIN CONNECTION

The structure was built by the Jones & Laughlin Steel Corp., from plans by B. H. Prack, architect and engineer of Pittsburgh. G. H. Danforth, contracting engineer for Jones & Laughlin, was in charge of the operation. Minnotte Bros. Co., Pittsburgh, handled steel erection for the contractor. W. S. Rugg, vice-president in charge of engineering for the Westinghouse Electric & Manufacturing Co., exercised general supervision. Inspection of welding for the owner was by A. M. Candy, welding engineer of the Westinghouse Electric & Manufacturing Co. William Norberg was foreman of the welders. The writer acted for the contractor as consulting engineer. The welding equipment used on this job consisted of three portable Westinghouse motor-generator sets, 200-ampere single-operator type, with alternating-current motors.

Today in the Mississippi Flood Area

Engineering and Human Conditions in the Basins and Along the Levees as an Engineer Sees Them

By W. W. DeBerard
Associate Editor, Engineering News-Record

V—The Sugar Cane Industry and Atchafalaya Crevasses

IN A WAY the 1927 flood in Louisiana was a blessing in disguise to the sugar cane industry as a whole. The fields of cane were so infected with the mosaic disease that yields had dropped to bankrupt figures in 1926. Scientists have produced new tolerant varieties, but the planter had not been "sold" on them, for the ordinary reasons of inertia, lack of publicity and heavy expense for the new seed. The new varieties proved far more resistant to inundation, and an ocular demonstration of far-reaching value was exhibited when the yellow rotting Creole varieties were compared with the few fields of vigorous varieties even after immersion for 6 to 8 weeks.

Long before I got to New Orleans up-river cotton planters had told me that the sugar planters were in a bad way. They attributed the hard luck of their sugar producing friends to unwise extensions into sugarmill machinery. In consequence it seemed especially appropriate to look into the sugar situation more than casually.

In an interview of optimism with L. M. Pool, vice-president of the Marine Bank & Trust Co. about the general economic situation the question of the solvency of the sugar industry generally was broached. He indicated that for the past few years there had been a decided slump; that the cane area was limited; that the mosaic disease had about finished many of the planters; that the crop was "made" largely on the "gang" system of day labor with the laborer getting $1.25 to $1.50 per day, though there was a certain amount of share cropping and renting done; that the new varieties of cane were well established and promised to rejuvenate the industry; that much of the labor which had left during the flood was flocking back because it liked to "make sugar"; that credit conditions were healthy; that the big banks could amply care for the small ones in the country districts; that some of the country banks had money in Wall St.; that one small bank had only recently asked where surpluses might be placed; and that the various credits established had made credit easy enough, perhaps too much so. Mr. Pool checked previous information up the valley to the effect that the first of the year would show the greatest strain, since planters must then arrange for financing the 1928 crop. He was entirely optimistic about passing that period without undue difficulty. As to the sugar cane slump and bright future he referred me to Dr. A. H. Rosenfeld, consulting technologist for the American Sugar Cane League and the State Agricultural Credit Corporation, Inc.

Later I saw Dr. Rosenfeld. Nowhere have I ever been so impressed with the story of the remarkable assistance that research science can give to an industry as I have in listening to this sugar expert.

Dr. Rosenfeld is a Louisiana-trained scientist sent in 1910 to Argentine from the Audubon Park Sugar Experiment Station in New Orleans. The province of Tucuman suffered steadily declining yield due to degeneration caused by mosaic disease, the same scourge that has more recently ruined Louisiana's crop. Mosaic is a disease, the exact cause of which is not well known but it is akin, at least, to a filterable virus such as that which causes scarlet fever. The Tucuman plantations were 100 per cent infected, and the experimenters set out to find types of cane which through tolerance or immunity would replace the Creole canes, which had come from the same stock that have been used so long in Louisiana. Yields in Tucuman declined from 263,000 tons in 1914 to less than 45,000 tons in 1916 and 1917, conditions paralleling those of Louisiana when in 1925 and 1926 her fields yielded less than 7 tons per acre.

For the tests to locate resistant or tolerant canes 126 varieties were brought to Argentine from Louisiana, 76 from Brazil and 6 from Java, where similar experiments had long been carried out to combat Sereh, another dread disease of sugar cane. The Java canes were found particularly tolerant of mosaic. They are called locally P.O.J. varieties from the East Java Experiment Station, (Proefstation Oost Java, hence the initials) and the yield was found about three times that of the native varieties. In addition the juice contained more crystallizable sugar, there was greater resistance to mosaic and other diseases, as well as of insect ravages, it could stand lower temperatures and furnish more and better fuel bagasse. In Louisiana, with its Celotex industry, the increased bagasse content is important. In fact, this by-product use has been a decided factor in helping rehabilitate the sugar industry.

Now, as to Louisiana. In 1925 the condition of Tucuman in 1916 and 1917 was paralleled, with yellow fields of low yield. But already a few acres of the new canes with their vigorous growths were in existence. The 1926 hurricane centering over Houma, where much of the new stock had been planted, showed that it had remarkable resistance to physical punishment. The old stock was broken and battered, producing only 4 tons per acre to 14 tons of the new P.O.J. Seed supply was cut 40 per cent by the storm, but 23,500 acres were laid down this past year. Of this the flood immersed 5,000 acres, but not more than 1,500 acres were ruined. About 125,000 to 150,000 acres is the total normal acreage cultivated; the flood destroyed 33,000 acres.

The flood precipitated the financial question of money for seed. Sugar cane is not actually reproduced from seed but propagated by laying down in the fall a double line of canes in rows about 6 ft. apart and covering with earth. At each joint is an eye from which a new shoot sprouts. In the spring about 2 in. of the earth cover, put on 4 in. deep for frost protection, is scraped off. The first or "plant" crop is cut late the next fall. Two "stubble" crops during succeeding falls are usually cut, and then the land is plowed up and some nitrogenous enriching crop like alfalfa, cow peas or soy beans grown for a year or two. Thus three crops in five years is about the average and the plantation owner rotates his fields, utilizing as much as 30 to 50 per cent of his crop (the old varieties) for seed. Much less seed is required with P.O.J., the eyes are closer together, and they are more sure of growing. Crops expected are 25 tons per acre the first year, 25 the second and 20 the third. Further crops may be made, but not if production falls below 12 tons.

From 21 eyes in three stalks brought to Louisiana in 1922 there has now been developed enough to plant the total normal acreage this last fall and leave 250,000 tons for grinding.

Returning now to the financing, many of the planters last fall saw their salvation in P.O.J. but had no means to purchase seed. Business interests, bankers, railroads and the by-products people formed the State Agricultural Credit Corporation, Inc., with a capital of $325,000, which was deposited with the Federal Intermediate Credit Bank at New Orleans. This capital would permit borrowing some three or four times the amount from the Intermediate Credit Bank. Another $250,000 was required for financing the 1927 planting. Money was loaned only to planters who would plant P.O.J. stock. Last year the corporation financed one-quarter of the crop. Dr. Rosenfeld is positive that many loans will be repaid next year and that eventually the original investment will be returned to the founders of the corporation. Thus there will be returned to Louisiana a purchasing power of 40 to 50 million dollars annually through the practical adaptation of science to industry aided and accelerated by the experience of the 1927 flood.

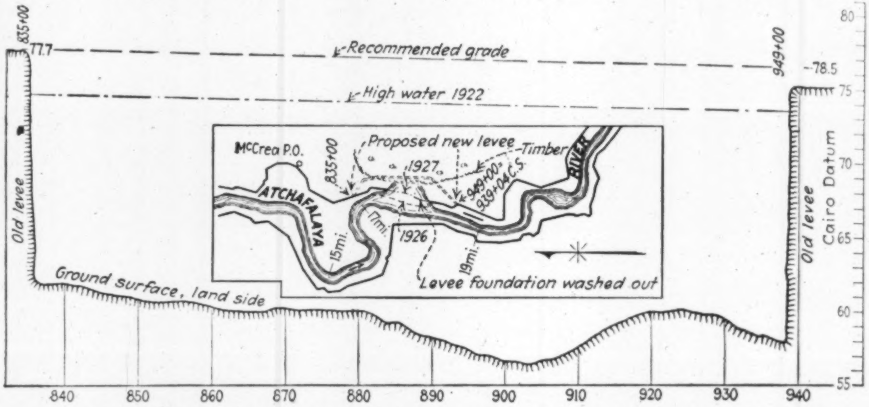

FIG. 1—CROSS-SECTION OF McCREA CREVASSE AND PLAN OF LOOP LEVEE

What sugar land in general is worth, and what that inundated is worth, cannot now be easily estimated, for few plantation owners are willing to set values when a new era of twice the tonnage and 20 per cent greater sweetness appears, one might say, even nearer than the horizon.

Some yields of various plantations, given in the accompanying table, indicate that first and second stubble crops (second and third year) are as good as the plant or first year crop. A ton of the P.O.J. cane produces from 8 to 10 per cent of sugar, or on the basis of the table from 2 to 3 tons per acre.

* "Plant" means crop from first year's planting and "First Stubble" from second year's growth.

A large local planter estimates that the new varieties are now yielding an average of 20 tons of cane or $1\frac{3}{4}$ tons of sugar which will be increased by 20 per cent with normal planting. Planting of new varieties has been very thin intentionally on account of the scarcity of seed. Good sugar land with some improvements but no mill and no crop is valued at $70. There has not been much increase due to new varieties but the market has been made more firm and loans extended thereby. Dr. Rosenfeld states that of late years land which might have been picked up at $30 to $35 has now come back to a value of $75 to $100, the price average before the ravages of mosaic. Based on earning power of 2 to 3 tons of sugar three out of five years such land should bring upward of $150 per acre but no one sees that price ahead at present.

In the "Sugar Bowl" country in the latitude south of Baton Rouge there is a restricted high-value district, but there are likely to be many acres of sub-marginal land in the vicinity added to the 135,000 acres Dr. Rosenfeld feels is worth cultivating for sugar.

Like all agricultural propositions there is always a "catch" somewhere. John F. Coleman says sugar cane breeds degenerate after about 20 to 25 years, this present occurrence being the third in his experience.

Two vital points come from this discussion: (1) What is the value of the sugar area that will be saved or lost by the proposed levees and floodways along the Atchafalaya and (2) What is to be the price of land that is now or will be planted to sugar cane that will lie within the floodway and have to be settled for either by easement or purchase?

It may not be amiss here to add that 20,000 acres of sugar land in the vicinity of Houma were saved by new low levees or topping old ones as a result of the warnings sent out by the veteran New Orleans weather forecaster, Dr. I. M. Cline. Much of this acreage was P.O.J. seed stock; thus science again assisted in saving the sugar industry. In preparing these predictions Dr. Cline made observations on the rate of advance of the flood waters. He came to a general average of 7 miles per day in the flat Louisiana delta country.

Melville and the Atchafalaya Crevasses—Since some of the water which escaped from the Atchafalaya levee breaks at Melville and McCrea, La., caused the sugar field flooding, a few observations made of these two

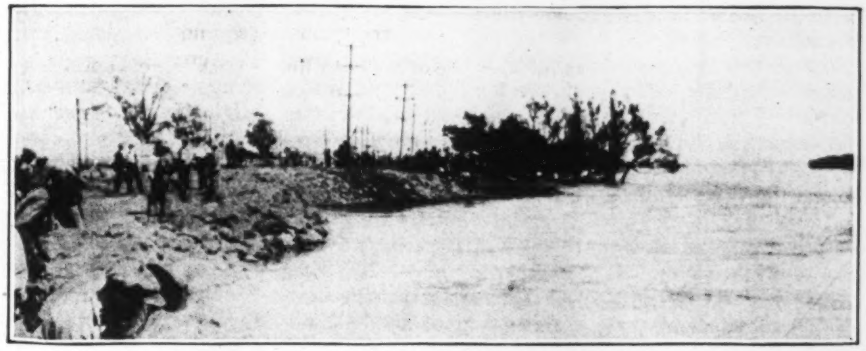

FIG. 3—EMERGENCY WORK TO HOLD A LEVEE

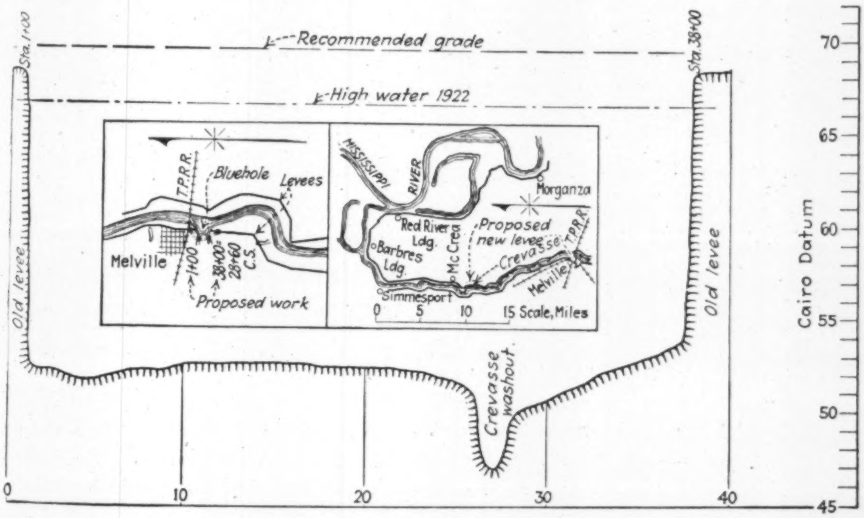
crevasses on Dec. 1 are included in this article. McCrea first, for it is up-river from Melville and was visited first after a drive from Baton Rouge over the ferry through country almost continuously flooded, not once but twice in 1927.

The break occurred at McCrea May 24 in the east side levee, and was due not to a failing levee but to undermining of its foundation. Inspection of maps showing the bank line in 1912 and again in 1922 (this was a state levee, though its repair has been undertaken by the Mississippi River Commission as an emergency measure) indicates that the batture or bank on the river side of the levee had been eaten rapidly toward the levee, and that by 1927 there was not much batture left. Lack of funds had precluded repairs in the way of a loop. Not a large blue hole was formed—perhaps because the site was an old cypress brake studded with stumps and "knees" and also because a certain amount of backwater head was built up due to the short distance (less than a mile) to a heavily wooded swamp. This same absence of heavy cutting was noted at Cabin Teele on the main river, where the break occurred in wooded country. As the river reaches the Gulf in half the distance it has twice the slope of the Mississippi, and in consequence has a much more rapid cutting capacity. It is working in virgin territory, however, as within the memory of the oldest inhabitant it once was only a chute across which men walked on logs.

Whether the policy of the M.R.C. to set back levees in the main river when cutting gets within 5 years of the levee would have sufficient factor of safety on the Atchafalaya is a question. Certainly a setback would have been made before it got within 1 or 2 years of the levee, had funds been available. The M.R.C. officials are watching all caving banks with appraising eyes. I visited one south of McCrea that is probably within the five-year limit, and was surprised to find caving extending back into the bank 100 to 200 ft. by general slumping and settling at least five feet vertically.



NO. 2—MELVILLE CREVASSE AND NEW LEVEE AROUND IT

The original crevasse carried away 2,000 ft. of levee, but the loop levee to repair it is two miles long in order to enclose the blue hole and set back the alignment to a safe distance, assumed at 20 years, away from the bank-eating river. The job calls for the movement of 600,000 cu.yd., about 5,000 cu.yd. per station for most of the alignment. A low bid of 31c. per yard was obtained, which was so much more than the 16c. estimated that all bids were rejected until the low bidder revised his bid to 24c. for the upper three-quarters. It is not the policy of the Fourth District of M.R.C. to let contracts when the low bid is much beyond 25 to 30 per cent over the estimate, but in this case the policy was stretched to 50 per cent. The contractor put on two dragline machines and the M.R.C. added one of their smallest 3-yd. draglines, averaging 50,000 yd. moved per month at a 9c. field cost, which with 3 to 5c. administration cost will still be measurably below the estimate.

The state section, which is considerably thinner and with much steeper borrowpit slopes than M.R.C. standard, materially reduced the yardage and costs. For the method of handling (with draglines), 20 per cent shrinkage was allowed. No particular difference in section was made for the various materials encountered. A center trench of about 10 to 15 ft. wide was excavated as a cutoff in which all stumps were removed, but they were not removed over the remainder of the levee base. Land values are $30 per acre within the cleared area paralleling the river in a strip from ½ to 1½ miles wide, back to the low swamp land valued at from $3 to $10 per acre.

Melville—Never, aside from the pathetic scenes of Dayton after the 1913 flood, have I seen more evidence of water devastation. Fourteen years ago I reached Dayton within 36 hours after the waters left town, but this was more than six months after the levee blew out. No one saw the blowout, the time was early morning, when the 1,000 people of the town were just getting up, and they had only an hour to rush to the levee or the railroad embankment which runs at right angles to the levees south of most of the town. Restriction of flow through subway entrances under the railroad gave the people the needed time to get out. Back levees eventually were all overtopped.

So close was the town to the crevasse that fine sand was washed in and deposited in the streets, houses and yards from 1 to 7 ft. deep. Removal of this sand has been the most expensive undertaking to rehabilitate the town. The Red Cross donated $125,000 to Melville for private use and the State Highway Department hauled away the sand deposited in the streets. Many owners of vacant lots are using the sand as filling and terracing; a few have raised their houses to the higher levels.

Right here let me interpolate that it is surprising how few houses in all of these inundated areas are built on elevated foundations. Rises in land are usually occupied and so are a few mounds of historic origin, but even in the best part of New Orleans less than 50 per cent, I would estimate roughly, are elevated more than 3 to 4 ft. above ground level.

Melville still is digging out. The brick schoolhouse has new furniture in the flooded first floor. Most of the stores have new stock. An air of briskness pervades the main street. Half a dozen negroes were loading sand from a vacant lot and from under a store adjacent on the main street. Red Cross workers were building a few new houses of the contractor's shack type and underpinning many more. Brown refugee tents were still in evidence, though not many. As in Arkansas City, house-moving trucks with eight low wide-tired wheels were in use. A drive of five miles to the west along the railroad showed where the waste sand from the town went; then beyond were farms with sand ridges and tongues stretched out behind any kind of velocity-checking obstruction. The sand is extremely fine, almost like quicksand. People accustomed to floods usually follow the water as it recedes to floor level, scrubbing and sweeping the muck out of their houses, but the Melville sand was too thick for anything but shovels.

Typical of the economics of the whole flood rehabilitation problem was a remark of one of the engineers who accompanied me through Melville. "Is it worth while for sentimental or any other reason to spend $500 to excavate a $300 house? Would it not be economy to burn, tear down or abandon the thousands of structures which at best are questionable as habitations?"

The crevasse at Melville is being looped by a levee containing 190,000 cu.yd., by a contractor who bid 23 cents. Early progress was good, but an idle M.R.C. dragline was being unloaded off a barge Dec. 1, to help the contractor complete the work by Jan. 1, two weeks beyond the contract date. The blue hole was small, and as at McCrea the foundation was full of stumps. No effort was made to remove them aside from a central cut-off trench. At first the railroad, which lost a pier at the west end of a swing draw-bridge, figured on moving the crossing upstream, but recent shipments of a large amount of stone ballast for filling around the existing piers indicate that it may have other plans.

The fate of the people in this area hangs on future action of the U. S. Government. So far they are hanging on, hoping for better protection, sale of property or reimbursement for easements for a floodway, or for some other exterior movement. One woman who had a vacant lot considerably elevated by the sand stated that her holdings were more valuable than before the flood. It would hardly seem reasonable to find prospective purchasers, but people cling to home localities with an unbelievable tenacity. Where there are people there is business, and business brings competition and more people. Just so all over the inundated areas traveled, at least 1,500 miles, were continued stories of people, whites as well as blacks, struggling back to their former locations from which they originally fled "never to return."

While these two crevasses on the Atchafalaya, the one to the east at McCrea and that to the west at Melville, added to the local floods, they accentuated the overflows of the lands downstream and back from the river. Young as it is, the river has overflowed enough to build up the area immediately adjacent, higher than the swamps 1 to 2 miles away. At the time the levee blew out Melville itself was already being flooded from the Bayou des Glaises breaks. The levees would have been overtopped due to the abnormal filling up of the Tensas basin feeding down the regular channel.

The report of the Chief of Engineers calls for strengthening the levees to afford protection 14 out of 15 years, but it also makes of the whole valley a floodway with a "fuse plug" system of levees at its head. Morgan City, Melville and Simmesport are to be inclosed by protection levees. This is the space best available hydraulically for the surplus waters to reach the Gulf, says the report.

The Atchafalaya never should have been leveed. It is 80 per cent swamp land now and the plan is to protect the developed lands to the same extent they now are protected, i.e., 14 out of 15 years. Will the sands of Melville be forgotten, the town again be prosperous and the back levees high enough when the next flood courses down the floodway 15 years hence?

The work of repairing these crevasses under state control as well as that of more than 50 other jobs under way by the M.R.C. in the Fourth District are under the charge of Major W. H. Holcombe, Corps of Engineers, U. S. Army. His military assistants are Capt. Thomas D. Stamps and First Lieutenant John M. Harman and his principal civilian assistant, George D. Waddill, associate engineer, who is in charge of lower river revetments. D. L. White is assistant engineer in charge of upper river revetments and F. C. Carey, assistant engineer in charge of levees. The major portion of the levee work is being carried out by some 25 contractors. On Nov. 1, 45 jobs were under contract and seven additional levees were being built by government machines. Revetment work is done practically all by Government forces.

Holland Tunnel Driving Records

A review of the data concerning the Holland vehicular tunnel at New York, published in this journal reveals the fact that no record has been made of the accuracy with which the shields met in driving the twin tubes under the Hudson River. Coming at the time of the death of Clifford M. Holland, the event did not receive the attention that otherwise would have been given to it. The headings of the north tube met Oct. 29, 1924, and the headings of the south tube met Dec. 7, 1924. Check of the alignment and grade gave the following results:

	North Tunnel	South Tunnel
Line	0.30 ft.	0.29 ft.
Level	0.02 ft.	0.03 ft.
Distance	0.54 ft.	0.73 ft.

The north tube headings met 585 ft. west of the Manhattan pier-head line and 2,605 ft. east of the New Jersey pierhead line. The south tube headings met 660 ft. and 2,540 ft. respectively, from the pierhead lines.

Central Power and Heating Plant For University of Iowa

Addition to Old Dam Provides Distribution Pipe Tunnel Across River—Turbines Have Separate Foundations

By B. P. Fleming
Head of the Department of Mechanical Engineering,
University of Iowa, and Consulting
Engineer, Iowa City

IN PREPARING plans for a large group of medical buildings at the University of Iowa, careful consideration was given to the necessary additional heating, lighting and power facilities. The writer was engaged to study the problem and report not only upon the requirements of this proposed group of buildings but upon a comprehensive scheme of heat and power development for the entire institution.

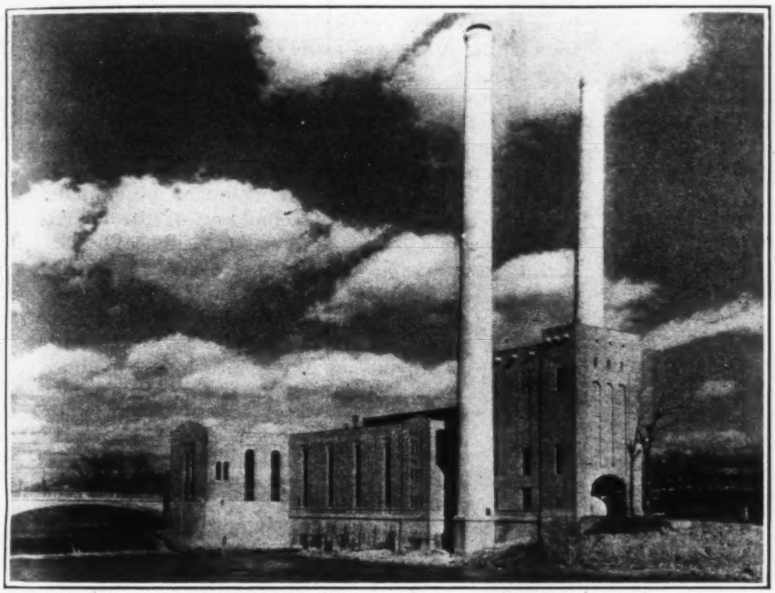


FIG. 1—NEW POWER STATION: UNIVERSITY OF IOWA
Power dam under bridge carries stem pipes in tunnel.

The Iowa River, about 350 ft. wide, subject to flashy floods of variable volume, flows southward through the campus. The university buildings chiefly occupy the bluffs for about ¼ mile back on either side, with the athletic field and open campus in the ½-mile flood plain between, making a total width of built-up area of about ¾ mile. At the south (lower) side of the campus, the university has a low-head power dam with the hydro-electric plant at the east end. The university has been served by four heating plants, one of which was also a power plant, with a partial system of distributing tunnels.

The new general plan consists of a central power and heating station at the east end of the dam, with heat distribution tunnels extending to the various buildings on either side of the river. The river furnishes abundant water for condensation, and coal may be delivered on a railroad spur. This central station, Fig. 1, will comprise a boiler plant built in units of four boilers each, all served by coal- and ash-handling facilities. One unit has been installed. The building is so located that the hydro-electric plant is housed in one corner, with space left for a second hydro-electric unit. A distribution tunnel was extended across the river by utilizing the existing power dam as the upstream cofferdam for an addition built against the downstream face, with the tunnel formed in this addition, as shown by Figs. 2 and 3. In this way the old dam, which was beginning to show signs of deterioration, was strengthened and repaired, and a tunnel was secured for a safe and dry conduit for steam mains.

The substructure of the heating plant was planned to be founded on rock, but the soundings were unreliable, since upon uncovering the site a fault was disclosed which necessitated the use of piling under the eastern half of the structure and added materially to the construction cost. In spite of this foundation partly on solid rock and partly on piling, no settlement cracks have appeared in the completed structure. The turbine foundations were carried down independently of the building to their own footings. The coal- and ash-handling unit, which is separate from the boiler room, is of reinforced concrete, with exterior brick facing. It comprises two 250-ton elevated coal bins and a 50-ton ash bin. The coal bins are not for storage primarily, but provide a bunker from which coal may be distributed by gravity to the boiler furnaces by an overhead motor-driven larry. The new concrete chimney is 9½ ft. in internal diameter at the top and 210 ft. high above the boiler room floor.

The main high-pressure steam header is connected to the tunnel lines through reducing valves and by-passes. A large low-pressure 20-lb. line, not yet installed, will convey bleeder steam from the main turbines and exhaust steam from turbine-driven auxiliaries to the low-pressure heating system on the east side campus. On the west side, high-pressure distribution is planned, with reducing valves at the buildings. The return water from heating systems on both sides of river flows to tanks in the low-level pump room by gravity, assisted by rotary vacuum pumps with automatic control.

Beneath the boiler room is a 250,000-gal. reservoir for water service for the institution. The rear end of

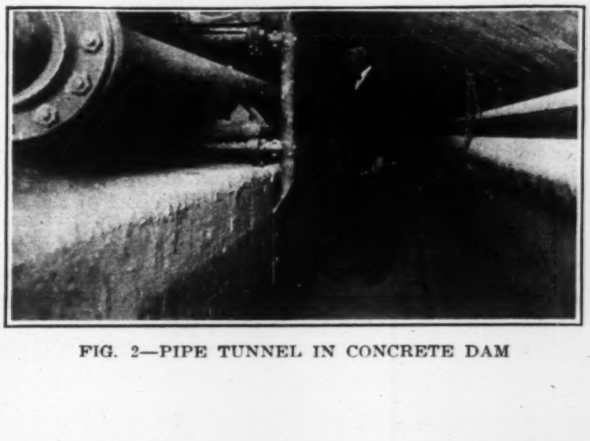

FIG. 2—PIPE TUNNEL IN CONCRETE DAM

the west row of boilers is supported by the roof of this reservoir, and its west wall is the west foundation wall of the boiler room. In flood time, when the lower floor may be 10 to 12 ft. below river level, drainage from the plant will be taken care of by an automatic sewage ejector in the base of the west chimney. The electrical generating equipment consists of two 1,250-kva. steam turbo-generators for two-phase 2,400-volt 60-cycle current.

FIG. 3—DAM AND PIPE TUNNEL

The development of this entire project, including preliminary studies, detailed design and construction, has been in charge of the writer. The architectural design is by Proudfoot, Rawson & Souers, Des Moines, Iowa. A. A. Alexander, Iowa City, was contractor for the main building unit and distribution tunnels; Priester Brothers, Davenport, Iowa, were contractors for the river crossing and for the second boiler-house unit now under construction. The Heine Chimney Co. built the two reinforced-concrete chimneys.

New Australian Interstate Bridge Opened

The new bridge over the Murray River at Mildura which links the state of Victoria with a flourishing agricultural section of New South Wales was opened recently in Australia by the British Secretary of State for the Dominions, reports Assistant Trade Commissioner Chas. F. Baldwin, Sydney, to the Department of Commerce. The bridge is one of four which have been built across the Murray in accordance with the terms of the Border Railways Agreement, which provides for the construction of five bridges. Its completion was characterized as one more link in the chain of great engineering works being projected in that section of Australia. Not only does the new bridge connect the Victoria and New South Wales banks of the Murray but it promises to become a magnet attracting returns from lands which hitherto have not been developed to the extent of their potentialities. It links Victoria with millions of acres of rich arable land in the neighboring state, in which the quality of the soil is declared by experts to be equal, and often superior, to that of the fertile Mildura district. The cost of the recently completed bridge was £100,000 which is to be shared proportionately by the two states. Its main span over the river is about 800 ft. in length, but with raised approaches specially constructed to withstand floods, its total length is more than a mile and a quarter.

Steel Foundation for River Tower of Transmission Line

Tower Rests on Trussed Frame Supported by Steel H-Beam Piles Driven Through Sides of Frame

By Paul L. Mercer
Assistant Engineer, Mississippi River Power Company, Keokuk, Iowa

An all-steel type of river foundation recently developed for use in the electric transmission line crossing of the Mississippi River at Fort Madison, Iowa, and shown by the view, Fig. 1, is thought to be of interest to engineers in general, not only because of the advantages that led to its adoption in this particular installation but also because of the possibilities it may suggest for other similar applications. The departure from the concrete and steel designs more commonly used for such locations was made largely because of cost considerations. The steel pier cost only $7,500, as compared with an estimated cost of practically twice this amount for the nearest competitor in concrete.

The building of the new and removal of the old bridge across the Mississippi River by the Atchison, Topeka & Santa Fe Railway Company necessitated the relocation and consequent rebuilding of the Mississippi River Power Company's river crossing of a double-circuit transmission line from Keokuk to Burlington, designed for future operation at 66,000 volts. The old crossing, operating at 11,000 volts, rested on wooden structures on the old Santa Fe bridge, with a steel tower on the upstream nosing of the draw rest high enough to provide proper clearances for the cables spanning the

navigable channel. With the building of the new bridge the same method of support on the bridge and a tower on the draw-rest nosing was followed, but with all structures built of steel for permanence and to match the substantial and impressive appearance of the new bridge. However, in addition to these structures four towers had to be located in the open river, supported on foundations entirely independent from the Santa Fe bridge.

These four piers were in water 5 to 13 ft. deep but where river stages vary only slightly because of the backwater from the Keokuk dam. As the tower loads themselves were not especially severe, ice became the greatest factor affecting the design. Ice often freezes to a thickness of 20 in. in this section of the river, and pressures up to 4 tons per lineal foot of ice are known to have been developed by the expansion of the ice fields with temperature changes.

Three of the piers supporting the transmission towers in the shallower water were cared for by steel grillages resting on wood piles and buried in islands of sand built by the hydraulic fill method. This plan, however, seemed unsuited for the fourth foundation because of the depth of water, 13 ft., and because of the danger of scour. After carefully considering a great many possible designs, the all-steel pier was finally adopted.

The structure consists of a box-like steel-trussed frame through which twenty 12-in. Bethlehem H-column piles 60 ft. long were driven practically to refusal through silt, sand and hard clay. The trusses, which sit clear of the water, form the bracing for the piles and makes the foundation a rigid unit. The H-columns are designed to take the weight of the structure, the maximum uplifts and reactions of the transmission tower, and the heavy ice thrusts which may occur during the winter seasons. A total ice thrust of 100 tons in any direction was provided for, at maximum stresses of 22,000 lb. per sq.in. in the steel. Fig. 1 shows details of the steelwork.

In construction, all material and equipment had to be handled on barges. This fact made steel the most economical material to use because it provided the required strength with a minimum of bulk and because it required no cofferdam, cribs or underwater operations. It is believed that the combination of heavy steel sections, asphalted and submerged, has eliminated any cause for apprehension in the matter of corrosion of steel exposed to water.

The steel trusses were set above the water to keep them above the ice and to simplify their erection and the riveting of the piles to the trusses. In erecting the foundation the steel trusses were first built up on timber falsework and securely anchored in the location desired by means of temporary wood piles. The trusses were then used as guides for driving the steel piles with swinging leads. The twenty piles were all first dropped through their respective slots in the trusses and rested on the river bottom so that the structure might have as much support as possible against being disturbed by the driving of any of the piles. Fortunately no obstructions were struck in the driving and an approximate penetration of about 35 ft. was reached by each pile. After driving, the tops were cut off flush with the trusses, rivet holes burned and reamed in the piles, and the structure riveted together. All exposed steel was then given two coats of asphaltic paint and the falsework was removed, leaving the foundation ready for the tower.

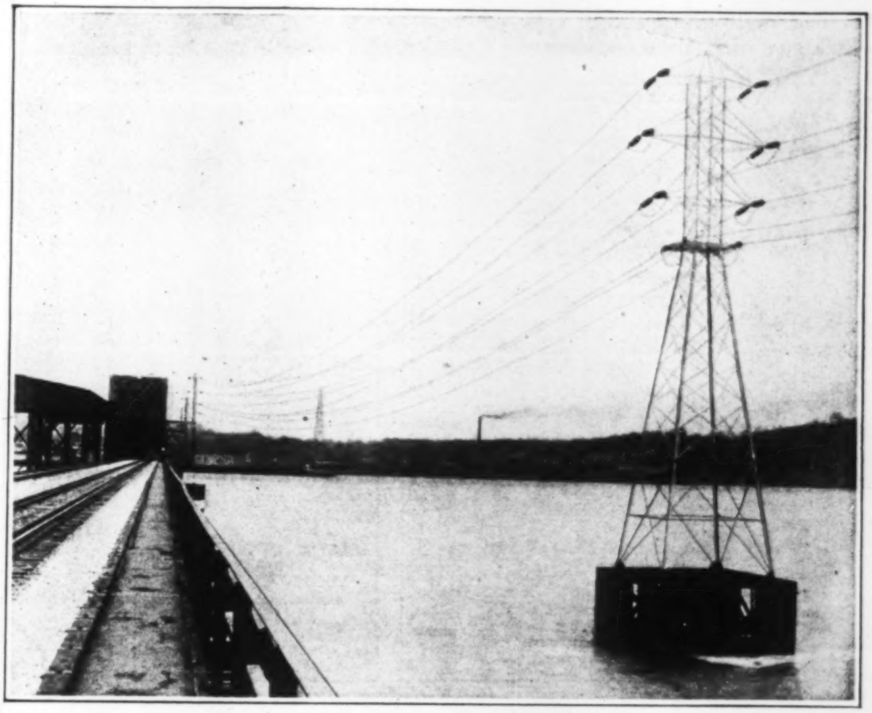

FIG. 2—RIVER TOWER OF 66,000-VOLT DOUBLE TRANSMISSION LINE AT FORT MADISON

Later a pancake-like layer of rock 6 ft. thick is to be placed around the steel piles to give greater rigidity at the river bottom, which consists of a finely divided silt deposit overlying the alternate layers of coarse sand and hard clay found in the lower depths.

In over-all dimensions the foundation is 20 ft. square and the trusses 8 ft. in height. The top and bottom chords of the trusses consist of two 10 in.-20 lb. channels double latticed and spaced 12 in. back to back. This spacing was just sufficient to allow the H-sections to drop through comfortably.

The foundation was designed by the writer under the direction of Albion Davis, chief engineer of the Mississippi River Power Company. Steel fabrication was by the Kansas City Structural Steel Company and erection by the Union Bridge & Construction Company, M. C. Taylor was superintendent of erection. The last-named company had the contract for building the bridge piers and abutments of the new bridge and for the removal of the old bridge. It therefore was well equipped for economically handling the erection of the transmission tower foundations.

Repair of Hurricane Damage to Two Miami Buildings

Condition of Meyer-Kiser and Realty Board Buildings—Value of Ordinary Wind Connections—Upper Part of Meyer-Kiser Building Removed—Realty Board Building Stiffened by Extra Bracing

By E. A. Stuhrman
Structural Engineer, Miami, Fla.

Reconstruction of two high steel-frame office buildings in Miami, Fla., that had been damaged by the great hurricane of Sept. 18, 1926, was carried out during the past year. The Meyer-Kiser Building, which had been greatly distorted, was partly taken down; the upper ten stories were removed, so that the building is now only seven stories high. The Realty Board Building, which was damaged mainly by the partial destruction of walls and partitions, was strengthened by additional bracing of the steel frame. The writer was the engineer in charge of the reconstruction of both buildings.

A general report of the action of the hurricane and of the condition of the two buildings in question was given in *Engineering News-Record* at the time (Sept. 30, p. 554; Oct. 7, 1926, p. 586, and Oct. 14, 1926, p. 624). More detailed examination of the buildings subsequently, however, gave much fuller knowledge of their condition and their resistance to wind action, as brought out in the present article.

Condition of Meyer-Kiser Building—Of the two buildings, the Meyer-Kiser suffered by far the more severe damage (see Fig. 2, showing the relative locations and the distortions of the two structures). As described in the previous articles, above referred to, it was bent about 2 ft. out of plumb, the distortion of the south or front face occurring in the seven stories between the third and tenth floors, while the parts above and below this remained practically plumb.

In comparison, the Realty Board Building was found to have only very slight distortion. Enlarged diagrams of column profiles and a top plan of this structure are shown in Fig. 4. The maximum displacement of the top tier with respect to the base was $3\frac{7}{8}$ in. northwestward, as determined by careful surveys. A considerable twist in the steel frame is evident. While some of this may have been due to erection inaccuracies, the amount is far in excess of the limits specified by the American Insti-

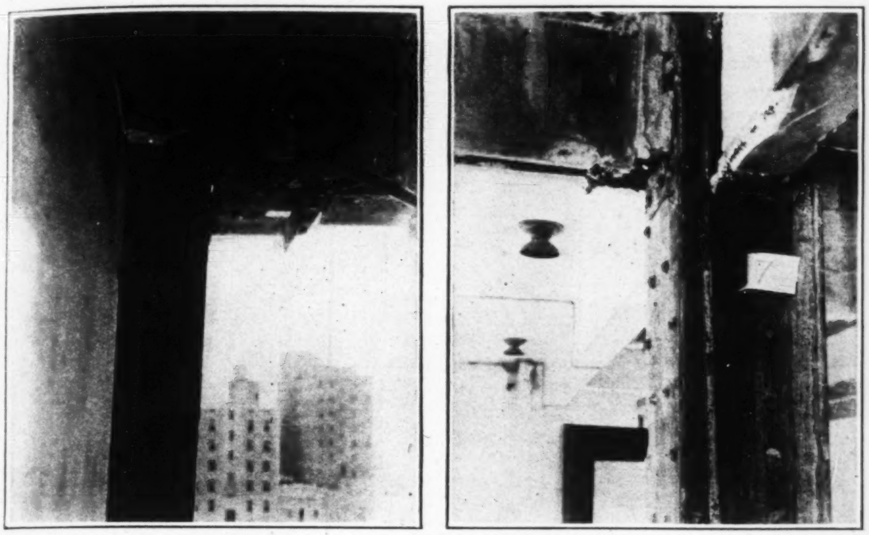

FIG. 3—FRONT-WALL COLUMN CONNECTIONS IN MEYER-KISER BUILDING
In the badly distorted part of the building the angles connecting columns and windbracing girders were bent or cracked. A cracked angle is shown at the right.

tute of Steel Construction. In the case of the Meyer-Kiser Building there is, of course, no doubt that the distortion was directly due to the hurricane.

In the front line of columns (Fig. 3) many angle connections were broken, and others were bent and partly pulled away from the columns. The columns were permanently bent between the third and tenth floors, the bending occurring above and below each girder connection, as brought out by the view Fig. 7. From the third bay to the north, however, the columns had no permanent set but were curved up in the form of a reversed curve from the ground up to the tenth floor.

As the upper stories of the building were taken down, the frame sprung back about 3½ in.; had it not been for the permanent set in the front columns it would have sprung back still more, I believe. The elastic spring of the frame manifested itself in a remarkable way by tremendous pressure on the timber diagonal bracing which was placed in the panels of the front wall during the demolition work as a safeguard. As the wrecking proceeded the bracing was not removed quickly enough, with the result that the 12x12-in. diagonal timbers in compression under the elastic spring-back pressure of the frame were bowed out of line about 6 in., and only with great difficulty could they be removed before failure.

The floor system in this building was of tile and concrete, but the spandrel beams were not incased in concrete. These floors, in the zone of distortion of the building, failed at each column due to torsional action. As the Realty Board Building, which had similar floors but with concrete incasement of the spandrel beams, showed no signs of failure in the floors, the writer concludes that all windbraced buildings should have their spandrel beams incased in concrete for the sake of the additional rigidity given by this incasement.

In both buildings it was evident that the floors acted as horizontal beams or cantilevers which transmitted the horizontal wind shear from one bent to another.

Reconditioning the Meyer-Kiser Building in its new and final height of seven stories was a relatively simple operation. The steel frame was amply strong for loads and lateral stress in this reduced height even in its distorted condition, and as it did not encroach on the property limits it was not disturbed. The columns were incased in reinforced concrete, and concrete spandrels were built out to the property line, so that, while the frame remains out of plumb, the concrete and masonry are true to line.

Realty Board Building—Interesting problems were presented by the fifteen-story Realty Board Building in the matter of determining whether it required strengthening and how the reinforcement could best by provided. The building is 45 ft. wide at the front (west face), 34 ft. at the rear, and 94 ft. 4 in. long east to west. Its total height from ground to roof level, excluding pent houses, is 165 ft. 9 in., which makes the ratio of height to width 5 to 1 at the east face and 3¾ to 1 at the west

FIG. 5—REINFORCEMENT OF REALTY BOARD BUILDING

face. During the hurricane the effects of the wind forces were displayed by excessive vibration; broken partitions and walls were the result, as shown in the views Figs. 6 and 8. Great damage was done to the walls and partitions up to the ninth floor, while above this level they were in good condition. Comparing this fact with the good condition of the Meyer-Kiser Building above the tenth floor, we may conclude that ordinary standard beam connections with top and bottom angles are sufficient for buildings nine to ten stories high, with ratio of width to height about 1 to 2½; this corresponds to generally accepted practice as to omission of extraordinary wind-bracing.

Before a decision was reached as to what should be done with this building after the storm, I reviewed the wind stresses and design, and found that the steel frame was properly designed for a wind load of 20 lb. per sq.ft., which corresponds to a wind velocity of about 70 m.p.h. The design conforms to the Miami building code requirements. The hurricane at its peak had a wind velocity of about 120 m.p.h., corresponding to a force of about 60 lb. per sq.ft., and in gusts it reached velocities as high as 150 m.p.h. It is readily seen from these figures why excessive vibration took place.

In the floor plan (Fig. 5) it will be observed that the transverse wind bents in the original design were placed at Cols. 1-4 (east face), 5-7 (the line of columns next adjoining), 14-18 (fifth bents from the east, at the junc-

View of sixth floor. Girders are straight but columns are bent above and below girder.

tion of narrow and wide parts of the building), 19-25 (the second bent from the west) and 24-27 (west front). No wind bents were provided in the transverse lines 8-10 and 11-13, presumably for architectural reasons. It therefore became necessary for the floor slab to transfer the wind pressure on the rear half of the building backward to the rear bents 1-4 and 5-7, and forward to bent 14-18. That it accomplished this transfer successfully is apparent from the undamaged condition of the floors. However, the load transfer manifested itself in a serious form at point *A*, near Col. 14 (Fig. 5), where the stair shaft walls were shattered up to the tenth floor. Evidently the beam extending from Col. 14 to Col. 15 lacked sufficient horizontal compressive or bending strength to transmit the accumulated wind shear at this point.

After giving this structure a great deal of study, I decided that the most feasible and economical means of adding stiffness to the frame was the provision of monolithic reinforced-concrete spandrel construction in the framework of the rear wall (bent 1-4), and provision of vertical and horizontal inclined steel struts to brace the outer columns of bents 8-10 and 11-13. This additional bracing is sketched in Fig. 5.

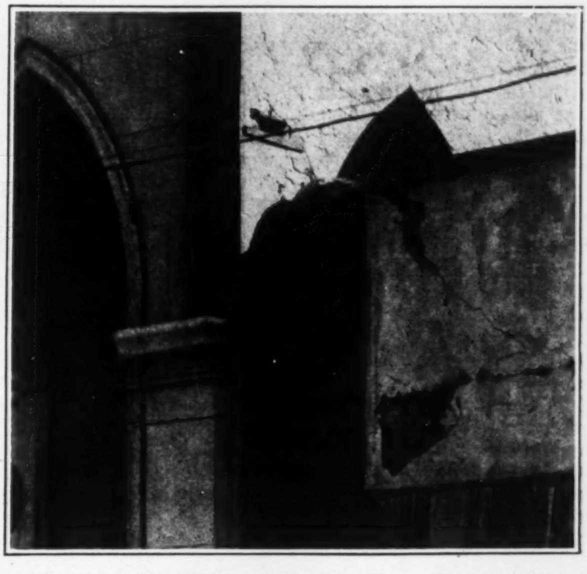

FIG. 8—FRONT CORNER OF REALTY BOARD BUILDING

When the building vibrated in the hurricane its southwest corner battered against the low adjoining building and broke away part of its coping.

The reinforced-concrete incasement of columns and spandrel beams in the rear wall extends from the ground up to and including the eighth floor. Cols. 8, 10, 11 and 13 are braced each by an outer bracing column placed in the side court and extending up to the fifth floor; intermediate connections tie the bracing column to the main column and form a strong portal system. The bracing columns have reinforced-concrete combined footings, as shown.

To take care of the load transfer at bent 14-18, which had caused the wall failure in the vicinity of point *A*, as already mentioned, horizontal steel struts were placed from Col. 11 to Col. 14, and from Col. 13 to Col. 18 at each floor level from the second to the sixth. It is believed that this construction will transmit any wind shear from the rear half of the building directly to the line of Cols. 14 to 24, thereby eliminating the observed weakness.

Letters to the Editor

A Forum for Discussion of Views of Engineers and Contractors

Study of Sewage Settling Tank Design

Sir—I have read with much interest the article by C. H. Capen, Jr., on "The Study of Sewage Settling Tank Design," together with your editorial thereon appearing in *Engineering News-Record* of Nov. 24, p. 833. The article contains much of interest, but probably owing to lack of space not sufficient data seems to have been given to substantiate certain of the conclusions reached.

It would seem desirable before the suggested method of rating the efficiency of settling tanks in terms of percentage of utilization of the settling capacity is generally accepted that it be demonstrated more clearly that this method is a true measure of tank efficiency. The true measure of settling tank efficiency is the percentage of the settleable solids that are removed by the tank and it is not apparent from the data given that the new method proposed gives results corresponding with the true figures.

In the extreme cases of high velocities, such as the recent measurements in the Winnipeg aqueduct by the salt velocity method the "flowing through period" (*Engineering News-Record,* April 28, 1927, p. 693) was considered the same as the "detention period," or as a settling tank the aqueduct would have 100 per cent efficiency which is of course absurd. Yet in a true settling tank it is possible by the use of baffles to approach this condition both as to "complete utilization of the settling capacity" and the low actual removal of settleable solids.

The table showing the Efficiency Rating of Settling Tanks at Sewage Works of Four New Jersey Towns appearing in Mr. Capen's article unfortunately gives but meagre information as to the true efficiency of the settling tanks in question as measured by the removal of the settleable solids. The two cases that appear at all comparable are the Philipsburg tank, when cleaned and operating under two different rates of flow. The results here, however, are not in support of the new rating method. Here tanks of a rated efficiency of 48 per cent gave a settleable solids removal of 81 per cent while under different conditions with an efficiency of 30 per cent the removal was actually greater or 89 per cent.

Under the heading of "Recommendation as to Design" it is interesting to note that an 8-hr. detention period is suggested for single-story settling tanks and a 2½- to 4-hr. period for an Imhoff tank, all of which is based presumably on the studies and observations cited. That is, the settling space in an Imhoff tank is considered to be from two to three times more effective per unit of volume than in other types. The outstanding difference between the settling chamber of the Imhoff tank and that of the plain flat bottomed tank is that in the Imhoff tank part of its capacity is in the more or less dead water space formed by the sloping bottom leading to the slots. This characteristic makes the Imhoff tank inherently less efficient as measured by "the complete utilization of its settling capacity," yet it is apparently not so considered.

In connection with the selection of settling periods up to 8 hr. it would be interesting to know what weight has been given to considerations of the effect of the longer periods on the quality of the effluent, particularly in reference to oders and troubles with gas lifted solids so familiar in the days of septic tanks.

Little exception can be taken to the general remarks under "Conclusions" except perhaps to go a little further with the observation that excellent removal of settleable solids has been secured in tanks of moderate detention periods when the length-width, ratio was less than 2.

Mr. Capen has done a service in advancing the data given, but it should be borne in mind that the function of a settling tank is to remove settleable solids and its efficiency should be rated on that basis. The actual time of passage of liquid through a tank is of little importance as long as in doing so it is capable of separating itself from the solids. To this end careful design is indeed necessary.

New York City, **Richard H. Gould,**
Nov. 30, 1927. Sanitary Engineer.

Sir—Mr. Capen's article on the "Study of Sewage Settling Tank Design" contains some interesting information. The efficiency, or rather the inefficiency, of sewage settling tanks has been observed for many years, and although many engineers have attempted to improve designs by following either personal hobbies or inadequately proved schemes, the usual result has been to adhere to customary construction. The size of the tank, as Mr. Capen says, has generally been proportioned to the so-called detention period, having little regard to the flow-through-period. The employment of baffles has been largely upon the hit-or-miss plan.

Many engineers have had little or no patience with inspectors who have, by means of colored dyes, attempted to show the rapid passage of some parts of the flow through the tank, thereby indicating tank inefficiency because of the lack of time given to a portion of the flow for the settling of its suspended matter.

The method of testing the flow, described by Mr. Capen, may be superior to the use of dye, and the writer compliments Mr. Capen for taking up this matter and bringing it forcibly to the attention of designing engineers. Careful scientific study of this subject is needed followed by some real practical experimentation on a large scale, and if Mr. Capen's method proves to be satisfactory for a rapid means of testing, it will be most useful.

As to the conclusions drawn by Mr. Capen, the writer is not surprised. Nothing seems to appear which has not been recognized for a long time by most of our experienced and thinking engineers. That however, does not prevent a repetition of such facts from being profitable to us.

What we need is some one to tell us how to design tanks which will be efficient and tanks in which, as Mr. Capen says, "the ratio of the flowing-through period to the detention period is unity," or nearly so.

The writer therefore hopes that Mr. Capen's work will be appreciated and that his method of testing will become the means of stimilating others to improve on tank designs.

Harrisburgh, Pa., **F. E. Daniels,**
Dec. 2, 1927. Chief, Industrial Waste Section,
Pennsylvania State Department of Health.

Sir—I was much interested in Mr. Capen's article, "Study of Sewage Settling Tank Design." The article is timely and has considerable academic value, but there it contains some statements that might be misleading to the designers of tanks, and to those engineers who report on the efficiency of existing tanks.

In Conclusion 8, Mr. Capen states that, "Analyses for solids will not always agree with the efficiency rating, but are somewhat consistent." Is not the analysis for solids the true scale for measuring the efficiency of a tank for settling purposes? The writer's idea of an efficient tank would be one in which the most solids were settled out and removed, without nuisance, for the least capital and operating costs.

Sodium chloride, as a chemical agent for determining flow-through values, is superior to other salts, for it is less influenced in solubility by changes in temperature than other salts, and is easily titrated. However, the density or specific gravity of a solution of salt is usually greater than that of the sewage and in each case varies with the concentration. If the solution is injected near the surface at the influent end, the solution will have a tendency to sink through the sewage during the flow-through period, and some of the chlorides will be retained in the sludge.

Tests at Dallas on Imhoff tanks and at Waco, Texas, on an activated-sludge plant, show a consistent drop in chlorides, after repeated tests, from influent to effluent. This can only be explained by the theory that chlorides are retained in the sludge which, of course, does not appear at the effluent. Otherwise, all tanks should show an increase in chloride con centration, due to the evaporation in tanks during the flow through period.

Osmotic and solution pressure would have a slight bearing on the results obtained by titration. There is a tendency for the molecules, after entering the liquid, to move in every direction and, consequently, a certain negative velocity or lag will appear by the use of salt solution, whereas certain dyes will diffuse to some extent, but will not show negative velocities except in the case of back water.

Mr. Capen's statement in Conclusion 7 that "velocity is unimportant" can not be applied generally. In an extreme case of a circular pipe being used as a settling tank, the flow-through efficiency would be maximum at high velocities and at the same time the settling would be at a minimum.

The writer has recently designed and constructed a settling tank for Jacksonville, Texas, having a detention period of 1 hr., and a length to width ratio of 1.5. This tank is consistently obtaining a removal of 90 per cent plus of 1-hr. settleable solids.

The detention period should be largely governed by the type of after treatment. Delayed detention increases the septicity of sewage and the floating sludge deposits, which are the prime cause of odors from settling tanks, and will react unfavorably with a following activated process.

The engineering profession could benefit by considering such subjects as sewage settling tank design, and all other single-unit designs, as simply a case history, and not as a general method to apply in all cases. That is the attitude aimed at by the medical profession in recounting their cases. From a philosophical standpoint, no two disposal plants should be of the same design, since the factors governing the design—local physical conditions, money available, and purification requirements—vary in every case, and since only one design can correctly satisfy the given condition, all plants to be correctly designed must be different.

The writer wishes to acknowledge Mr. Capen's article as a valuable contribution, and is of the opinion that more detailed study should be made on the science of settling sewage.

H. L. Thackwell,
Consulting and Constructing Engineer.

Jacksonville, Texas,
Nov. 26, 1927.

Sir—It is evident from the foregoing letters of Messrs. Gould and Thackwell that the table of efficiency rating was not of sufficient size to prove some of the viewpoints of the writer.

Before and during the period of the tests an enormous number of analyses of all kinds were made, including, of course, numerous analyses for solids. Invariably the discrepancies from anticipated results were so noticeable that attempts to prove relative efficiencies of tanks by comparison of solid results were usually given up in disgust. For that reason the writer has always been very skeptical of solid results. This was indicated in the article by Conclusion 8. The results in the table were given for what they might be worth and, in spite of their inconsistencies, are much better than the average.

The whole situation was studied quite thoroughly at Phillipsburg, where tests of all kinds were made over a period covering several months. In this case a silk mill discharged various dyes into the sewer system a short distance above the plant several times a day. The tanks were used as settling units for the lime and electrically treated sewage from the direct-oxidation process. In spite of the extreme solubility of the dyes and the fact that they had been thoroughly dissolved for hours, the lime sludge in the tank when drawn out in a section in a huge glass pipette showed unmistakable color stratification. On more than one occasion this stratification was predicted as to exact arrangement of colors simply by keeping a record of the colors as they appeared.

There is no reason to doubt that the salt solution acts much the same as the dye. In two of the test cases an attempt was made to compare the probable volume of chlorides that should be found in the effluent. It was found that a considerable amount of salt was lost. This might cause the "negative velocity or lag" spoken of by Mr. Thackwell, but I am more inclined to accept Mr. Clifford's statement, quoted in my article, that "The forward movement of the solute does not differ appreciably from the molecules of the solvent." Certainly when the tests are all conducted on the same basis as these were, the results are all comparable. The loss of salt may be due to adherence or chemical combination of the salt to or with the settleable solids removed by the tank.

In one test that the writer knows of but did not see, a salt solution was introduced in an Imhoff tank and the percentage appearing at the outlet end was very small. It was found that the chloride content in the sludge compartment and *gas vents* had increased, thus proving that the salt had passed through the slots. Furthermore, tests with dye in Imhoff tanks showed exactly the same results, and the color in the *gas vents* was frequently deeper than in the tank effluent.

The objection raised by Mr. Gould to the noneffective apex volume of an Imhoff tanks is perfectly reasonable and has been repeatedly spoken of by Mr. Downes, who devised a special inlet whereby the common overflow inlet was changed to a deflecting inlet. The effect on the tank was very noticeable.

In defense of the recommended detention periods, it should be of prime importance to consider what the average conditions are under which each type of tank operates. The long period for one-story tanks seldom does any harm from the odor standpoint because such tanks are seldom followed by secondary units of the type that would cause nuisances. Many one-story tanks are allowed to accumulate solids up to 75 per cent of their volume. Certainly eight hours capacity is none too much under such conditions. It is all right to reply that such conditions should not be allowed to exist, but they are the rule rather than the exception. This is true in New Jersey in spite of the fact that the state has gone a long way to promote intelligent operation. It is interesting to note that Mr. Gould and Mr. Thackwell both mention successful cases of short detention period and a small ratio of length to width. However, the writer knows of cases in New Jersey where somewhat similar designs were unsuccessful, although it must be admitted that unintelligent operation was partly responsible.

It was not intended to convey the opinion that all tanks other than Imhoff tanks should have a detention period of eight hours. This figure was given for cases of the ordinary one-story settling tank. It is also quite obvious that the conditions of length and width called for are not met in the case of a circular tank such as the circular Imhoff or the Dorr tank. Nevertheless, it was stated that such tanks "can be made very efficient."

The criticism in regard to the case of a pipe line being very efficient but allowing no sedimentation are perfectly correct. The writer was fully aware that such criticisms could be made and had read many articles on the salt velocity methods used for determining pipe flows, particularly those of Mr. Groat, which were published in the *Transactions* of the American Society of Civil Engineers in 1914. However, a well informed engineer would never design a settling tank that operated under the conditions of a pipe line, and it has to be presupposed that the fundamental principles of design must be included before attempting an efficiency rating. An illustration exists in the case of one of the companies which installs small settling units for private houses, wherein the buildings to be served had a large number of occupants. The company applied to a body having jurisdiction for permission to install a number of small rectangular tanks in series., the effect being to create a high velocity with practically the same condition of flow as in a pipe line. The permit was denied on that basis, but, in spite of the arguments advanced, the company still insisted that series and not parallel operation was correct. That particular installation was not made, but there exist many others of identical nature, the extreme being a case of twelve such units connected in one series. These facts do not disprove the practicability of the efficiency rating, but merely show that it has to be used in conjunction with other established engineering principles.

The letter of F. E. Daniels hardly needs a reply. Mr. Daniels was at one time connected with the same Department for which the tests were made and was thoroughly familiar with the conditions that led to the investigation. It is not unreasonable to suppose that he or others may have previously expressed ideas of a similar nature, particularly since it is obvious that Mr. Clifford worked on the idea twenty years ago and his publications must have struck a responsive chord in many places in this country.

The comments included in these letters are exactly of the type that were desired and they show that not all engineers are content to follow the old beaten path. The writer wishes to thank the contributors for their comments and believes that they have contributed to the subject under consideration.

East Orange, N. J.,

Consulting Engineer.

Wisconsin Engineers Ask Whether Licensing is Advantageous

Sir—The question of whether to support or oppose the Licensing of Engineers in Wisconsin is being studied by a committee of the Engineering Society of Wisconsin, of which I am chairman. The committee is open-minded and anxious to reach a sound conclusion. Our study of published discussion reveals a lack of concrete and specific evidence upon which to base judgment. The committee desires, therefore, to get in touch with anyone who has something tangible to offer. We would like especially to learn about the merits and defects of licensing from individual engineers who are working under license laws. Perhaps some of your readers will have something to offer. Here are some of the questions for which we are seeking answers:

Are there *quacks* in the engineering profession; that is, are there men who do not possess a passable knowledge of mathematics, physics, and mechanics, but who, nevertheless, psas themselves off for engineers? Does anyone know of specific cases of quackery?

Has licensing, where introduced, actually and tangibly improved conditions for either the public or the engineer?

Has licensing, where introduced, adversely affected the condition of the engineer, either by imposing an appreciable financial burden, hampering free movement from state to state, imposing a barrier to worthy young men who want to enter the profession, or in any other way?

Madison, Wisconsin,
Nov. 25, 1927.

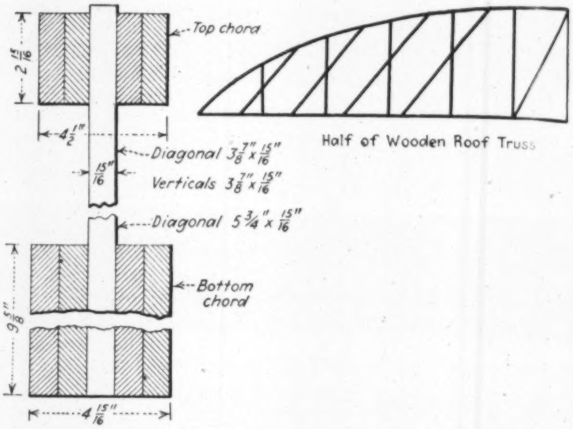
L. F. Van Hagan,
Professor of Railway Engineering,
University of Wisconsin.

Wooden Skating Rink Roof Truss Fails Under Snow Load

Sir—On November 24 in the village of Newberry, Mich., a wood frame skating rink collapsed under a snow load of 4½ inches of rain-soaked snow. The load was about 6 lb. per sq.ft. There was fortunately no loss of life since the skating season had not opened. The present size of the skating enclosure was about 60x120 ft., with the length north and south. Along the entire length of the west side was a lean-to structure divided into lockers and waiting rooms. The main structure was divided into panels by a system of trusses supported on posts. There were about 12 panels. The trusses had a curved top chord and a horizontal lower chord, as shown in the accompanying sketch. The trussing between the upper and lower chord was curious in that the diagonals while intersecting the verticals at about mid-height, did not have their center line intersect the center line of the verticals on the center lines of the top and bottom chords, but below the lower chord and above the upper chord center line. The spacing of the verticals was about 2 and 4 ft., as I recall. The bowstring span was about 59 ft., the truss depth in the center about 7.7 ft., and the height of the lower chord about 10 ft. Purlins 2 in. x 5⅝ in. spaced about 2 ft., were used, on top of which was 1-in. sheathing and a heavy felt.

The entire roof, the east side and ends of the main building, are down, apparently from a combination of the effect of the snow load and a west breeze which swayed the top eastward. The roof fell vertically almost intact, the east and south walls falling outward.

During the time the building was used for skating it often contained 200 persons more or less. It had stood two seasons, probably because of exceptional weather, and because the roof was kept clear of snow by the wind. On one or two occasions, I saw men keeping the snow from plastering itself onto the west edge during a wet snow storm.



Top chord
$2\frac{15}{16}$
$4\frac{1}{2}''$
Diagonal $3\frac{7}{8}'' \times \frac{15}{16}''$
$\frac{15}{16}''$
Verticals $3\frac{7}{8}'' \times \frac{15}{16}''$
Diagonal $5\frac{3}{4}'' \times \frac{15}{16}''$
Bottom chord
$9\frac{5}{8}''$
$4\frac{15}{16}''$
Half of Wooden Roof Truss

DETAILS OF BOWSTRING TRUSS SHOWING ARRANGEMENT OF DIAGONALS

At the time the rink was built, three years ago, I warned such persons as I thought might have influence that the building was not safe.

R. R. Ryan.

Should Employer or Employee Pay Employment Agency Fees?

Sir—Among the several able articles and letters which have from time to time appeared in the columns of your journal anent the inadequacy of engineering salaries, there is one subject I have not yet seen broached, which in a way bears directly upon the salary question. I refer to the tendency among a considerable number of the engineering firms who are large employers to place whatever vacancies they may have in the hands of employment agencies. This is no doubt an excellent thing for the firms under discussion, since it relieves them of a large amount of clerical and secretarial work. But—and here's the rub—is it fair to expect the poorly paid employee to bear the cost of this service? It is, in a measure, tantamount to putting a premium upon a vacancy.

Take the case of the $200 a month man who has perhaps been unemployed for some weeks. Such a one, very often married, and with a family to support, faced with an accumulation of unpaid bills, for families must be fed even though the breadwinner is not working, obtains a position through one of the agencies, and immediately is up against the problem of paying away one-third or more of his first month's earnings. This is a condition which should not be tolerated. Since the employer is saved the extra work involved, let the employer pay.

There is also the point, of value to the employer, that when he places his vacancy in the hands of an agency he reaches only a limited proportion of those who might be qualified to fill it.

Another Struggling Engineer.

Toe of Cofferdam for Hudson Bridge Fails; Three Drown

Section of Sheetpiling at Deep West Tower Structure Blows In—No Serious Delay

ON Dec. 23 the toe of a short section of the steel sheetpiling of one of the Hudson River bridge pier cofferdams at Fort Lee, N. J., blew in, overwhelming three of the men at work in the cofferdam. The structure in question was the northerly of the two cofferdams in which the two pier footings for the west tower pier of the 3,500-ft. Hudson River suspension bridge are being built. Each of the two cofferdams is about 100 ft. square. The south cofferdam had previously been pumped out, cleaned down to sound rock and concreted to within about 25 ft. of the water surface. The north cofferdam was pumped out only recently, and the landward half of the rock bottom was being cleaned off preparatory to concreting, when the blow-in occurred.

Description of Cofferdams

These cofferdams are in water ranging from about 40 ft. depth at the landward edge to 65 or 70 ft. depth on the river edge, measured from water surface to rock. The rock is Triassic (Newark) sandstone, with irregular surface sloping down eastward, and was originally overlaid with rock fragments and river mud, to a water depth of 10 to 20 ft. The cofferdams were constructed by dredging the site down to a depth of about 40 ft. and then driving steel sheetpiling around a completed assemblage of bracing consisting of five or six horizontal frames with heavy steel H-beam walers along the sheeting and double 12x12 struts in both directions, spaced 15 to 20 ft. apart horizontally. The sheet pile wall of the land side and about one-fourth of the width of the upstream and downstream sides was single-wall, while the remainder of the periphery was double-wall construction, 5 or 6 ft. wide, whose cells were filled with clay except that the lower 20 ft. of the cells on the river side was filled with concrete to stiffen the cofferdam structure between the rock surface and the lower tiers of bracing. All piles were driven down hard, to penetrate the upper layers of rock where possible.

After completion of the cofferdam it was pumped down, the landward half of the rock surface was cleaned off and concreted, and then excavation completed in the wedge-shaped deeper part toward the river, and this also concreted.

After successful completion of this work in the south cofferdam, the north cofferdam, which had been making somewhat slower progress, was at the stage of cleaning off the loose and soft upper layers of rock preparatory to concreting the landward half. At the westerly end of the north wall, where the structure consists of only a single line of sheeting, the excavation of the bottom had gone down some 4 ft., inside of a berm about 5 ft. wide which was left along the foot of the cofferdam wall. The sheetpiles here were seated a foot or two in the bottom, so that the body of the excavation was two or three feet below the pile points. The lowest tier of bracing was 6 or 8 ft. above. Without warning, the lower ends of the piles in this part of the wall were forced in by the water and soil pressure outside, apparently shearing off the material of the berm and admitting a large rush of mud and water. Some of the men were able to reach the ladder to the top, but three were caught.

It is expected to drive an outer wall of sheeting at the point of the blow, filling the cells with firm material, to seal the leak before pumping out is attempted. No serious delay to the work is expected and the general plan already successful in the south cofferdam will be followed.

No Agreement Reached on Price of Colorado River Power

Conferences that were held daily in San Francisco starting Nov. 21 between members of the Colorado River commissions of the states of Arizona, Nevada and California, their state engineers, consulting electrical engineers and other advisors in an effort to determine what price Arizona and Nevada should receive from California for hydro-electric power to be generated if and when Boulder Dam is built, were terminated Dec. 17. At the close of the conference it was stated that while California had offered to pay a higher amount than its previous offer of four-tenths of a mill a kilowatt-hour made at the last Denver conference, the figures had proved unacceptable to Arizona and Nevada. The price named by California was not made public. At the Denver conference last fall one mill a kilowatt-hour had been asked by the other two states.

At Denver on Dec. 19, representatives of the four states of the upper basin of the Colorado River adopted a resolution opposing passage of any legislation proposing the construction of a dam at Boulder Canyon or any other development pending the outcome of negotiations among the three lower basin states, Arizona, California and Nevada.

Committees Offer Preliminary Data On Flood Control

Engineering Groups Meet to Advise House Committee on Control of Mississippi River

DURING the past week several engineering groups at the request of Chairman Reid of the flood control committee of the House of Representatives conferred with that committee to advise it on the subject of Mississippi River flood protection.

A committee of the American Society of Civil Engineers, appointed under a resolution of the Board of Direction passed at the Columbus meeting in October, met under the chairmanship of President John F. Stevens. The committee included J. Waldo Smith, of New York, J. W. Billingsley, of New Orleans, John F. Coleman, of New Orleans, Morris Knowles, of Pittsburgh, J. B. Galloway, of San Francisco, and D. W. Mead, of Madison.

Am. Soc. C. E. Committee

After reviewing the reports of General Jadwin and of the Mississippi River Commission, as well as the reports of the separate boards which had advised these authorities, the committee drew up a series of questions for use in the House hearings, to bring out the facts relating to various phases of the Mississippi floods and the protection systems proposed by the Chief of Engineers and the Mississippi River Commission respectively. A general report accompanying these questions recognized the great speed with which the official investigations of the last six months had to be conducted, but called attention to the unexplained differences of plan and estimate between the two proposed protective systems. It also suggested that full costs (including land, damages and incidental costs) should be compiled to enable various protective systems to be fairly compared. Immediate prosecution of mapping, the establishment of a hydraulic laboratory, and energetic prosecution of all the protective work that can now be determined upon as part of the final comprehensive plan, were recommended; but it was recommended that the surveys should be placed in the hands of the regular survey bureaus of the government, and that the laboratory be placed in the Geological Survey. Fuller study of the entire protection problem was called for as a prime essential to the adoption of a definite project.

A committee of university professors appointed by the presidents of a number of technical universities at the request of Congressman Reid also reviewed the flood control reports. This committee included Profs. B. A. Etcheverry, of the University of California, W. B. Gregory, of Tulane University, H. W. King, of the University of Michigan, Daniel W. Mead, of the University of Wisconsin, Clark E. Mickey, of the University of Nebraska, Harry Rubey, of the University of Missouri, Arthur N. Talbot, of the University of Illinois, Francis P. Witmer, of the University of Pennsylvania, and Sherman M. Woodward, of the University of Iowa.

University Professors' Report

In its report this committee pointed out the essential change of attitude toward flood control represented by the reports of the Chief of Engineers and of the commission, and suggested that the basis for this change of policy should be fully set forth. A detailed review of the project was not attempted in view of the absence of a sufficient amount of detail in the report. The committee suggested, however, that immediate action is necessary to provide at least the same degree of security as before the flood of last spring, and to carry on such other work as will fit into an ultimate plan. At the same time that this work is going on, extensive study and investigation of the entire problem are necessary, in the committee's opinion, including study of the possible magnitude of future floods and the economic degree of security to be provided. The difference of cost estimates by the Mississippi River Commission and General Jadwin was pointed out as requiring explanation, and as warranting a more precise and detailed statement of costs, including all elements of cost involved, not merely construction but also right-of-way and the like. The committee indicated that such analysis of cost and the associated studies might suggest essential modifications of the plans now proposed. The committee also questioned the advisability of building "fuse plug" levees at the heads of the floodways, and expressed the opinion that all elements of the protection system should function in definite manner. It proposed an engineering board of review for the flood projects, and outlined the essentials of a sound administrative plan, based on continuing the Mississippi River Commission in charge of the work.

Hearings by the House committee are expected to begin on Jan. 5.

Three Short Courses for Sewage-Works Operators

Three short courses for sewage plant operators will be given Jan. 16 to 27 at Rutgers University by the College of Engineering in co-operation with the New Jersey Sewage Works Association and the State Department of Health. Course I is a prerequisite to Course II and Course III is an advanced course. Details of the course may be had from Dean Edward H. Rockwell, Engineering Building, Rutgers University, New Brunswick, N. J.

Chicago Prohibits Parking

By a vote of 37 to 4 the city council of Chicago has passed an ordinance which prohibits all parking of automobiles in the loop or business district between 7 a.m. and 6:30 p.m. on week days. Taxicabs will be allowed at specified cabstands. This much-discussed plan will go into effect on Jan. 2. Some merchants objected on the score of losing trade, but a traffic survey at stores indicated that less than 2 per cent of the customers came from parked automobiles. On the other hand, it is estimated that the greater freedom of movement under the new system will not only expedite traffic but will increase patronage by automobile riders who now keep away on account of the congestion and traffic difficulties.

S.P.E.E. Announces New Widespread Investigation in Engineering Education

The Board of Investigation and Coordination and the staff of the Society for the Promotion of Engineering Education have announced that through the creation of a special fund, a parallel project to the investigation of engineering education recently conducted by the colleges will soon be undertaken. The investigation is made through the provision of $30,000 by certain educational institutions and the Carnegie Corporation. The new inquiry, as stated in the proposals which form the basis of the grant, is to be directed toward the following ends:

1. To indicate the character and the extent of the need in the United States for a type of technological education having the following general characteristics: (a) More advanced than the work of the secondary schools; (b) affording a general preparation for technical, supervisory and commercial services in industry, rather than specific training for skilled trades and occupations; (c) differing from the programs of the engineering colleges by being briefer, more intensive and more direct in method, less theoretical and more strictly technical in content and not leading to an academic degree; and (d) principally full-time and co-operative day courses, but not excluding evening and extension courses organized into extended curricula.
2. To indicate the extent and character of the present facilities for giving education of this character and to appraise their effectiveness.
3. To indicate the means by which the needs may be met more adequately.
4. To indicate how institutions giving this type of technological education and the present engineering college may supplement each other so as to create a well-balanced system of higher technical education.
5. To indicate how the public educational authorities, the professional societies of engineers and industrial bodies may aid in establishing this type of education on a stable and adequate basis.

In defining the scope of the inquiry, attention was directed primarily to a type of education, rather than a type of institution. It is recognized that the field of specific training for crafts, trades and industrial processes, not commonly classed as forms of engineering activity, is of great importance, but that it warrants separate investigation under other auspices. A certain overlap is found between that field and the area of the projected inquiry, but training for engineering activities is the end of the specific inquiry in view.

In line with the policy pursued in other investigations by the society, a special advisory committee will be constituted, representing the interests most directly affected. The project is expected to extend through the year 1928.

Report Lists Sites for Airports in New York City Area

The fact-finding committee appointed by Secretary Hoover to study and report on airport facilities for the New York area made its report Dec. 20. Six sites were recommended as follows: A 300-acre tract near Middle Village, Queens Borough; the site where the city of Newark is now building an airport; the Bronx-East River area; the Hackensack Meadows area; Jamaica Bay area; and the Wall St.-Brooklyn area, which is Governors Island.

The report was made at a luncheon held under the auspices of the Merchants Association, the meeting being presided over by William T. McCracken, assistant secretary of commerce for aeronautics, who was chairman of the committee.

Water Resources Survey Before Congress

A bill providing for complete survey of the country's water resources was introduced in Congress on Dec. 20 as House Bill 8111, by Congressman Newton. One of the immediate objects of the proposed survey is a study of flood conditions. Control of streams has been handicapped by lack of basic facts, especially with respect to the magnitude of flood discharges and the average interval of time between floods of any given magnitude. There is need for more information as to the total quantity of runoff and the times and quantities of discharge at maximum, mean and minimum stages. The same information is needed also in connection with the design, construction, operation and administration of all works for utilizing the surface waters of the country.

Under the terms of the Newton bill the Geological Survey is authorized to collect the necessary information and prepare an inventory of the nation's water resources. An appropriation of $400,000 for the current year and $500,000 in each of the following 19 years is authorized by the bill.

Attempts Continue to Get Lines Under Sunken Submarine

Attempts continue to get lines under the S-4, U. S. Navy submarine which sank on Dec. 17 when rammed by the U. S. Coast Guard cutter Paulding off Provincetown, Mass., carrying 40 officers and men to their deaths. The submarine lies on the ocean floor at a depth of about 100 ft. and in mud about 12 ft. deep. Divers using jetting hose with special head are endeavoring to tunnel underneath the hull in order that cables may be placed for raising the submarine with pontoons. Tunneling on the starboard side had been about half completed on Dec. 27 when diving was discontinued because choppy seas had dragged the anchor of the diving ship Falcon. Lieutenant-Commander Ellsberg, who successfully raised the S-51, is in direct charge of the operations on the S-4.

The S-4 was returning to its base from a trial trip after some reconditioning when rammed. The Paulding continued to its base, though badly damaged. Navy surface craft and divers were in communication with six men in the S-4 for more than three days, first by oscillating devices, and then by actual code tapping on the hull of the sunken submersible.

Unlicensed New York Engineers Face Legal Involvement

According to a letter recently sent all engineering societies in the state of New York, the attorney general will proceed against all engineers who are not duly licensed to practice or who have failed to renew their certificates as provided by Article 55 of the Education Law. Up to this time it was considered expedient to refrain from pushing the matter of legal procedure against unlicensed engineers, thereby giving them ample time to become familiar with the law and its requirements. However, inasmuch as several years have elapsed since the passage of the act, the attorney general's office has been requested by the Education Department of the state of New York to proceed against all delinquents.

Street Sanitation Officials to Meet in Detroit

The eighth conference of the International Association of Street Sanitation Officials will be held at Hotel Statler, Detroit, Mich., Jan. 9 and 10. Among the topics and speakers are: street cleaning, Elmer C. Goodwin, examining engineer, Department of Street Cleaning, New York City; final disposition of ashes and miscellaneous refuse, W. J. Galligan, Bureau of Streets, Chicago; snow removal, George W. Dies, street commissioner, Toronto, Ont.; street designs from a sanitary viewpoint, W. C. Earle, city engineer, Pasadena, Calif.; and financial possibilities of salvage; Capt. Harrington Place, engineer, Detroit Bureau of Governmental Research, Detroit, Mich.

Road Show, Convention Managers Expect 30,000 At Cleveland, Jan. 9-14

Returns received by the managers of the convention and road show at Cleveland Jan. 9-14, 1928, of the American Road Builders Association indicate that both will exceed in attendance and interest those of any previous years. About 30,000 are expected to be in attendance during some period of the exhibition and the technical meetings. The numbers of exhibits will be increased by having available some 60,000 sq.ft. more of space than was available last year.

In accounting for their expectations the convention and exhibition managers point out that the convention in Cleveland may be styled a bigger and better gathering due to three main reasons: the increased attendance by the Pan-American contingent, participation by the newly organized county highway officials, and the fact that the Cleveland auditorium affords 150,000 sq.ft. of floor space as against the 90,000 sq.ft. that were available last year.

The county highway officials were organized last June by Thomas J. Wasser who is the first president of the organization. Thursday, Jan. 12, will be County Officials' day. On this day the first national session of county highway officials ever held will convene in the Hollenden Hotel. The response to Mr. Wasser's invitations to county highway officials throughout the country to be present, indicates that all sections of the country will be represented.

Not only are the nations of South and Central America taking a more active interest than ever before, but a large number of them are sending delegations to the convention accompanied by elaborate exhibits. Mexico is sending a delegation of three men with an exhibit of the Mexican National Highway System and other things of interest in that republic.

Cuba, likewise, will participate in a similar manner. Other nations will send official representatives and in addition will participate in the presentation of foreign exhibits for the inspection of all American road builders.

Chicago Gets Traffic Commission

Following the recommendations of a city traffic report made last year and noted in *Engineering News-Record*, Feb. 3, 1927, p. 193, the Greater Chicago Street Traffic Commission has been organized by representatives of the city, county and park boards. The personnel of the commission is: President, R. W. Wolfe, commissioner of public works; vice-president, James Simpson, president of Chicago Plan Commission; secretary, Leslie J. Sorenson, city traffic engineer. Committees have been appointed to prepare uniform systems of traffic signals and traffic regulations, while a committee of police officers will arrange for uniform enforcement of the regulations.

Everglades Tax Law Is Declared Void

Circuit Court Judge Love, of Florida, on Dec. 14 declared unconstitutional the new state tax law passed last spring to place the Everglades drainage work on a stronger financial basis. The law authorized the levy of an *ad valorem* tax on land in the district, in addition to benefit assessments as heretofore. This provision was made to meet the views of bond buyers that more security should be placed behind Everglades drainage bonds in order to bring down interest and enable larger issues to be sold.

After the passage of the law, property owners in the Everglades assessment district sued, claiming that their lands, being not marshy or subject to benefit by Everglades drainage, could not lawfully be taxed on its value. The present decision upholds this view. The state plans to appeal.

Everglades work has been conducted only on a small scale during the past year, pending a decision on the validity of the tax law.

Pittsburgh Gasholder Explosion Found Accidental

On Dec. 21 a coroner's jury verdict on the explosion of the 5,000,000-ft. gasholder in Pittsburgh on Nov. 14 found that the explosion was accidental, and resulted from leakage of the valves which separated the holder from the supply mains. The verdict recommended, however, that authoritative general safety rules for conducting repair work on gasholders be drawn up.

The holder belonged to the Equitable Gas Company, a subsidiary of the Byllesby Company, of Chicago, and served for storage of natural gas. It had been in process of repair for several weeks before the accident, the Riter-Conley Company doing the repair work in conjunction with forces of the gas company. Two valved pipes connected the holder to a system of mains; the valves in these pipes were closed, but the pipes were not disconnected during the repair work. After the explosion the valves were tested and one was found to leak slightly although no evidence of gas had been found in or about the holder before the morning of the explosion.

At the time of the explosion the holder bell had been raised partway by blowing in air, a total of about 650,000 cu.ft. From the gas leakage measured after the explosion, it was estimated that about 40,000 cu.ft. of gas entered the holder. Ignition was brought about by a welding torch which was being used on the outside of the holder bell.

Railway in Texas Oil Field

The Texas-New Mexico Railway Company has been authorized to build a new railroad line from Monahans in Ward County, Texas, through Kermit and Winkler Counties to the Texas-New Mexico boundary line, a distance of approximately 35 miles.

Personal Notes

J. G. Tripp, until recently engineer of construction on the Lake Pleasant Dam, has taken charge of the construction work on the Coolidge Dam for Atkinson Kier Bros. Spicer Company, the general contractors. Mr. Tripp is a graduate of the Massachusetts Institute of Technology and has had varied experiences on dam construction, having been employed on the Little Rock Dam at Palmdale, Calif., and the Emigrant Creek Dam at Ashland, Oregon.

F. C. Hart, until recently assistant project engineer for the Missouri Highway Department, has been appointed resident engineer on bridge construction by the Arkansas State Highway Department.

Harold A. Thomas, professor of hydraulics in the Department of Civil Engineering at Carnegie Institute of Technology, has been appointed hydraulic engineer for the city of Pittsburgh. His appointment was made by the Department of Public Works. His work will be concerned with studies of flood heights relative to a relocation of boulevards along the rivers, and other construction changes recommended by the City Plan Commission.

Dr. H. N. Bundesen, until recently health commissioner of Chicago, has been appointed director of health of the Sanitary District of Chicago.

James E. Henderson, until recently assistant engineer in the construction department of the Florida East Coast Railway Company, has resigned to accept a residency with the Arkansas State Highway Department. Mr. Henderson was employed on double-track work of the Florida East Coast. For five years prior to his going to Florida, he was connected with the South Carolina State Highway Department.

C. E. Douglas has resigned as city manager of Dubuque, Iowa, his resignation to be effective Feb. 1, 1928. Mr. Douglas was formerly city manager of Newport News, Va., and succeeded O. E. Carr, who is now city manager of Fort Worth, Texas.

Harold E. Wessman, until recently structural designer with Waddell & Hardesty, consulting engineers of New York, has accepted an appointment in the Department of Civil Engineering at the University of Illinois. Mr. Wessman is a graduate of that university.

H. W. Fenno, who has been division engineer at Chicago for the New York Central R.R., has been appointed engineer of maintenance-of-way with headquarters in Cleveland, Ohio, succeeding Charles Yoder, who died recently.

G. Tornes has been appointed general supervisor of buildings in the engineering department of the Chicago, Milwaukee & St. Paul Ry., succeeding the late N. H. La Fountain.

Engineering Societies

Calendar

Annual Meetings

INTERNATIONAL ASSOCIATION OF STREET SANITATION OFFICIALS, Chicago, Ill.; Annual Conference, Detroit, Mich., Jan. 9-10, 1928.

AMERICAN ROAD BUILDERS ASSOCIATION, Washington, D. C.; Annual Convention, Cleveland, Ohio, Jan. 9-14, 1928.

AMERICAN SOCIETY OF CIVIL ENGINEERS, New York City; Annual Meeting, New York City, Jan. 18-20, 1928.

ASSOCIATED GENERAL CONTRACTORS, Washington, D. C.; Annual Convention, West Baden, Ind., Jan. 23-27, 1928.

NATIONAL ASSOCIATION OF BUILDERS' EXCHANGES, Washington, D. C.; Annual meeting, Miami, Fla., Feb. 6-9, 1928.

ENGINEERING INSTITUTE OF CANADA, Montreal; Annual Meeting, Monday, Feb. 14-16, 1928.

AMERICAN CONCRETE INSTITUTE, Detroit, Mich.; Annual Convention, Philadelphia, Feb. 28, 29 and March 1, 1928.

AMERICAN RAILWAY ENGINEERING ASSOCIATION, Chicago, Ill.; Annual Convention, Chicago, March 6-8.

The International Association of Street Sanitation Officials has a long program of subjects for general discussion at the annual convention at Detroit, Mich., Jan. 9 and 10. The list is as follows: Street cleaning, E. C. Goodwin, New York, and W. J. Walsh, Minneapolis, Minn. Sewer maintenance and catch basin cleaning, E. E. Paffrath, St. Louis, Mo. Destroying and cutting weeds, A. B. Cook, Charlotte, N. C. Disposal of ashes and refuse, W. J. Galligan, Chicago. Snow removal, Geo. W. Dies, Toronto, Canada. Rubbish and ash collection, M. S. Murray, Kansas City, Mo. Street signs, L. W. Herzog, Albany, N. Y. Street parking in relation to street cleaning, E. A. Wood, Winnipeg, Canada. Utility excavations in streets, Robert B. Brooks, St. Louis. Street maintenance and repairs, I. M. Goss, South Bend, Ind. Cure of littering of streets and alleys, Joseph C. Powers, Atlantic City, N. J. Street design from a sanitary viewpoint, W. C. Earle, Pasadena, Calif. Training street cleaning personnel, J. P. Soderstrum, Rapid City, So. Dak. Salvage, Harrington Place, Detroit, Mich. The budget in relation to street cleaning, F. J. Altvater, Denver, Colo. In addition, there will be a report from the committee on garbage disposal. The secretary is A. M. Anderson, 10 So. La Salle St., Chicago.

The Associated Technical Societies of Detroit, at the December meeting elected officers as follows for 1928: President, Major John P. Hallihan, chief engineer, Rapid Transit Commission; vice-president, L. E. Williams; secretary (re-elected), E. L. Brandt. This association, representing fifteen local organizations, has co-operated with different city departments in preparing specifications, selecting engineers for vacancies in various city committees and commissions, and in selecting personnel and equipment for the technical departments of city educational institutions.

The District of Columbia section of the American Society of Civil Engineers, the Washington Society of Engineers and the Washington Post of the Society of American Military Engineers held a special joint meeting Dec. 17 at the U. S. Chamber of Commerce auditorium. The feature of the program was "The Mississippi River in Flood" by Major John B. Gotwals, Corps of Engineers, U. S. District Engineer at St. Louis. The talk was accompanied with both moving pictures and lantern slides illustrating rescue work, flood scenes and river conditions during the spring flood period.

The Engineering Institute of Canada will hold its next annual meeting in Montreal February 14-15.

Obituary

Lieut.-Col. Henry S. Spackman, former president of the engineering company which bore his name, and now the E. L. Conwell Co., Philadelphia, died Dec. 21 at the age of 61 years. Col. Spackman began his professional career with James W. Queen Co., Philadelphia. He was then successively employed by the Pennsylvania Railroad, on building construction for the state of Pennsylvania, by the Philadelphia Department of Public Works and by James H. Windrim as constructing engineer. In 1896 he helped organize and was a member of the firm of Lathbury & Spackman, which later became the Henry S. Spackman Engineering Co., engineers and consultants in physical and chemical analyses of structural materials. During the World War Col. Spackman was known chiefly for his work as chief of the cement section and as technical adviser to the Peace Commission.

D. W. Brunton, internationally known consulting engineer and inventor, known to the civil engineering profession principally through his work in tunneling and who had made Denver his home, died at the Mayo clinic at Rochester, Minn., Dec. 20, aged 78 years. Mr. Brunton had been in ill health several years. Mr. Brunton was born in Ayr, Ontario, June 11, 1849 and when 21 began his engineering apprenticeship under J. C. Buckley. He came to this country in 1873 and practically grew up in the mining industry of the West. With J. Vipond Davies and J. Wellington Finch Mr. Brunton was selected to locate the Moffat tunnel under James Peak in Colorado, now nearing completion.

Construction Equipment and Materials

A Section Devoted to What the Manufacturer Is Doing for the Engineer and Contractor

Concrete Road Yardage

For November the square yardage included in concrete pavement contract awards according to the Portland Cement Association was 5,102,195 for roads; 2,614,285 for streets, and 267,979 for alleys; or a total for the month of 7,984,459 sq.yd.

The accompanying table summarizes the statistics for the current year:

SQUARE YARDS OF CONCRETE PAVEMENT AWARDED DURING 1927

Month	Roads	Streets	Alleys	Total All Classes
Jan....	2,656,118	1,504,059	75,352	4,235,529
Feb	2,336,031	1,935,262	119,382	4,390,675
March.	5,134,974	3,866,102	298,667	9,299,743
April..	10,264,336	4,931,954	285,924	15,482,214
May..	8,234,755	5,601,627	397,220	14,233,602
June..	8,424,051	6,977,602	673,350	16,075,003
July....	7,298,618	4,903,789	412,721	12,615,128
Aug...	10,725,030	5,820,033	479,369	18,024,432
Sept...	6,872,398	4,365,135	343,270	11,580,803
Oct...	5,527,085	3,686,570	586,575	9,800,230
Nov....	5,102,195	2,614,285	267,979	7,984,459
Totals	72,575,591	46,206,418	4,939,809	123,721,818

Business Notes

Paradon Mfg. Co., Arlington, N. J., announces the appointment of the Pacific Water Works Supply Co., Inc., Seattle, Wash., as its representative in the Pacific northwest. The Chemical Equipment Corp., Los Angeles, Calif., has been appointed in a similar capacity for the states of California, Nevada and Arizona.

C. H. Keller, president of the **Contractors' Equipment Company**, Detroit, has for practically two years been operating an aeroplane in his travel to the plants of manufacturers whom he represents. The first year Mr. Keller, it is stated, covered between 15,000 and 20,000 miles by air, and this year will exceed this mileage. Recently Mr. Keller completed a 3,000-mile trip which took in stops at Chicago, Peoria, Cedar Rapids, Minneapolis, Oshkosh and back to Detroit.

Harnischfeger Sales Corp., Milwaukee, Wis., announces the establishment of a branch office in Cleveland, Ohio, with J. T. Conners in charge.

C. N. Thulin, vice-president, Duff Mfg. Co., Pittsburgh, has taken over the supervision of the eastern sales district in addition to the western sales district of which he has been in charge for several years. **W. G. Robb** has been appointed district manager of the New York district with headquarters in New York City. **E. E. Thulin** has been appointed district manager of the Chicago district with headquarters in Chicago. P. G. O'Hara, former vice-president in charge of the eastern district, has resigned to join the organization of the Vacuum Oil Co., New York City.

The Stuart S. Smith Co., 19th and Indiana Sts., San Francisco, Calif., has been appointed by The T. L. Smith Co. of Milwaukee as distributors of Smith mixers and pavers for the northern California and western Nevada territories.

Rollway Bearing Co., Inc., Syracuse, N. Y., announces the opening of an office in Pittsburgh, Pa., in charge of Samuel Farrell, for several years with the company at Youngstown, Ohio.

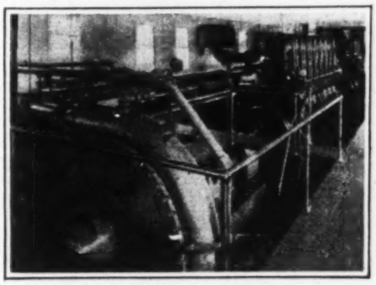
Pennsylvania Highway Department has recently placed an order for 36 trucks from the Four Wheel Drive Auto Co., Clintonville, Wis. At the present time the Pennsylvania Highway Department has approximately 89 four-wheel-drive trucks in its service.

Indiana Truck Corp., Marion, Ind., announces the appointment of Herbert H. Swiss as manager of its export department, with headquarters at the company's factory. Mr. Swiss was export manager for several years for the Republic Motor Truck Company, and served in the same capacity for the Ruggles Motor Truck Company for the past seven years.

New Developments

Diesel Dredge in Operation on New York State Barge Canal

A dredge has been added to the fleet in operation on the New York State Barge Canal powered with a solid injection diesel engine. The main unit is a four-cycle, single acting, De La Vergne vertical type, rated 500 b.hp. at 275 r.p.m. in eight cylinders, while the auxiliary unit is of three cylinders rated at 200 b.hp. at 277 r.p.m. Both engines have a 14½-in. bore and 18-in. stroke and are otherwise alike, thus greatly simplifying the matter of spare or repair parts. The speed of the main unit may be varied from the rated speed down to 90 r.p.m., through the aid of a throttle mounted on the governor column. A tachometer indicates the speed of the engine at all times.



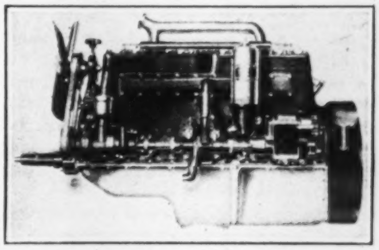
ENGINE ROOM WITH DIESEL ENGINE CONNECTED TO 15-IN. PUMP

Connected to the main unit through a heavy duty Francke flexible coupling is a 15-in. centrifugal dredge pump manufactured by the Morris Machine Co., Baldwinsville, N. Y. This unit is designed to handle 200 yd. of solids per hour when pumping to an elevation of 40 ft. through 2,400 ft. of 15-in. line.

The auxiliary engine drives a 130-kw. d.c. Westinghouse generator. Mufflers are installed in the exhaust line of each engine, while Reed air filters are used in the air inlet lines, the use of this latter equipment being found advisable as the dredge will often operate in sandy country. Engine jacket cooling water is circulated by motor-driven centrifugal pumps which take the water from the canal and pass it through the jackets after which it is run to waste overboard. Tanks, formed by bulkheads in the hull, hold approximately 32,000 gal. of fuel. The fuel system is equipped with jacketed lines and heating coils as well as duplex filters so that heavy fuel oil may be burned in the engines at any time.

New Line of Heavy-Duty Engines Designed with New Features

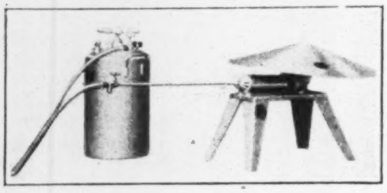
Seven bearing crankshafts, six cylinders in a single block, pump capacity of 70 g.p.m. to permit application of hot water heating systems, when used in bus service, are some of the features of the new line of heavy-duty engines put out by the Hercules Motors Corp., Canton, Ohio. This new line is known as the Y X series and is made in three sizes, all with 4¾-in. stroke, but with bores of 3¾ in., 4 in. and 4⅜ in. It is claimed by the manufacturers to be the first heavy-duty six-cylinder engine that will run continuously at high power at 1,800 r.p.m. Another new series of these engines, to be known as the W X, will shortly be put into production in which a stroke of 4¼ in. will be used with bores of 3⅜ and 3¾ in.



Careful consideration has been given in the design to accessibility and other factors making for ease of maintenance. Felt washers ordinarily used are eliminated, oil seals being provided at various joints. An oil filter of the built-in type is used. Further operating security is afforded by a hood surrounding the oil pump which is so arranged that if the screen clogs for any reason, oil can be drawn up over the edges of the hood and the supply is still continued. Alloy steel is used to a large extent for the important parts. The cylinder block is a semi-steel casting containing 1½ per cent nickel. Piston pins and valve tappets are molybdenum steel, while the valves are of the one-piece type, the exhaust being silchrome and the inlet nickel-chromium metal.

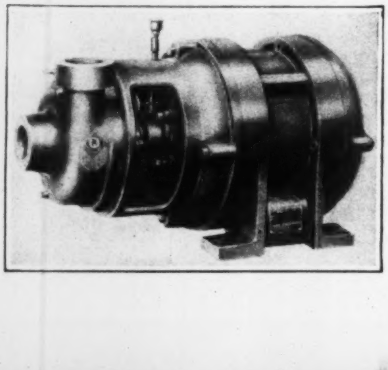
Salamander Is Operated By Light Furnace Oil

A new type salamander has recently been placed on the market by Littleford Bros., Cincinnati, Ohio, which is claimed to produce enough heat to replace from four to six salamanders of the old coke burning type. The new salamander consumes kerosene or a light furnace oil for fuel. The unit is simple to operate, being controlled entirely by a single valve adjustment. There are no smoke and no fumes to injure workmen. It is said that when used indoors the heater will not mar plastered walls. The flame is entirely contained beneath the hood so that danger from fire is eliminated. A special pan is also provided under the burner to prevent any possibility of oil dripping on the floor. A further safety feature is the arrangement of the legs so that the salamander will not upset if bumped. The new oil burning salamander is made in two sizes. Fuel consumption for the No. 1 is about one-half gallon per hour and for the No. 2 about ¾ gallons per hour.



Compact Centrifugal Pump Units Designed in Small Sizes

The centrifugal pumping sets, type SSU, recently brought out by the Allis-Chalmers Manufacturing Co., Milwaukee, Wis., are combined motor and pump units of compact, substantial design. Both the pump and motor parts are built and guaranteed by the same manufacturer. The unit is close coupled by fastening the pump impeller to one end of the extended motor shaft, the pump casing being bolted to a special integrally cast extension of one of the motor end housings. This arrangement is claimed to make the simplest possible construction and eliminates the base plate, coupling and pump bearings, at the same time assuring permanent alignment between the pump and motor.



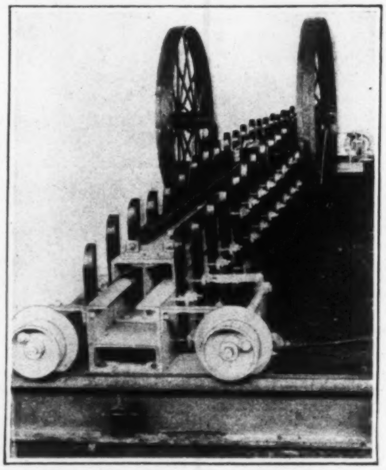
The motor bearings, which are the pump bearings as well, are of the oversize Timken tapered roller type mounted in dust and grease tight housings. The pumps are built in 1¼ in. x 1¼ in., 1½ in. x 1½ in., 2 in. x 2 in., and 2½ in. x 2½ in. sizes, and can be used with 1, 1½, 2, 3, 5 and 7½-hp. motors. The capacities handled range from 25 to 200 g.p.m. against heads of from 50 to 100 ft.

Diesel Operated Excavating Machines Announced

After experiments covering over four years, the Harnischfeger Corp. of Milwaukee, Wis., announces Diesel equipped excavators in 1 and 1¼ yd. sizes for shovels and draglines, and 1¼ and 1½ yd. sizes for rehandling clamshell service. The engines are of the full-Diesel four cylinder type and the fuel is injected mechanically. The engine may be started cold without priming or reheating. The manufacturers claim that the Diesel engine will take a sudden heavy load without slowing down as much as will a gasoline motor, and that it is this quality that makes the Diesel ideal for heavy duty work.

Subgrade Machine Operates On Road Form

There has recently been placed on the market by Ted Carr & Co., Chicago, a new subgrade machine known as a true grade scarifier. It is adapted to run on the forms and scarify the subgrade to an exact depth for highway construction. It is claimed that the machine will cut high places from the hardest subgrades, it being designed so that before any scarifier tooth can raise from the ground, it is necessary to lift half of the weight of the two-ton machine.



The frame is adjustable to different widths of road from 16 to 24 ft., and carries 47 double-end plow-steel scarifier teeth. These are so arranged that there is ample room for earth to pass between them, while at the same time they come in a new path on the return trip so that they have scarified the ground every three inches. Wheels aided by lift springs are provided at the center to enable the operator to raise the machine preparatory to turning it around or taking it from the forms.

Manufacturers and Trade Associations

Calendar

Annual Meetings

NATIONAL SAND AND GRAVEL ASSOCIATION, Washington, D. C.; Annual Convention, Detroit, Jan. 4-6, 1928.

ASSOCIATED EQUIPMENT DISTRIBUTORS, Milwaukee; Annual meeting, Cleveland, Jan. 6-7, 1928.

AMERICAN ROAD BUILDERS ASSOCIATION, Washington, D. C.; Annual Convention, Cleveland, Ohio, Jan. 9-14, 1928.

NATIONAL CRUSHED STONE ASSOCIATION, Washington, D. C.; Annual Convention, West Baden, Ind., Jan. 16-19, 1928.

NATIONAL PAVING BRICK MANUFACTURERS ASSN., Chicago; Annual meeting, Chicago, Jan. 25-26, 1928.

New Publications

Road Rollers—ERIE MACHINE SHOPS, Erie, Pa., has published a pamphlet describing its new gasoline operated tandem road rollers. The pamphlet, besides giving a number of illustrations of the machine in various circumstances of operation, includes detailed specifications of the roller and its operating mechanism.

Uses for Inks—CHAS. M. HIGGINS & Co., Brooklyn, N. Y., has prepared a 20-p. book entitled "Techniques," giving a number of outstanding artistic treatments of present-day illustrations produced by means of Higgins' drawing inks, both black and in colors. The works of a number of important artists and illustrators are included. The booklet has been prepared primarily as an aid to the architect, draftsman and architectural student, showing what can be accomplished by use of the company's inks.

Asphalt Plant—F. D. CUMMER & SONS Co., Cleveland, Ohio, has published a 23-page booklet, describing its stationary and portable asphalt plants. The booklet is really a list of specifications for each type of plant accompanied by illustrations, both of the complete units, and of the special parts.

Business Side of Construction

Facts and Events that Affect Cost and Volume

Publicly Owned Construction Projects Other Than Buildings Gained In 1927

Upward Movement Started In Spring of Current Year—Waterworks Alone Failed to Show Increase in Total Contract Value

THE total public contract awards for construction other than buildings during 1927, including November, amounted to $939,183,000 an increase of 16 per cent over the same period of 1926, according to statistics compiled by *Engineering News-Record*. The cumulated monthly totals through March of this year were slightly under last year, but beginning with April awards, 1927 has remained above the cumulated 1926 figures. Each month of 1927 has exceeded the corresponding month of 1926 except January, February, and July. June, 1927, was far ahead of June, 1926, about 60 per cent, while July of this year was only 30 per cent less than last year.

Of all awards, both public and private, 60 per cent has been for buildings during the eleven months of 1927. Only about 20 per cent of all public expenditures for construction is for buildings. The 80 per cent of non-building public contracts include waterworks, sewers, streets and roads, the majority of bridges and excavation and drainage projects, all Federal Government work and part of the general unclassified construction awards.

Waterworks awards during eleven months of 1927 are slightly less than last year but cumulated monthly totals showed this year to be in the lead at the end of March, June, and August.

Bridge contracts have exceeded 1926 since the fifth month by a conspicuous amount. Eleven months' total is about 65 per cent higher than the same period last year.

Construction of sewers has also gone ahead in larger volume than last year except for the first two months of the year. The total increase has been approximately 15 per cent over 1926 figures to December 1.

Cumulated totals of contracts for excavation and drainage work stands about 48 per cent higher than last year and in June, 1927, the totals were 150 per cent larger than during the first half of 1926.

Streets and roads have been contracted for in about the same amount each month as in 1926 and the eleven months' total for 1927 exceeds last year by only about 6 per cent.

Federal Government contracts are approximately at the same point as last year although totals through August and September of 1926 were considerably above 1927.

Unclassified public work has been contracted for in larger volume than last year by about 74 per cent. Thus it is seen that all classes of public construction except waterworks have been undertaken in 1927 in larger volume than last year.

Minimum in each class is described at the top of the following page.

PUBLIC BUILDING CONTRACTS COMPARED WITH CONSTRUCTION OTHER THAN BUILDINGS

(000 Omitted In Value)

1927	Public Contracts Excluding Building	Per Cent of Total Contracts	Public Building	Per Cent of All Public Contracts
January	$41,865	23	$22,574	35
February	29,775	17	13,374	31
March	84,093	31	13,490	14

Work In Foreign Fields During the Last Half of 1927

THE following tabulation of important construction projects awarded to American contracting firms, during the last six months of the current year, was compiled from items which appeared from time to time in the Construction News section of *Engineering News-Record*. The majority of the foreign jobs let during the half-yearly period were awarded by the Navy Department. The Lake Tsana dam ($20,000,000) awarded by the Abyssinian Government, was by far the most outstanding foreign project of the year. Canadian contracts are not included in the accompanying table. Totals for the Dominion, however, appear regularly, by classes, in the first issue of each month.

FOREIGN CONTRACTS AWARDED DURING THE LAST HALF OF 1927

Project	Date of Issue *E.N-R.*	Location	Owner	Contractor	Value
Barracks	July 7	Guantanamo, Cuba	Bureau of Yards and Docks, Navy Dept., Washington, D. C.	Donnell-Zane Co., New York, N. Y.	$13,828
Gasoline tank	Sept. 1	Guantanamo, Cuba	Bureau of Yards and Docks, Navy Dept., Washington, D. C	Austin Eng. Co., Inc., New York, N.Y.	10,200
Power plant	Sept. 8	Tokio, Japan	Nippon Elec. Co	H. K. Ferguson Co., Cleveland, O.	300,000
Hospital	Sept 22	Oahu, Hawaii	Schofield Barracks, U. S. Army	R. R. Ames, Honolulu, H. T	229,000
Tanks	Oct. 27	Aruba, Dutch West Indies	Anglo-Mexican Petroleum Co., Ltd. (Royal Dutch-Shell)	Chicago Bridge & Iron Works, Chicago, Ill	....
Chimneys	Nov. 3	Pearl Harbor, Hawaii	Bureau of Yards and Docks, Navy Dept., Washington, D. C.	Weber Chimney Co., Chicago, Ill.	15,365
Dam and highway	Nov. 17	Lake Tsana, Abyssinia, Africa; road from lake to Addis Ababa	Abyssinian Government	J. G. White Eng. Corp., New York N. Y.	20,000,000
Sugar cane mill	Nov. 17	Tarlac Province, Philippine Islands	Compania General de Tabaco de Filipinas, Barcelona, Spain	General Elec. Co., Schenectady, N.Y. and U. S. Steel Corp., New York, N.Y.	2,000,000
Factory and warehouse	Nov. 24	Yokohama, Japan	Ford Motor Co., Detroit, Mich	H. K. Ferguson Co., Cleveland, O.	1,000,000
Officers quarters	Nov. 24	Cavite, Philippine Islands	Bureau of Yards and Docks, Navy Dept., Washington, D. C	J. E. Grant, Manila, P. I	30,000
Quarters	Dec. 8	San Juan, P. R., U. S. Naval Radio Station	Bureau of Yards and Docks, Navy Dept., Washington, D. C	Benitez & Gautier, Santurce, P. R.	9,500
Barracks	Dec. 8	Pearl Harbor, Hawaii	Bureau of Yards and Docks, Navy Dept., Washington, D. C	C. A. Blume, San Francisco, Calif. R. E. Wooley, Honolulu, H. T.	444,415 108,000
Generating plant equipment	Dec. 15	Pearl Harbor, Hawaii	Bureau of Yards and Docks, Navy Dept., Washington, -. C.	Grace Bros. & Co., Honolulu, H. T.	$18,990
Refrigeration plant	Dec. 15	Pearl Harbor, Hawaii	Bureau of Yards and Docks, Navy Dept., Washington, D. C	Von Hamm-Young Co., Ltd., Honolulu, H. T	14,175

This Week's Contracts—With Comparisons

Minimum costs observed are: $15,000 for water-works and excavation, drainage, irrigation, levee, river and harbor projects; $25,000 for other public works; $40,000 for industrial and $150,000 for commercial, educational, institutional, religious and other buildings.

Week ended	Public Work	Private Work	Total U. S.
December 29, 1927.	$16,437,000	$64,165,000	$80,602,000
December 22, 1927.	23,599,000	41,777,000	65,376,000
December 30, 1926.	12,900,000	18,719,000	31,619,000
Total For Year			
1927	1,255,240,000	1,998,526,000	3,253,766,000
1926	1,089,155,000	1,764,692,000	2,853,847,000

E.N.-R. Index Numbers

On December 1, 1927

COST	VOLUME
203.90	272
Last Year 210.80	Last Year 211

The Index Numbers are published in detail and with charts in the first issue of each month. The Cost Index is given in full from 1903 through 1926, with a thorough explanation of its method of computation, and a graphic comparison with many other index numbers, in the 48-page pamphlet entitled Engineering News-Record Construction Costs.

Weekly Construction Market

*Ton. †Delivered to job. ‡280-lb. net. +Advance. —Decline.

DEMAND for heavy engineering construction in 1927 exceeded that of last year by at least 14 per cent, according to *Engineering News-Record* statistics, outlined in the table at the top of the page.

This year, as in 1926, public work constituted about 38 per cent of the total value of contracts let. The gain in privately owned projects was fully as heavy as that of public awards.

With wages of skilled building trades mechanics consistently above 1926 levels, materials prices have eased off sufficiently to give a general cost level that is approximately 1 per cent below the 1926 average. The *E. N.-R.* Construction Cost Index Number at the top of the page is based on 1913 as 100.

Contracts for public improvement cover water-works, sewers, bridges, streets, roads, and awards made by the Federal, state, county, or municipal authorities. Private projects consist mostly of industrial and commercial buildings, with a considerable number of hotels, apartments, educational, institutional, and religious structures. The minimum adopted in each class, as stated in the table, is necessary in order to exclude from the figures all jobs too small to be of interest to the engineer.

THIS limited price list is published weekly except in the first issue of each month and gives current prices on the principal construction materials in nine representative cities. Valuable suggestions on costs of work can be had by noting actual biddings as reported in the Construction News and Unit Prices sections following.

The first issue of each month carries complete quotations for all of the basic materials and for the rest of the important cities, also wage rates for the principal building trades and common labor. The last complete list will be found in the issue of Dec. 1, the next on Jan. 5. Explanation of prices contained in the table will appear from time to time in this section; last shown Dec. 22, 1927, p. 1026.

Price movements of the last week, sufficiently far reaching to have more than a local effect, were the increasingly upward tendencies shown by steel, other than sheets; the seasonal softening of portland cement quotations; and the slightly firmer postion of softwood lumber.

The brick price situation will improve, from the manufacturers standpoint, as seasonal curtailment in output reduces the present over-supply.

Weakness prevails in the pig iron market despite the increasing firmness of fabricated steel. Reinforcing bars, plates, and shapes hold firmly to the price of $1.80 per 100 lb., base, Pittsburgh, for carload lots or over.

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Terminal, Sacramento, Calif., San Francisco Produce & Provision Terminals, Inc., plans, $6,000,000.

Generating station, Chicago, Ill., Sanitary Dist., making plans, $6,000,000.

Sewers, St. Louis, Mo., Bd. Pub. Serv., takes bids in August or September, $3,360,000.

Warehouse and canning plant, Oakland, Calif., California Co-operative Producers, plans, $3,000,000.

Office, Newark, N. J., J. C. Eisele, Inc., having sketches made, $2,000,000.

Transmission line, Texas, West Texas Utilities Co., making plans, $2,000,000.

Sewers, Los Angeles, Calif., Los Angeles Co., made surveys, $2,000,000.

Bridge, St. Louis, Mo., takes bids in August, $1,500,000.

Hotel, St. Louis, Mo., Syndicate, making preliminary plans, $1,500,000.

Waterworks, Santa Barbara, Calif., City, plans, $1,498,000.

Theatre, Portland, Ore., Washington Theatre Enterprises, having plans prepared, $1,000,000.

Bids Desired

Club New York, N. Y., July 26, by New York Athletic Club, $4,800,000.

Apartment hotel, Chicago, Ill., Delaware Building Corp., taking bids, $1,500,000.

Bids Received

Auditorium, Cleveland, O., June 22, from Hunkin-Conkey Constr. Co., $1,749,000.

Contracts Awarded

Bank and office, New York, N. Y., Chase Nat'l. Bank, to C. T. Willis, Inc., $7,000,000.

College, Montreal, Que., Jesuit Fathers to A. Deschamps, $2,000,000.

College, Moraga, Calif., St. Marys College, to J. P. Brennen, Berkeley, $1,750,000.

Apartment, Pittsburgh, Pa., Morewood Gardens Co., to W. T. Grange Co., $1,400,000.

News of the Week

Waterworks

Proposed Work

Mass., Quincy (br. Boston)—Voted $15,000 bonds, new water service connections, etc. in various streets. Private plans.

Ga., Atlanta—W. Zode Smith, supt. Water Works Dept., soon takes bids extending and improving water system, pumping plants, power house, etc. $500,000. J. N. Eley, Atlanta Trust Bldg., engr.

Ga., Waycross—See "Sewers."

Ind., Evansville—Making surveys waterworks improvements. To exceed $15,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs.

Ia., Ogden—Voted $15,000 bonds, new deep well, pumping equipment, etc.

Mo., Sweet Springs—City, A. Harwood, clk., will not extend water system, construct reservoir, etc., at present time. J. W. Shickles & Co., 708 New York Life Bldg., Kansas City, engrs. This corrects report in June 30 issue.

Tex., Alamo Heights—Making plans waterworks improvements. $25,000. S. F. Crecelius, 201 Torcido Dr., San Antonio, engr.

Tex., Midway—Real Estate Bd., T. E. Ackers, et al, Jacksonville, take bids after July 10, distributing system, well, pumping equipment, etc., here. $35,000. Private plans.

Tex., San Antonio—See "Unclassified."

Okla., Anadarko — Making preliminary plans extending 14,500 ft. 4- to 8-in. c.i. mains in various streets. Election soon $35,000 bonds for same. C. Riggins, Anadarko, engr.

Okla., Mangum — Making estimates waterworks extensions. To exceed $50,000. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Mooreland—Soon takes bids complete waterworks. $35,000. V. V. Long & Co., 1300 Colcord Bldg., Oklahoma City, consult. engrs. Noted May 5.

Okla., Sentinel — Making preliminary plans new waterworks. $25,000. A. Winningham, city clk. Engineer not announced.

Calif., Monrovia—Voted $175,000 bonds, improving waterworks, etc. Noted Apr. 28.

Calif., Monrovia—Voted $220,000 bonds, laying pipe lines, purchasing lands, etc. H. S. Gierlich, city engr.

Calif., Santa Barbara—Making plans developing water supply, constructing tunnel through Santa Ynez Mts. and developing additional storage facilities in Santa Ynez water shed, $1,404,000, or storage reservoirs, and developing underground supply south of Santa Ynez range for emergencies and providing additional storage facilities in Santa Ynez watershed above Gibraltar Dam, $1,498,000. V. E. Trace, supt. water dept.

Calif., Santa Maria—City Trustees soon take bids 28,300 ft. 18 in. rein.-con. centrifugal (Hume process) rein.-con., electric welded steel 10 in. gauge, or Natl. lap-welded pipe. H. Neel, Jr., city engr.

Calif., Sebastopol—Voted $38,000 bonds, extending waterworks.

Calif., Shafter — Shafter Pub. Utilities Dist. plans election $300,000 bonds, drilling 2 wells and installing new mains in various streets.

Que., Huberdeau—Soon takes bids waterworks. C. C. Lersard, 33 Grande Allee, Quebec City, engr. and archt.

Ont., Thorold — Thorold Twp. plans waterworks. $90,000. W. Chipman, Mail Bldg., Toronto, engr.

Bids Desired

N. Y., New York — July 12, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Bainbridge, Bouck, Castle Hill, Croes, East Bay and Hollers Aves., etc.

Pa., Phila.—July 14, by Bureau Waterworks, Contrs. 805, 879, 884, 887, 888 and 889, also 8 in. high pressure fire service line, etc., in Sepviva St. from Susquehanna Ave. to Hagert St., Contr. 888.

THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.

Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.

La., Roseland—July 14, by Town Council, Town Hall, W. E. Palmer, mayor, waterworks. J. W. Billingsley, Interstate Bank Bldg., New Orleans, consult. engr. Noted Apr. 14.

Ky., Louisville — See "Contracts Awarded."

Wis., Norwalk—July 12, by V. C. Wruck, village clk., 12,450 ft. 6- and 8-in. c.i. pipe, fifteen 6 and one 8 in. gate valves, 26 hydrants, approximately 2,400 ft. 4 or 8 in. supply mains; 150,000 gal. concrete underground storage reservoir, concrete springhouse and 20,000 gal. clear water basin, or alternate bids drilling well. $35,000. Druar & Milinowski, Globe Bldg., St. Paul, Minn., engrs. Noted May [illegible].

Tex., Odessa—See "Unclassified."

Okla., Carter—July 12, by G. C. Mitchell, city clk., new waterworks, incl. 26,300 lin. ft. 2- to 6-in. pipe, 2 deep well pumps, etc. $31,000. Long & Co., Colcord Bldg., Oklahoma City, engrs. Noted May 26.

B. C., Vancouver—July 12, by City Council, one hundred 6 in. hub end gate valves. C. Brackenridge, City Hall, engr.

Contracts Awarded

Mass., Newton (Ind. br. Boston)—For 2,034 lin.ft. concrete culverts, for Laundry Brook, to J. MacDonald Constr. Co., 77 Summer St., Boston, $43,670.

N. Y., Hamburg — Bd. Village Trustees, filteration plant, to A. Phelps & Son, 5150 Braden St., Detroit, Mich., $73,591. Noted Apr. 21.

N. Y., St. George — N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Forest Ave., Hylan Blvd., etc., to Knight & DeMicco, Inc., 448 East Tremont Ave., New York City, $29,390. Noted June 16.

N. Y., Westfield — Bd. Water & Sewer Comrs., Easton Hall, 7,400 lin.ft. 14 in. c.i. waterpipe to United States Cast Iron Pipe & Fdry. Co., Burlington, N. J. Noted June 16.

Md., Baltimore—Bd. Awards, mains in Wagners Point and Fairfield Rd., to M. and J. B. McHugh, 5006 Wakefield Rd., for Mayor and City Council. $75,225. Noted June 9.

Va., Clarendon—Supervs. Arlington Co. constructing reservoir, to Pittsburgh-Des Moines Steel Co., Curry Bldg., Pittsburgh, $61,840.

La., Many—City Clerk, waterworks improvements, incl. well, to Layne-Louisiana Co., Lake Charles, $5,500; fire pumps and compressor, to Fairbanks-Morse Co., 1000 St. Charles St., New Orleans, $5,490; plant and pipe line, to Montgomery Constr. Co., Kaplan, $11,502; pipe, to Natl. Cast Iron Pipe Co., Santa Fe Bldg., Dallas, Tex., $14,223; tank and tower, to Pittsburgh-Des Moines Steel Co., Tuttle and Southwest 10th St., Des Moines, Ia., and valves, to Columbia Iron Wks., c/o Swanson McGraw, Inc., Balter Bldg., New Orleans, $2,151. Noted May 28.

Ky., Louisville—Louisville Water Co., 435 South 3rd St., J. J. Miller, pres., will construct 10,800 ft. 20- to 30-in. mains in western part city, by own forces. $114,000. Private plans.

Mich., Grand Haven—City, constructing filter plant, Div. A, to G. E. Tillman, Centralia, Ill., $57,653, engrs. est. $63,335; filter equipment and piping, Div. B, to Roberts Filter Mfg. Co., Darby, Pa., $24,940, engrs. est. $26,475. Noted May 26.

Ill., Chicago—Bd. Local Impvts., Room 207, City Hall, system c.i. supply pipes with castings, c.i. fire hydrants, and valves, brick basins, etc., in portions South Peoria, Summerset, North Natoma, Pratt, North Francisco, North Mozart, North Sacramento, and South Karlov Aves., South Sangamon, West 93rd and West 56th Sts.

TRADE "LEADITE" MARK

Registered U. S. Pat. Office

Only 51 days between the decision to build an emergency water works plant - - *and the finished job!*

- - the speed with which Leadite jointing can be accomplished contributed to this remarkable feat.

THE line illustrated here is 26,000 ft. of 12" pipe with LEADITE joints.

Owing to the emergency which arose in the city for which the installation was made no trenching could be attempted.

The line lies throughout its entire length on the surface of the ground without any bracing except at the bends.

After completion the line was tested to 260 lbs. pump pressure.

Specify and use
LEADITE
—it saves at least 75%

It is now under constant pump working pressure of 230 lbs. For over 30 years now, LEADITE has demonstrated by test and experience that it is absolutely permanent and secure.

Leadite is self-caulking and is so simple to use that the method of using it can be taught to even the most inexperienced help in a very short time.

Added to its speed and ease of use—Leadite saves at least 75% on account of saving in material and labor.

Be sure it is
LEADITE
and accept no imitations ~ ~ ~

Part of the 26,000 ft. installation, crossing an open field. Chas. E. Waddell & Co., Engineers.

The pioneer self-caulking material for c. i. pipe.
Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Waterworks (Continued)

to G. G. Anderson, Chicago; in portions Rogers, Petterson, Sauganash, North Keystone, North Karlov, North Kedvale, North Keeler, North Tripp, Kildare, Lowell, North Kostner, Granville and Glenlake Aves., to S. Ryan, 2927 West Congress St.

Ill., Galesburg—City, pumping station, Div. A, construction work, to Preister Constr. Co., Davenport, Ia., $27,880; Div. B, vitr. pipe and valves, to Roberts Filter Co., Darby, Pa., $10,980; Div. C, pumps, to Amer. Well Wks., Aurora, $10,540; and Div. D, plant equipment, to O. E. Ray, Abbington, $11,278. Grand total $60,678. Noted May 26.

Ia., Lisbon — C. R. Runkle, town clk., 75,000 gal. tank on tower, to Pittsburgh-Des Moines Steel Co., Tuttle and Southwest 10th Sts., Des Moines, $8,000; 9,000 ft. 4 in. and 1,000 ft. 6 in. c.i. pipe, 4 hydrants, 11 gate valves, etc., to P. Berg, Reinbeck, $12,000. Noted June 2.

Mo., Butler—City Clerk, 1 m.g. rein.-con. reservoir, 125 ft. diam. and 15 ft. deep, to Collins Constr. Co., Leavenworth, Kan., $15,000. Noted June 16.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, rein.-con. covers for four 275 x 600 ft. storage reservoirs at Bissells Point Waterworks Sta., and one 402 x 500 ft. at Baden Waterworks Pumping Sta., to F. A. Stiers, Garrison and Magazine Sts., $350,320 and $119,912 respectively. Engrs. est. $430,000 and $140,000 respectively. Noted June 2.

Tex., Fayetteville—Waterworks improvements, incl. 15,655 lin.ft. 2- to 8-in. c.i. pipe, 50,000 gal. tank on 100 ft. tower, 100 g.p.m. pump and motor, etc., to W. G. Davis, 509 North Texas Bldg., Dallas, $28,823. Engrs. est. $30,000. Noted Feb. 3.

Tex., Houston—Water System, incl. 50,000 gal. tank, 59,000 gal. ground storage pumps, air compressor, 3,000 ft. 8 in. and 40,000 ft. 2 in. mains, to Utilities Constr. Co., Houston, $53,000.

Tex., Lockney—Waterworks extensions, etc., to G. E. Prendergrast & Co., 2142 Ave. H Wichita Falls, approximately $25,000. Noted Mar. 17.

Tex., Perryton — Waterworks improvements, incl. 250,000 gal. concrete reservoir, to H. C. Burt, Hutchinson, Kan., approximately $9,950. Noted June 16.

Tex., South Houston — For 50,000 gal. tank, 59,000 gal. ground storage, 3,000 ft. 8 in. c.i. pipe and 40,000 ft. 2 in. pipe, to Utilities Constr. Co., Houston, $53,000. Engrs. est. $55,000.

Calif., Monterey Park—To Elliott & McKenna, Balisle, 2 m.g. concrete reservoir $20,140, grading roadway $150,380 ft. 10 in. cement pipe $228, etc. Noted June 2.

Sewers

Proposed Work

Mass., Revere—Plans sewers, etc. in various streets. $26,950 appropriated. Private plans.

Ky., Southgate—Plans 15,000 ft. sewers in various streets. $80,000. E. E. Nepper, 128 Walnut St., engr.

O., Alliance—Making plans sewage disposal plant. G. B. Gascoigne, Leader Bldg., Cleveland, engr.

O., Oxford—Making plans approximately 4 mi. 10, 15 and 20 in. vitr. sewer in section village South of High St. and between Oak and College Aves. $50,000.

Mich., East Lansing—Made plans 7,400 ft. 24 and 30 in. rein.-con. interceptor and sewage treatment works. Hubbell, Hartgering & Roth, 2640 Buhl Bldg., Detroit, engrs. $100,000.

Mich., Grosse Pointe Farms (mail Grosse Pointe)—Making preliminary plans trunk sewer and 24 and 48 in. sanitary collector, also temporary pumping station. $425,000 bond election soon for same. Hubbell, Hartgering & Roth, 2640 Buhl Bldg., Detroit, engrs.

Mich., New Boston—Wayne Co. (Detroit), G. A. Dingman, drain comr., making preliminary plans approximately 7,500 ft., 30 and 42 in. rein.-con. drain and concrete tank, here. $100,000. F. W. Little, Wyandotte, engr. Hubbell, Hartgering & Roth, 2640 Buhl Bldg., Detroit, consult. engrs.

Ill., Belleville—Made plans intercepting sewers in various streets. $100,000. Pearce, Greeley & Hansen, 6 North Michigan Ave., Chicago, engrs.

Ill., Brookport—Making plans new sewerage system. $25,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs.

Ill., Edwardsville—Takes bids about Aug. 15, 12,345 ft. 10- to 18-in. vitr. clay sewers, 536 ft. 12 and 14 in. c.i. pipe, 35 manholes, 2 septic tanks, 48 ft. diam. and 31 ft. deep, etc., also 6,500 cu.yd. grading various streets. $52,464. Sheppard & Morgan, Edwardsville Bank Bldg., engrs. Noted Apr. 21.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, takes bids in August or September, constructing section River Des Peres Sewer Project, incl. two 29 x 25 ft. adjacent rein.-con. horseshoe pipes in covered ditch, and short connection with Union Blvd. Sewer; later takes bids 1 mi. section same sewer, incl. 29 x 25 ft. rein.-con. horseshoe through Forest Park between Union and Skinker Blvds.; also plans 1 mi. section same sewer replacing River Des Peres Project between Skinker Blvd. and city limits. $3,360,000. W. W. Horner, 300 City Hall, engr.

Tex., Amarillo — Making plans sewage disposal plant. $300,000. H. B. Jones, Amarillo, engr. Noted June 16.

Tex., Ft. Worth—City, c/o O. E. Carr, mgr., making surveys, etc., enlarging disposal plant from 8 m.g. to 20 m.g. capacity. $50,000. D. L. Lewis, city engr.

Tex., Midway—Real Estate Bd. T. E. Ackers, et al, Jacksonville, take bids after July 10, sewers in various streets, here. $40,000. Private plans.

Okla., Ada—Soon takes bids sewage disposal plant. $50,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs. Noted May 5.

Okla., Mooreland—Soon takes bids complete sewerage system and disposal plant. $40,000. V. V. Long & Co., 1300 Colcord Bldg., Oklahoma City, consult. engrs.

Calif., Los Angeles—Los Angeles Co. made surveys storm drain to serve Pasadena, South Pasadena, Alhambra, etc. $2,000,000 or more.

Calif., Ukiah—Voted bonds to exceed $25,000, extending sewerage system. Noted July 15.

Ont., Grimsby—Making plans sewers in down town district. $100,000. F. A. Dallyn, 71 King St. W., Toronto, engr.

Bids Desired

Mass., Lakeville—July 11, by Commissioner Pub. Health, 5,500 ft. 10 in. pipe, manholes and connections to buildings and existing sewers and rein.-con. dosing tank, 14 x 20 x 5½ ft. with wooden building over it, 6 sand filters each 80 ft. square with embankments and under drains, 1,100 ft. ditch, installing gates, valves, and appurtenances, etc., at sewerage disposal works Lakeville Sanatorium, for Commonwealth of Massachusetts.

R. I., East Providence—July 18, by Com. on Sewage Disposal of Town East Providence, Town Hall, sewage disposal plant. City Wastes Disposal Co., 45 7th Ave., New York City, engrs.; adv. E. N.-R. July 7.

N. Y., Long Island City—July 11, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., sewers in Queens Blvd., Hicks Pl., Middleburgh, Potter, 45th, 114th, Sayres, and Brinkerhoff Aves., Stone, 74th, 76th and 2nd Sts., etc.

N. Y., Syracuse—July 11, by Bd. Contr. & Supply, City Hall, sanitary sewer in Atkinson, Euclid Sts., etc. N. F. Pitts, Jr., City Hall, engr.

Ky., Southgate (mail Newport)—July 14, by City Clerk, City Hall, 22,700 ft. 6- to 10-in. sanitary sewers in various streets. $80,000. E. E. Nepper, 128 Walnut St., engr.

O., Garfield Heights (br. Cleveland)—July 8, by Village, sewer in portions Sects. 1, 6, 7, 9, 4, 3 and 10. To exceed $50,000. R. Munz, Town Hall, Cleveland, engr.

Mich., Grand Rapids—July 13, by F. H. Locke, City Hall, 8,200 ft. 42- to 72-in. vitr. crock, and concrete or brick sewers, etc., in North End Sewer System, A-23, Comstock Slight Blvd.

Tex., McLean—July 20, by W. E. Bogan, city clk., 46,700 ft. 6- to 15-in. vitr. clay pipe and disposal plant. Hasie & Rady, Clarendon, civil engrs. Noted Mar. 24.

Tex., Odessa—See "Unclassified."

Wash., Camas—July 15, by City Comn., 3 mi. 6 to 18 in. and outfall sewer in various streets. $50,000. Stevens & Coon, Spalding Bldg., Portland, Ore., engrs.

Contracts Awarded

N. Y., Brooklyn—J. J. Byrne, pres. Brooklyn Boro, Boro Hall, sewer in Bay 10th St., to Murphy Richmond, Inc., 50 Court St., $11,733; in Linden Blvd., to Delmel Constr. Co., 7624 15th Ave., $9,470; and in East 3rd St., to Paulsen Constr. Co., 9303 Sutphin Blvd., Jamaica, $35,883. Grand total, $57,086. Noted June 9.

N. Y., Long Island City—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., sewer in Ramsey St., to J. Gallo, 169-10 State St., Flushing, $41,258; Ryerson St., to E. Kelly, Jr., Flushing, $4,114; Sutphin Blvd. and Tuckerton St., to A. Paino, 9315 Union Hill, Jamaica, $339,818 and $250,351 respectively. Grand total $635,541. Noted June 16.

N. Y., New York — H. Bruckner, pres. Bronx Boro, Crotona Park, 3rd and Tremont Aves., sewer in East 234th St., to A. Spadaro, 2883 Coddington Ave., $2,368; in Timpson Pl., to F. Gabrielle, 2750 Creston Ave., $9,240; and in Cruger Ave., to A Caserts, 2442 Barnes Ave., $11,713. Grand total $23,321. Noted June 16.

Pa., Pittsburgh — For 9- to 20-in. terra cotta sewers in Fernwald Rd., Sunnyside St., Tropical and Orangewood Aves., to F. Mannella & Sons, 1507 North Lang Ave., $33,941 engrs. est. $35,000; also 54 in. brick and 72 in. brick and concrete sewers in Bates St., to M. O'Herron Co., South McKean St., $59,825.

Ga., Claxton—C. E. DeLoach, city clk., approximately 26,650 lin.ft. 8- to 15-in. sewer, etc., in various streets, to Eatman Plumbing Co., 221 Jackson St., Albany, $25,000. Engrs. est. $25,000.

Miss., Oxford—See "Streets and Roads."

O., Cleveland—For 2,450 ft. 15- to 18-in. vitr. tile sewer in Bennington Ave., to W. B. Smith, 1350 West 89th St., $11,603, 2,565 ft. 12- to 24-in. Carrington Ave., to Kassouff & Co., 2600 Althen Ave. $19,686, 1,915 ft. 12- to 18-in. Kerton Ave., and 1,860 ft. 12- to 24-in. Sprecher Ave., to Ciraci Constr. Co., 3305 Milverton Rd., Shaker Heights $8,587 and $9,236 respectively; 1,600 ft. 12- to 24-in. Wainfleet Ave., and 390 ft. 12 in. West 133rd St., to N. J. Galvin, 16311 Saranec Rd., Cleveland, $6,627 and $1,170 respectively. Grand total $56,909. Noted June 9.

Mich., Detroit—J. Reid, comr. Pub. Wks., to Detroit Drainage Constr. Co., Meyers Rd., 4,188 ft. 6½ to 3½ ft. egg shaped sewer in Grand River Arm, Sect. 2 West of Mill Rd. Sewer $94,289, 4,957 ft. 8 ft. cylinder to 28 x 42 in. egg shaped in Grand River Arm Sect. 1 West of Mill Rd. Sewer $164,924, 2,492 ft. 6 to 2½ ft. cylinder, 602 ft. 32 x 48 in. egg shaped, etc. in West Chicago Arm West of Hubbell Ave. Sewer $62,749, 4,526 ft. 7½ to 4 ft. in Schoolcraft Arm Fast of River Rouge $109,509, and 4,448 ft. 7½ ft. to 30 in. cylinder, 605 ft. 36 x 54 in. egg shaped, etc. in West Chicago Arm East of Hubbell Ave. Sewer $127,306; to P. Cappello, 9329 Kresge Bldg., 5,389 ft. 5½ ft. to 28 x 42 in. egg shaped, 1,808 ft. 12- to 24-in. crock, etc. in Fullerton Arm East and West of Hubbell Sewer, $98,455; to Black & Gargaro, Dept. Pub. Wks., 5,229 ft. 7 to 4½ ft. in Schollcraft Arm West of Mill Rd. Sewer $139,534, and 2,285 ft. 6½ to 3½ ft. cylinder in Lyndon Ave. Arm West of Mill Rd., Sewer $64,496; to T. D. Nolan, 1401 Plymouth Rd. 1,582 ft. 5 ft. cylinder in Saunders Ave. Arm $47,687, 1,032 ft. 4 ft. cylinder and 968 ft. 32 x 48 in. egg shaped in South Coolidge Arm East of Liddesdale Sewer $50,668, also 1,277 ft. 26 x 54 in. egg shaped and 2,527 ft. 4½ to 3½ ft. cylinder in Puritan Arm East and West of Hubbell Sewer $78,609; to S. A. Healy, 1007 Amer. State Bank Bldg., 4,707 ft. 7½ to 6 ft. cylinder, etc. in Six Mile Rd. Sewer Sect. 2 $123,330, and 4,903 ft. 11½ to 7½ ft. cylinder, etc. in Six Mile Rd. Sewer Sect. 1 $241,535; to J. Porth & Son, Detroit, 4,670 ft. 7½ to 4½ ft. cylinder, 416 ft. 40 x 60 in. egg shaped and 25 ft. 10½ ft. cylinder, etc., in Lasher Rd. Arm North of Six Mile Rd. Sewer $141,672; to A. Rossi, 5307 Pennsylvania Ave., 7,722 ft. 72 x 42 in. cylinder and 30 ft. 28 x 42 in. egg shaped, etc. in Puritan Arm East and West of Mill Rd. Sewer $141,082; to J. Loguer, Detroit, 884 ft. 5 ft. cylinder, 665 ft. 32 x 42 in. and 684 ft. 28 x 42 in. egg shaped, etc. in Visger Arm East and West of Liddesdale Sewer $46,399; and to City, Dept. Pub. Wks., 2,782 ft. 6 to 4½ ft. cylinder, etc. in South Coolidge Arm West of Liddesdale Sewer $100,885, and 4,259 ft. 6½ to 5 ft. and 25 ft. 9½ ft. cylinder, etc. in Cullen-Fort Arm Liddesdale Ave. Sewer $174,127. Grand total $2,007,256.

Mich., Pontiac—H. A. Maurer, city clk., constructing Imhoff tank and junction chamber addition to sewage disposal plant, to Culbertson & Kelly, 876 West Milwaukee St., Detroit, $44,145. Noted May 26.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., to Zimmermann & Zimmermann, Milwaukee, sewers in 13th Ave. $8,709, 35th St. $619, Forest Pl., 36th, 38th, 39th, Toronto and Montreal Sts., $14,616; to Wenzel & Henoch Constr. Co., 49th and State Sts. Barker St. $307, and Pennsylvania Ave. $350; to A. H. Koch, Milwaukee, Roosevelt Dr., $2,013; and to Mierswa Constr. Co., 582 20th St., 33rd Ave. $3,206. Grand total $29,820.

Mo., University (Sta. St. Louis)—Sewers in Shaftsbury Heights Dist. 63, 7,500 cu.yd.

INDEPENDENT
Reinforced
Concrete

PIPE

for PERMANENT SEWERS

—and *Profitable* Contracts

THE city wants a *permanent* sewer, and the contractor wants a *profitable* job! Both are made certain when the specifications call for INDEPENDENT Reinforced Concrete Pipe.

Permanence in the completed sewer is assured by the proven durability of concrete— plus these "Independent" features; accurate reinforcing, quality materials, close inspection, expert supervision and careful curing of finished pipe.

Profit for the contractor is provided by low first cost, prompt delivery, speed and economy in laying, easy-to-seal joints, and the full cooperation of our concrete pipe specialists on every job.

Write, wire or phone us for information or estimates on your next concrete pipe sewer project.

INDEPENDENT CONCRETE PIPE CO., 202 N. West St., Indianapolis, Ind.

INDEPENDENT

Reinforced Concrete Pipe

Sewers (Continued)

Class A, 700 cu.yd. Class B, and 100 cu.yd. Class C excav.; 542 ft. 42 and 51 in. vitr. segmental block two-ring complete; 4,856 ft. 8- to 27-in. vitr. clay and 2,280 ft. 6 and 8 in. lateral extensions to curb, etc., to Grant & Meinert, Fullerton Bldg., St. Louis $23,711; also granitoid sidewalks on Etzel Ave. between Ferguson and Pennsylvania Aves., to Fehlig & Ferrenbach, Inc., 3500 Hickory St., St. Louis, $1,858.

Calif., Gilroy—To Oakland Sewer Constr. Co., 354 Hobart St., Oakland, pipe extensions $12,842, irrigation pipe, etc. $9,265, and laying 1,454 ft. 8 in. vitr. or concrete pipe line $1,156; also to J. Currie, 1100 Peninsula Ave., Burlingame, disposal plant, etc. $28,235. Grand total $51,498. Noted June 16.

Calif., Los Angeles—City Harbor Dept., for Fish Canneries Sewer, 2,925 ft. 24- to 36-in. light rein.-con. pipe under railway tracks, etc., to J. Grabovich, Hibernian Bldg., $26,579. Noted Apr. 28.

Waste Disposal

Proposed Work

N. J., Elizabeth — Bd. Council Bureau Pub. Wks., City Hall, plans garbage incinerator. $250,000. Engineer not selected. Owner requests interested contractors to communicate with them.

Bids Desired

Ill., Lake Forest—July 22, by Mayor & City Council, at office J. F. King, city clk., alternate bids on Incinerator 1; incl. 2 unit, 10 ton capacity each, in 12 hours, brick and concrete building for same with fuel storage space, brick chimney, etc.; Incinerator 2, 2 unit 7.5 ton capacity, brick and concrete building for same and chimney built for additional 7.5 ton additional unit, coal storage space, etc.; Incinerator 3, 1 unit 20 ton capacity in 12 hours, brick and concrete building for same, coal storage space, brick chimney, etc.

Contracts Awarded

N. J., Paterson — Bd. Pub. Wks., City Hall, furnaces and flues for incinerator plant, to Hiler Eng. & Constr. Co., 122 Livingston St., Brooklyn, $108,964. Noted Apr. 20.

Bridges

Proposed Work

Ga., Augusta — State Hy. Dept., East Point, Ga., and State Hy. Dept., Columbia, S. C., making plans 3 span 1,882 ft. steel and concrete bridge over Savannah River, at Fureys Ferry, near here, Richmond Co. $250,000.

Ga., Fitzgerald—E. M. Elliott & Associates, 3628 West 64th Pl., Chicago, Ill., making preliminary surveys bridge over Okmulgee River at Lampkins Old Field Ferry, near here.

Ill., Chicago — Cook Co. Hy. Dept., County Bldg., made plans widening 3 span bridge, incl. roadway and sidewalks on each side over Des Plaines River, at Grand Ave. $40,000. G. A. Quinlan, County Bldg., engr.

Missouri—State Hy. Comn., Jefferson City, making plans two 12 ft. rein.-con. slab, one 40 and two 35 ft. rein.-con deck girder spans, etc. in Audrain Co.; one 35 ft. rein.-con. deck girder, two 6 ft. and two 20 ft. rein.-con. slab spans, etc., Bollinger Co.; 40 ft. rein.-con. deck girder span, etc., Cooper Co.; two 12 ft. and seventeen 20 ft. rein.-con. slab, two 25 ft. rein.-con. deck girder, four 70 ft., one 90 ft. and one 100 ft. steel truss spans, etc. in Chariton Co.; two 5 ft. rein.-con. slab, two 35 and four 50 ft. rein.-con. deck girder spans, etc. in Greene Co.; one 8 ft., two 12 ft., and one 16 ft. rein.-con. slab three 40 ft. and two 45 ft. rein.-con. deck girder spans, etc. in Lawrence Co.; two 12 ft. rein.-con. slab and one 80 ft. steel truss spans, etc. in Pike Co. T. H. Cutler, ch. engr.

Mo., St. Louis—Takes bids in August, steel and timber railroad approach to St. Louis Municipal Bridge, here. $1,500,000.

Tex., Lynchburg—Harris County Bridge Co., Houston, plans 3 span 630 ft. bascule bridge, here. $500,000. J. B. Strauss, 311 Sheridan Rd., Chicago, Ill., engr.

Okla., Binger—State Hy. Dept., Oklahoma City, making preliminary plans 3 span 225 ft. steel truss bridge on piers over Pond Creek, on Highway 41, Caddo Co., near here. $40,000. C. R. Mindigo, Capitol Bldg., Oklahoma City, engr.

Okla., Blackburn—Pawnee Co. (Pawnee) making preliminary plans 3 span 240 ft. steel truss bridge on concrete piers over Black Bear Creek, near here. $35,000. O. F. Sewell, Pawnee, engr.

Okla., Carter—State Hy. Dept., Oklahoma City, making preliminary plans 1 span 90 ft. steel truss bridge on piers over Elk River, on Road 41, Beckham Co., near here. $40,000. C. R. Mandigo, Capitol Bldg., Oklahoma City, engr.

Okla., Cordell—State Hy. Dept., Oklahoma City, making preliminary plans 4 span 360 ft. steel truss bridge on piers over Washita River, on Road 41, Washita Co., east of here. $50,000. C. R. Mandigo, Capitol Bldg., Oklahoma City, engr.

Calif., Riverside—City, defeated $105,000 bonds, constructing Victoria Ave. Bridge. Noted Mar. 3.

Calif., Freeport (mail Sacramento) — Sacramento Co. (Sacramento), and Yolo Co. (Woodland), making plans steel bascule type bridge over Sacramento River, here. $200,000. C. Deterding, Sacramento, surv. former and A. G. Proctor, Woodland, surv. latter counties. Noted Apr. 28.

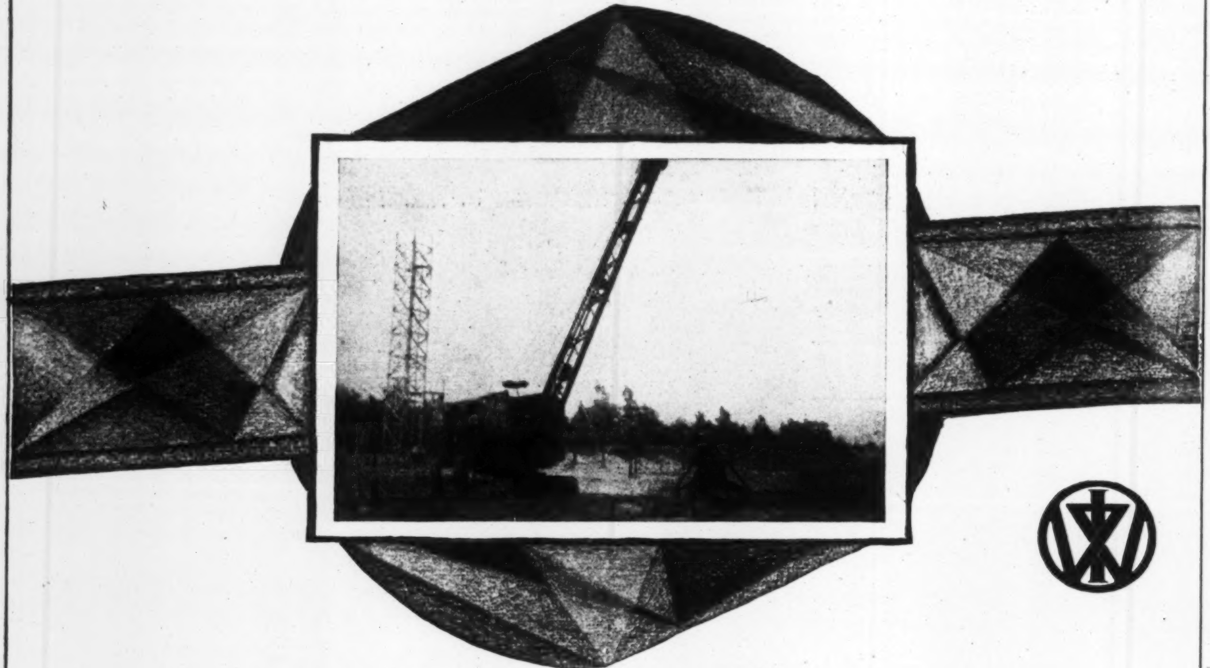
Dams

Proposed Work

Mass., East Walpole—Bird & Sons making plans concrete dam. $25,000. Monks & Johnson, 99 Chauncy St., Boston, engrs.



IT'S A KNOWN FACT

IT IS a known fact that an INDUSTRIAL crane, whether it be crawler, rail crane or wrecker, will fulfill your highest expectancy for service and resulting profits.

The service and profit that comes to the INDUSTRIAL owner is due to the extensive research made by our engineers for the *right material* and the design that puts that material in the *right place*. Maintaining a high standard of quality of all materials put into INDUSTRIAL products makes for greater stamina and longevity. Ask any owner, he knows!

Write our nearest branch office for further details or demonstration.
Write or call now!

Crawling Tractor Cranes, Shovels, Draglines, Locomotive Cranes, 5 to 75 tons, Wrecking Cranes 75 to 200 tons, Freight Cranes, Transfer Tables, Railsaws, Pile Drivers, Clamshell Buckets, Steam Pile Hammers.

Subway—Phila., Pa.—July 19, by H. E. Ehlers, dir., 1211 Chestnut St., constructing approximately 3,020 lin.ft. South Broad Street Subway, Contr. 109; adv. E. N.-R. June 30 and July 7.

Power and Light Extensions, etc.—Batesville, Ark.—See "Contracts Awarded."

Grain Terminal—St. Paul, Minn.—July 12, by A. E. Eggert, city purch. agt., grain terminal, incl. facilities for loading bulk and sacked grain, also incline trestle type cradle and wharf barge, trackage, etc. on Mississippi River levee near Chestnut St. $150,000. G. M. Shepard, city engr.

Transmission Line—Texas—See "Contracts Awarded."

Land Development—Odessa, Tex.—Wink Townsite Co., Inc., c/o J. T. Cross, pres., taking bids developing 650 acres land into new townsite, incl. waterworks $35,000, sewers $40,000, and paving $75,000, approximately 10 mi. from here. Private plans.

Ramp and Loading Stations, etc.—Portland, Ore.—See "Bridges."

Contracts Awarded

Wharf—Boston, Mass.—Central Wharf Co., 37 Central Wharf, for 36 Central Wharf, timber, to L. D. Willcutt & Sons, 146 Summer St. Engrs. est. $25,000.

Comfort Station—Lynn, Mass.—Bd. Park Comrs., A. T. Comstock, chn., concrete comfort station, Strawberry Ave., to P. Barker, 13 Arlington St. Engrs. est. $25,000. Noted June 30.

Heating, Ventilating, etc. — Kingston, R. I.—Bd. Educ., State House, Providence, heating and ventilating in engineering building, College Grounds, to Files Eng. Co., 131 Bourn St., Providence, $19,248. Engrs. est. $25,000. Noted June 9.

Fences—Providence, R. I.—Water Supply Bd., 23 mi. Knox type wire fence, concrete posts about Scituate Reservoir, to R. A. Bergeson, 41 Baxter St., Woonsocket, $66,491. Noted June 9.

Athletic Field—East Orange, N. J.—Bd. Recreation, City Hall, grading, cinder track, house, etc., here, to Potterton Hayes & Smith, 215 West 28th St., New York City. Engrs. est. $25,000.

Bath House—Phila., Pa.—Stewardson & Page, archts., 315 South 15th St., 2 story and basement, 52 x 53 ft., rein.-con. and brick, plain foundation, 1808-14 East Hazzard St., to Townsend, Schroeder & Wood, Drexel Bldg., for Public Bath Assn. of Phila., 718 Wood St. Noted June 16.

Stadium — Huntington, W. Va. — Park Comn., (1st unit) concrete and steel stadium Charleston Ave. and 15th St., to Rust Eng. Co., 311 Ross St., Pittsburgh, Pa., $90,000. Noted Mar. 24.

Sand Bins, Sand Dryer and Compressor House—Mendenhall, Miss.—Gulf & Ship Island R.R. Co., c/o Illinois Central R.R. Co., 135 East 11th Pl., Chicago, Ill., elevated steel dry sand bins, sand dryer and compressor house, cinder pits, also sewer and water facilities, etc., here, to Zitterell-Mills Co., Webster City, Ia.

Coal Dock—Cincinnati, O.—Cleveland, Cincinnati, Chicago & St. Louis R.R., H. Baldwin, ch. engr., 230 East 9th St., 1 story coal dock, rein.-con., plain foundation, Hillside Ave., to Ogle Constr. Co., 28 East Jackson St., Chicago, Ill., $40,000.

Coal Mine Tipple — Harrisburg, Ill. — O'Gara Coal Co., 310 South Michigan Ave., Chicago, 4 track tipple and facilities for screening, picking and refuse disposal for 3,000 ton capacity per day, also four bin rescreener making sizes under 2 in. and facilities handling any commercial size coal for local trade, truck loading, steel and concrete, to Allen & Garcia Co., 21 East Van Buren St., Chicago; 300 tons structural steel, to Continental Bridge Co., 53 West Jackson Blvd., Chicago.

Culvert—Iowa—See "Bridges."

Power and Light Extensions etc.—Batesville, Ark.—Arkansas Power & Light Co., Pine Bluff, will extend 110 kv. system to here, large transformer station, extend electric distribution system to industries adjacent to Batesville, also extensions and replacements for water and light distribution systems here, by own forces. $750,000. Noted June 23.

Coaling Station — Bonne Terre, Mo. — Mississippi River & Bonne H. Schanti, ch. engr., 200 ton rein.-con. automatic electric conveyor type coaling station, here, to Fairbanks, Morse & Co., 900 South Wabash Ave., Chicago, Ill.

Transmission Line—Texas—Texas Electric Serv. Co. will build 100 mi. transmission line between Wichita Falls and Burkburnett, by day labor. $275,000. Private plans.

Transfer Shed, etc.—Corpus Christi, Tex.—Nueces Co. Navigation Dist., concrete, brick and steel addition to transfer sheds and warehouse, to Sumner Sollitt Co., c/o Natl. Bank of Commerce Bldg., San Antonio, $102,000.

Materials

Proposed Work

Pipe—Santa Cruz, Calif.—R. S. Tait, city water supt., plans purchasing 1,000 ft. 10 in. water pipe. J. K. James, city engr.

Bids Desired

Granite Blocks—New York, N. Y.—July 13, by J. Miller, pres. Manhattan Boro. Municipal Bldg., 50,000 special 5 in. granite paving blocks.

Frogs, Switches, etc.—Phila., Pa.—July 11, by C. E. Walsh, purch. agt. Pennsylvania R.R. Co., 15 North 32nd St., West Phila., frogs, switches, crossings, gauge rods, etc., Contr. 86-1927.

Pipe—Cleveland, O.—July 8, by City, 100 tons ⅝ in. and 10 tons 1 in. lead pipe, also 835 tons 3- to 60-in. c.i. pipe.

Lighting Posts and Cable — Cushing, Okla.—City in market 200 "White Way" lighting posts and 19,000 ft. armored cable. L. A. Crenshaw, mayor.

Bids Received

Ties and Timber—New York, N. Y.—Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., July 1, supply untreated ties and timber for use in constructing 14th St.—Eastern Line (Order 18), from R. D. Walker Lumber Co., 1st Natl. Bank Bldg., Mobile, Ala., $4,767. Noted June 23.

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Coach plant, Pontiac, Mich., Yellow Truck & Coach Mfg. Co., plans, $8,000,000.

Club, Cleveland, O., Town & Country Club Co., having plans prepared, $3,000,000.

Paving Ft. Myers, Fla., making plans, $2,000,000.

Passenger station Phila., Pa., Phila. & Reading R.R. Co., having plans prepared, $2,000,000.

Apartment, Chicago, Ill., W. O. Bannerman & Co., having sketches made, $1,500,000.

Apartment, Jersey City, N. J., D. Lerner had plans prepared, $1,500,000.

School, Glendale, Calif., Glendale Union High School Dist., voted bonds, $1,400,000.

Hotel, Harlingen, Tex., Syndicate, plans, $1,200,000.

School, Vancouver, B. C., soon takes bids, $1,135,000.

School, etc., Rock Island, Ill., Bd. Educ., having preliminary plans prepared, $1,000,000.

Waterworks, Eugene, Ore., making plans, $1,000,000.

Hotel, Rockford, Ill., Rockford Hotel Co., had plans prepared and takes bids about Aug. 1, $1,000,000.

Loft, Phila., Pa., B. F. Cohn, having plans prepared, $1,000,000.

Bids Desired

Loft, Phila., Pa., July 18, by Manufacturing Realty Building Co., $1,500,000.

Theatre, Louisville, Ky. July 20, by Theatre Realty Corp., $1,000,000.

Bids Received

Hospital, Detroit, Mich., H. A. I. Andres, secy. Dept. Health, from W. E. Wood Co., $2,378,200.

Contracts Awarded

Hotel, Baltimore, Md., Lord Baltimore Hotel, to Consolidated Eng. Co., $6,000,000.

Pipe line, Texas, Empire Companies to Acme Foundry and Machine Co., Coffeyville, Kan., $3,000,000.

Hotel, Los Angeles, Calif., Local Syndicate to A. S. O'Neil, $1,500,000.

City Hall Phila., Pa., Dept. Pub. Wks., general contract to F. W. Mark Co., and others totaling $1,306,938.

Hospital, etc., Cleveland, O., Charity Hospital to Lundorff-Bicknell Co., $1,200,000.

News of the Week

Waterworks

Proposed Work

Conn., Hartford — Hartford Water Bd., 1026 Main St., plans emergency reservoir. $250,000. C. M. Saville, 1026 Main St., engr.

N. J., Denville—Township plans water works and reservoir. $225,000.

Ind., Indianapolis — Indianapolis Water Co., F. C. Jordan, secy., plans new 12 in. c.i. mains, 300 tons pipe for new extensions, 200 hydrants, two 500 hp. boilers, and 4 elevated reservoirs, each 1,500,000 gal. capacity. $550,000.

Ill., Grayville—Making preliminary plans new well supply in Wabash River bottoms, also pumping equipment, distribution lines, etc. Caldwell Eng. Co., 36 North Side Sq., Jacksonville, engrs.

Okla., Bessie—Making surveys new waterworks. $30,000. E. W. Gantt, 1116 West Main St., Oklahoma City, engrs.

Okla., Laverne—Plans complete waterworks. $25,000. C. A. Woods, Stillwater, engr.

Okla., Mangum—Making plans and surveys waterworks extensions. To exceed $15,000. Benham Eng. Co., 512 Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Quinlan—Making plans complete waterworks. $35,000. C. A. Wood, Stillwater, engr.

Ore., Eugene—Making plans improving and extending waterworks. To exceed $1,000,000 W. C. Clubb, Court House, engr.

Bids Desired

R. I., North Tiverton (mail Tiverton)—July 20, by Town, waterworks in various streets. $15,000 or more. Private plans.

Conn., Hartford—Water Bd., 1026 Main St., taking bids 3 mi. 42 in. pipe line between Reservoirs 5 and 6. $300,000. C. M. Saville, 1026 Main St., engr. Noted May 5.

O., Toronto — July 26, at office Toronto Water Works, 500 meters for 125 lb. water pressure.

O., Crooksville—July 15, by Village, C. L. Dean, clk., waterworks. $100,000. Asire & Moore, South Bend, Ind., engr.

Ill., Chicago—July 19, by City, Room 207, City Hall, water service pipes in 12 various streets and avenues. M. J. Faherty, pres. Bd. Local Impvts.

Wis., Milltown—July 19, by City, A. N. Lystrup, city clk., constructing pump house and furnishing deep well equipment. Druar & Milinowski, 500 Globe Bldg., St. Paul, Minn., engrs. Noted June 2.

Kan., Buhler—Taking bids deep wells, also quotations (by mail) pumping equipment. $30,000 bonds voted for same. F. E. Devlin, 614 Bitting Bldg., Wichita, engrs.

Calif., Beverly Hills—Taking bids part 1 and 2 story, 200 x 280 ft., rein.-con. aeration plant as part of water system, here. $200,000. W. Thomas, archt., and Salisbury, Bradshaw & Taylor, engrs., both 745 Petroleum Securities Bldg., Los Angeles. Noted May 5, under Unclassified.

Contracts Awarded

N. J., Newark—North Jersey Dist. Water Supply Comn., 24 Commerce St., relocating Ringwood Mines Pumping Station, Ringwood Boro, Passaic Co., Contr. 17, to Arnold-More, Inc., 45 Clinton St., $13,500.

O., Cleveland — Dept. Pub. Welfare, Columbus, J. E. Harper, dir., laying 200 ft. 6 in. c.i. water pipe, etc. in Hawthornden Farm State Hospital, here, to Huffman-Wolfe Co., 40 West Broad St., Columbus, $29,275.

Mich., Detroit—Secretary Detroit Water Bd., 176 East Jefferson Ave., 38,150 ft. 6- to 16-in. c.i. mains, 68 gate wells, etc. in various streets, to V. Fintozzi, 3065 Humboldt Ave., Detroit, $23,377; 44,968 ft. 6- to 16-in. c.i. pipe, 88 gate wells, etc., to Contg. & Eng. Co., 603 Morgan Bldg., $28,907. Water Bd. will supply pipe. Noted June 2.

> *THESE reports are grouped under each class (water-works. sewers. etc.) and under each stage of the work (proposed. bids desired. etc.), according to the following geographic sections: New England, Middle Atlantic, South. Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk. County Clerk, or corresponding official.*

S. D., Watertown—For 1 m.g. standpipe, to Pittsburgh-Des Moines Steel Co., Tuttle and Southwest 10th Sts., Des Moines, Ia., $34,000. Noted June 23.

Tex., Abilene—For c.i. pipe, to Amer. C.I. Pipe Co., 371 Praetorian Bldg., Dallas, $20,900; hydrants, to Darling Valve Mfg. Co., West Bldg., Houston, approximately $8,000; valves and valve boxes, to Waskom Supply Co., Dallas, $2,300; and joint lead, to San Antonio Supply Co., 231 East Commerce St., San Antonio, $1,911.

Tex., Crystal City — Extending waterworks mains, laterals, etc., to Dalton & Davis, Crystal City, approximately $20,000. Noted June 16.

Okla., Konawa—Waterworks and improvements, to E. W. Baker & Co., Medical Arts Bldg., Oklahoma City, approximately $78,000.

Sewers

Proposed Work

O., Canton—Stark Co. plans 4 mi. sewer in North Canton Sewer Dist., $100,000-$150,000; also sewer in Massillon-Canton Rd. Sewer Dist., $75,000-$100,000. G. E. Davidson, Canton, co. sanitary engr.

Mich., Royal Oak, Ind.—(br. Detroit)—Making plans vitr. or concrete sewers in Prairie Lawn Sub-division. $88,350. Hoad Decker, Shoecraft & Drury, Ann Arbor, engrs.

Ill., Bartlett—Made plans sewage disposal plant and sewers in various streets. $60,000. Suhr, Berryman & Peterson, 105 North Clark St., Chicago, engrs.

Ill., Carpentersville—Made plans 8- to 15-in. sewers in various streets. $180,000. Suhr, Berryman & Peterson, 105 North Clark St., Chicago, engrs.

Ark., Conway—Soon takes bids 22,000 ft. 18 and 24 in. sewers, and sewage disposal plant, in Dist. 2. $150,000. W. L. Winters, Merchants Natl. Bank Bldg., Ft. Smith, engr.

Tex., Amarillo—Making plans new sewage disposal plant. To exceed $25,000. Wynkoop Kiested, 614 Interstate Bldg., Kansas City, Mo., engr.

Tex., Perryton — Voted $70,000 bonds, complete sewerage system and disposal plant. Devlin Eng. Co., 127 Central Bldg., Amarillo, engr. Noted Mar. 31.

Tex., San Angelo—Making plans sewers in various streets. $700,000. Terrell Bartlett Engineers, Calcasieu Bldg., San Antonio, engrs.

Okla., Binger—Made preliminary plans new sewerage system. To exceed $25,000. M. Alexander, mayor. Engineer not selected.

Okla., Mangum—Making plans extending sewers in various streets. To exceed $50,000. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., engrs.

Ont., Toronto—York Twp. plans 470 ft. each sanitary and storm sewers in Traymore Crescent, also 1,420 ft. 8 in. and up vitr. tile service sewers in Victoria Blvd. and Ray Ave. $25,000. F. B. Goedike, 40 Jarvis St., engr.

Bids Desired

Mass., Stoneham—July 19, by Bd. Selectmen, Buick Bldg., sewers in various streets. $25,000. Private plans. Noted Mar. 24.

See proposal advertising on page 151

TRADE "LEADITE" MARK

Registered U. S. Pat. Office

Waterworks engineers and superintendents prefer to use Leadite for joints—*It assures them that the pipe line will be completed and a revenue producer well within the time allowance.*

THE speed and simplicity of use of Leadite is a big factor in rapidly expanding communities.

This illustration shown here is a scene from an installation where Leadite was used with c. i. bell and spigot pipe.

These lines are in one of the fastest growing cities in the South. The speed of Leadite jointing makes it possible to lay pipe fast enough to keep up with the new building and real estate expansion.

In addition, Leadite joints are permanent. For over 30 years Leadite has been tested and used under all pipe laying conditions and has proven completely satisfactory.

The saving of labor time and advantages of using Leadite produce a saving of over 75% of the cost of making the joints.

Benefit by the experience of thousands of engineers, superintendents and contractors who have used Leadite.

When time is money . . .
use High-Early-Strength concrete
made with standard (not special)
Universal Cement

In paving Quarry Street, Wheeling, W. Va., the contractors, Consolidated Engineering Company, secured *High-Early-Strength* Universal Concrete thru use of fully tested methods and standard—not special—Universal cement, furnished by Builders' Supply & Fuel Co. For full details, use the accompanying coupon.

2245 Lb. Concrete in *3 Days*
As Against *2000 Lb.* Concrete in *28 Days*

Good concrete as ordinarily placed develops a compressive strength of about 2000 pounds per square inch at *28 days*. In the paving of Quarry Street, Wheeling, W. Va., the engineers used fully tested methods and standard—not special—Universal cement to obtain *High-Early-Strength* concrete. At *3 days* the compressive strength of test cylinders averaged 2245 pounds per square inch.

Not only was the street opened weeks earlier, but because *High-Early-Strength* concrete also has a higher *ultimate* strength, the city obtained a *permanently* better and stronger pavement.

High-Early-Strength Universal Concrete may be made as workable as desired and used on all types of concrete work. For full details, use the accompanying coupon.

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland Columbus New York

Concrete for Permanence

UNIVERSAL PORTLAND CEMENT CO.
210 South La Salle Street, Chicago

Without obligation, please send me detailed information on methods for securing strong concrete in *3 days* with the usual materials.

Wooden Structural Materials

Creosoted by Republic

give longer life and greater service

Whether It's

Republic Creosoted
Wood Block Floors

Republic Creosoted
Ties for Industrial Tracks

Republic Creosoted
Poles and Piling

Republic Creosoted
Structural Timbers

THE Republic Creosoting Company distills all the creosote oil used in treating these products. The same high standard of creosote oil, as well as the same thorough degree of penetration, is thereby maintained.

Reilly's Improved Creosote Oil is real creosote oil. Without question, it is the very finest creosote oil on the market today. *Not only is it used for the treatment of Republic Products, but quantities are shipped all over the world.*

PROVEN performance has demonstrated the economy of creosoting all wooden structures—but it has also demonstrated that there is greater economy plus maximum service when the creosoting was done by Republic.

The Republic Creosoting Company is the largest and oldest creosoting company and, naturally, should lead the field.

Republic Creosoting Co.

Crawling Tractor Cranes, Shovels, Draglines, Locomotive Cranes, 5 to 75 tons, Wrecking Cranes 75 to 200 tons, Freight Cranes, Transfer Tables, Railsaws, Pile Drivers, Clamshell Buckets, Steam Pile Hammers.

WHERE UTILITY COUNTS

JOBS like the one pictured above call for a crane with a diversity of uses.

The *INDUSTRIAL all purpose crawler* can make profits for you on any sort of job.

If it's excavating for foundations, the dipper attachment is easily applied and is very efficient. For pile driving there's the pile driver leaders that can be hooked on very conveniently. The lattice boom is attached very simply, and a bucket and hook and block may be used in numerous places for handling building materials such as gravel, sand, steel beams, and concrete blocks.

We invite comparison and our nearest sales engineer will be pleased to talk things over with you.

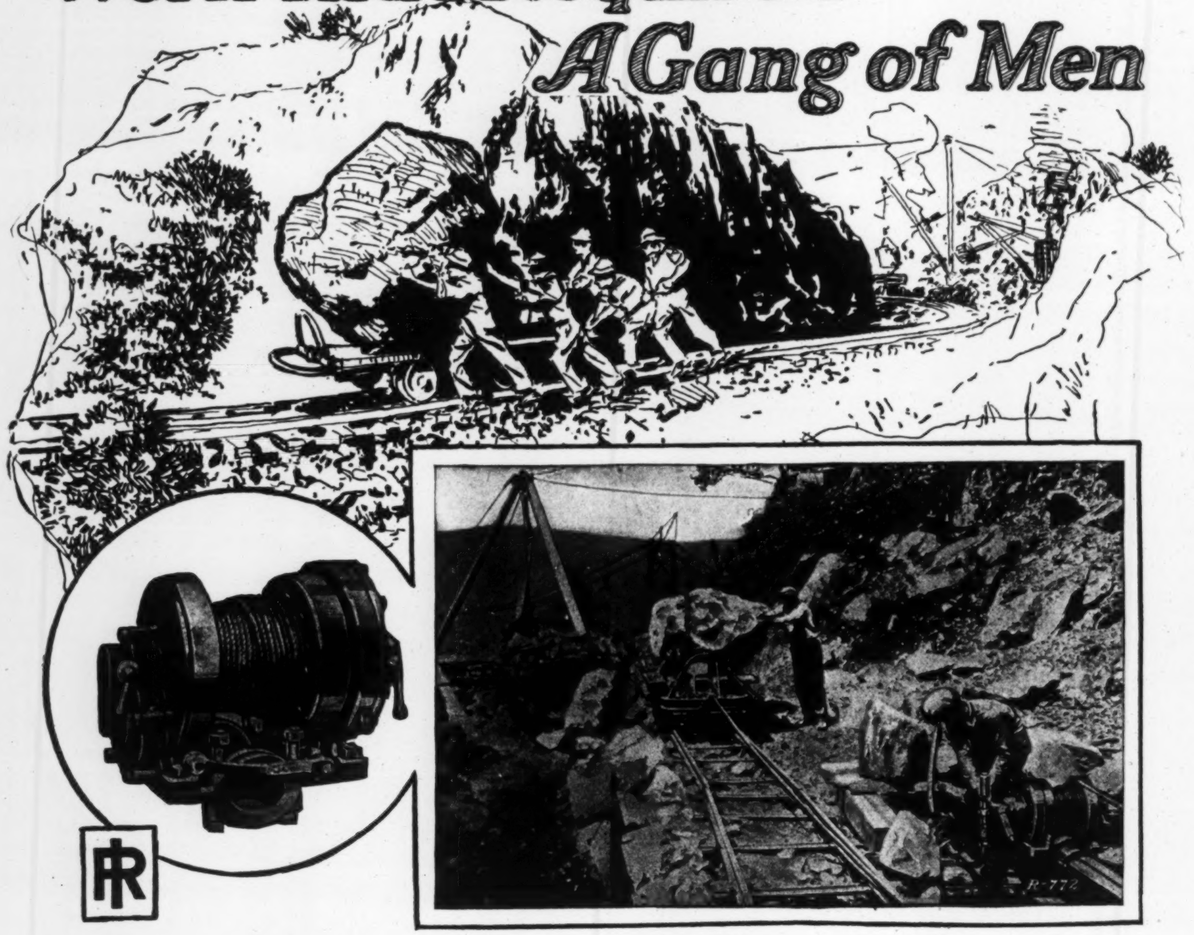
Work That Required A Gang of Men



ON construction work, the 10H "Little Tugger" Hoist can be depended upon to move the heavy loads that ordinarily require a gang of men.

Around any job where material is hoisted or hauled, one of these 10H "Little Tuggers" will find a thousand uses. It saves time and money, and speeds up the work.

"Little Tugger" Hoists, made in three sizes, can be obtained with either single- or double-drum construction. They are available in both one-way and reversible types, and can be operated on either steam or air.

"Little Tuggers" are powerful machines, yet are easy to move about and set up. Put one on your job and watch results.

Encouraging Steel Engineering Research

THE American Institute of Steel Construction offers the results of its research to any engineer—free of cost or obligation. The Institute also invites co-operation in forwarding its educational work. Help us to end confusion and misinformation by establishing the proved facts regarding steel.

Send for the Institute's Standard Specification for the design, fabrication and erection of structural steel in building. The Specification alone is estimated to be saving building owners and taxpayers more than $30,000,000 annually. Ask for our Code of Standard Practice, with its clear definition of all terms and obligations. We will also send "STEEL NEVER FAILS."

AMERICAN INSTITUTE OF STEEL CONSTRUCTION, INC.

The co-operative non-profit service organization of the structural steel industry of the United States and Canada. Correspondence is invited. Address: Lee H. Miller, M. Am. Soc. C. E., Chief Engineer, 285 Madison Avenue, New York City

UNIT PRICES

On actual contracts gathered by field correspondents, also those sent in by readers

Sewage Disposal Works—Parsons, Kan.

Bids were opened by City, Mar. 29, (lowest three) for sewage disposal works, from (A) Carrothers & Nelson, 600 Walsex Bldg., Kansas City, Mo., (awarded contract); (B) Reed & Wheelock, Clay Center; (C) F. A. Every & Sons, Parsons. The unit bids are as follows:

	A	B	C
9,500 cu.yd. earth excavation	$0.75	$0.75	$0.90
100 cu.yd. loose rock excavation	1.50	3.00	3.00
Solid rock excavation	6.00	4.50	7.00
Removing septic tank roof (lump sum)	1,700.00	2,000.00	275.00
Preliminary settling tank, using Dorr clarifier mechanism (lump sum)	6,600.00	6,500.00	6,579.19
Using Hardinge clarifier mechanism (lump sum)	6,300.00	6,500.00	6,679.19
Final settling tank:—			
Using Dorr clar. mechan. (lump sum)	8,800.00	8,000.00	9,794.47
Using Hardinge clar. mechan. (lump sum)	8,480.00	8,000.00	9,819.47
Aeration tanks (lump sum)	17,200.00	16,000.00	15,518.00
Blower station (lump sum)	9,550.00	11,500.00	10,385.93
Pumping station (lump sum)	4,750.00	7,500.00	5,790.00
Upper control manhole (lump sum)	860.00	750.00	1,136.83
Lower control manhole (lump sum)	460.00	700.00	1,137.61
Weir gauging station (lump sum)	1,370.00	1,500.00	1,659.40
Sludge filters (lump sum)	6,050.00	6,375.00	7,840.04
620 lin.ft. 4 in. cast iron pipe laid	1.50	1.75	1.80
660 lin.ft. 6 in. cast iron pipe laid	1.70	1.75	2.45
700 lin.ft. 8 in. cast iron pipe laid	2.40	2.00	3.95
10 in. cast iron pipe laid	3.00	3.25	....
12 in. cast iron pipe laid	3.50	3.75	....
70 lin.ft. 16 in. cast iron pipe laid	3.60	4.25	7.90
100 lin.ft. 4 in. vit. clay sewer pipe laid.	.50	.75	....
150 lin.ft. 6 in. vit. clay sewer pipe laid	.70	1.00	.65
350 lin.ft. 8 in. vit. clay sewer pipe laid	.80	1.50	.75
12 in. vit. clay sewer pipe laid	1.25	2.00	1.40
15 in. vit. clay sewer pipe laid	1.50	2.50	....
250 lin.ft. 18 in. vit. clay sewer pipe laid	2.00	3.50	....
21 in. vit. clay sewer pipe laid	3.50	5.00	5.75
Sludge digester piping (lump sum)	$1,770.00	2,500.00	2,289.36
60 cu.yd. misc. reinf. concrete	24.00	28.00	....
10 cu.yd. conc. backfill	12.00	15.00	15.00
6 surface drainage inlets	15.00	15.00	10.00
5 standard manholes	50.00	60.00	100.00
10 cu.yd. concrete in bulkhead	25.00	20.00	20.00
Time of completion, months	10	8	9
Totals based on Hardinge Clarifiers	$72,834	$78,732	$81,636
Totals based on Dorr Clarifiers	$73,454	$78,732	$81,511

Engineering News-Record Issue of July 14, 1927

Bridges—Washington

Bids were opened by State Highway Department, Olympia, Apr. 26, (lowest three) for bridges on State Road No. 1, Pierce Co., Redondo to Tacoma, from (A) Paul S. Savage, 729 Tacoma Bldg., Tacoma, (awarded contract); (B) Pacific Construction & Timber Co., Seattle; (C) J. F. Bachelor, Tacoma. The unit bids are as follows:

	A	B	C
895 cu.yd. structure excavation	$2.55	$1.30	$2.60
30 cu.yd. gravel backfill in place	3.25	2.75	3.00
305 cu.yd. concrete class "A" in place	17.00	18.00	21.75
305 cu.yd. concrete class "B" in place	15.50	18.00	19.80
70 cu.yd. concrete class "E" in place	13.50	17.50	13.80
63,700 lb. steel reinf. bars in place	.042	.07	.035
72 M. ft. b.m. lumber and plank, treated in place	81.00	76.00	77.50
350 M. ft. b.m. lumber and plank, untreated in place	45.00	47.00	66.00
5,200 lin.ft. furnishing piling at site, treated	.54	.54	.55
2,860 lin.ft. furnishing piling at site, untreated	.155	.24	.27
115 driving piles treated	6.25	9.00	10.00
90 driving piles untreated	9.00	8.00	10.00
135 lb. copper seal, in place	.50	.60	.55
Totals	$26,750	$28,877	$29,853

Engineering News-Record Issue of July 14, 1927

Sewers—Houston, Tex.

Bids were opened by City, Mar. 15, for storm sewers in Wayside Drive from Navigation to Buffalo River, 67th St., from Navigation to Avenue N and Avenue N from 67th Street to Wayside Drive, from (A) C. K. Horton, 2202 Clay St., (awarded contract); (B) McClendon & Green, First National Bank Bldg.; (C) Scott Shambaugh. The unit bids are as follows:

	A	B	C
10 cu.yd. extra excavation	$1.50	$2.00	$1.00
10 ton mi. hauling	1.00	1.80	1.00
10 man hrs. extra work—labor	.60	.60	.50
10 team hrs. extra work—team	.80	.90	.80
2 M.ft.b.m. timber in foundations	60.00	75.00	40.00
15 M.ft.b.m. timber ordered left in trenches	40.00	35.00	40.00
15 cu.yd. extra class 2 concrete	20.00	20.00	18.00
1 cu.yd. extra brick masonry	30.00	30.00	25.00
1,000 lb. extra reinforcing steel	.10	.08	.05
5 cu.yd. road gravel	4.00	5.00	3.00
5 cu.yd. road shell	4.00	3.50	1.80
14 std. manhole type "A"	70.00	70.00	60.00
35 lin.ft. extra depth man hole type "A"	10.00	10.00	5.00
52 supplying and setting inlet type "B"	35.00	35.00	33.00
2 supplying and setting dbl. inlet "B"	70.00	70.00	65.00
8 ft. extra depth dbl. inlet "B"	12.00	10.00	8.00
200 lin.ft. mon. concrete 36-in.— 0 to 6 ft.	5.25	5.50	5.60
10 lin.ft. mon. concrete 36-in.— 6 to 8 ft.	5.75	6.00	6.50
710 lin.ft. mon. concrete 36-in.— 8 to 10 ft.	5.80	6.00	6.50
1,780 lin.ft. mon. concrete 36-in.—10 to 12 ft.	6.10	6.25	7.50
10 lin.ft. mon. concrete 36-in.—12 to 14 ft.	7.00	8.00	8.50
145 lin.ft. mon. concrete 42-in.— 0 to 6 ft.	6.50	6.50	6.75
80 lin.ft. mon. concrete 42-in.— 6 to 8 ft.	6.75	7.50	7.25
45 lin.ft. mon. concrete 42-in. 8 to 10 ft.	7.10	8.00	7.50
570 lin.ft. mon. concrete 42-in.—10 to 12 ft.	7.40	8.00	7.50
120 lin.ft. mon concrete 42-in.—12 to 14 ft	7.60	8.50	8.50
45 lin.ft. mon. concrete 42-in.—14 to 16 ft.	8.00	9.00	10.00
1,160 lin.ft. concrete pipe—15-in.—0 to 6 ft.	2.00	2.00	1.90
1,160 lin.ft. concrete pipe—15-in.—6 to 8 ft.	2.10	2.00	2.15
60 lin.ft. concrete pipe—18-in.—0 to 6 ft.	3.00	2.75	2.55
60 lin.ft. concrete pipe—18-in.—6 to 8 ft.	3.10	3.00	2.75
10 lin.ft. concrete pipe—18-in.—8 to 10 ft.	4.00	3.50	3.00
20 lin.ft. concrete pipe 24-in.—0 to 6 ft	3.50	4.00	3.50
260 lin.ft. concrete pipe—24-in.—6 to 8 ft.	3.75	4.00	3.50
105 lin.ft. concrete pipe—24-in.—8 to 10 ft.	4.10	4.50	4.00
Totals	$34,698	$35,675	$37,329

Road—Texas

Bids were opened by Commissioners of Harris County, Houston, Mar. 14, for constructing Houston Avenue Extension Road, from (A) Philpot Construction Co., Galveston, (awarded contract); (B) Charles K. Horton, Houston; (C) Scott Shambaugh, Houston. The unit bids are as follows:

	A	B	C
23,622 cu.yd. earth roadway excavation	$0.25	$0.25	$0.30
150 cu.yd. channel excavation	.70	.35	.30
126 cu.yd. structural excavation	1.00	1.00	1.00
4,809 cu.yd. earth borrow	.30	.25	.30
7,584 sta.yds. earth overhaul	.03	.03	.04
200 hours extra rolling base	2.50	3.00	3.00
100 M. gals. sprinkling base	2.00	2.00	3.00
50 M. gals. water hauled additional mile	1.00	1.00	1.50
35,199 sq.yd. reconstructed base course	.04	.03	.05
1,759.6 cu.yd. base course material	1.85	2.00	2.00
8,249.4 cu.yd. base course material hauled additional ½ mile	.06	.06	.07
35,199 sq.yd. concrete pavement— modified Bates type	2.05	2.15	2.12
136,940 lb. reinforcing for pavement	.05	.05	.055
119.55 cu.yd. class "A" concrete	22.00	20.00	22.00
1.94 cu.yd. class "C" concrete	25.00	22.00	25.00
11,217 lb. reinforcing steel	.04	.05	.05
24 lin.ft. 18 in. concrete pipe	2.00	2.75	2.00
370 tons plain riprap	5.00	6.00	4.00
4 supports for pavement at bridge ends	125.00	100.00	150.00
500 team hours	.95	.80	.80
500 labor hours	.45	.40	.50
2,727 cu.yd. shell for shoulders	1.90	1.90	2.00
12,787 cu.yd. shell hauled additional ½ mi	.06	.06	.05
Totals	$104,524	$108,188	$110,100

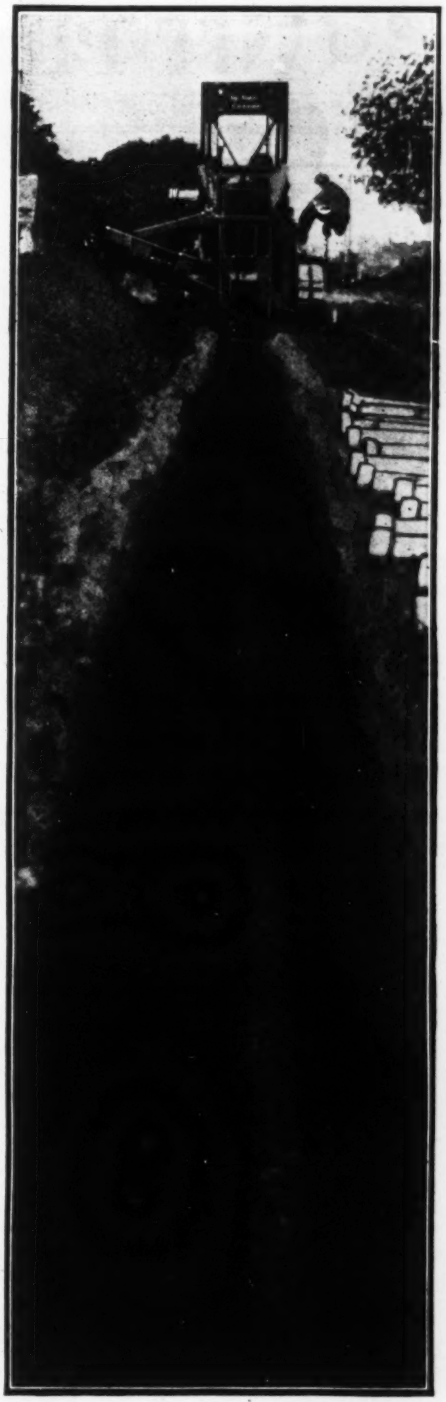
ONLY THE BARBER-GREENE HAS THE VERTICAL DIGGING BOOM AND THE OVERLOAD RELEASE



Tearing Through—To New Ditching Records

TURN this Barber-Greene loose wherever there is digging to do—and watch it go. The vertical boom dives straight into the ground, full depth. Then it starts tearing up the earth for yard after yard of clean-cut trench.

If an obstruction bars the way, this digging demon doesn't plunge into it blindly and damage the machinery. The overload release takes care of that. The vertical boom can either jump over or keep picking until the obstruction is removed.

This nimbleness, plus the mile-a-day speed on shallow pipe line trench and the versatility that turns service laterals into a source of profit are reasons enough why Barber-Greene Ditchers topped all ditcher sales records last year.

"Ditching Snapshots and Records" is full of interesting pictures that show Barber-Greenes digging everything that's "diggable." And pages are devoted to cold cost figures that show how Barber-Greenes cut the cost of digging to new low records. Send for your copy today.

Street Improvements—San Luis Obispo, Calif.

Bids were opened by Supervisors of San Luis Obispo County for improving streets in Morro Beach section, from (A) Warren Construction Co., 28th and Poplar Sts., Oakland, (awarded contract); (B) Braun, Bryant & Austin, Los Angeles; (C) Irving L. Ryder, San Jose. The unit bids are as follows:

	A	B	C
23,200 cu.yd. grading	$1.10	$1.30	$1.45
815,000 sq.ft. 2½-in. asph. base with 1½-in. Warrenite-bit. surface	.23	.243	.25
12,375 ft. curb and gutter	1.40	1.50	1.30
55,360 ft. conc. dished gutter	.90	.93	1.05
105 catchbasins	65.00	60.00	55.00
1,717 ft. 8-in. corru. culvert	1.70	1.60	2.00
54 ft. 12-in. corru. culvert	2.50	2.50	2.50
8 ft. 18-in. corru. culvert	3.50	3.00	2.50
8 ft. 24-in. corru. culvert	4.50	4.00	3.50
930 cu.ft. conc. (culvert)	1.10	1.00	1.00
2,500 lb. reinf. steel	.10	.10	.09
1 conc. bridge (lump sum)	9,700.00	12,000.00	11,900.00
400 cu.ft. conc. bridge foundation	.70	.80	.90
6,420 ft. 12-in. vit. sewer pipe	2.00	1.85	2.20
100 T's, 12-in. pipe	4.00	4.00	4.75
1,580 ft. 10-in. vit. sewer	1.50	1.50	1.80
40 T's on 10-in. pipe	3.20	3.50	4.25
100 ft. 10-in. well casing	3.00	3.00	3.35
4,170 ft. 8-in. vit. sewer	1.80	1.65	1.70
100 T's on 8-in. pipe	3.20	3.00	3.75
16,300 ft. 6-in. vit. sewer	1.60	1.55	1.50
400 T's on 6-in. pipe	3.00	2.50	3.25
1,000 ft. 4-in. vit. sewer	1.00	1.00	.85
60 manholes	125.00	140.00	110.00
40 lampholes	18.00	20.00	25.00
18,600 ft. 6-in. riveted steel pipe	2.90	3.10	2.60
7,600 ft. 4-in. riveted steel pipe	2.50	2.35	2.10
14,200 ft. 2-in. wrought steel	1.00	1.10	.90
7 gate valves, 6-in.	25.00	30.00	40.00
19 gate valves, 4-in.	20.00	23.00	30.00
46 gate valves, 2-in.	12.00	12.50	20.00
33 fire hydrants	70.00	80.00	85.00
65 No. 107 King Electroliers	132.00	140.00	165.00
66 No. 44 King Electroliers	128.00	130.00	140.00
23,000 ft. ¾-in. conduit	.38	.40	.40
570 ft. 1½-in. conduit	.40	.45	.50
24,400 ft. electric conductor	.27	.30	.35
Totals	$488,363	$508,981	$512,394

Sewers, Etc.—Sedalia, Mo.

Bids were opened by City, May 1, for constructing sanitary sewers and disposal plant, from (A) Hamilton Contracting Co., and A. C. Comstock, Bartlesville, Okla., (awarded contract); (B) Chanute Construction Co., Kansas City. The unit bids are as follows:

	A	B
7,364 ft. furnishing and laying 8 in. standard V.C. pipes	$0.60	$0.45
6,113 ft. furnishing and laying 10 in. standard V.C. pipes	.65	.60
2,641 ft. furnishing and laying 12 in. standard V.C. pipes	1.85	.85
4,675 ft. furnishing and laying 18 double stgth. V. C. pipes	2.00	1.90
1,323 ft. furnishing and laying 24 double stght. V. C. pipes	4.00	3.00
5,502 ft. furnishing and laying 27 double stgth. V. C. pipes	5.00	4.00
1,304 ft. excavating and refilling 0 to 4 ft	.40	....
2,155 ft. excavating and refilling 4 to 6 ft	.50	.40
6,344 ft. excavating and refilling 6 to 8 ft	.60	.50
6,463 ft. excavating and refilling 8 to 10 ft	.75	.55
4,669 ft. excavating and refilling 10 to 12 ft	1.00	.70
2,737 ft. excavating and refilling 12 to 14 ft	1.20	.80
3,464 ft. excavating and refilling 14 to 16 ft	1.60	1.10
450 ft. excavating and refilling 16 to 20 ft	1.65	2.40
103 manholes	90.00	80.00
20 cu.yd. class B concrete	25.00	20.00
2,000 cu.yd. rock excavation	5.00	5.00
309 lin.ft. cutting and replacing pavement	2.00	2.75
6,500 cu.yd. earth excavation at disposal plant	1.00	1.00
75 cu.yd. rock excavation at disposal plant	5.00	3.50
1,020 cu.yd. class A concrete at disposal plnat	20.00	24.50
90,000 lb. reinforcing steel at disposal plant	.05	.0575
Totals	$193,221	$215,000

Conduit—Syracuse, N. Y.

Bids were opened by Board of Contract and Supply, May 2, for Contract "B," Section 2, of Third Conduit, hauling and distributing c. i. pipe, valves and specials, trenching and backfilling, etc., from (A) Provo Bros.; 604 North Salina St., (awarded contract using lead); (B) Robeck-Humphries Co.; (C) Mondo Construction Co. The unit bids are as follows:

	A	B	C
Chopping and clearing (lump sum)	$1,000.00	$400.00	$500.00
800 lin.ft. excav. and backfill under 6 ft	1.20	1.80	2.10
19,700 lin.ft. 6-8 ft	1.20	1.90	2.50
5,400 lin.ft. 8-10 ft	1.30	2.30	3.60
600 lin.ft. 10-12 ft	1.60	4.08	5.00
600 lin.ft. 12-14 ft	2.10	4.76	6.00
500 lin.ft. 14-16 ft	2.70	5.44	7.00
300 lin.ft. 16-18 ft	3.30	6.12	9.00
300 lin.ft. 18-20 ft	3.90	10.00	10.00
300 lin.ft. over 20 ft	4.70	12.00	11.00
500 cu.yd. ordinary excav	1.50	1.00	2.00
2,000 cu.yd. embankment	.70	1.00	1.25
500 cu.yd. gravel lining	2.00	3.00	2.50
100 sq.yd. grouted stone paving	2.50	3.00	3.00
28,200 lin.ft. laying 36-in. pipe (with lead)	.75	2.25	1.50
50 lin.ft. 30-in. pipe (with lead)	.75	6.00	1.50
650 lin.ft. 12-in. pipe (with lead)	.75	1.00	1.00
28,200 lin.ft. testing pipes (lump sum)	1,410.00	2,000.00	1,000.00
10 lin.ft. laying 6-in. tile drain	1.00	.80	1.00
Gate house (lump sum)	2,500.00	2,000.00	2,000.00
4 chambers	650.00	450.00	500.00
6 blow-offs	325.00	125.00	300.00
7 air valves	200.00	90.00	150.00
7 manholes	300.00	125.00	250.00
7,420 tons unloading C. I. pipe, etc.	4.00	3.00	3.30
Plate girder bridge (lump sum)	2,700.00	2,800.00	2,700.00
75 cu.yd. concrete culverts	20.00	23.00	18.00
20 cu.yd. extra concrete, first class	20.00	23.00	18.00
20 cu.yd. extra concrete, second class	18.00	21.00	14.00
500 hours common labor	.60	.70	.70
100 hours skilled labor	1.00	1.50	1.25
100 hours foreman labor	1.25	1.50	1.25
300 ton hours motor trucks	1.00	2.00	2.00
16 stone monuments, set	10.00	5.00	10.00
1,000 lb. reinforcing steel	.10	.10	.10
Removing bulkhead (lump sum)	100.00	100.00	100.00
Laying 36-in. pipe with leadite	.45	1.75	.90
Laying 30-in. pipe with leadite	.75	6.00	.90
Laying 12-in. pipe with leadite	.75	.89	.75
Totals using lead	$112,630	$174,108	$178,691
Totals using leadite	$104,170	$159,937	$161,579

Engineering News-Record Issue of July 14, 1927

Breakwater—Muskegon, Mich.

Bids were opened by U. S. Engr. Office, Federal Bldg., Milwaukee, May 31, for constructing south breakwater at Muskegon Harbor, from (A) Love Construction Co., Union Bank Bldg., (awarded contract); (B) Great Lakes Dredge & Dock Co., Milwaukee; (C) E. E. Gillen, Milwaukee; (D) McMullen & Pitz Construction Co., Manitowoc. The unit bids are as follows:

	A	B	C	D
Driving and cutting off 1323 foundation piles for caissons, per pile	$14.00	$24.00	$32.50	$35.00
9,700 tons Class I stone, per ton of 2,000 lbs. in place	3.00	3.60	4.50	4.90
25,600 tons Class II stone, per ton of 2,000 lbs. in place	4.00	4.90	4.20	5.15
7,100 tons Class III stone, per ton of 2,000 lbs. in place	4.50	4.90	4.65	5.15
3,775 cu.yd. concrete superstructure and filling for breakwater	17.00	16.90	31.00	30.00
Leveling foundations and sinking 28 caissons, per caisson	750.00	600.00	1,300.00	1,200.00
Totals	$267,147	$307,499	$380,607	$409,090

Engineering News-Record Issue of July 14, 1927

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Gas pipe line, Texas and Louisiana, Dixie Pipe Line Co., plans, $10,000,000.

Sewers, Chicago, Ill., Sanitary Dist., plans, $6,000,000.

Irrigation, Orange Cove, Calif., Foothill Irrigation Dist., plans election, $2,500,000.

Bridge, Paducah, Ky., Paducah Board Trade, takes bids about Aug. 15, $2,100,000.

Hospital, Wauwatosa, Wis., Milwaukee Co., having plans prepared, $2,000,000.

Road improvement, Nashville, Tenn., Davidson Co. voted bonds $1,500,000. Total $3,000,000.

Temple, Kansas City, Mo., Scottish Rite Temple, having preliminary sketches made, $1,500,000.

Club, Chicago, Ill., Hellenic-American Athletic Club, having plans prepared, $1,250,000.

University, Los Angeles, Calif., University of California, having plans prepared, $1,200,000.

Bridge, Amarillo, Tex., Chicago, Rock Island & Pacific Ry. Co., made plans, $1,000,000.

Apartment, Portland, Ore., Rose Holding Co., having plans prepared, $1,000,000.

Amusement center, Newark, N. J., Arena & Amusement Co., Inc., having plans prepared $1,000,000.

Bids Desired

Civil courts, St. Louis, Mo., Aug. 2, by Bd. Pub. Serv., $2,700,000.

Contracts Awarded

Plant, Hopewell, Va., Atmospheric Nitrogen Co., to Stone & Webster, Boston, Mass., $25,000,000.

State Societies building, Long Beach, Calif., All States Building Corp., to Wilson & Bever, Anaheim, $1,500,000.

News of the Week

Waterworks

Proposed Work

W. Va., Parkersburg — Voted $400,000 bonds, waterworks improvements. J. V. Dunbar, Parkersburg, engr.

S. C., Holly Hill—Voted $47,000 bonds, waterworks improvements.

O., Hamilton—Soon takes bids buildings for water-works plant. $83,000.

Mo., Caruthersville—Making preliminary plans extending water distributing system; also extending and repairing sewers in various streets, $35,000.

Okla., Arnett — Voted $15,000 bonds, waterworks, and $15,000 bonds, electric lighting system.

Calif., Beverly Hills—Soon takes bids part 1 and 2 story, 200 x 280 ft., rein.-con. aeration plant, for water system. $200,000. Salisbury, Bradshaw & Taylor, Petroleum Securities Bldg., Los Angeles, engrs. Noted May 5.

Calif., Martinez—Clerk Contra Costa Co., takes bids in August, boring well, installing motor, pump, valves, etc. for Water Works Dist. 1.

Bids Desired

N. Y., Brooklyn — July 26, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Avenue H, Maspeth, Varick, and 19th Aves., here.

N. Y., Brooklyn — July 29, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Avenues H, O, T, U and Z, Albany, Bath, Bedford and Benson Aves., Batchelder, Bay 34th, Bay 49th, Bay 50th Sts., etc., here.

N. Y., Long Island City—July 26, by N. J. Hayes, comr. Water Supply, Gas & Electricity Municipal Bldg., New York City, mains in Queens and Winchester Blvds., Roosevelt, and 50th Aves., 22nd and 25th Sts., etc., here.

N. Y., Poughkeepsie — July 28, by Bd. Pub. Wks., Eastman Park Mansion, rein.-con. structure and placing pipes, valves, strainers, etc., for additional scrubbers, Poughkeepsie Water Works. Hazen & Whipple, 25 East 43rd St., New York City, consult. engrs.; adv. E. N.-R. July 21.

N. Y., Syracuse—Aug. 1, by Bd. Contr. & Supply, City Hall, A. Smingler, Jr., secy., reservoir for water supply; adv. E. N.-R. July 21. Noted Nov. 18.

Pa., Martinsburg—Aug. 1, by J. H. Nicodemus, secy Boro Council, 2,500 lin.ft. 8 in. mains and replacing gate house at dam, F. M. Hunter, Goldschmid Bldg., Altoona, engr.

La., Columbia—See "Contracts Awarded."

La., Villa Platte—July 25, by City, 200,000 gal. rein.-con. covered reservoir, 5,570 lin.ft. 4- to 8-in. H & S mains, hydrants, etc. H. A. Mentz, Hammond, engr.

O., Columbus—July 30, by O. Moore, clk. Franklin Co., 5,790 ft. 6- to 12-in. c.i. mains in Bexley Heights Truro Twp. $15,000. E. L. Bradbury, Court House Annex, engr.

Mich., Detroit—July 28, by Dept. Pub. Wks., City Hall, 4 vertical electric motor driven pumping units, 500 cu.ft. capacity per sec. against 27 ft. head, with auxiliary equipment. P. A. Fellows, city engr.

Minn., Stillwater — July 29, by L. C. Clarke, engr. & supt. Bd. Water Comn., 204 North 3rd St., 1,000 various sized water meters.

Okla., Weleetka—Aug. 3, by W. W. Griffin, city clk., raising reservoir dam, new levee and spillway. $18,500. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs. Noted May 12.

Calif., Santa Maria—A. H. Drexler, city clk., taking bids 28,300 lin.ft. rein.-con. irrigation, centrifugal rein.-con., electric welded steel 10-gauge steel, or Natl. lapwelded or equal pipe line. H. Neel, Jr., city engr.

Ont., Willowdale—July 25, by H. D. Goode, clk North York Twp., one 600 Imperial g.p.m. centrifugal pump, 330 ft. head, direct connected to electric motor. $5,000. G. Baker, Willowdale, engr.

Contracts Awarded

N. Y., Mohawk—Municipal Comn., ½ m.g. rein.-con. distributing reservoir, etc., to H. W. Bacheler, Herkimer, $19,922. Noted June 2.

La., Columbia—Louisiana Power & Light Co., Pine Bluff, Ark., will build waterworks and distribution system, here, by day labor. $35,000. Private plans.

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.*

Ia., Massena—H. D. Hancock, city clk., 15,350 ft. 2- to 6 in. c.i. pipe, 22 hydrants, twelve 2- to 6-in., valves and boxes 5,500 lb. specials, 30 000 gal. tank on 55 ft. or 100 ft. tower, 10 x 10 ft. wood pump house, on 12 ft. concrete pit, pumps, etc., to C. W. Roland Co., 1347 8th St., Des Moines.

Neb., Imperial—W. C. Hill, village clk., 15,000 lb. 4 hd. bare and 500 lb. 4 sd. bare copper wire, 2,200 lb. 6, and 3,850 lb. 4 TBWP copper wire, to Midwest General Electric Co., 814 South 14th St., Omaha, $3,511; and oil engine, to Worthington Pump & Machine Corp., 825 Scarrett Bldg., Kansas City, Mo., $18,150. Noted June 2.

Tex., Waco—City will extend 6- to 8-in. c.i. mains in South Waco and in 15th St., by day labor. $15,000. Address W. H. Deaton, city supt.

Calif., San Diego—Water system in Linda Vista Dist., Morena Blvd., etc., to Claude Fisher Co., 756 South B'way, Los Angeles, $94,816. Noted May 19.

Sewers

Proposed Work

Miss., Iuka—Making preliminary surveys complete sanitary sewerage system, disposal plant, etc. Palglaze & Basenberg, Birmingham, engrs.

O., Akron—W. F. Peters, dir. Pub. Serv., takes bids this fall, 7,410 lin.ft. 8- to 42-in. vitr. clay sewer, etc. in Evans St. et al. $69,700. J. E. Root, Municipal Bldg., engr.

O., Canton—Bd. Control plans trunk sewer East of Grace Ave. N.E. $50,000-$100,000. W. E. Sarver, city engr.

Ill., Blue Island—Made plans 3 sewerage systems. $175,000. A. L. Fox, 160 North La Salle St., Chicago, engr.

Ill., Chicago—Sanitary Dist. of Chicago, 910 South Michigan Ave., plans 6 mi. 16 in. concrete relief sewer from 39th to 87th Sts. $6,000,000. E. J. Kelly, 910 South Michigan Ave., engr.

Ill., West Frankfort—Making preliminary plans sewage disposal plant and sanitary sewers in various streets. $200,000. C. A. Cox, City Hall, engr.

Ia., Des Moines—See "Excavation, Drainage, Irrigation, Levees, River and Harbor."

Ia., Grinnell—City takes bids after July 22, complete sewage disposal plant. $65,000. R. B. Slippy, 406 Lafayette Bldg., Waterloo, engr.

Ia., Lowden — Postponed indefinitely 3 mi. 8 and 12 in. sewers and paving 12 blocks various streets. $45,000. H. R. Green Eng. Co., Bever Bldg., Cedar Rapids, engrs. Noted Feb. 3.

Mo., Caruthersville—See "Water Works."

Okla., Claremore — Made preliminary plans sewage disposal plant and new outfall sewers in various streets. $30,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Ore., Salem—Made plans improving and extending sewerage system. $500,000. H. M. Rogers, Court House, engr.

Bids Desired

Mass., Boston—July 25, by Dept. Pub. Wks., sewerage system in River, Arlington and Walter Sts., in Dorchester and Hyde Park. $35,000. J. H. Sullivan, comr.

See proposal advertising on page 131

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Only 51 days between the decision to build an emergency water works plant - - *and the finished job!*

- - the speed with which Leadite jointing can be accomplished contributed to this remarkable feat.

THE line illustrated here is 26,000 ft. of 12" pipe with LEADITE joints.

Owing to the emergency which arose in the city for which the installation was made no trenching could be attempted.

The line lies throughout its entire length on the surface of the ground without any bracing except at the bends.

After completion the line was tested to 260 lbs. pump pressure.

Specify and use **LEADITE** —it saves at least 75%

It is now under constant pump working pressure of 230 lbs. For over 30 years now, LEADITE has demonstrated by test and experience that it is absolutely permanent and secure.

Leadite is self-caulking and is so simple to use that the method of using it can be taught to even the most inexperienced help in a very short time.

Added to its speed and ease of use—Leadite saves at least 75% on account of saving in material and labor.

Be sure it is **LEADITE** and accept no imitations ~ ~ ~

Part of the 26,000 ft. installation, crossing an open field. Chas. E. Waddell & Co., Engineers.

The pioneer self-caulking material for c. i. pipe.
Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Sewers (Continued)

Mass., Boston—July 28, by Dept. Pub. Wks., sewerage system in Hazelton St., Dorchester and Piedmont St., City Proper; July 29, Bowditch St., Roxbury. J. H. Sullivan, comn.

N. Y., Long Island City—July 27, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., regulator chamber, installing automatic regulator, also repairing and cleaning overflow chamber at Rust St. and Clark Ave., etc.

N. Y., St. George — See "Streets and Roads."

N. Y., Rye—Aug. 8, by Westchester Co. Sanitary Sewer Comn., 192 Martine Ave., White Plains, constructing Blind Brook Sewer Projects, Sects. A, B, C, D, and E. E. S. Martin, secy.; adv. E. N.-R. July 21.

N. J., Bridgeton—Aug. 2, by C. P. Corey, city clk., City Hall, 2 sewage pumping Stations, Contr. 1; Cohansey River Crossing and force main to treatment plant, Contr. 2; and sewage treatment plant, Contr. 3. Remington & Vosbury, 509 Cooper St., Camden, consult. engrs.; adv. E. N.-R. July 21.

N. J., Newark—July 28, at City Hall, Sect. 3, Supplementary Joint Trunk Sewer in East Orange, Hillside, Irvington, Maplewood, Millburn, Newark, Roselle Park, South Orange, Summit, Union and West Orange. A. Potter, 50 Church St., New York City, engr.; adv. E. N.-R. July 21. Noted June 30.

N. J., Plainfield—Aug. 1, Common Council, City Hall, approximately 8,500 lin.ft. 8 and 10 in. vitr. sewers, etc., in various streets. A. W. Vars, city engr.; adv. E. N.-R. July 21.

N. J., Teaneck (mail West Englewood) —July 26, by Twp. Com., Municipal Bldg., storm drainage system, in Downing St., River and Churchill Rds. A. Noack, 235 Main St., Hackensack, engr.

N. J., Teaneck (mail West Englewood)—July 26, by Twp. Com., Municipal Bldg., Teaneck Rd., 10,000 ft. 8- to 12-in. sewers in various streets, Contr. Y. Sanborn & Bogert, 30 Church St., New York City, consult. engrs.

Pa., Allentown—Aug. 16, at office M. W. Gross, mayor, Central Fire and Police Station, constructing Kline's Island Sewage Treatment Plant, Contr. 1. Metcalf & Eddy, Statler Bldg., Boston, Mass., engrs.; adv. E. N.-R. July 21.

Pa., Lansdale—July 28, by Boro Council, constructing sewage collecting well, pump house, electrically driven pumping equipment, and cast iron force mains; also 5,750 ft. 8- to 12-in. vitr. sewer pipe, etc. Albright & Mebus, 1502 Locust St., Phila., or 112 South Easton Rd., Glenside, engrs.

W. Va., East Rainelle — July 26, by Town, W. W. Martin, mayor, sewerage system, incl. 26 manholes, 400 ft. 6 in. farm tile, 15,371 ft. 6- to 15-in. terra cotta pipe, etc. Plumley-Walters Eng. Co., Bank Commerce Bldg., Charleston, engrs.

Ala., Birmingham — July 30, by City Comn., approximately 2½ mi. brick, c.i. and terra cotta sewers to drain area bounded by east line of Southern Ry., south to Sect. 13, Twp. 17, S., Range 3, W., Mitchells Addition to North Birmingham. $167,000. A. J. Hawkins, city engr.

O., Amherst—July 26, by F. L. Moebius, village clk., sewage disposal plant; adv. E. N.-R. July 21.

O., Akron—July 28, W. F. Peters, dir. Pub. Serv., 18,960 ft. 8- to 24-in. vitr. clay and 7,690 ft. 30- to 75-in. brick or segmental block sewer in Arlington et al. (Weston Rd. Dist.) $273,500. J. F. Root, Municipal Bldg., engr. Noted Mar. 31.

O., Columbus—July 30, by O. Moore, clk. Franklin Co., 17,590 ft. 6- to 20-in. vitr. clay sewer, etc., in Minerva Park, and disposal plant, 7,400 lb. steel, in Mifflin Twp. $90,278. E. L. Bradbury, Court House Annex, engr.

Mich., Detroit—July 27, by Dept. Pub. Wks., backwater gates for East Jefferson Ave. Sewer Dist. P. A. Fellows, City Hall, engr.

Mich., Detroit—July 27, by Comr. Pub. Wks., monolithic concrete or brick sewers, etc., in 2,613 ft., Griggs-Curtis Arm, Sect. 1 north of 6 mi. Rd. Sewer, 2,164 ft. Seven Mile Rd. Arm East, Sect. 1 Hubbell Ave. Sewer, 1,625 ft. Avon Ave. Arm North Grand River Ave. Sewer, 1,858 ft. Grand River Ave. East Berg Rd. Sewer, and 7,830 ft. Pembroke Ave. Arm East Hubbell Sewer; also repairing and extending Dubois St. dock and outlet.

Mich., East Lansing—July 23, by City, B. A. Faunce, clk., constructing Central Relief Sewer and Drain, 6,716 lin.ft. 36- to 60-in. pipe; adv. E. N.-R. July 21.

Ill., Chicago—July 28 (extended date), by H. C. W. Laubenheimer, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., North Side Intercepting Sewer Contr. 9, 7 river and channel crossings, etc. T. J. Crowe, pres. Noted July 14.

Ia., Maxwell—July 25, by City, E. L. Wood, city clk., sewage disposal plant, 58 manholes, 20,541 ft. 8 and 10 in. sewers in various streets. $40,000. Currie Eng. Co., Webster City, engrs.

Tex., San Antonio—Aug. 1, by State Bd. Control, Austin, H. H. Harrington, chn., improving sewage treatment plant, at State Hospital for Insane, here. Terrell Bartlett, Engineers, 612 Calcasieu Bldg., San Antonio, engrs.

Tex., Terrell—Aug. 1, by State Bd. Control, Austin, improvements and additions to sewerage plant, incl. incineration, etc., here, for Terrell State Hospital. $300,000. Terrell Bartlett, Engineers, Calcasieu Bldg., San Antonio, engrs.

Mass., Beverly—South Essex Sewerage Bd., Fort Ave., Salem, Sect. 8, Rial Trunk Sewer, here, to V. Barletta, 10 Whipple Ave., Roslindale, $72,585; and Sect. 12 of Trunk Sewer, 690 ft. 48 in. iron pipe, to J. H. Ferguson, 289 Chapman St., Providence, R. I., $17,060. Noted June 16.

O., Cleveland—See "Streets and Roads."

O., Cuyahoga Falls — Sewers, etc. in Fairland Allotment, to W. McDowell & Sons Co., 4120 East 104th St., Cleveland, $30,458. Engrs. est. $30,000.

Ill., Dolton—For 8- to 24-in. vitr. tile and 24- to 84-in. concrete sewers in various streets, to Pastoret-Dorsey-Barrett Co., Duluth, Minn., $407,000. Engrs. est. $250,000. Noted Dec. 16.

Waste Disposal

Bids Desired

Wis., Shorewood—Aug. 1, by Village Bd., 30 ton per day, high temperature destructor Dutch oven type municipal garbage incinerator. H. A. Schmitt, village engr.

Bridges

Proposed Work

N. J., New Providence—Bd. Freeholders Union Co., Elizabeth, plans bridge over Passaic River, at Scotch Plains Rd., here. $30,000. J. L. Bauer, Elizabeth, engr.

Va., Danville—Making sketches rebuilding 825 ft. arched concrete, or concrete and steel traffic bridge, 54 ft., recently burned. Election soon $350,000 bonds for same. A. Saville, Madison Farms, Richmond, and C. A. P. Turner, 300 Builders Exch. Bldg., Minneapolis, Minn., engrs.

Ky., Paducah—Harrington, Howard & Ash, engrs., Orear-Leslie Bldg. Kansas City, Mo., takes bids about Aug. 15, 11 span 4,000 ft. bridge, to have 12 concrete piers, 2,400 ft. concrete trestle, 1,520 ft. Cantilever steel span, 20 ft. roadway across Ohio River, here, for Paducah Bd. Trade, C. W. Craig, secy. $2,100,000. Noted Mar. 31 under Kentucky and Illinois.

O., Lisbon—Comrs. Columbiana Co. take bids about Aug. 13, one span concrete bridge on Lincoln Highway near here, $36,000; also concrete bridge over Little Yellow Creek, at Wellsville, $58,000. L. C. Kirk, Lisbon, engr.

Ind., Williamsport—Aug. 1, by Bd. Comrs. Warren Co., Court House, constructing Bridge 282 "High Bridge" and Bridge 283 "Rainsville Bridge." O. K. Albright, co. engr.; adv. E. N.-R. July 21.

Tex., Amarillo—Chicago, Rock Island & Pacific Ry. Co., C. A. Morse, ch. engr, La Salle St. Sta., Chicago, Ill., made plans 2,400 ft. rein.-con. and steel bridge over Canadian River, 152 ft. above water level, here. $1,000,000. Most of construction will be done by day labor.

Bids Desired

N. J., Bridgeboro—Aug. 1, by State Hy. Comn., State House, Trenton, constructing single leaf bascule span bridge, over Rancocas Creek, on Route 2, Burlington Co., here. A. L. Grover, ch. clk.; adv. E. N.-R. July 21. Noted Feb. 24.

Mississippi — July 25, by Bd. Supervs. Jackson Co., Pascagoula, two 210½ ft. steel swing spans, operating machinery, electrical equipment, roadway gates, 61,533 ft. creosoted timber flooring, 865 sq.yd. rock asphalt wearing surface, 2 operators houses, roadway lights and wiring, for bridges over Pascagoula River at Pascagoula and over Dog River at Moss Point. Noted June 9.

Illinois—July 27, by State Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, bridges in Moultrie, Piatt, Douglas, Richland, Monroe, and Madison counties. F. T. Sheets, ch. highway engr.

Ill., Chicago—July 28 (extended date), by H. C. W. Laubenheimer, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., substructure for double leaf trunnion bascule bridge over Main Drainage Channel of Sanitary Sewer Dist., on line of Crawford Ave., etc. T. J. Crowe, pres. Noted June 30.

Minnesota—July 26, by State Hy. Dept., St. Paul, one 120 ft. and two 50 ft. concrete bridges, also one triple 10 x 10 ft. monolithic culvert, on Rushford-Whalen Rd., State Project 9-21-2, Fillmore Co.

South Dakota—See "Streets and Roads."

Missouri—July 29, by State Hy. Comn., Jefferson City, two 12 ft. rein.-con. slab, one 40 ft. and two 35 ft. rein.-con. deck girder spans, etc. in Audrain Co.; seventeen 20 ft. rein.-con. slab, two 25 and 30 ft. rein.-con. deck girder and one 90 ft. steel truss spans, etc., in Chariton Co.; two 12 ft. rein.-con. slab, three 40 ft. rein.-con. deck girder, one each 60 ft. and 70 ft. steel truss spans, etc. in Cape Girardeau Co.; one 8 ft., two 12 ft., and one 16 ft. rein.-con. slab, three 40 and two 45 ft. rein.-con. deck girder spans, etc. in Lawrence Co.; three 30 ft. rein.-con. deck girder spans in Lincoln Co.; 40 ft. rein.-con. deck girder span in Cooper Co.; two each 12 and 20 ft. rein.-con slab and one 80 ft. steel truss spans in Pike Co. T. H. Cutler, ch. engr. Noted May 26.

Arkansas—See "Streets and Roads."

Oklahoma—July 26, by State Hy. Dept., Oklahoma City **(S.A.P. means State Aid Project)**, 3 span 140 ft. rein.-con. trestle bridge S.A.P. 250, near Westville, Adair Co., $30,000; 28 span 470 ft. pile trestle bridge over Red River at Headrick, Kiowa and Jackson Counties, $40,000, 34 span 140 ft. pile trestle bridge S.A.P. 483 at Fairview, Major Co., $40,000; and 1 span 110 ft. steel truss bridge on piers, S.A.P. 494, near Gould, Harmon Co., $30,000. C. R. Mandigo, Capitol Bldg., Oklahoma City, engr.

Calif., Los Angeles—Aug. 1, by Bd. Pub. Wks., 3 span 547 ft. concrete bridge and girder approaches, 56 ft. roadway, etc., over La Canada de la Alison, on 4th and Lorenna Sts. M. Butler, city bridge engr.

Que., Longueil — July 23, by L. E. J. Brais, bridge over River of Montreal in St. Joseph de Chambly Parish, for City. $150,000. I. E. Vallie, Quebec, engr.

Contracts Awarded

Maine—State Hy. Dept., Concord. Jeff Bracket Bridge, in Acton, to Ames Constr. Co., Somersworth, N. H., $23,027; bridge in Cornish, also one in Wells and Kennebunk, to Gulliver Co., 120 Exchange St., Portland, Me., $8,908 and $8,465 respectively; 2 bridges in Newfield, to E. Cyr, Waterville, $11,291; and 3 in Sebago, to J. A. and J. R. Partridge, Portland, $5,674, all concrete.

Rhode Island — State Bd. Pub. Roads, Providence, constructing Pocassett River Bridge 23, in Cranston, to H. M. Soule, 110 Brooks St., Pawtucket, $16,950; and Cottage Home Bridge 225, in Warwick, to Rendle Corp., 271 Marginal St., Chelsea, Mass., $4,100, both concrete and timber.

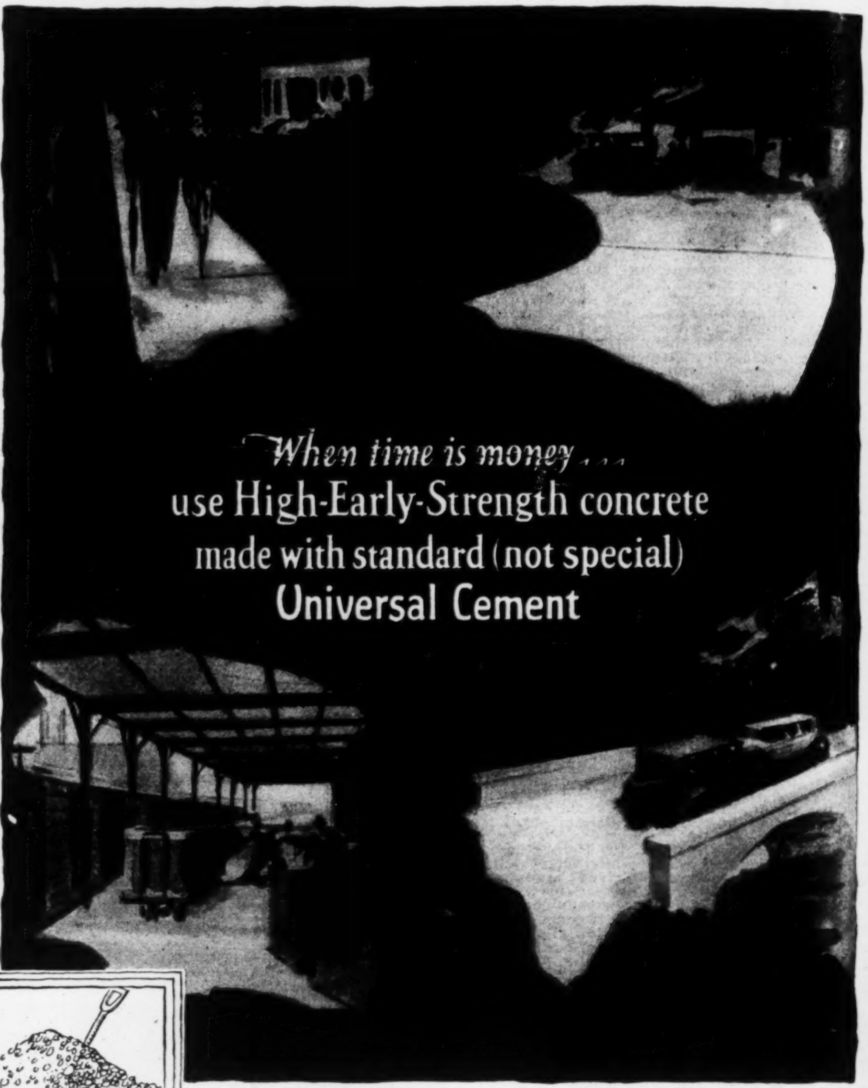
N. Y. Oswego—Oswego Co., A. E. Howard, supt., bridge over southern branch Salmon River at Port Ontario, here, to F. A. Buckland, Inc., 1131 Monroe Ave., Rochester, $43,999.

O., Cleveland—Cuyahoga Co., repairing bridge over Rocky River, on Lorain Rd., to Bituminous Constr. Co., Leader Bldg., $74,014. Engrs. est. $77,085. Noted June 16.

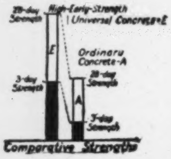
Iowa—State Hy. Comn., Ames, **(F. A. P. means Federal Aid Project, and P. B. P. Primary Bridge Project)**, 32 x 24 ft. skew deck girder bridge on F. A. P. 52, P. B. B. P. 140, Buchanan Co., to A. F. Johnson, Lockridge, $17,000, and to J. B. Elliott, Independence, $7,524, 2 bridges and 20 culverts on P. B. P. 387, Cass Co., to Lundgren-Reis Co., 65 College St., Des Moines, $43,867, and to E. C. Smith, Rockwell City, $13,582, 1 bridge and 4 culverts on P. B. P. 308, Tama Co., to Zitterel-Swanson, Webster City, $13,830, and 6 culverts on P. B. P. 201, Monroe Co., to Ellis & Jordan, Centerville, $1,696. Grand total $138,664. Noted June 23.

Ia., Dubuque—Dubuque Co., 2 I-beam bridges, 11 culverts and extensions, to

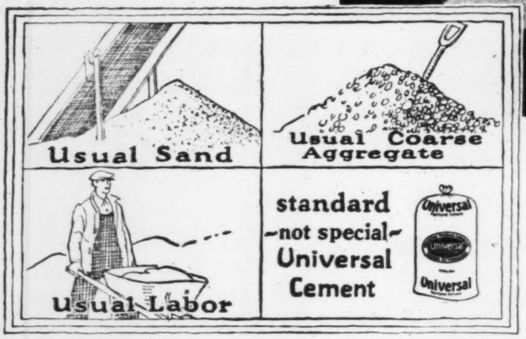
Constr. News page 28



When time is money . . .
use High-Early-Strength concrete
made with standard (not special)
Universal Cement



High - Early - Strength Concrete "E" made by using special methods and standard (not special) *Universal* cement is permanently *better* and *stronger* than concrete as ordinarily produced.



Usual Sand
Usual Coarse Aggregate
Usual Labor
standard
-not special-
Universal
Cement
Universal
Universal
Universal

High-Early-Strength Universal Concrete is made with the usual aggregates, usual labor, usual equipment and standard—not special—Universal cement, all applied according to fully tested methods. The coupon will bring full details promptly.

Time Saved on *All* Types of Jobs Thru Use of *High-Early-Strength* Concrete

In many sections of the country and on *all* types of jobs, builders are securing strong concrete in *3 days* with usual labor, usual materials, usual equipment and *standard*—not special—Universal cement, all applied according to fully tested methods.

Not only does this give *early* use of the job, but because such concrete has a higher *ultimate* strength in addition to a higher *early* strength, it also gives *permanently* better and stronger concrete. In securing *early* use, you get a *better* job; in securing a *better* job you get *early* use; in either case, you get both when you use *High-Early-Strength* Universal Concrete.

For full details on how to obtain *High-Early-Strength* Universal Concrete with the usual materials, usual labor and usual equipment, send in the accompanying coupon.

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Artificial silk plant, Camden, N. J., Furness Corp., plans, $10,000,000.

Oil pipe line, San Angelo, Texas, Texas-Ohio Oil Co. and Transcontinental Oil Co., making preliminary surveys, $7,000,000.

Pipe line and distributing systems, Marshall, Tex., Texas-Dixie Gas & Utility Co., plans, $5,120,000.

Railroad, Kansas City, Mexico & Orient Ry. Co., plans extension, $2,500,000.

Hotel, Scarsdale, N. Y., Equity Scarsdale Corp., N. Y. C., having plans prepared, $2,000,000.

Apartment hotel, Toronto, Ont., Ramsey, Stewart & Co., soon takes bids, $2,000,000.

Apartment hotel, Toronto, Ont., Garden Apartments c/o N. A. Armstrong & Co., Ltd., archts., having plans prepared, $1,500,000.

Hospital, Minneapolis, Minn., Estate Building Co., having plans prepared, $1,500,000.

Waterworks, Eugene, Ore., voted bonds, $1,250,000.

Cement plant, Louisville, Neb., Ash Grove Cement Co., Kansas City, Mo., will build, $2,000,000.

Bids Received

Subway, Philadelphia, Pa., Dept. City Transit, July 19 from Heyman & Goodman, N.Y.C., $7,629,880.

Waterworks, Corpus Christi, Tex., from Smith Bros., Crockett, $1,612,955.

Waterworks, Oakland, Calif., Directors East Bay Municipal Utility Dist., from G. Pollock Co., Sacramento, $1,370,685.

Contracts Awarded

Passenger station, Buffalo, N. Y., New York Central R.R. Co., N. Y. C., to Walsh Constr. Co., Syracuse, $12,000,000.

Gas pipe line, Texas and Louisiana, Dixie Pipe Line Co., Galveston, to Moody Seagraves Co., Orange, $10,000,000.

Factory, Pontiac, Mich., Yellow Truck & Coach Mfg. Co., Detroit, to J. A. Utley, Detroit, $8,000,000.

Factory, Los Angeles, Calif., B. F. Goodrich Rubber Co., Akron, O., to Foundation Co., N. Y. C., approx. $5,000,000.

Hospital, Detroit, Mich., Detroit Bd. of Health, to W. E. Wood Co., $2,387,219.

Warehouse, Long Island City, N. Y., Bloomingdale Bros., Inc., N. Y. C., to Turner Constr. Co., N. Y. C., $1,500,000.

Professional Bldg., New York, N. Y., Philsin Realty Corp., to Dwight P. Robinson & Co., $1,500,000.

Apartment, Seattle, Wash., Exeter Co., to H. F. Allan, $1,000,000.

News of the Week

Waterworks

Proposed Work

Mass., Charlestown (sta. Boston)—W. F. Schrafft & Sons Corp., 160 Washington St. N., Boston, plans condenser water intake and discharge pipes, and dredging Mystic River, etc., here. To exceed $15,000. Private plans.

Mass., West Townsend—Water Div. making surveys water system, incl. shallow wells, pumps, reservoir and water lines. $70,000. Parker, Bateman & Chase, High St., Clinton, engrs.

O., New Paris—Soon takes bids waterworks. $40,000.

Mo., Lilbourn—City postponed indefinitely construction waterworks and sewerage system. $70,000. A. C. Moore, Joplin Natl. Bank Bldg., Joplin, engr. Noted Sept. 16.

Tex., Beaumont—See "Unclassified."

Okla., Okay—Making preliminary plans new waterworks. $17,000. G. Howe, mayor. Engineer not selected.

Okla., Rosston—Made preliminary plans new waterworks. $18,000. G. Baxter, mayor. Engineer not selected.

Okla., Stillwater—Making plans waterworks improvements. Koch & Fowler, 801 Central Bank Bldg., Dallas, Tex., engrs.

Okla., Wagoner — Making preliminary plans main extensions, pumping equipment and additional storage. $40,000. A. McAllister, mayor. Engineer not selected.

Ore., Eugene—Voted $1,250,000 bonds, developing waterworks and power system from McKenzie River. W. C. Clubb, Court House, engr. Noted July 14.

Bids Desired

Conn., Hartford—Aug. 15, by Bd. City Water Comrs., Municipal Bldg., 3 mi. pipe line from Reservoir 6 to Reservoir 5. Adv. E. N.-R. July 28.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Waterworks engineers and superintendents prefer to use Leadite for joints—*It assures them that the pipe line will be completed and a revenue producer well within the time allowance.*

THE speed and simplicity of use of Leadite is a big factor in rapidly expanding communities.

This illustration shown here is a scene from an installation where Leadite was used with c. i. bell and spigot pipe.

These lines are in one of the fastest growing cities in the South. The speed of Leadite jointing makes it possible to lay pipe fast enough to keep up with the new building and real estate expansion.

In addition, Leadite joints are permanent. For over 30 years Leadite has been tested and used under all pipe laying conditions and has proven completely satisfactory.

The saving of labor time and advantages of using Leadite produce a saving of over 75% of the cost of making the joints.

Benefit by the experience of thousands of engineers, superintendents and contractors who have used Leadite.

Pa., Phila.—Aug. 2, by Dept. Pub. Wks., Bureau of Highways, grading; asphalt paving (assessment work); asphalt repaving; redressed granite block repaving; paving and repaving 9th St.; grading and improving City Ave. and 57th St.; repairing bridges; asphalt paving mixtures; asphaltic concrete paving materials; crushed stone and bituminous material, etc. G. H. Biles, dir.

Maryland—Aug. 2, by State Rd. Comn., Baltimore, concrete or Amiesite paving 1.45 mi. highway through Campus of University of Maryland at College Park, Contr. P-77. Prince George Co., J. N. Mackall, chn.

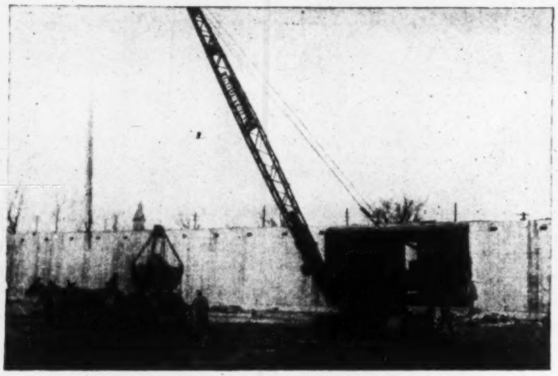
Md., Baltimore—Aug. 2, by State Rds. Comn., Baltimore, grading, concrete and sheet asphalt paving various roads in Montgomery, Prince Georges, Baltimore, Anne Arundel, and Kent Counties, etc. J. N. Mackall, chn.; adv. E. N.-R. July 28.

Md., Baltimore—Aug. 3, by Bd. Awards, paving streets listed in Contr. 421. S. Percell, City Hall, highways engr.

Virginia—Aug. 11, by State Hy. Comn., Richmond, grading 8 mi. Project SI39C and S162DC; grading and bridging 3 mi. S494A; and bituminous macadam paving 3 mi. S505. C. S. Mullen, ch. engr.; adv. E. N.-R. July 28.

Va., Appalachia—Aug. 2, at Mayors Office, L. P. Witt, clk., grading and concrete paving 11,050 sq.yd. various streets; adv. E. N.-R. July 28.

Ga., Calhoun—Aug. 1, by J. C. Garlington, City Hall, grading, curbing and concrete paving 7,800 sq.yd. roadway, here. Wiedeman & Singleton, Candler Bldg., Atlanta, engrs.



INDUSTRIAL CRAWLERS

and

COMMUNITY WELFARE

EVEN communities receive a distinct benefit from INDUSTRIAL all purpose crawlers. A million dollar filtration plant in the South, is being pushed along to completion by the aid of INDUSTRIAL crawlers. INDUSTRIAL reliability and stamina is bringing pure drinking water nearer and nearer to the homes of the waiting community.

This country's largest contractors are using INDUSTRIAL all purpose crawlers with satisfaction. A short time on the job, and repeat orders come in.

Write or wire our nearest branch and get complete information on this ALL PURPOSE — ALL SERVICE crawler.

Crawling Tractor Cranes, Shovels, Draglines, Locomotive Cranes 5 to 75 tons, Wrecking Cranes 75 to 200 tons, Freight Cranes, Transfer Tables, Railsaws, Pile Drivers, Clamshell Buckets, Steam Pile Hammers.

The 110-hp. Type "POC-2" Oil Engine Air Compressor

What does your Compressed Air cost?

WHEN operating at 100 pounds discharge pressure, the oil engine compressor pictured above will deliver 1,000 cu. ft. of free air at a cost of 1½ cents.

In this day of keen competition, production costs must be kept down. Because of their reliability and high overall economy, the POC air compressor units are reducing costs in almost every industry.

Standard compressors for 100 to 125 pounds discharge pressure have piston displacements of 350, 600, and 900 cu. ft. per minute. Units for special conditions are also available. Let us tell you more about them.

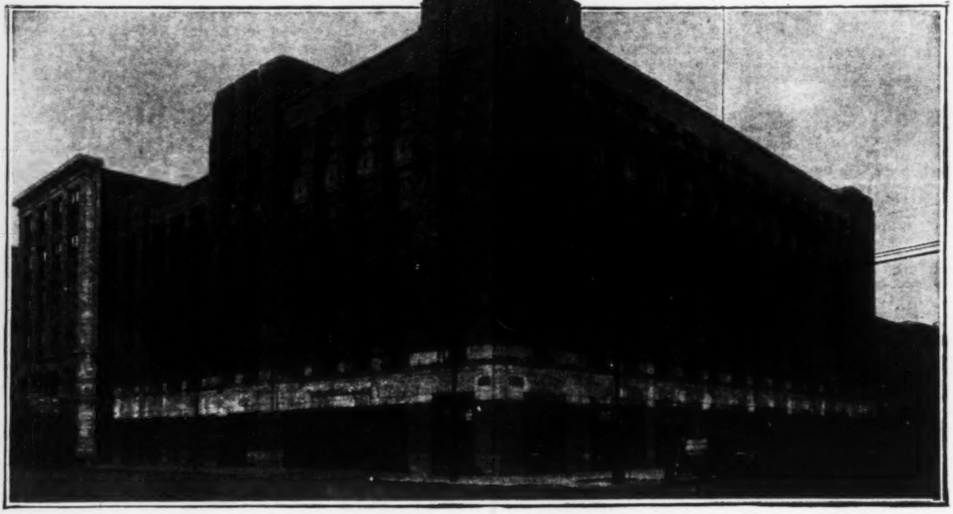
AMERICA NEEDS MORE GARAGES IN HER CITIES



There's a Need for Truck Garages

MID-CITY housing of commercial vehicles—a garage right at their loading point — became practical with the advent of d'Humy Motoramps. You can plan an economical multi-floor building with certain knowledge that an entire truck fleet can enter and leave just as fast as the checker at the door can pass them. There is no waiting for elevators and no elevator cost.

Are there not truck fleet owners before whom you can profitably place this idea? You can avail yourself freely of our specialized knowledge in preparing a plan. We will gladly sketch-plan a miniature floor layout to show the efficiency of a modern-type building.

The above illustration is of the Detroit News Garage which houses the fleet of trucks which are required for this newspaper's delivery service.

Capacity 400 cars

P. 151, Cullman Co. to be delivered f.o.b. cars Cullman, Hanceville and Garden City; 55,240 bbl. cement or 36.826 bbl. Puzzolam cement, for F. A. P. 149, Jefferson Co., delivered f.o.b. cars Warrior, Seloca, Kimberly and Morris; approximately 12,923 bbl. cement or 8,615 bbl. Puzzolam cement for F. A. P. 194, Montgomery Co., delivered f.o.b. cars Montgomery and tunters Stations; approximately 22,841 bbl. cement or 15,228 bbl. Puzzolam cement for F. A. P. 148, Montgomery and Autauga Counties, delivered f.o.b. cars Hunters Station, McQueen Station and Prattville; 36,568 bbl. cement or 24,379 bbl. Puzzolam cement for F. A. P. 146-B, Mobile Co., delivered f.o.b. cars Theodore, St. Elmo and Grand Bay; 35,826 bbl. cement or 23,884 bbl. Puzzolam cement, for F. A. P. 101 (reopened), Butler Co., delivered f.o.b. cars Fort Deposit, Searcy and Greenville; also 8,102 bbl. cement for F. A. P. 147, Jefferson Co., delivered f.o.b. cars Birmingham and at siding on Acton Spur.

Bridge Lumber—Iowa—Aug. 5, at office State Hy. Comm., Ames, 37 carloads bridge lumber delivered at various points in state.

Pipe—Seminole, Okla.—Mayor and City Council in market 100 tons 6 in. Class "B" c.i. pipe.

Ties—Montreal, Que.—Aug. 1, by G. P. MacLaren, genl. Ties & Times Agt. Canadian Natl. R.R. Co., railway ties.

Bids Received

Cement, Sand, Rock, etc.—Los Angeles, Calif.—M. B. Beatty, clk. Los Angeles Co., from Riverside Portland Cement Co., 742 South Spring St., Southwestern Portland Cement Co., 356 South Spring St., and California Portland Cement Co., Pacific Mutual Bldg., 2,600,000 bbls. cement in bulk, f.o.b. cars at mills (Crestmoore or Colton) $4,602,000, in sacks $5,772,000, in bulk in Districts yard at Azusa $5,343,000, and in sacks at Azusa, $6,513,000, etc.; from Union Rock Co., 7th and Los Angeles Sts., sand, etc., 1,620,000 tons sand, 1,330,000 tons gravel and crushed rock, etc., f.o.b. cars Largo or Rivas on P. E. Ry. and Kincaid on Atchison, Topeka & Santa Fe R.R., freight to be added as per schedule accompanying bid, $4,550,000; from Builders Crushed Rock Products Co., P. O. Box 568 Azusa, sand at $0.50 per ton, and rock $1 each class. Noted June 18 and 23.

UNIT PRICES

On actual contracts gathered by field correspondents, also those sent in by readers

Bridge—Oakland, Calif.

Bids were opened by Alameda Co. (lowest three) for constructing bridge over Arroyo De La Laguna on County Road No. 5428, near Hacienda, Pleasanton Road Dist., Pleasanton Township, from (A) Baldwin Bros., Berkeley Builders' Exchange, Berkeley (awarded contract); (B) Walter M. Willett; (C) McDonald & Maztiora. The unit bids are as follows:

	A	B	C
550 cu.yd. excav. and backfill below elev. 275.0	$6.00	$5.50	$9.00
570 cu.yd. excav. and backfill above elev. 275.0	1.75	2.50	5.00
880 cu.yd. excav. for roadway	1.00	1.00	.75
5,650 sq.ft. 4-in. gravel roadway surf	.055	.075	.06
480 cu.yd. Class "A" concrete	14.50	23.00	22.00
440 cu.yd. Class "B" concrete	22.50	22.00	21.00
110,000 lb. reinforcing steel	.054	.05	.05
319,000 lb. structural steel	.072	.063	.06
Removal of bridge (lump sum)	100.00	1,000.00	200.00
100 lin.ft. steel guard fence	1.00	120.00	2.00
100 lin.ft. 12-in. iron drainage pipes	1.50	160.00	3.00
Cutting thru concrete (lump sum)	500.00	250.00	300.00
Totals	$52,706	$53,326	$54,289

Engineering News-Record, Issue of July 28, 1927.

Approaches to Viaduct, Cincinnati, Ohio

Bids were opened by Commissioners of Hamilton County, Feb. 25, for grading, curbing and paving 4,600 sq.yd. approaches to viaduct over Pennsylvania R.R. on I. C. H. 8, from (A) Foley Construction Co., 3209 Boudinot Ave., (awarded contract); (B) Brewer & Brewer; (C) J. L. Radabaugh, Montgomery; (D) W. P. Flynn. The unit bids are as follows:

	A	B	C	D
38,000 cu.yd. embankment	$0.80	$0.80	$0.90	$1.30
80 cu.yd. crushed stone, spread and rolled	4.00	4.00	4.00	5.00
20 cu.yd. screenings, spread and rolled	4.00	4.00	4.00	5.00
2,500 lin.ft. protection fence	.75	.80	.80	1.00
4,600 sq.yd. concrete pavement (1-1½-3) 10 in	3.00	2.90	2.90	5.00
1,200 lin.ft. concrete curb	.30	.40	.40	2.00
30 cu.yd. concrete (walls 1-2-4 mix)	15.00	15.00	15.00	20.00
4,600 sq.ft. cement sidewalks	.30	.30	.30	.30
Totals	$49,205	$50,100	$52,250	$79,780

Engineering News-Record, Issue of July 28, 1927.

Road—New Hampshire

Bids were opened by State Highway Department, Concord, Apr. 15, (lowest three) for road in Shelburne, Project No. 229-B, from (A) W. H. Hinman, Medway, Mass. (awarded contract); (B) A. G. Bianchi, Longmeadow, Mass.; (C) Williams & Sorrenti, Boston. The unit bids are as follows:

	A	B	C
13,173 cu.yd. earth excavation	$1.00	$0.90	$1.00
1,304 cu.yd. ledge excavation	2.50	5.00	4.00
3,887 cu.yd. gravel base course	1.45	1.35	1.50
2,529 cu.yd. gravel sur. course	1.45	1.50	2.00
16 cu.yd. class "B" concrete	25.00	25.00	20.00
55 cu.yd. class "C" concrete	20.00	20.00	20.00
1,842 lb. reinforcing steel	0.10	0.10	.05
186 lin.ft. laying 12-in. c.m. pipe	1.00	1.00	.70
10 lin.ft. laying 14-in. c.m. pipe	1.00	1.20	.70
14 lin.ft. laying 20-in. c.m. pipe	1.00	2.00	.70
364 lin.ft. laying 15-in. r.c. pipe	1.25	1.50	.90
32 lin.ft. laying 18-in. r.c. pipe	2.00	2.50	.90
512 lin.ft. wood guard railing	0.75	.70	.70
2,788 lin.ft. wire cable railing wp	.85	.80	.75
Totals	$30,903	$32,541	$33,742

Engineering News-Record, Issue of July 28, 1927.

Road—Kansas

Bids were opened by State Highway Comn., Topeka, May 20 (lowest four and highest), for constructing 1.067 mi. Lecompton Road, State Highway No. 92, F. A. P. No. 268, Sect. I, Leavenworth Co., from (A) C. L. Dolman, Topeka (awarded contract); (B) M. R. Ammerman, Wichita; (C) Wyland, Lattin & Yard, Osborne; (D) A. L. Cook, Ottawa; (E) A. A. Davis & Co., Kansas City, Mo. The unit bids are as follows:

	A	B	C	D	E
38,417 cu.yd. earth excav.	$0.34	$0.42	$0.40	$0.38	$0.40
3,453 cu.yd. rock excav.	1.45	1.50	2.00	2.00	2.00
348.1 cu.yd. class "A" concrete	19.00	18.50	19.00	21.50	24.00
1.2 cu.yd. class "E" concrete	35.00	35.00	35.00	40.00	40.00
2.5 sq.yd. plain rip rap	1.25	4.00	4.00	4.00	2.50
39,069.1 lb. reinf. steel in place	.05	.05½	.05	.05	.06
1,710 lin.ft. guard fence, cable, R. C. posts	.75	.80	.75	.80	1.00
12.95 sta. hedge to be removed	10.00	10.00	10.00	10.00	12.00
Totals	$28,093	$31,453	$32,304	$32,498	$34,891

Engineering News-Record, Issue of July 28, 1927.

Levee and Sea Wall—Beardstown, Ill.

Bids were opened by State Division of Waterways, 950 Transportation Bldg., Chicago, May 25, for constructing levee and seawall, from (A) McWilliams Dredging Co., 1537 McCormick Bldg., Chicago, (awarded contract earth levees); (B) J. A. Heyworth, Inc., 606 South Michigan Ave., Chicago (awarded contract concrete river front wall and other work); (C) B. Layton, Muscatine, La.; (D) Byrne Bros. Construction Co., Inc., 624 S. Michigan Ave., Chicago; (E) States Corporation, 38 S. Dearborn St., Chicago; (F) Kochlitzky & Prosser, Cape Girardeau, Mo. The unit bids are as follows:

	A	B	C	D	E	F
Clearing for embankment (lump sum)	$4,000.00	....	....	$9,280.00	$15,000.00	$5,000.00

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Transmission line, Virginia Electric & Power Co., Virginia and North Carolina, plans improving system, $6,652,339.

Pipe line, Texas, Humble Pipe Line Co., Houston and Amarillo, making plans, $3,000,000.

Irrigation system, Eagle Pass, Texas, Maverick Co., making plans and soon takes bids, $2,000,000.

Waterworks, Santa Barbara, Calif., making surveys, $1,800,000.

Roads, Council Bluffs, Ia., Pottawayomic Co., voted $1,600,000 bonds.

School, Philadelphia, Pa., Archdiosese of Philadelphia, having plans prepared, $1,500,000.

Y.M.C.A. building, Philadelphia, Pa., having plans prepared, $1,500,000.

Sewers, Toronto, Ont., making plans, $1,000,000.

High school, Rock Island, Ill., Bd. Educ. having plans prepared, $1,000,000.

Bids Desired

Transit extension, Boston, Mass., Transit Dept., bids open Aug. 17, Sect. 2 Rapid Transit System; Aug. 31, Sect. 3, $4,500,000.

Theater, San Francisco, Calif., H. A. Minton, bids open about Aug. 20, $1,500,000.

Candy factory, St. Louis, Mo., Nat'l Candy Co., takes bids about Aug. 25, $1,000,000.

Bids Received

Bridge, Harrisburg, Pa., Dept. Property & Supplies, from James McGraw Co., Philadelphia, $1,824,851.

Contracts Awarded

Gas pipe line, Texas, Prairie Oil & Gas Co., Amarillo, to Nat'l Supply Co., Pittsburgh, Pa., approx. $3,000,000.

Hotel, San Francisco, Calif., Huckins Hotel System to Lindgren & Swinerton, $2,000,000.

Waterworks, Corpus Christi, Texas, to Smith Bros., $1,585,000.

Office and garage, Toronto, Ont., G. A. Stimson & Co. to Carswell Constr. Co., Ltd. Archts. est., $1,500,000.

Loft, B. F. Cohen, Philadelphia, Pa., to Taylor Meyers, Pittsburgh, Pa., $1,250,000.

Apartment, Richmond, Va., Monroe Terrace Interests, to Wise Granite and Construction Co. and A. J. Saville, Inc., $1,100,000.

Club, Chicago, Ill., Granger and Bollenbacher, archts., to E. L. Scheidehelm Co. Archts. est., $1,000,000.

News of the Week

Waterworks

Proposed Work

Conn., Putnam—Plans waterworks improvements, incl. new standpipe on Richmond Hill and standpipe enlargements, Bates Hill. $135,000 appropriated.

N. Y., Chautaqua—Making plans filtration and pumping plants. $40,000. Pease, Greeley & Hansen, 6 North Michigan Ave., Chicago, Ill., engrs.

Ga., Tallapoosa—J. W. Hildebrane, city clk., plans extending mains in various streets. K. F. Thomas, McGlawn Bowen Bldg., Atlanta, engr.

Mich., Berkley—Voted $25,000 bonds, waterworks improvements, incl. elevated tank, motor driven pump, etc. R. A. Murdoch Co., 602 Transportation Bldg., Detroit, engrs. Noted May 26.

Ill., Washburn—Takes bids about Aug. 16, 28,550 ft. 4- to 8-in. c.i. mains, 43 fire hydrants, thirty 4 in., sixteen 6 in. and two 8 in. valves, etc. in various streets. $42,689. Kinsey Eng. Co., Arcade Bldg., Pekin, engrs.

Kan., Bonner Springs—Voted $20,000 bonds, extending waterworks. E. T. Archer & Co., 609 New England Bldg., Kansas City, Mo., engrs.

Ark., Sheridan—Soon takes bids complete waterworks distribution system, sewers etc. in various streets. $75,000.

Tex., Barreda—Lasby & Crawford, San Benito, plans 1 story waterworks plant. $40,000. Engineer not announced.

Tex., Glen Rose—Making plans and soon takes bids water filtration plant and mains, etc. in various streets. $30,000. H. B. McAllister, Glen Rose, engr.

Tex., Pampa—Voted $70,000 bonds, extending waterworks. Engineer not announced.

Tex., San Benito—Central Power & Light Co., c/o F. C. Udden, dist. mgr., Frost Bldg., San Antonio, making plans brick and concrete filtration plant, 1 m.g.d. $50,000. Alvord, Burdick & Howson, 8 South Dearborn St., Chicago, Ill., consult. engrs. Noted June 9.

Tex., San Antonio—B. W. Mills c/o F. H. Booth, Frost Bldg., San Antonio, making plans new waterworks, in Palm Heights, here. $45,000.

Okla., Knowles — Made preliminary plans new waterworks, incl. deep well pump, motors, etc. $20,000. G. Hester, mayor.

Wash., Chehalis—Voted $80,000 bonds, 5 m.g. reservoir. B. Bantz, city engr.

Wash., Hoquiam—Making preliminary plans and surveys, industrial water resources, etc. C. E. Dorisy, Three Tree Point, and H. L. Gray, Henry Bldg., both Seattle, consult engrs.

Calif., Redwood City—E. M. Kneese, clk. San Mateo Co., withdrew call for bids to have been opened July 11, domestic water supply system for Ravenswood Water Dist. Will readvertise.

Calif., Riverside—Making plans additional water supply in Fairmount Park. $15,000 or more. E. R. Bowen, Central Bldg., Los Angeles, engr.

Calif., Santa Barbara—Making surveys Mona Dam and additional tunnel through mountains as auxiliaries to water system. $1,800,000. V. E. Trace, city water supt.

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> ***Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.***

Ont., Carleton Place—Making plans extending approximately 1 mi. 6 in. c.i. mains with specials, valves, hydrants, etc. in various streets. $15,000. E. A. Wilson, Carleton Place, engr.

Ont., Gananoque—Making plans extending 8,330 lin. ft. 6. in. and up c. i. mains, in various streets. $26,000. H. Rogers, Gananoque, engr.

Ont., Sandwich—Making plans extending approximately 1.5 mi. 6 in. c.i. mains, etc. in Dominion St. $20,429. C. R. McCall, Gas Bldg., Windsor, engr.

Ont., Swastika—Teck Twp. Council making plans waterworks and sewerage systems. $50,000. H. Sutcliffe, New Liskeard, engr.

Ont., Thorold—Thorold Twp. making plans 2 to 3 mi. 6. in c. i. mains, valves, etc., in various streets. $30,000. W. Chipman, Mail Bldg., Toronto, engr.

Ont., Willowdale—North York Twp. making plans 1 mi. 6 and 8 in. c. i. mains, valves, hydrants, etc. in Dufferin St., Beachmount and Hill Aves. $15,000. G. Baker, Willowdale, engr. Noted Feb. 17.

Bids Desired

Pa., Harrisburg—Aug. 15, by Dept. Pub. Wks., Bureau of Water, S. F. Haasler, supt., 36 in. force mains in various streets, adv. E. N.-R. Aug. 4.

Mich., Detroit—Aug. 10, by Bd. Water Comrs., 176 East Jeffierson Ave., superstructure weir and control chambers, 17,000 lb. structural steel, 700 cu.ft. cast stone work, 1,300 sq.ft. tile roof, 45,000 common and 20,000 face brick, etc. G. H. Fenkell, 176 East Jefferson Ave., engr.

Ill., Chicago—Aug. 9, by City, Room 207, City Hall, water service pipes and drains in various streets and avenues. M. J. Faherty, pres. Bd. Local Impvts.

Nev., Reno—Aug. 15, by E. H. Beemer, clk. Washoe Co., water pipe line between town of Wadsworth and Darby Canal, excavating and backfill trench 5,500 ft. long, 20 in. wide and 30 in. deep; approximately 1,000 cu.yd. excavation, 5,700 ft. 8 in. pipe, average haul 1 mi.; 5,700 ft. 8 in., 14 gage Armco welded iron pipe with field joints welded with 3 tees, 2 gate valves, 2 outlets, 1 in. globe valves and connections to existing lines at terminals. King & Malone, Cladinos Bldg., engrs.

Contracts Awarded

Mass., Springfield—Bd. Water Comrs. Contr. 10, Coble Mountain Diversion Tunnel to Coleman Bros. Inc., 245 State St., Boston, $362,800. Noted June 23 under "Unclassified."

La., Roseland—Town Council, Town Hall, general contract waterworks, to A. B. Hayden, Christian Pass, Miss., $12,086; pipe, to Dixie Mill Supply Co., 901 Tchoupitoulas St., New Orleans, $6,993; valves and hydrants, to Columbian Iron Wks., 811 Boyce St., Chattanooga, Tenn., $1,422; pumps, to Walter Castanedo, Inc., Canal Commercial Bldg., New Orleans, $3,466; tank on tower, to Chicago Bridge & Iron Wks., Hawly Bldg., Atlanta, Ga., $6,200; wells, to Blakemore Drilling & Eng. Co., New Orleans, $5,380. Grand total $35,547. Noted July 7.

O., Crooksville—Village, C. L. Dean, clk., waterworks plant, to E. F. Payne Co., New Lexington, $61,282. Noted July 14.

Ind., Bloomington — Filtration plant, piping and pumping equipment, etc; to C. A. Pike, Bloomington, $103,697. Noted June 16.

Mich., Royal Oak (Ind. br. Detroit)—Dept. Water Supply, 1½ m.g. elevated water tank, steel, for booster tank in connection with supply from Detroit Dept. Water Supply, on Lafayette Ave. to Chicago Bridge & Iron Wks., 37 West Van Buren St., Chicago, Ill., $92,500.

See proposal advertising on page 159

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

"The World's Playground" has used Leadite with complete satisfaction for over 20 years

ATLANTIC CITY, New Jersey, is proud of its well-paved streets. In laying new or additional cast iron mains, the engineers always use Leadite. They know from the experience of nearly one-quarter of a century that Leadite joints are absolutely secure and that the occasion will not arise where paved streets have to be dug up to repair the line.

In addition to the mains under the paved streets, Leadite was used for jointing the 24" main that runs under the famous boardwalk.

Other lines run through salt marshes, over bridges and under numerous railroad tracks.

The sizes of these mains run from 4" to 48".

Mr. L. Van Gilder is Engineer and Superintendent of the Atlantic City water department.

Added to the security and permanence of Leadite joints there is a saving of 75%.

For its economy—permanence—security—and the speed with which jointing can be finished—Water Works men specify and use Leadite.

Laying 24" c. i. water mains, with Leadite Joints, in Atlantic City under paved street.

Specify and use

LEADITE

—it saves at least 75%

Be sure it is

LEADITE

and accept no imitations~~~

The pioneer self-caulking material for c. i. pipe. Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Waterworks (Continued)

Mich., Saginaw—Pumping and purification structures for waterworks, to F. R. Patterson Costr. Co., 2631 Woodwood Ave., Detroit, $1,293, and carbon dioxide equipment, to Flinn & Dreffin Co., 431 South Dearborn St., Chicago, Ill., $9,625. Noted June 16.

Ill., Galesburg—Sinking well to Potsdam Formation, approximately 2,500 ft., to W. H. Cater, Contg. Co., 2643 West Monroe St., Chicago, at $4,000 per ft. Engrs. est. $40,000. Noted Nov. 11.

Ia., Newton—Waterworks improvements, incl. 26,000 16 in. pipe, etc., to Charles Robeck Co., 408 Securities Bldg., Omaha, Neb., $106,900. Noted June 23.

Ia., Ottumwa—City Water Dept., 400,000 gal. elevated steel tank, to Pittsburgh-Des Moines Steel Co., Tuttle and South West 10th St., Des Moines, $30,140. Noted June 23.

Kan., Chetopa—For 300 hp. Diesel engine and 94 hp. generator, etc., to McIntosh & Seymour Co., Dwight Bldg., Kansas City, Mo., $23,475 and $2,300 respectively. Noted June 9.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, manufacturing and driving piles for coagulant house foundation, etc. at Howards Bend Water Works Station on Missouri River, to McCormack-Combs Constr. Co., Columbia Bldg., $20,790. Noted June 30.

Tex., Alice—Waterworks improvements, incl. drilling well, motor driven rotary pumping equipment, 500 g.p.m., to Layne & Bowler Co., Chelsea Ave., Memphis, Tenn., approximately $16,000.

Tex., Corpus Christi—Improving water supply, to Smith Bros., Corpus Christi, $1,585,000.

Tex., Harlingen—Waterworks improvements, pump house, to R. A. Ewing, Harlingen, $25,687; water mains, to Nat. Cast Iron Pipe Co., Santa Fe Bldg., Dallas, $9,500; fire hydrants and connections, to San Antonio Machine Supply Co., 325 North Center St., San Antonio, $4,000. Grand total $39,187 Noted May 12.

Okla., Carter—Waterworks, to Sherman Iron Wks., 18 East Main St., Oklahoma City, $29,377. Engrs. est. $31,000. Noted July 7.

Calif., Huntington Park—For c.i. mains, etc. in Pacific Blvd., to G. Mitchell, 619 West Belgrave Ave., $33,418.

Calif., Oakland—East Bay Municipal Utility Dist., Lafayette Dam to G. Pollock Co., Forum Bldg., Sacramento, $1,370,685. Noted July 28.

Calif., San Bernardino—For 10,000 ft. 4 in. Class "250" Delavaud c. i. pipe, 12 ft. lengths, to U. S. Cast Iron Pipe Co., Wright-Callendar Bldg., Los Angeles, $4,450; also 10,000 ft. 6 in. and 2,500 ft. 8 in. pipe, 16 ft. lengths, to Amer. Cast Iron Pipe Co., Rives-Strong Bldg., Los Angeles, $6,746 and $2,418 respectively. Grand total $13,614.

Calif., Vista—Vista Irrigation Dist., 51,000 ft. excavating and backfilling trench for 4- to 12-in. concrete and steel pipe, to Crump Irrigation & Supply Co., Encinitas, $7,287; laying 12,100 ft. 8- to 12-in. concrete pipe, and 40,000 ft. 4- to 6-in. welded steel pipe, to Escondido Cement Products, Escondido, $5,051 and $2,700 respectively. Grand total $15,038.

Sewers

Proposed Work

Mass., Chicopee—Plans improving sewers in 17 various streets. $100,000. M. I. Shea, mayor.

Mass., Lakeview—Commonwealth of Massachusetts, Boston, rejected bids July 11, sewerage system disposal plant, etc. at Lakeville Sanatorium, here. Probably readvertise. Noted July 21.

W. Va., Huntington—Plans storm and sanitary sewers in Walnut Hills, $73,000. A. B. Maupin, city clk.

When time is money . . .
use High-Early-Strength concrete
made with standard (not special)
Universal Cement

Intersection of Church and New Streets, Champaign, Ill., placed and opened to traffic in *3 days* thru use of *High-Early-Strength* Universal Concrete made by using thoroly tested methods and standard—not special—Universal cement. Fred Lohman, city engineer; Frank Somers, Urbana, contractor. Standard—not special—Universal cement furnished by Somers-Barr Co., Inc., Urbana. For circular on *High-Early-Strength* concrete, use the coupon.

UNIVERSAL PORTLAND CEMENT CO.
210 South La Salle Street, Chicago

Without obligation, please send me detailed information on methods for securing strong concrete in *3 days* with the usual materials.

Name ....

Address ....

ENR 8-4-27

21 *Days* Becomes 3 *Days*

When *High-Early-Strength* Universal Concrete Is Used

Important intersections, connecting links or entire roads or streets that must be opened quickly need no longer be closed from 21 to 28 days for the concrete to gain the necessary strength.

Thru the use of fully tested methods and standard—not special—Universal cement, concrete is now secured with a *3-day* strength equal to the *28-day* strength of ordinary concrete. This concrete, having a higher *ultimate* as well as a higher *early* strength, also provides a *permanently* better and stronger pavement.

For full details on how to obtain *High-Early-Strength* Universal Concrete with the usual materials, usual labor and usual equipment, send in the accompanying coupon.

Universal Portland Cement Co.

Independent

Concrete Pipe Sewers

Laid Faster, and at Lower Cost

SEWER contractors prefer to use INDEPENDENT Reinforced Concrete Pipe, because the exclusive "Recessed" Joint greatly facilitates placing the pipe and sealing the joints. Substantial savings of time, labor and material are made on many jobs. The lower half of the joint recess is sealed INSIDE the sewer and the upper half is filled OUTSIDE the pipe. It is the easiest joint to seal under *all* trench conditions.

Added to these economies in construction is a permanence in the completed sewer that assures generations of efficient service, with little or no upkeep.

No matter what the size of your next concrete sewer project or job may be, get in touch with "Independent" for full information and estimates on your pipe requirements. Write or wire us.

INDEPENDENT CONCRETE PIPE CO., 202 N. WEST ST., INDIANAPOLIS, IND.

Bridges (Continued)

W. Va., Charleston—Kanawha Co., 1 span, 200 ft. steel and concrete bridge across Cabin Creek, to E. R. Mills, Covington, Ky., $36,048. Noted June 30.

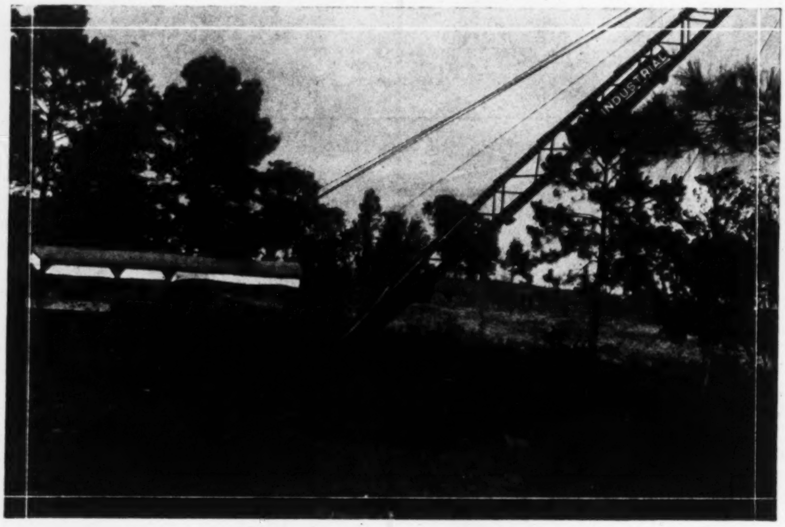
Streets and Roads

Bids Desired

Maine—Aug. 16 by State Hy. Dept., Augusta, grading and bituminous macadam paving etc., 2.71 mi. Federal Aid Project, 106-A Poland; and graveling, etc. 0.85 mi. Federal Aid Project 98-C in Gouldsboro and 2.94 mi. Federal Aid Project 105-A, Anson, P. D. Sargent, ch. engr.



Where Grading is tough—

THERE'S nothing like an INDUSTRIAL all purpose crawler for rough and tough grading. A gasoline crawler equipped with a dragline bucket can work wonders in a few hours' time.

The 24-inch shoes make the INDUSTRIAL particularly adaptable for work in fairly soggy ground. Manipulation is extremely simple, and the upkeep cost is very low. If there's money to be made it can be made with an INDUSTRIAL.

Write or call our nearest branch for complete information about this all-service, all-purpose crawler.

Crawling Tractor Cranes, Shovels, Draglines, Locomotive Cranes, 5 to 75 tons, Wrecking Cranes 75 to 200 tons, Freight Cranes, Transfer Tables, Railsaws, Pile Drivers Clamshell Buckets, Steam Pile Hammers.

Establishing Standard Specifications

THE American Institute of Steel Construction has developed a Standard Specification which is estimated to be saving building owners and other taxpayers more than $30,000,000 a year! The Specification covers the design, fabrication and erection of structural steel for buildings. It was developed with the co-operation of the ablest engineering talent in America. It is endorsed by such bodies as the A. S. C. E., the New York Building Congress, and the Pacific Coast Building Officials Conference.

The Institute supplements this Specification with a Code of Practice which is doing away with all misunderstandings between the buyer and seller of structural steel. You are invited to co-operate in the Institute's educational work, to avail yourself of the Institute's data and experience. Write now for the important fact-book, "STEEL NEVER FAILS."

AMERICAN INSTITUTE OF STEEL CONSTRUCTION, INC.

The co-operative non-profit service organization of the structural steel industry of the United States and Canada. Correspondence is invited. Address: Lee H. Miller, M. Am. Soc. C. E., Chief Engineer, 285 Madison Avenue, New York City.

Steel Insures Strength and Security

Water Main—Houston, Tex.

Bids were opened by City, May 23, for laying 12-in. main on Franklin Ave. from Main to Chenevert Sts. and 8-in. main on Franklin Ave. from Chenevert to Chartres Sts., from (A) Southern Construction Co., (awarded contract); (B) The Piling & Foundation Co., Bankers Mortgage Bldg.; (C) C. K. Horton, 2200 Clay St. The unit bids are as follows:

	A	B	C
150 cu.yd. extra excav.	$1.00	$2.00	$1.00
1,500 man hrs. extra labor	.60	.50	.60
10 M. ft. B.M. timber ordered left in trench	40.00	40.00	40.00
20 cu.yd. road gravel	4.00	3.50	4.00
200 extra team hours	.90	.90	.80
For pipe furnished in 16-ft. lengths:			
100 lin.ft. laying 12-in. pipe 0–4 ft. deep	2.00	1.95	2.00
2,800 lin.ft. laying 12-in. pipe 4-6 ft. deep	2.00	2.10	2.20
900 lin.ft. laying 12-in. pipe 6-8 ft. deep	2.20	2.35	2.30
700 lin.ft. laying 8-in. pipe 4-6 ft. deep	1.10	1.20	1.50
250 lin.ft. laying 6-in. pipe 4-6 ft. deep	1.00	.95	1.25
For pipe furnished in 12-ft. lengths:			
100 lin.ft. laying 12-in. pipe 0-4 ft. deep	2.15	2.00	2.15
2,800 lin.ft. laying 12-in. pipe 4-6 ft. deep	2.15	2.20	2.35
900 lin.ft. laying 12-in. pipe 6-8 ft. deep	2.35	2.45	2.45
700 lin.ft. laying 8-in. pipe 4-6 ft. deep	1.15	1.25	1.60
250 lin.ft. laying 6-in. pipe 4-6 ft. deep	1.00	1.05	1.35
Totals	$21,625	$23,370	$23,630

Engineering News-Record, Issue of Aug. 4, 1927.

Road—Port Huron, Mich.

Bids were opened by Div. Engr., State Highway Dept., Port Huron, May 24, for constructing road in Casco and Ira Townships, St. Clair Co. and Lenox & Chesterfield Townships, Macomb Co., from (A) Bishop & Weir, 955 East Jefferson Ave., Detroit, (awarded contract); (B) White Construction Co., 735 Fullerton Ave., Chicago; (C) Pope-Foss Co., Mt. Clemens; (D) Murray & Fremont and Deckerville Construction Co. The unit bids are as follows:

	A	B	C	D
48,855 cu.yd. excav.—earth	$0.48	$0.60	$0.55	$0.60
10,259 sta.yd. excav.—overhaul	.02	.02	.03	.03
194 lin.ft. 12-in. encased tile culvert	1.40	1.40	1.50	1.50
30 lin.ft. 15-in. encased tile culvert	1.75	1.75	1.75	2.00
158 lin.ft. 18-in. encased tile culvert	2.25	2.00	2.60	2.40
56 lin.ft. 24-in. encased tile culvert	3.50	3.40	4.50	3.00
25 lin.ft. relaying 12-in. pipe	.50	.50	.75	.50
20 lin.ft. relaying 18-in. pipe	.60	.60	1.00	.75
333.6 cu.yd. concrete—grade B	16.00	16.00	15.00	18.00
325.3 cu.yd. concrete—grade C	16.00	16.00	15.00	18.00
25,858 lb. steel reinforcement	.05	.05	.06	.06
78 lin.ft. 12-in. reinforced concrete pipe	1.40	1.60	1.55	1.50
12 lin.ft. 12-in. reinforced concrete pipe	2.00	2.50	2.60	2.50

131 lin.ft. railroad header, detail No. 7	1.00	1.50	2.50	1.00
68 lin.ft. w.i. pipe railing	2.00	.60	.75	4.00
91,557 sq.yd. concrete pavement 7-in. center 9-in. edge (mesh reinf.) 5.4lb. per sq.yd.	1.66	1.75	1.92	1.91
Totals	$189,904	$203,899	$217,567	$220,481

Engineering News-Record, Issue of Aug. 4, 1927.

Bridges—Washington

Bids were opened by State Highway Department, Olympia, May 10, (lowest three) for constructing Camp Mason-Tanner Bridges on State Road No. 2, King County, from (A) Ward Construction Co., P. O. Box 1146, Tacoma, (awarded contract); (B) King & Stillwell, Seattle; (C) C. F. Martin, Seattle. The unit bids are as follows:

	A	B	C
190 cu.yd. class "A" excav	$1.00	$1.25	$4.20
915 cu.yd. structure excav	4.00	3.25	5.83
635 cu.yd. concrete class "A" in place	28.50	32.25	36.21
252 cu.yd. concrete class "B" in place	26.50	29.90	23.21
91 cu.yd. concrete class "C" in place.	25.00	20.85	20.65
142 cu.yd. concrete class "E" in place	22.00	20.40	22.91
142–160 lb. steel reinf. bars in place.	.06	.0575	.035
750 lb. bronze expansion plates in place	1.00	.60	.52
Totals	$43,304	$44,643	$45,473

Engineering News-Record, Issue of Aug. 4, 1927.

Sewer—Chicago, Ill.

Bids were opened by Sanitary District, 910 South Michigan Ave., June 2, for constructing North Side Intercepting Sewer, from (A) W. J. Newman, 21 North Curtis St., (awarded contract); (B) E. J. Albrecht; (C) D. J. O'Connor; (D) G. M. O'Brien; (E) Lydon Construction Co.; (F) Underground Construction Co.; (G) Byrne Bros. Construction Co.; contractors all of Chicago. The unit bids are as follows:

	A	B	C	D	E	F	G
2,425 lin.ft. sewer, 50 in. high by 32 in. wide	$28.00	$31.50	$31.50	$31.00	$81,237.50	$37.00	$48.50
Junction chamber (lump sum)	2,500.00	1,142.00	3,400.00	3,000.00	600.00	3,000.00	5,000.00
120 lin.ft. manholes	25.00	17.00	15.00	30.00	11.00	30.00	15.00
3,900 lb. iron castings and miscellaneous metals	0.10	0.09	0.10	0.15	0.095	0.10	0.25
200 lb. additional reinforcing steel	0.07	0.07	0.07	0.07	0.07	0.07	0.07
5 cu.yd. rock excavation	5.00	5.00	5.00	5.00	5.00	5.00	5.00
50 cu.yd. additional earth excav. in tunnel	5.00	5.00	5.00	5.00	5.00	5.00	5.00
50 cu.yd. additional concrete class A in tunnel	20.00	20.00	20.00	20.00	20.00	20.00	20.00
Totals	$75,079	$81,209	$83,266	$83,649	$83,817	$98,004	$126,676

CORK on the Roof

Keeps Top Floors Cooler

HOW are *your* top floors these hot summer days? Are they as comfortable as the lower floors; or are they stifling with the heat that pours in through the roofs?

Insulating a roof with Armstrong's Corkboard will stop most of that heat. It will keep your top floor rooms as cool as those below and repay you quickly through the increased efficiency of employees working under comfortable conditions.

Moreover, you will find these same rooms easier to keep comfortably and uniformly warm in winter.

Armstrong's Corkboard is easily laid *right over your present roofing.* By installing it now, you can get the benefit of roof insulation for the rest of this summer, and have it for many summers and winters to come.

The Insulation of Roofs with Armstrong's Corkboard
The Insulation of Roofs to Prevent Condensation

Send for these Free Books

"The Insulation of Roofs with Armstrong's Corkboard" contains information on the insulation of all types of buildings.

"The Insulation of Roofs to Prevent Condensation" treats specifically the subject of condensation of moisture on ceilings. Write for these books to Armstrong Cork & Insulation Company, 218 Twenty-fourth Street, Pittsburgh, Pa.

Insulating the roof of the F. N. Burt, Inc., Factory Building at Buffalo, N. Y., with 2-inches of Armstrong's Corkboard.

Road—Texas

Bids were opened by A. J. Wise, County Engr., Courthouse, Houston, for constructing 17.6 mi. LaPorte Road, Harris Co., from (A) Tibbetts Construction Co., Joseph Bldg., Ft. Worth, (awarded contract); (B) Gibson & Mitchell, Pauls Valley, Okla.; (C) Haden & Austin, Houston. The unit bids are as follows:

	A	B	C
6.8 acre clearing	$25.00	$65.00	$50.00
6.8 acre grubbing	75.00	65.00	50.00
88,024 cu.yd. earth roadway excavation	.25	.31	.28
14,237 cu.yd. channel excavation	.30	.30	.25
1,109 cu.yd. structure excavation	.75	.75	1.00
35,464 cu.yd. earth borrow excavation	.25	.29	.25
78,451 sta.yd. earth overhaul	.04	.04	.05
600 roller hr. extra rolling base	3.00	1.50	2.50
272 m.gal. sprinkling base	2.00	2.00	2.50
136 m.gal. water hauled add. mile	1.00	.50	1.50
3,428 cu.yd. subgrade treatment material	2.30	2.00	2.20
13,572 cu.yd. subgrade material hauled add. ½ mile	.06	.07	.07
147,863 sq.yd. reconstructed base course	.03	.04	.03
3,453 cu.yd. base course matl. from barges	1.75	1.75	1.50
4,426 cu.yd. base course matl. from R.R. cars	2.20	2.10	1.90
47,635 cu.yd. base course matl. hauled add. ½ mile	.06	.07	.06
198,893 sq.yd. concrete pavement—Bates type	1.91	2.09	2.20
759,541 lb. reinforcing for concrete pavement	.045	.05	.0525
415 cu.yd. class "A" concrete	18.00	20.00	20.00
65 cu.yd. class "C" concrete	25.00	20.00	20.00
35,599 lb. reinforcing steel	.05	.05	.05
660 lin.ft. 15-in. concrete pipe in place	1.50	2.50	1.50
450 lin.ft. 18-in. concrete pipe in place	1.90	2.90	2.00
370 lin.ft. 24-in. concrete pipe in place	3.00	4.50	3.00
2 catch basins	50.00	75.00	100.00
300 sq.yd. plain riprap	1.50	2.50	2.00
600 sq.yd. old concrete riprap	1.00	1.50	.50
2,600 lin.ft. 6-in. concrete curb	.25	.20	.75
10 support for pavement at bridge ends	100.00	110.00	150.00
2,165 lin.ft. resetting guard fence	.10	.30	.15
2,000 hr. team time	.60	1.00	.90
2,000 hr. labor time	.35	.50	.45
Totals	$566,866	$557,342	$573,946

Engineering News-Record, Issue of Aug. 4, 1927.

Road—New Hampshire

Bids were opened by State Highway Department, Concord, Apr. 15, (lowest three) for constructing Rockingham Rd. in Salem Township, Project 198-C, from (A) B. Perini & Sons Co., Ashland, Mass., (awarded contract); (B) Central Construction Co., Lawrence, Mass.; (C) J. E. Watkins, Amesbury, Mass. The unit bids are as follows:

	A	B	C
1,001 cu.yd. earth excavation	$0.95	$1.10	$1.10
2,724 cu. yd. borrow	.95	1.15	1.10
1,286 cu.yd. Gravel base course one course reinforced concrete	1.20	1.15	1.10
12,300 sq.yd. pavement	2.25	2.45	2.50
12 cu.yd. class C concrete	25.00	20.00	20.00
88 lb. reinforcing steel	.08	.10	.05
92 lin.ft. laying 15 in. R.C. pipe	1.50	1.75	1.00
36 lin.ft. laying 24 in. R.C. pipe	2.50	2.00	1.50
200 lin.ft. wood guard railing	.60	.60	.70
744 lin.ft. wire cable railing WP	.75	.80	.75
Totals	$33,970	$37,045	$37,351

Engineering News-Record, Issue of Aug. 4, 1927.

Dike—St. Louis, Mo.

Bids were opened by Board of Public Service, June 14, for 2,100 ft. of hurdle dike extension of Dike No. 15 on St. Louis County side of Missouri River at Howard's Bend, from (A) Kansas City Bridge Co., Orear-Leslie Bldg., Kansas City, (awarded contract); (B) Fruin-Colmon Contracting Co., Merchants-Laclede Bldg. The unit bids are as follows:

	A	B
215,000 sq.ft. brush mattress	$0.08	$0.15
5,000 cu.yd. stone	4.50	5.00
65,800 ft. piling	35	.30
65,800 ft. piling driven	.35	.40
Totals	$85,760	$103,310

Engineering News-Record, Issue of Aug. 4, 1927.

Sewers—Union, N. J.

Bids were opened by H. Kreh, Jr., Township Engr., Union Center, June 8, for constructing sewers in Elmwood Ave. and other streets, from (A) Decker & Canning, 395 Grove St., Newark, (awarded contract); (B) L. R. Gilbert, Plainfield; (C) J. Miele & Co., East Orange; (D) Pizzimenti Bros., Little Falls; (E) Spinello Construction Co., Orange; (F) J. Cestone, Montclair; (G) Paulsen Construction Co., New York City. The unit bids are as follows:

	A	B	C	D	E	F	G
800 cu.yd. rock excavation	$2.75	$1.00	$3.50	$3.00	$4.00	$4.00	$5.00
3,600 cu.yd. quicksand	3.00	2.50	3.50	3.00	2.75	4.00	13.00
180 M ft. B.M lumber in place	85.00	25.00	70.00	25.00	65.00	70.00	20.00
100 cu.yd. class "C" concrete	15.00	10.00	15.00	12.00	15.00	19.00	10.00
250 lin.ft. 8 in. sewer 0- 6 ft. deep	1.22	1.70	1.25	1.30	1.50	1.30	2.35
1,500 lin.ft. 6- 8 ft.	1.43	1.70	1.50	1.50	1.60	1.40	2.45
5,850 lin.ft. 8-10 ft.	1.50	2.10	1.70	2.00	2.35	1.80	2.80
175 lin.ft. 10-12 ft.	2.00	2.40	2.25	3.00	2.90	2.50	3.20
880 lin.ft. 15 in. sewer 6- 8 ft. deep	2.00	3.50	2.35	3.50	3.50	4.00	3.25
425 lin.ft. 8-10 ft.	2.40	4.00	2.70	4.25	4.50	5.00	3.60
1,620 lin.ft. 10-12 ft.	2.90	4.50	3.25	5.00	5.00	6.00	4.10
590 lin.ft. 12-14 ft.	3.38	5.00	4.65	8.00	6.00	7.00	4.85
880 lin.ft. 14-16 ft.	4.50	7.00	6.50	10.00	7.00	9.00	6.32

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Railway, Missouri, Kansas City, Mexico and Orient R.R. Co. making plans, $7,000,000.

Streets and roads, Texas, Edinburg-Hidalgo Co. election Sept. 6, $6,000,000.

Bridge, Rhode Island, Mt. Hope Bridge Co. having plans prepared suspension bridge across Mt. Hope Bay, $5,500,000.

Kraft paper mill, Port Townsend, Wash., Nat'l Paper Products Co. having plans prepared, $2,500,000 to $3,000,000.

Streets and roads, Sherman, Tex., Grayson Co. voted bonds, $2,500,000.

Hotel, Pueblo, Colo., P. H. Philbin, purchased site and had plans prepared, $2,000,000.

Cement plant, St. Louis, Mo., Missouri Portland Cement Co. takes bids about Sept. 1. Approximately $2,000,000.

Theatre, San Antonio, Tex., Interstate Amus. Co. having plans prepared, $2,000,000.

Hospital, Bayonne, N. J., Jewish Hospital Ass'n takes competitive sketches about Oct. 15, $2,000,000.

Hotel, Asbury Park, N. J., Kelly Co. plans, $1,500,000.

Streets and roads, Council Bluffs, Ia., Pottawatomie Co. voted bonds, $1,600,000.

Streets and roads, Athens, Tex., Henderson Co. making plans $1,400,000.

Streets and roads, Sigourney, Ia., Keokuk Co. voted bonds, $1,300,000.

Streets and roads, Refugio, Tex., Refugio Co. bonds election soon, $1,250,000.

Streets and roads, West Union, Ia., Fayette Co. voted bonds, $1,200,000.

Factory, Los Angeles, Calif., Firestone Rubber Co. plans, $1,000,000.

Polytechnic school Baltimore, Md., Mayor and City Council having plans prepared, $1,000,000.

Building, Los Angeles, Calif., Lilly-Fletcher Syndicate having plans prepared, to exceed $1,000,000.

Pipe foundry, Pueblo, Colo., Colorado Fuel and Iron Co., plans, $1,000,000.

Hospital, Camden, N. J., Dept. Pub. Health, having plans prepared, $1,000,000.

Bank and office, Pasadena, Calif., First Trust and Savings Bank and First Nat'l Bank soon take bids, $1,000,000.

Contracts Awarded

Sewers, Chicago, Ill., Sanitary Dist. of Chicago to Foschner Contg. Co., $3,827,120; to Builders Iron Fdry. Co., $57,834; to Chapman Valve Mfg. Co., $33,327. Total $3,918,281.

Office building, Chicago, Ill., Holabird and Roche to McLennan Constr. Co., $3,150,000.

Natural gas system, Texas, Western Gas and Fuel Supply Co., to Atex Constr. Co., approximately $2,500,000.

Office building, Chicago, Ill., De Paul Educational Society, to McLennan Constr. Co., $2,000,000.

Office building, Chicago, Ill., Riseman and Hirschfield to Dilks Constr. Co., 2,000,000.

Apartment store and garage, Chicago, Ill., Syndicate, incl. H. F. Knipp, to Dahlberg & Sundrin, Archts. est. $1,115,000.

Apartment, Oakland, Calif., Bercovich & Associates, to Pacific Coast Engineering Co., $1,000,000.

Waterworks, Rochester, N. Y., Lake Ontario Water Co., to J. G. White Corp., Engrs. est. $1,000,000.

N. J., Runnemede — (Sta. Camden) — Boro Council, plans waterworks system, incl. 7 mi. 4- to 6-in. pipe, etc. $105,000. W. D. Vosbury, Camden, engr.

La., Monroe—Made plans and takes bids about August 15 filtration plant, distribution mains, etc. $600,000. Burns & McDonnell Eng. Co., 402 Interstate Bldg., Kansas City, Mo., engrs. Noted June 9.

Tenn., Nashville—Bd. Pub. Wks. soon takes bids laying 3 mi. trunk line in northeast part of city. To exceed $15,000. H. E. Howse, mayor. Noted June 23.

Minn., St. Paul—J. W. Kelsey, supt. Water Bd. making plans water tower, 110 ft. high and 36 ft. diam. to house 200,000 gal. tank in Highland Park. $60,000. F. X. Tewes, City Hall, archt.

Kan., Longton—Voted $80,000 bonds waterworks and sewerage systems. F. E. Devlin, 614 Bitting Bldg., Wichita, engr.

Mo., Cabool—Voted $39,000 bonds, 100,000 gal. rein.-con. reservoir, deep well and pumping equipment, 60,000 gal. tank on tower, distribution mains, etc. A. H. Kendricks, Seymour, engr. Noted Dec. 30.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, received no bids July 26, guides, brackets and fixed screen refuse troughs, c.i. water supply pipe, etc. for three traveling water screens in intake at Howards Bend Waterworks Station on Missouri River, St. Louis Co. Will readvertise. L. Day, comr. Noted June 30.

Ark., Fort Smith—Soon takes bids turbine driven centrifugal pump for waterworks station. $40,000. W. H. Evans, City Hall, engr.

Ark., Springdale—Soon takes bids filtration plant, etc. $50,000. Alexander Eng. Co., Woodruff Bldg., Springfield, Mo., engr.

Tex., Alice—Voted $10,000 bonds well and pumping equipment for waterworks. Address P. S. Anderson, Alice, secy.

Tex., Balmorhea — Borderland Utilities Co., plans complete waterworks incl. wells or reservoir, pumping unit, etc. $35,000. Private plans.

Tex., Barreda (mail San Benito)—Gillock Development Co. c/o Lasby & Crawford, San Benito, making preliminary plans complete waterworks incl. power plant, etc. $50,000. Private plans. Noted Aug. 4.

Tex., Beaumont—See "Unclassified."

Tex., Glen Rose—Made plans complete waterworks and sewage system. H. B. McAllister, 519 North 12th St., Waco, engr.

Tex., Hico—Making plans water works improvements. H. B. McAllister, 519 North 12th St., Waco, engr.

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.*

Tex., Point Isabel—James Dickensen, making plans rein.-con. 2 m.g. settling basin, $100,000. Private plans.

Okla., Faxon — Voted $15,000 bonds, new well, pump and 51,000 ft. 4 and 6 in. c.i. pipe, etc. C. Riggins, Anadarko, engr.

Calif., Glendale — See "Streets and Roads."

Calif., Sebastopol—Making plans additions to water system, 3,000 lin.ft. 10 in. c.i. main, and one 500,000 gal. reservoir. G. L. Dillman, 14 Montgomery St., San Francisco, engr. Noted July 7.

Bids Desired

Mass., Westfield—Sept. 12, by Bd. Pub. Wks., earth dam and reservoir. O. E. Parks, supt.; adv. E. N.-R. Aug. 11.

R. I., North Tiverton (mail Tiverton)—North Tiverton Fire Dist., H. Ibbotson, clk., taking bids and opens same about Aug 15, complete equipment and appurtenances in pump house for proposed water works, incl. necessary pipe fittings and meters.

N. Y., Corning — Aug. 22, by Bd. Pub. Wks., constructing pumping station and force main, in Denison Park, H. Burdett Cleveland, 225 Bway., New York City, consult. sanitary engr.; adv. E. N.-R. Aug. 11.

Md., Baltimore — Aug. 17, by Bd. of Awards, copper pipe for Bureau of Water Supply. G. F. Wieghardt, City Hall, water engr.

N. C., Goldsboro—Aug. 25, by Mayor and Bd. Alderman, waterworks improvements, W. C. Olsen, Inc., Raleigh, engr.; adv. E. N.-R. Aug. 11.

N. C., Wilson—See "Sewers."

Mich., Detroit—Sept. 28, by Dept. Pub. Wks., 4 vertical motor driven pumping units 500 cu.ft. capacity per sec. against 27 ft. head, for Conners Creek, storm water pumping station. J. W. Reid, comr. Pub. Wks.

Ill., Thornton—Aug. 17, by Bd. Trustees, tubular well. C. J. Fleck, village clk.; adv. E. N.-R. Aug. 11.

Mo., St. Louis—Aug. 23, by Bd. Pub. Serv., 208 City Hall, 4 boiler settings for 650 hp. boilers, brick construction with steel lagging, incl. complete combustion control system, etc. for Howard Bend Waterworks Station on Missouri River, St. Louis Co. $40,000. L. Day, City Hall, comr.

Mo., St. Louis—Aug. 30, by Bd. Pub. Serv. 208 City Hell, rein.-con. clear water basin at Howards Bend Waterworks on Missouri River, St. Louis Co. $270,000. L. Day, City Hall, comr.

Tex., Alpine—see "Contracts Awarded."

Tex., San Antonio—See "Unclassified."

Bids Received

N. Y., Syracuse—Bd. Contract & Supply, City Hall, A. Mingler Jr., secy., 487,100 cu.yd. excavation for city reservoir from J. Young, West Brighton Ave. and Hunt. St., $210,000. Noted July 21.

Pa., Phila.—Dept. Pub. Wks., Bureau of Water, July 28, improving Queen lane filters, Contr. 890, from Penna Eng. & Constr. Co., Real Estate Trust Bldg. $13,322; and engine room floor at Torresdale Pumping Station, Contr. 891, from Acme Mach Co., 27 North 38th St. $20,000.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, July 26, 1 story and basement, 53 x 60 ft., rein.-con. and brick substation in Dist. E of City Electric Light System, from Atlas Constr. Co., International Life Bldg., $18,000. Noted June 30.

TRADE "LEADITE" MARK

Registered U. S. Pat. Office

Eliminating Repairs and Maintenance Costs

TRENTON WATER WORKS, Trenton, N. J., has been using Leadite for making joints in c. i. bell and spigot water mains for a great many years with entire satisfaction.

They have laid nearly 75 miles of c. i. pipe of various sizes with Leadite joints.

Trenton has very good paved streets and they have never had to dig up a Leadite joint for repairs during all the time they have been using Leadite. They consider this excellent performance for Leadite joints.

They find the use of Leadite has reduced to a minimum repairs and maintenance costs.

Trenton Water Works has always found Leadite joints efficient and economical.

They keep a check on their distribution system by water waste surveys.

During the severe winter of 1917-18 Trenton Water Works had over 2000 frozen services. Many of these services were connected to mains laid with Leadite joints. They had no difficulty in thawing, with electrical apparatus, services connected with mains which were laid with Leadite joints.

Mr. Alvin Bugbee is Superintendent of the Trenton Water Works.

Specify and use
LEADITE
It saves at least 75%

Be sure it is
LEADITE

When time is money . . .
use High-Early-Strength concrete
made with standard (not special)
Universal Cement

Cuts Two Weeks From Detour Period And Also Gives Better Concrete

Thousands of motorists were spared the time-loss and inconvenience of a long detour thru the simple use of *High-Early-Strength* Universal Concrete in the construction of a bridge in Lyon County, Iowa.

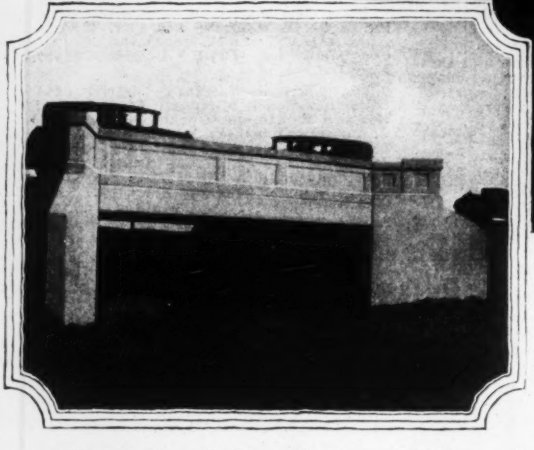
The contractor used the usual labor, usual materials, usual equipment and standard—not special—Universal cement, all applied according to fully tested methods. He obtained concrete with a *3-day* strength equal to the *28-day* strength of ordinary concrete. This concrete, having a higher *ultimate* as well as a higher *early* strength, is also *permanently* better and stronger concrete.

As *High-Early-Strength* Universal Concrete can be made as workable as desired, it is being used on all types of jobs. For full details, send in the accompanying coupon.

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland Columbus New York

Concrete for Permanence



Bridge at Inwood, Iowa. Detour period shortened by two weeks thru the use of *High-Early-Strength* Universal Concrete. R. H. Fuller, county engineer; Frank Humphrey, Cherokee, Iowa, contractor. Standard—not special—Universal cement furnished by Schoeneman Bros. Co., Inwood

UNIVERSAL PORTLAND CEMENT CO.
210 South La Salle Street, Chicago

Without obligation, please send me detailed information on methods for securing strong concrete in *3 days* with the usual materials.

NO FEAR OF BEING MAROONED

THERE'S no reason to fear mucky ground or mire when you own an INDUSTRIAL all-purpose crawler. The unusually wide shoes in the crawler tread and ample power to pull out of any situation are very substantial reasons why you should not hesitate to take any contract that comes along when you own an INDUSTRIAL all-purpose crawler.

Contractors all over the country are enjoying INDUSTRIAL satisfaction. Repeat orders from the country's most prominent contractors are evidence of INDUSTRIAL performance.

Our nearest representative is awaiting a call from you.
He has the information you desire.

(This is the twentieth of a series on the New York subway contractors.)

How New York City is Building Its New Subway System

For over fifty years Ingersoll-Rand has been a pioneer in the manufacture of compressed air equipment. Half a century of leadership in its field has won the continued patronage of the country's foremost contractors. And now, in 1927, with work well under way on the new subway system, New York contractors have again selected I-R products for their many jobs requiring the use of air-operated equipment.

INGERSOLL-RAND COMPANY—11 BROADWAY, NEW YORK CITY
Offices in principal cities the world over

816—W. L. Huber, 1304 Crocker Natl. Natl. Bank Bldg., San Francisco, Calif., wants preliminary permit power project within Tahoe and El Dorado Natl. Forests, on North and Middle Forks, American River, in Placer and El Dorado counties.

817—West Virginia Power Co., Charleston, ton, W. Va., wants preliminary permit 2 power projects in connection with 2 proposed dams to replace existing Governmentment Dams 2, 3, 4 and 5, on Kanawha River, Kanawha Co.

818—American River Water & Power Co., Auburn, Calif., wants preliminary permit power project, partly within Tahoe Natl. Forest, on North and Middle Forks, American River, in Placer Co.

819—Montana-Idaho Mines Corp., Winston, Mont., and Spokane, Wash., wants license power project partly within Helena Natl. Forest on North and South Forks of Beaver Creek, in Broadwater Co., Mont.

820—Eastern Oregon Development Co., Baker, Ore., wants license transmission line on public lands in Baker Co.

821—Libby, McNeil & Libby, Seattle, Wash., wants license power project in Tongass Natl. Forest, on Cascade and Rosa Creeks and Lower and Upper Lakes, on Gravina Island, Alaska, near Kenchikan.

822—Gold Basis Mining & Milling Co., Oakland, Calif., wants license power project in Tahoe Natl. Forest, on East Fork of North Fork of Yuba River, Sierra Co.

823—General Power & Light Co., 231 South LaSalle St., Chicago, Ill., wants license power project on Green River, in McLean Co., Kentucky, near Calhoun.

Unclassified

Proposed Work

Grain Elevator—Fitchburg, Mass.—J. Cushing Co. plans new grain elevator with equipment. $100,000. Engineer not selected.

Athletic Field—Meriden, Conn.—International Silver Co., Recreation Dept., State St. plans athletic field incl. baseball diamond, gridiron, tennis courts, cinder track and grandstand. To exceed $25,000. Private plans.

Asphalt Mixing Plant—Long Island City, N. Y. —M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., rejected bids June 22, asphalt mixing plant with full equipment to Bureau Highways. Noted June 16.

Stadium—North Albany (mail Albany) **N. Y.**—Capital Dist. Baseball Assn., S. E. Aronowitz, secy., 100 State St., Albany, making plans steel and concrete stadium, Chadwick Park, here. $250,000. G. Thompson, 324 Montgomery St., Syracuse, engr. and archt.

Transmission Line — Texas — Central Power & Light Co., c/o Frost Bldg., San Antonio, making plans and soon take bids power transmission line from Kingsville to Falfurrias. $275,000. Private plans.

Gas Pipe Line—Amarillo, Tex.—Assoc. Producers Gasoline Co., 513 Rule Bldg., making plans and soon take bids improving system, incl. steel tanks and small pipe lines. $100,000. Private plans.

Land Development—Beaumont, Tex.—Gulf Building & Loan Co., c/o W. M. Clapp, pres., 2462 Calder St., having plans prepared 360 acre sub-division development, incl. natural gas distributing system $16,000, water system $35,000, sewers $25,000, paving $60,000 etc. Private plans.

Tank Farm—Pecos, Tex.—Mid-Kansas Oil & Gas Co. (subsidiary of Ohio Oil Co., Tulsa, Okla.), plans twenty-five 80,000 bbl. steel oil tanks on 770 acre farm in new Pecos field in Pecos Co., here. $750,000. Private plans.

Gas System—San Angelo, Tex.—Western Gas Serv. Co., c/o B. Carter, Ranger, making surveys gas system improvements, here. Private plans.

Land Development—San Antonio, Tex.—T. F. Ragsdale and associates, c/o C. Y. Bailey, Travis Bldg., purchased 56 acres land on Fredericksburg Rd., and plans paving $60,000, waterworks $20,000, and sewers $35,000. Private plans.

Oil Pipe Line—San Antonio, Tex.—See "Buildings—Industrial."

Transfer Shed—San Antonio, Tex.—Merchants Transfer Co., c/o F. Canaday, 215 Main Ave. soon take bids 100 x 260 ft. tile, rein.-con., sheet iron, etc. Nueva and Dolorosa Aves. $160,000. H. S. Green, Alamo, Natl. Bank Bldg., archt.

Grain Elevator—Kelso, Wash., Kelso Port Commission had plans prepared by J. S. Metcalf Co., Ltd., 111 West Jackson Blvd., and takes bids about Sept. 1, grain elevator. $416,000 bond voted. Noted Apr. 21.

Swimming Pool—Berkeley, Calif.—City, E. M. Hann, clk., plans 130 x 150 ft. swimming pool.

Lighting System—Culver City, Calif.—Plans ornamental lighting system on portions Wagner St., Barman Ave., etc. To exceed $25,000.

Lighting System—Los Angeles, Calif.—City, plans ornamental lighting system in portions of Genesee St., Ogden Dr., Orange Grove Ave., etc. To exceed $25,000.

Lighting System—Los Angeles, Calif.—See "Streets and Roads."

Parking Pier—Santa Monica, Calif.—Ocean Park Realty Corp., Ocean Park, had plans prepared by J. P. Verrine, Lincoln Bldg., Los Angeles, for pier, timber and creosoted piling, approximately 100,000 sq.ft. for auto packing, here. $150,000.

Bids Desired

Golf Course—Waterbury, Conn.—Waterbury Club, I. W. Day, 111 Main St., taking bids golf course and club house. To exceed $50,000. Parson & Waite, 1 Beacon St., Boston, archts. Noted Apr. 14.

Foundations—New York—See "Streets and Roads."

Subway—Brooklyn, N. Y.—Sept. 2, by Bd. Transportation, J. H. Delaney, chn. 49 Lafayette St., New York City constructing Sect. 1, Route 109, Rapid Transit R.R., extending along and under Jay St., from Nassau to Willoughby Sts., here.

Comfort Station—New York, N. Y.—Aug. 16, by Park Bd., W. Herrick, pres., Dept., Parks, Arsenal Bldg., Central Park, general construct comfort station in Washington Square Park.

Exit Facilities and Fire Stops—Rome, N. Y.—Aug. 24, by Comr. Mental Hygiene, Dept. Mental Hygiene, Capitol, Albany, exit facilities and fire stops at State School for Mental Defectives, here; adv. E. N.-R. Aug. 11.

Bath House and Pool—Wash., D. C.—Aug. 12, at Office Public Buildings & Parks, constructing bath house, beginners pool, and swmiming pool, McKinley High School Grounds, 1st and R Sts. N. E. Noted June 9.

Air Port—Paducah, Ky.—See "Contract Awarded."

Boiler Settings—St. Louis, Mo.—See "Waterworks."

Lighting System—Azusa, Calif.—Aug. 15, by H. R. Smith, city clk., ornamental lighting system in portions of Orange, Sunset Aves., etc. To exceed $25,000. C. L. Nichols, city engr.

Bids Received

Park Improvements—Ridgewood (br. Brooklyn), **N. Y.**—Park Bd. at office Dept. Park, Arsenal Bldg., Central Park, New York City, park improvements, at Anawanda Park, here, from M. J. Grant, 139 Potter Ave., Astoria, $19,465. Noted July 28.

Contracts Awarded

Coal Pocket—Fall River, Mass.—W. C. Arwater & Co., 2 Bedford St., 1 story, wood, plain foundation, to R. H. Beattie, 209 Bedford St. Engrs. est. $25,000.

Heating System—Worcester, Mass.—City, Supt. Public Bldgs. heating system in Downing St. school, to Central Heating Co., Worcester, $20,350.

Air Port—Paducah, Ky.—C. R. Iseman, (owner and contractor), will build air port, incl. grading, erecting hangers, gasoline filling and repair stations, etc., on Clarks-Ferry Rd., near here. Engrs. est. $50,000.

Tunnel and Approaches—Anderson' Ind.—County and Cleveland, Cincinnati, Chicago & St. Louis Ry., H. Baldwin, ch. engr., 230 East 9th St., Cincinnati, O., tunnel and approaches incl. 7,000 cu.yd. earth excav. to Herrick & Co., Cuyahoga Bldg., Cleveland, O. Approximately $87,000. Engrs. est. $90,000.

Grain Elevator—Omaha, Neb.—Missouri Pacific R.R. Co., E. A. Hadley, ch. engr., Ry. Exch. Bldg., St. Louis, Mo., constructing rein.-con. and steel addition to grain elevator, 15th and Anderson Sts., to E. Ahlskog Co., 6422 Kimlark St., Chicago, Ill. Nye & Jenk Grain Co., Grain Exch. Bldg., Omaha, Neb., lessee. Noted July 28.

Swimming Pool, Golf Course, etc.—Glendale (mail Kirkwood), **Mo.**—See "Buildings—Commercial."

Water Treating Plant—Hermann, Mo.—Missouri Pacific R.R. Co., Ry. Exch. Bldg., St. Louis, water treating plant incl. steel storage tank pump, etc., to Foundation Co. of Missouri, 1923 Main St., Kansas City.

Natural Gas System—Texas—Western Gas & Fuel Supply Co., Ranger, natural gas system in Ballinger, Winters, Miles, Rowena, Talpa, Valera, Silver City, also 76 mi. 8 in. gas main line from San Angelo to Silver City and other towns, to Atex Constr. Co., Eastland. Approximately $500,000 and $2,000,000 respectively.

Tank Farm—Del Rio, Tex.—Mid-Kansas Oil & Gas Co., c/o W. W. Fleming, Findlay, O., twenty-five 80,000 bbl. steel oil tanks, to Mount Cooper Boiler & Iron Wks., c/o owners, $750,000.

Lighting System — Huntington Park, Calif.—Ornamental lighting system on Pacific Blvd., to G. W. Kemper, 3701 South Overland Ave., Los Angeles, $75,935.

Lighting System—Los Angeles, Calif.—Ornamental lighting system on Cadillac Ave. between La Cienga and Robertson Blvds., to R. D. Caley, 4722-4th Ave., $76,165.

Lighting System—Los Angeles, Calif.—Ornamental lighting system on Pacific Ave. between 26th and Paseo Del Mar Sts., to A. C. Rice, 1957 Santee St., $34,821. Noted Apr. 7.

Lighting System—Los Angeles, Calif.—City, ornamental lighting system on 7th St., between Alvaredo St. and Garland Ave., to Los Angeles Electric Works, 1128 South Los Angeles St., $38,486.

Materials

Proposed Work

Cement—Merced, Calif.—P. J. Thornton, Co. Clk. and W. E. Bedesen, Shafer Bldg., Co. Surveyor, plans to purchase 6,500 bbls. portland cement.

Bids Desired

Guard Rail—Iowa—See "Streets and Roads."

Bridge Lumber—Maringo, Ia.—Aug. 19, at office Auditor Iowa Co., 5 cars 3 x 12 x 16 ft. and 1 car 3 x 12 x 20 ft. standard sawed rough fir lumber, and 1 car untreated cypress piling. W. W. Thorn, Marengo, co. engr.

Road Oil, etc.—Inglewood, Calif.—City, taking bids furnishing 2,700 bbl. road oil and 4,500 tons crushed rock.

Granite Blocks—Montreal, Que.—Aug. 15, by Chn. Executive Committee, City Hall, Montreal, Que., for 108,700 granite blocks.

Contracts Awarded

Culvert Pipe—Iowa—State Hy. Comn., Ames, 672 ft. 15 in. corrugated culvert pipe f.o.b. Moravia, Project P-496, Appanoose Co., and 796 ft. 15 and 36 in. f.o.b. Belmond, Project F-267, Wright Co., to Klauer Mfg. Co., Dubuque $591 and $591 respectively, 426 ft. 15 in. f.o.b. Hilton, Project F-482 Monroe Co. and 216 ft. 15- to 48- ft. f.o.b. Melrose, Project P-477, Monroe Co., to Central Culvert Co. Attumwa, $383 and $271 respectively. Grand total $1,838.

Bridge—Portland, Ore.

Bids were opened by Commissioners of Multnomah Co., for two concrete viaducts on Canyon Road, from (A) Lindstrom & Feigenson, Worcester Bldg., (awarded contract); (B) A. D. Kern, 290 East Salmon St.; (C) Taylor Bros., Builders Exchange. The unit bids are as follows:

	A	B	C
500 cu.yd. common excavation	$1.00	$0.75	$0.90
1,000 cu.yd. loose rock excavation	2.00	1.00	.90
500 cu.yd. solid rock excavation	3.50	3.25	2.50
1,790 cu.yd. Class A concrete, 1:2:4 mix	16.00	18.00	17.00
160 cu.yd. Class D concrete, 1:2:3 mix	20.00	18.00	25.00
250,000 lb. reinforcing steel in place	.0375	.035	.04
2,100 lb. guard angles in place	.15	.09	.20
100 lin.ft. 3-in. porous drain tile in place	.30	.09	.30
Totals	$45,810	$47,048	$47,480

Engineering News-Record, Issue of Aug. 11, 1927

Bridge—Oakland, Calif.

Bids were opened by Commissioners of Alameda Co. (lowest three and highest) for constructing Mission Bridge over Calaveras River, from (A) Gutleben Bros., 614 Mills Bldg., San Francisco, (awarded contract); (B) C. B. Cowden; (C) W. M. Willett; (D) G. C. Vensano Co. The unit bids are as follows:

	A	B	C	D
3,200 yd. excav., below elev. 230	$5.25	$6.30	$5.00	$8.00
2,600 yd. excav., above elev. 230	2.45	.95	1.68	13.00
19,500 cu.yd. rdwy. excavation	.60	.63	.71	.70
34,000 sq.ft. 4 in. graveled rdwy	.05	.05	.06	.04
3,100 cu.yd. concrete in bridge	19.60	22.00	21.30	25.00
516,000 lb. reinforcing steel	.05	.045	.055	.051
2,000 lin.ft. guard fence	1.10	1.10	1.10	1.00
100 ft. 12-in. corrugated pipe	2.00	1.75	1.80	3.00
Totals	$127,918	$134,870	$134,882	$186,276

Engineering News-Record, Issue of Aug. 11, 1927

Bridge—Chicago, Ill.

Bids were opened by Department of Public Works, May 26, for east substructure of double leaf trunnion bascule bridge over South Branch of Chicago River on Roosevelt Road, from (A) FitzSimons & Connell Dredge & Dock Co., 10 South La Salle St., (awarded contract); (B) Central Dredging Co., 307 North Michigan Ave.; (C) Great Lakes Dredge & Dock Co., 104 South Michigan Ave. The unit bids are as follows:

	A	B	C
Removing all obstructions (lump sum)	$27,500.00	$38,350.00	$35,000.00
Shed for storage of cement (lump sum)	3,000.00	3,025.00	3,500.00
Building cofferdams (lump sum)	100,000.00	85,380.00	125,000.00
100 cu.yd. general excavation	5.00	8.00	5.00
100 cu.ft. removal of boulders	1.50	6.00	1.00
430 cu.ft. removal of solid limestone	1.50	7.00	1.00
10 cu.yd. removal of solid stone	20.00	38.75	15.00
20,700 cu.ft. complete sub piers	2.00	2.10	2.50
2,000 cu.yd. filling within cofferdam	3.00	1.60	2.50
800 cu.yd. 1:6 portland cem. concrete	22.00	25.50	22.00
1,400 cu.yd. 1:7½ portland cem. concrete	18.00	20.00	20.00
120 cu.yd. portland cement mortar	25.00	45.50	30.00
320,000 lb. steel reinforcing material	.06	.075	.07
160,000 lb. permanent fixed steel	.10	.12	.12
84,000 lb. structural steel beams	.09	.10	.12
11,100 lb. steel castings	.15	.12	.15
200 lb. cast iron manhole covers	.20	.10	.10
2 brass bell traps	30.00	30.00	25.00
30 safety treads	4.00	4.00	3.00
4,000 lin.ft. Norway pine piles delivered	.45	.40	.40
4,000 lin.ft. driving sundry piles	1.00	.40	.60
5,000 ft. b. m. creosoted oak timber in place	250.00	300.00	250.00
40,000 ft. b. m. untreated yellow pine timber in place	250.00	200.00	150.00
50 lin.ft. vitrified clay sewer pipe	8.00	9.00	10.00
Concrete in sub piers—air pressure, per cu.ft	15.00	15.00	1.00
Extra portland cement, per bag	1.00	1.00	.80
Totals	$287,290	$299,365	$335,885

Engineering News-Record, Issue of Aug. 11, 1927

Bridge—Chicago, Ill.

Bids were opened by Department of Public Works, June 23, for superstructure of double leaf trunnion bascule bridge over South Branch of Chicago River on Roosevelt Road, from (A) Ketler-Elliott Co., 3121 South California Ave., (awarded contract); (B) Strobel Steel Construction Co., 53 West Jackson Blvd.; (C) Kelly-Atkinson Construction Co., 189 West Madison St. The unit bids are as follows:

	A	B	C
Superstructure, except sidewalks, operators' houses, enclosure walls, electrical equipment, plumbing and fixed part railings (lump sum)	$466,000.00	$477,580.00	$487,000.00
Horizontal truss and 2 inclined braces (lump sum	5,900.00	5,600.00	6,000.00
Material called for on drawing 10854 (lump sum	11,000.00	10,900.00	10,900.00
Additional carbon steel and rivets, per lb.	.12	.12	.10
Additional reinforcing metal, per lb.	.10	.15	.08
Additional forged or machinery steel, per lb	.30	.30	.25
Additional cast steel, per lb	.28	.30	.25
Additional machinery iron castings, per lb.	.28	.25	.25
Additional phosphor bronze and babbitt, per lb	1.50	1.00	1.25
Additional portland cement, per bag	1.00	1.00	1.00
Additional Atlas lumnite cement, per bag	3.50	3.25	3.00
Additional steel punchings, per lb	.02	.03	.02
Additional lead slag, coarse agg. No. 5, per cu.ft	1.00	2.00	.25
Additional plain concrete with 1:3 mortar, per cu.ft.	1.00	1.50	.75
Additional composition concrete—1:2 mortar, per cu.ft	3.00	2.00	2.50
Additional creosoted Y. P. or oak timber, per f.b.m	150.00	140.00	150.00
Additional untreated fir, per f.b.m.	125.00	110.00	125.00
Additional concrete not used for cwt., per cu.yd.	35.00	30.00	25.00
Totals	$482,900	$494,080	$503,900

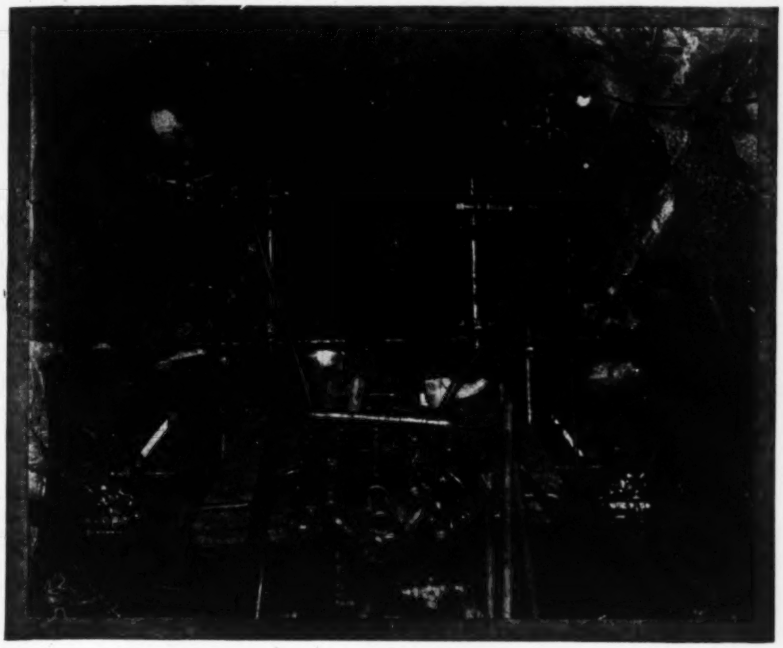
WAUGHDRIFTER



Waugh Model 17
Tunneling Drills
Mounted on
Special
Drill Carriage

Cascade Tunnel

The Leading Tunneling Drill

A Standing Record

In October, 1926, A. Guthrie and Company established a new world's record in tunnel driving on the Cascade Tunnel project, when they advanced an 8′ x 9′ tunnel heading 1157 feet, working from a single heading. Denver Model Seventeen drills, mounted as shown above, were used exclusively in establishing this record.

For all tunnel driving projects, and for all hard rock drilling in mining and quarrying operations, the Denver Model Seventeen is now recognized as the leading rock drill.

Because of its speed and power, and above all, because of its dependability, it has been selected on such notable projects as the Moffat, Chelan, Cascade, Hetch Hetchy, Milton Bowman, Conowingo, and many others.

It will pay you to investigate the performance of this fast dependable machine. Write for your copy of Bulletin No. 170.

Engineering News-Record, Issue of Aug. 11, 1927

57 cents per cu.ft. is the contract price of a terminal warehouse building for the Central Terminal & Cold Storage Co., of New York City, awarded to the Parklap Construction Co., New York City. The building will be 208x223 ft. by 132 ft. high; 46,384 sq.ft.; 1 story 20 ft., 10 story 13 ft., 9 stories 11 ft.; to cost $3,500,000. Concrete, with caisson foundation and reinforced-concrete floor. Moores & Dunford, 110 East 42d St., New York, engineers.

Constr. News page 81a

Grain elevator of 8 storage tanks, 96 ft. high, 25 ft. diameter, at Hutchinson, Kan., is estimated at $40,000.

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Gas pipe line, Oklahoma and Texas, Phillips Petroleum Co., made preliminary plans, $10,000,000.

Silk factory, Old Hickory, Tenn., Dupont Rayon Co. having plans prepared, $4,000,000.

High school, Trenton, N. J., Bd. Educ. having plans prepared, $3,000,000.

Grocery store and office, Chicago, Ill., Tebbets & Garland having preliminary sketches made, $2,000,000.

Club, Chicago, Ill., Chicago Beach and Country Club, having sketches made, $2,000,000.

Gas plant, Piscatawaytown, N. J., Internat'l Combustion Engine Corp., having plans prepared, $1,500,000.

Training school, Philadelphia, Pa., University of Pennsylvania, plans, $1,500,000.

Apartment, South Orange, N. J., Kuskin and Rothberg, having sketches made, $1,500,000.

Bank and office, Tulsa, Okla., Exchange Trust Co., plans prepared, $1,000,000.

Waterworks, Hood River, Ore., making surveys and plans new waterworks, $1,000,000.

Bids Desired

Bridge, Paducah, Ky., Bridge Committee, bids open Aug. 22, $2,100,000.

Bridge, Chicago, Ill., Com. Pub. Works, bids open Aug. 30, $1,500,000.

Seminary, West Hartford, Conn., St. Thomas Seminary, taking bids, $1,000,000.

Bids Received

High school, Hyde Park, Mass., Schoolhouse Dept. from P. Caputa, $1,123,550.

Contracts Awarded

Power plant, Beaumont, Texas, Gulf State Utilities Co., will build by day labor, $4,000,000.

Theater, Louisville, Ky., Theater Realty Corp. to G. A. Fuller & Co., $1,000,000.

Memorial, Louisville, Ky., Louisville Memorial Comn., to Struck Constr. Co., $726,000.

News of the Week

Waterworks

Proposed Work

N. J., Seaside Heights — Making plans drilling two 12-in. wells, 175 ft. deep for waterworks system. $5,000.

W. Va., Grafton—Voted $140,000 bonds, new filtration plant. J. M. Rice, Oliver Bldg., Pittsburgh, Pa., engr. Noted Jan. 12.

Ill., Highland Park—See "Sewers."

Kan., Brookville—Making plans extending waterworks. $25,000. S. A. Sulentic, Constr. & Eng. Co., New England Bldg., Topeka, engr.

N. D., Lehigh—See "Buildings Industrial."

Mont., Kevin—Voted $65,000 bonds, constructing waterworks. A. W. Furber, town clk.

Mo., Savannah—Voted $85,000 bonds, impounding reservoir, filtration plant, etc. J. W. Shikles & Co., 708 New York Life Bldg., Kansas City, engrs. Noted Mar. 25, 1926.

Tex., Rotan—Plans new waterworks improvements outside city limits, extending mains, etc. $150,000. Hawley & Roberts, c/o Leader Bldg., Lubbock, engrs.

Tex., San Benito—See "Unclassified."

Tex., Weslaco — Making preliminary plans water filtration plant. $40,000 bond election soon for same. B. T. Sanders, Weslaco, engr.

Tex., West Vernon—Making plans 400,000 g.p.d. complete waterworks. $25,000. Address Mayor.

Okla., Anadarko—Voted $35,000 bonds, main extensions, incl. 9,900 ft. 4 and 6 in. c.i. pipe. R. Cleveland, mayor. Noted July 7.

Okla., Cordell—Voted $26,500 bonds, new settling basin and main extension. F. Ford, Cordell, engr. Noted June 23.

Okla., Goteba—Plans new water supply and extensions. $15,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs. Noted May 19.

Okla., Hobart—Making preliminary plans main extension. $65,000. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Oklahoma City—Made preliminary plans 21,000 ft. 4- to 8-in. mains in Lincoln Terrace Addition. $40,000. B. M. Hart, City Hall engr.

Okla., Renfrow — Making preliminary plans new waterworks, incl. c.i. mains, etc. $15,000. H. Lester, mayor. Engineer not selected.

Okla., Ryan—Voted $15,000 bonds, pump station, Triplex pump and motor, main extension, incl. 7,800 ft. 4 and 6 in. c.i. mains. F. E. Devlin, Bitting Bldg., Wichita, Kan., engr.

Ore., Hood River—Making surveys and plans new waterworks with source from Lost Lake. $1,000,000. Clark & Hurlburt, Hood River, engr.

Ont., Port Arthur—Making plans 1½ mi. 6-in. c.i. mains, for waterworks system. Engrs. est. $24,000. J. Antonisen, City Hall, engr.

Ont., Toronto—York Twp. making plans 1 mi. 6-in. c.i. mains, valves, hydrants, etc., on Rushton Rd., Snider and Sydney Aves. $15,000. F. B. Goedike, 40 Jarvis St., engr.

Bids Desired

N. Y., Long Island—Aug. 23, by N. J. Hayes, comr., Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Alderton and 41st Aves., 52nd and 54th Sts., Park Lane and 55th Pl., 68th Rd., 2nd Ward; Rose, 27th, 33rd, 43rd, 44th, and 48th Aves., 197th, 198th, 207th, 209th, 13th, 220th and 243rd Sts., etc., 3rd Ward, here.

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.*

N. Y., New York—Aug. 23, by N. J. Hayes, comr., Water Supply, Gas & Electricity, Municipal Bldg., 36 in. steel mains in Central Park and 5th Ave., Manhattan Boro, also Barker, Bruner, Cambreling, Cambridge, Commonwealth, Cross, Delafield Aves., etc., Bronx Boro.

N. Y., St. George—Aug. 19, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Appleby, Arden, Bellmore, Bement, Benedict, Bradford, Carmel, Grant, Kell, Lincoln Sts., etc., here.

N. J., Belmar—Aug. 22, by Boro Council extending water mains and sewers in various streets. C. W. Birdsell, engr.

Tenn., Nashville—Aug. 23, by Bd. Pub. Wks., 3 mi. 2 in. mains in northeast part of city. To exceed $15,000. City to furnish pipe. H. E. Howse, mayor. Noted Aug. 11.

O., Fostoria—Aug. 31, by City, improving water-works plant. J. N. Chester Engineers, Union Bank Bldg., Pittsburgh, Pa., engrs., adv. E. N.-R. Aug. 18.

Mo., Macon—Aug. 25, by W. A. Tibbs, city clk., improving waterworks, 215 acres clearing, 90,000 cu.yd. earth embankment, 1,050 cu.yd. concrete, pump station and gate house, two 700 g.p.m. centrifugal pumps and 9,708 ft. 12 in. c.i. mains, etc. Burns & McDonnell Eng. Co., Interstate Bldg., Kansas City, engrs. Noted June 23.

Okla., Altus—Aug. 22, by L. L. Smith, city clk., extending 6,770 ft. 4- to 10-in. mains in various streets. $15,000. J. C. Chisum, Altus, engr.

Contracts Awarded

N. Y., Syracuse—Bd. Contr. & Supply, City Hall, new reservoir, to J. Young, West Brighton Ave. and Hunt St. $210,000. Noted Aug. 11.

Miss., Gulfport—See "Sewers."

Miss., Jackson—Addition to filtration plant, incl. chemical house, 4 filters, operating house, coagulating basin and flume and mixing chamber, to Owen & Gaddis, 810 South Gallatin St., approximately $60,000.

O., Cleveland — Comrs. Cuyahoga Co., 11,000 ft. 6 and 8 in. c.i. mains in Briar Cliff Subdivision 46, Impvt. 854, to Joseph Co., Prospect-Fourth Bldg., $28,459.

O., Columbus—O. Moore, clk. Franklin Co., 5,790 ft. 6- to 12-in. c.i. mains in Levee Dist. 1, to H. B. Watters, 180 North High St., $9,589. Engrs. est. $15,000. Noted July 21.

O., Maple Heights (br. Cleveland)—See "Sewers."

Ill., Galesburg—To Thorpe Bros. Well Co., 7th and Holcomb Sts., Des Moines, Ia., drilling well to Potsdam Formation, incl. drilling hole 400 ft. deep for casing 22 in. outside diam., etc., at $21 per ft., 400 ft. pipe for same at $10.40 per ft., drilling well 1,050 ft. deep for casing 14 in. outside diam. $13, furnishing and installing 14 in. casing for same $7.80, drilling hole 1,050 ft. deep for 12 in. outside diam. $6, making tests for water depth, at $4.50 per hr. This corrects report in Aug. 4 issue.

Wis., Milltown—A. N. Lystrup, city clk., pump house and deep well equipment, to E. E. Johnson, 2302 Long Ave., St. Paul. Noted July 14.

Neb., Lincoln—For 6 m.g. concrete reservoir, to B. J. Jobst Building Co., 414 Bankers Life Bldg., $64,900. Engrs. est. $84,000. Noted June 23.

Neb., Lincoln—For 53,205 ft. 4- to 16-in. c.i. mains, 53 hydrants, 109 valves, 49,000 lb. special castings, etc. in Water Dist. 118, to Newberg & Bookstrom, 1338 M St. $94,935. Engrs. est. $125,000.

Tex., Happy—Complete waterworks system, to Orman Constr. Co., Box 632, Shamrock, $27,516. Noted Jan. 20.

Tex., Millsap—Texas & Pacific R.R. Co., E. F. Mitchell, ch. engr. Dallas, earth dam for creation water supply reservoir, and concrete bridge to J. T. Scott, Millsap, approximately $90,000.

Tex., Turkey—Complete waterworks system incl. 50,000 gal. reservoir, 6- to 8-in. mains, pumping unit, etc., to Orman Constr. Co., Box 632, Shamrock, $40,180. Noted June 9.

See proposal advertising on page 138

TRADE "LEADITE" MARK

Registered U. S. Pat. Office

Even under the most rigorous conditions of service Leadite proves its efficiency

—where a line is subjected to constant vibration the joints must be tight and remain tight

IN installing the 12" bell and spigot bridge line illustrated here the element of constant vibration was a serious consideration.

Leadite was used for jointing and has given perfect satisfaction throughout the 5½ years since this Bridge Line was installed—working pressure approximately 105 lbs. per sq. in.

This water department has laid many miles of cast iron water mains with Leadite joints—sizes 6" to 30"—pressures ranging from 40 pounds to 170 pounds per square inch. They say their experience with Leadite has been extremely satisfactory. Their experience with Leadite extends over 20 years.

The ease with which Leadite can be used is another consideration with waterworks engineers in making their specifications for unusual and difficult installations, as well as for general work.

The speed of jointing with Leadite is of great importance to Contractors in helping them complete their work promptly. From experience they know how much time they can save by using Leadite.

Everywhere waterworks engineers specify and use Leadite for the satisfaction it gives, its safety, security and economy.

Twelve-inch c. i. bell and spigot water main —Bridge Line—over 500 feet long—subject to severe vibration—carrying approximately 105 lbs. pressure per square inch.

Specify and use

LEADITE

It saves at least 75%

Be sure it is

LEADITE

and accept no imitations

The pioneer self-caulking material for c. i. pipe. Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Sewers

Proposed Work

R. I., Woonsocket—Plans sewerage works in various streets, $106,000. Public Wks., Dept. engr.

N. J., Elizabeth—Bd. Wks. plans sewerage system from Westfield Ave. to Orchard St. $75,000. T. Collins, Elizabeth, engr.

N. J., Princeton — Boro Council made plans sewage system, disposal plant, etc. $400,000. N. S. Hill, 112 East 19th St., New York City, N. Y., engr.

Ind., Rossville—Making plans extending sewerage system. $20,000. Municipal Service Co., 413½ Wabash Ave., Terre Haute, engrs.

Mich., Muskegon — Making preliminary plans sewage disposal plant $900,000. Pearse, Greely & Hansen, 6 North Michigan Blvd., Chicago, Ill., engrs.

Ill. Belleville—Soon takes bids Richland Creek Intercepting Sewer, 11,458 ft. 36 and 42 in. concrete pipe, 609 ft. 24- to 36-in. pipe, rein.-con. treatment plant, outfall structure, etc. $190,320. Pearce, Greeley & Hansen, 6 North Michigan Ave., Chicago, engrs. Noted July 7.

Ill., Highland Park—Making plans sanitary sewers and water mains. $200,000. Windes & Marsh, Winnetka, engrs. Noted May 13, 1926.

Ill., Rockport—Soon takes bids new sewerage system. $25,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs.

Minn., St. Paul—Plans sewers in Luella Ave., Maryland, Hyacinth, Orange, and Hawthorne Sts. $25,000. G. M. Shepard, city engr.

N. D., Lehigh—See "Buildings Industrial."

Ark., Fayetteville — Making preliminary plans extending and improving sewerage system in Sewer Dist. 1. $112,000.

Tex., Lockney—Election Aug. 16, $40,000 bonds complete sewerage system. Hawley & Roberts, Leader Bldg., Lubbock, engrs.

Tex., Rotan—Making surveys new sewerage system. $75,000 bonds soon for same. Hawley & Roberts, c/o Leader Bldg., Lubbock, engrs.

Tex., West Vernon (Vernon P. O.) — Making plans and soon take bids sewerage system. $25,000. Address Mayor.

Okla., Anadarko—Voted $35,000 bonds waterworks and sewer extensions. Peckham & Riggins, 225½ West Grand St., Oklahoma City, engrs.

Okla., Claremore—Plans 17,700 ft. 8 and 10 in. vitr. clay lateral sewers in Sewer Dist. 20. $23,410. B. Sprangle, Claremore, engr.

Okla., Sand Springs—Plans 14,400 ft. 8 and 10 in. vitr. clay lateral sewers in Sewer Dist. 21. $30,000. C. Tingley, Sand Springs, engr.

Okla., Wanette—Defeated $45,000 bonds new sanitary sewerage system. C. A. Wood, Stillwater, engr. Noted Apr. 28.

Colo., La Junta—Plans sewage pumping plant. $40,000 bonds. G. E. Hine, La Junta, engr.

Calif., Fullerton — Made surveys storm drain and sewerage system here, to exceed $400,000. C. M. Thorpe, city engr.

Calif., Glendale—Plans 6- to 10-in. sewers in Cambell, Dryden, Mountain Sts., etc. $25,000. J. F. Johansen, City Hall, engr.

Ont., Hamilton—City soon takes bids approximately 1,500 ft. storm trunk sewer on Gage Ave. south of Barton St. $45,000. W. L. McFaul, City Hall, engr.

Ont., Port Arthur — Making plans constructing 1.5 mi. 8-in., etc., vitr. clay sewers in various streets. Engrs. est. $26,000. J. Antonisen, City Hall, engr.

Ont., Riverside—Making plans constructing 3-4 mi. 8 in. and 12 in. vitr. clay sewers in various streets. $60,000. A. W. oCnnor & Co., Metropolitan Bldg., Toronto, engrs.

Ont., Toronto—Robins Ltd., Nat. Bldg., making plans rein.-con., sewage disposal plant, at Armour Heights subdivision. $40,000. Gore, Nasmith & Storrie, Confederation Life Bldg., engrs.

Bids Desired

Mass Beverly—Aug. 24, by South Essex Sewerage Bd., Fort Ave., Salem, substructure Beverly Pumping Station, rein.-con. 30 x 40 x 25-48 in. -30 in. and 20 in. c.i. inlet and discharge sewers and appurtances at water front, foot Wales St. Private plans.

N. Y., Brooklyn—Aug. 24, by J. J. Byrne, pres., Brooklyn Boro, Boro Hall, improving Manhattan Beach disposal plant and installing automatic pumping equipment, etc.

N. Y., Brooklyn—Aug. 24, by J. J. Byrne, pres. Brooklyn Boro, Boro Hall, sewers in Avenue P, Kingshighway, West 5th and West 10th Sts.

N. Y., Long Island City—Aug. 22, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., sewers etc. in portions Hosack and 65th Places, Bway., 88th and 89th Sts., Burnside, Hayes, 25th, 50th, and 109th Aves.

Pa., Allentown—Sept. 6, by M. W. Gross, mayor, pumps for sewage treatment plant, Contr. 2, Metcalf & Eddy, Statler Bldg., Boston, Mass.; adv. E. N.-R. Aug. 18.

Pa., Phila.—Aug. 24, by Dept. Pub. Wks., Bureau of Engineering, branch sewers in various streets. G. H. Biles, dir.

Okla., Ada—Aug 23 (extended date), by L. Daggs, city clk., new sewage disposal plant and 630 ft. 8- to 24-in. outfall sewers, Imhoff tank, 1,000 g.p.m. motor driven pumps, etc. $45,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs. Noted Aug. 11.

B. C., Burnaby — See "Contracts Awarded."

Contracts Awarded

Mass., Boston—Dept. Pub. Wks., sewerage system in River St. etc. in Dorchester and Hyde Park, to De Christoforo Bros., Co., 38 Glendale Rd., Rosindale, $66,387. Noted July 21.

Mass., Stoneham — Sewers in various streets, to Federal Constr. Co., Summer St. Engrs. est. $25,000. Noted July 13.

Conn., Bridgeport—Brick and steel disposal plant located under ground, incl. comfort station, to W. J. Shaughnessy, 527 Brooks St., $77,849. Engrs. est. $75,000.

N. Y., Long Island City—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., sewers in Kingsland Ave., to J. Gallo, 169-10 State St., Flushing, $77,944. Noted Aug. 11.

N. Y., New York—W. J. Flynn, acting pres., Bronx Boro, Crotona Park, 3rd and Tremont Aves., sewers in Nereid Ave. to Commerce, 1910 Webster Ave., $60,466; and in East 233rd St., to C. Turiano Contg. Co., 2911 Coddington Ave., $19,282. Noted Aug. 11.

Pa., Lansdale—Boro Council, sewerage system, to Anthony Pietro Co., Morgantown, W. Va., $60,895 and pumping station, to M. Y. Neeley Co., Phila., $9,437. Noted July 21.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, main sewers in Washington Lane, to A. Frunzi, 513 High St., $18,977; and Forrest St., to Jafalla & Mark, Inc., 10 Ryders Ave. $80,287. Noted July 14.

Fla., Miami—Concrete sanitary sewers, Contr. 97 in Dists. 231, 244 and 245, to Central Station & Equip. Co., Miami and 114 Liberty St., New York, N. Y. $437,647.

Miss., Gulfport—System terra cotta pipe sewers in 20th, 33rd, 37th, 38th, 41st, Rich and Thorton Aves., to G. A. Muth & Son, Rickarby St., Mobile, Ala., $29,482. Engrs. est. $30,000. Also 6,200 ft. 6-in. c.i. and 1,300 ft. 2-in. galvanized iron water mains, 12 firehydrants, etc., to G. Hopkins, East Beach St., $8,154. Noted April 14.

O., Amherst—Constructing sewage disposal plant, to W. O. Kester & Co., Box 84, Firestone Park, P. O., Akron. $59,048. Noted June 23.

O., Burton—For 3.5 mi. 8 in. vitr. clay sanitary sewers in various streets, to Shullo & DeLuch, 140 Summit St., Akron, $74,927.

O., Cleveland—Comrs. Cuyahoga Co., 3,800 ft. 8 to 27 in. sewer in Sunset Drive Sewer, Impvt. 311, to Janashak & Callow, 1366 Union Ave. $26,419.

O., Cleveland—Comrs. Cuyahoga Co. 10,000 ft. 8- to 30 in. tile sewers in Elmwood Rd., to J. B. Lynn Constr. Co., 16311 Saranac Rd. $26,594.

O., Euclid (br. Cleveland)—Constructing sewer in (3 sections) Euclid Ave., to A. C. Hattendorf, Stop 14, $130,451. Noted July 28.

O., Maple Heights (br. Cleveland)—Sewers in 3 streets and mains in 2 streets, to Hadded-Mall Co., Schofield Bldg., Cleveland $37,191 and $18,980 respectively.

Mich., Detroit—Dept. Wks., 4,037 ft. concrete sewer in Detroit River Interceptor Sec. 4 and 3,777 ft. sewer, etc., Sec. 5 to S. A. Healy, 1007 American State Bank, $24,950 and $356,545 respectively. Noted Aug. 11.

Mich., Detroit—Dept. Pub. Wks., constructing Connors Creek Backwater Gates in connection with Connors Creek sewer, incl. 24,015 cu.yds. excav., 7,737 cu.yds. concrete, 781 tons reinforcing 22,920 lin.ft. wood piling, to Lennane & McIllvenna, foot of Leib St. $449,921.

Ill., Chicago—H. C. W. Leubenheimer, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., North Side Intercepting Sewer Contr. 9, incl. 7 river and channel crossings, to Byrne Bros. Constr. Co., 624 South Michigan Ave., $285,950. Noted July 21.

Ia., Grinnell—Changes in Imhoff tank, 25 x 48 ft. sludge digestion tank, 113 x 128 ft. sprinkling filter, 60 x 100 ft., sludge bed, 1,600 ft. 24-in. vitr. pipe sewers, to A. Emmert, Newton, $60,900. Noted Aug. 11.

Kan., Abilene—For 5,400 ft. 15-in. vitr. clay pipe, sewage pumping station, etc., to Ray G. Tripp Constr. Co., Herrington. $29,579. Noted June 23.

Tex., Levelland—Sanitary sewerage system, pumping and sewage disposal plant, to R. Irick, Plainview. Approximately $60,000.

Ont., Toronto—Robins Ltd., Natl. Bldg., 1 mi. 8- to 21-in. sewer in Armour Heights subdivision, to W. E. Taylor, 22 Falcon St., and pipe to Clay Products Agency, Metropolitan Bldg. Engrs. est. $30,000.

Ont., Toronto—Vitr. tile sewer in Lane 1st. North of Norman Ave., to Natl. Contr. Co., 52 Imperial St., $720; egg and circular brick sewers in tunnel, Yonge St., from Lawrence Ave. to City limits, in connection with North Toronto Sewage Scheme, and in Section 4A, to W. R. Worthington Constr. Co., 287 Belsize Dr., $81,710 and $21,724 respectively; Vitri. tile sewers in Lane North of Garnet Ave. and West of Ossington Ave., to Grant Contr. Co., 50 Front St., E., $3,600; sewers in lane near Sullivan St., to Simone Bros., 133 Monarck Pk. Rd., $925. Grand total $108,679.

B. C., Burnaby—Municipal Council will construct 70,555 ft. 6- to 15-in. sewers in various streets. $146,270. Work will be done by day labor. Former contract rescinded. D. Johnston, Municipal Hall, Edmonds, engr.

Bridges

Proposed Work

Miss., New Albany—Union Co. making preliminary plans rein.-con., creosoted timber and steel bridge, 20 ft. wide, across Tallahatchie River, here. $70,000.

O., Urichsville — Tuscarawas Co., New Phila., plans 200 ft. concrete bridge over Stillwater Creek, Trenton Ave. $50,000-$60,000.

Kan., Columbus—Cherokee Co., rejected bids two 70 ft. steel truss, one 20 ft. slab and two 35 ft. deck girder spans on Federal Aid Project 299-B. H. W. Tyrell Court House, engr. Noted July 14.

Tex., Amarillo—City, c/o J. D. Bartlett, city mgr., making plans rein.-con. viaduct over tracks Chicago, Rock Island & Pacific R.R. at West 8th St., $40,000. Address H. B. Jones, city engr.

Tex., Cliffside (mail Amarillo)—Potter Co. (Amarillo), c/o S. B. Motlow, judge, making preliminary surveys, etc., 60 ft. concrete and steel bridge, and 20 ft. approaches across West Amarillo Creek, near here. $50,000. R. W. Ryder, Amarillo, co. engr.

Tex., Houston—Made plans 7 span, 400 ft. rein.-con., bridge with 100 ft. steel lift span, extension Lockwood St. $200,000. J. C. McVea, city engr.

Tex., Laredo—Plans 3 bridges all rein.-con. and steel, $100,000 bond election soon for same. F. C. Heines, Laredo, engr.

Tex., Seguin—Guadalupe Co. plans concrete and steel bridge across Guadalupe River. $35,000. Address Co. Judge, Seguin.

Tex., Vernon—Wilbarger Co. voted $50,000 bonds concrete and steel bridge over Pease River. Address J. V. Townsend, co. judge. Noted June 2.

Ore., Portland—Comrs. Multnomah Co. take bids in spring concrete bridge over Columbia Slough between Portland, Ore. and Vancouver, Wash.; also grading and paving Denver Ave. approach to same bridge. $427,119.

California—Tulare Co. (Visalia) making plans, 323 ft. "Woodlake Bridge" over St. Johns River; 120 ft. Springville Bridge over Tule River on Camp Nelson Rd.; 283 ft. Italy Grade bridge over Tule River north of Poplar; 264 ft. Deer Creek Bridge over Deer Creek on Fountain Springs-Deer Creek Rd., and 33 ft. bridge over Cameron

INDEPENDENT CONCRETE PIPE "Show up Remarkably Well" in Euclid, O., Tests

From Euclid (Cleveland) Ohio Observer

Thorough Tests are Made of Concrete Sewer Pipe

The Euclid engineering department has put into effect a thorough system for testing the materials used in constructing concrete sewers . . . Tests of the concrete are made three times a day, and the materials are also tested on delivery. Tests are made by filling tubes with the concrete as it is mixed. Some of the tubes are allowed to stand seven days, and some twenty-eight days, before testing.

Recent tests of the concrete pipes made for the Euclid Avenue sewer **showed up remarkably well,** according to Engineer Frank A. Thomas. The pipes are being manufactured by the Independent Concrete Pipe Company of Indianapolis for the sewer contractor, the Ciraci Construction Company. The highest of the seven-day tests was that of 3,634 pounds to the square inch. In fact, this cube of concrete carried a weight of 100,000 pounds, which was considered remarkable by the engineer. Two other tests withstood 2,702 pounds pressure in one instance and 2,211 pounds in another. The concrete, to be standard, should stand a pressure of from 1,200 to 1,500 pounds to the square inch, in seven days, according to Engineer Thomas. The tests were conducted by the Cleveland Testing Laboratory.

Yard at Euclid, Ohio, where Independent Concrete Pipe were built for Euclid Ave. sewer.

These tests, plus those conducted in many other cities, prove conclusively that none but the best of materials and workmanship are used in building INDEPENDENT Reinforced Concrete Pipe.

The *proved* high quality of INDEPENDENT Pipe is the city's guarantee of a permanent, efficient sewer, and it is the contractor's assurance of a smooth-running, profitable job.

The *economy* of INDEPENDENT Concrete Pipe is another feature which will interest engineers and contractors. Let us send you estimates on your next concrete pipe sewer project.

INDEPENDENT CONCRETE PIPE CO., 202 N. West Street, Indianapolis

Bridges (Continued)

Creek near Zumwalt Ranch, 32 ft. bridge east of Merryman over Yokohl Creek, all rein.-con. L. A. Moye, co. surveyor.

Calif., Knights Landing (Grafton, P. O.)—Yolo Co., (Woodland) and Knights Landing Ridge Drainage Dist. preparing plans bridge over Knights Landing ridge. $50,000. A. G. Proctor, Woodland, co. surveyor.

Calif., Olive—Atchison, Topeka & Santa Fe Ry., R. B. Ball, ch. engr. (coast lines), 6th and Main Sts., Los Angeles, making plans replacing timber bridge with one 70 ft. and one 75 ft. steel span bridge over Santa Ana River, near here. $150,000.

Bids Desired

New Jersey and Pennsylvania—Aug. 24, by Joint Comn. for Elimination of Toll Bridges over Delaware River, between New Jersey and Pennsylvania, State Office Bldg., Trenton, N. J., steel superstructure for bridge over Delaware River connecting Trenton, N. J. and Morrisville, Pa. L. Focht, supt. and engineer; adv. E. N.-R. Aug. 18.

Pa., Phila.—Aug. 24, by Dept. Pub. Wks., Bureau of Engineering, 162 ft. steel incased in concrete bridge, 66 ft., over Phila. & Trenton R.R. tracks, on Linden Ave. G. H. Biles, dir.

Ky., Paducah—Aug. 22, by Bridge Committee, c/o Paducah Board Trade, 11 span 4,000 ft. bridge, concrete trestle bridge on concrete piers over Ohio River, here. $2,100,000. Harrington, Howard & Ashe, Orear-Leslie Bldg., Kansas City, Mo., engrs. Noted July 21.

Michigan—Aug. 23, at office G. H. Greene, resident engr., Alpena, one 150 ft. span T. L. Bridge 1-68-1-1 Contr. 1 and 2, Oscoda Co. for State Hy. Dept., Lansing.

Michigan—Aug. 24 at Macomb Co. Road Office Mt. Clemens, two 50 ft. steel deck girder S. R. Bridge 1-50-3-24 Contr. 1. C. L. Cowgill, Plymouth, resident engr.

Michigan—Aug. 30, at Genesee Co. Road Office, Flint, five 45 ft. steel deck girder span S. R. bridge 1-25-7-23 Contr. 1 and 2 and two 55 ft. span T. L. bridge 1-25-16-5 Contr. 1 and 2. R. W. Roberts, 504 Eddy Bldg., Saginaw, resident engr.

Ill., Chicago—Aug. 30, by R. W. Wolfe, comr. Pub. Wks., 200 ft. trunnion bascule bridge 62 ft. wide with 38 ft. roadway, over Calumet River at 106th St. $1,500,000. T. G. Philfeldt, City Hall, engr. Noted Aug. 12, 1926.

Tex., Houston—Aug. 31, by City, O. F. Holcombe, mayor, 3 span 400 ft., steel and concrete bridge across Houston Ship Channel at Adams St. $200,000. J. C. McVea, Houston, engr.

Contracts Awarded

N. J., Roselle (Ind. br. Elizabeth)—Concrete bridge at 5th Ave., to Weldon Contr. Co., Westfield, $38,515.

Pa Harrisburg—B. E. Taylor, secy. Dept. Property & Supplies, Capitol Bldg., Soldiers and Sailors Memorial Bridge, Contr. 2, to James McGraw Co., Phila., $1,623,381. Noted June 30.

Pa., Pittsburgh—Substructure for Millvale Avenue Bridge over Pennsylvania R.R. tracks, to Vang Constr. Co., Bessemer Bldg., $38,803. Noted Jan. 20.

West Virginia — State Road Comn., Charleston, Flat Run Bridge on Project 3203-F, Preston Co., to E. R. Mills, Covington, Ky., $8,235 Paw Paw Bridge on Project 1004 Morgan Co., to Polina Constr. Co., Keyser, $32,860, Buffalo Bridge, Project 3326-A Putnam Co., also gravel surfacing approaches to same, to Young Bros., Red House, $5,650. Grand total $46,755. Noted June 30 and July 7, under "Streets and Roads."

Wis., Muscoda—State Hy. Comn. at Village Hall, constructing Muscoda Bridge, incl. 1,167 lb. structural steel and 91,550 lb. reinforcement, etc., to Worden-Allen Co., Pt. Washington Rd., Milwaukee, $153,850. Noted July 28.

Washington—State Hy. Comn., Olympia, 4 rein.-con. bridges on State Road 2, and rein.-con. T-beam bridge over Salmon Creek, Clark Co., to Colonial Building Co., 617 Hutton Bldg., Spokane $53,391 and $12,232 respectively; also one 40 ft. and two 38 ft. rein.-con. T-beam bridge over Kachees River on Federal Aid Project 114-C, to Lindstrom & Feigenson, 230 Worcester Bldg., Portland, Ore., $22,928, both Kittitas Co. Grand total $88,551. Noted July 21 under "Streets and Roads."

Dams

Contracts Awarded

Mo., Osceola—See "Buildings Industrial."
Tex., Millsap—See "Waterworks."

Railways

Proposed Work

Mass., Boston — Quincy Market Cold Storage & Warehouse Co., 178 Atlantic Ave., plans private railroad tracks, Hanover and Commercial Sts. $25,000. Private plans.

Bids Desired

New York — Sept. 1, by A. C. Watson, ch. engr. Long Island R.R. Co., Long Island Station, Jamaica, lowering West Hempstead Branch track, etc. to permit constructing bridge on Southern State Parkway, west of Lakeview, in Hempstead; adv. E. N.-R. Aug. 18.

Excavation, Drainage, Irrigation, Levees, River and Harbor

Proposed Work

N. J., Allenhurst—Boro, M. D. Pyle, clk., plans repairing and altering jetties and appurtenances on ocean front. $30,000.

La., Ferriday—Making preliminary plans, levees and drainage system here. $200,000.

La., Monroe—Tensas Levee Bd. making preliminary plans repairing levee along Ouachita River, Ouachita and Caldwell Parishes. $50,000.

La., New Orleans—Orleans Levee Bd., 201 New Court House, made preliminary plans moving back levee line and raising grade of Dumaine St. levee. $100,000. R. B. Kohnke, 201 New Court House, engr.

Ark., Conway—Levee Dist. 1, J. E. Little, dir., making preliminary plans repairing approximately 100,000 cu.yd. levee, here. Dickinson & White, Boyle Bldg., Little Rock. engrs.

Ark., Newport—Overcup D. D., c/o P. W. Black, R. F. D., making preliminary plans approximately 230,000 cu.yd. excav. in ditches, etc. Bowman-Morrow Eng. Co., 201 Court House, engrs.

Ark., Tuckerman—Swan Pond D. D., c/o S. Graham, comr., making preliminary plans 130,000 cu.yd. excavation, in ditches, etc. Bowman-Morrow Eng. Co., 201 Court House, Newport Ark., engr.

Tex., Brownsville—Voted $600,000 bonds drainage work in Cameron Co. Water Control & Impvt. Dist. 5. Address O. C. Darcy, Brownsville, co. judge.

Tex., Harlingen—Arroyo Navigation Dist. c/o J. B. Chambers, voted $500,000 bonds ship channel. Noted June 30.

Tex., Ingleside—See "Buildings—Industrial."

Colo., Nepesta—Pueblo County, Nepesta Ditch & Irrigation Co., E. F. Nichols, Court House, Pueblo, plans dirt excavation to build water storage reservoir incl. rein.-con. work, near here. $250,000.

Calif., Grass Valley—Nevada Irrigation Dist., making plans reservoir on Deer Creek at Scott's Flat, also dam on Bear River at Combie site, near here. F. H. Tibbetts, Alaska Commercial Bldg., San Francisco, engr.

Bids Desired

N. Y., North Tarrytown (Ind. br. Tarrytown)—Aug. 29, by Westchester Co. Park Comn., 72 Pondfield Rd., Bronxville, dredging in Hudson River, constructing dikes, filling in swamp area east of New York Central R.R. tracks and filling beach at Kingslands Point Park, here. J. Downer, Bronxville, ch. engr. adv. E. N.-R. Aug. 18. Noted July 7.

Illinois—Sept. 1, Comrs. Union D. D. 1, Rock Island Co., towns Zuma and Hampton, at office F. P. Searle, 303 Safety Bldg., Rock Island, cleaning out and widening Main Ditches, 1, 2, 3, 4, 5, 6 and 7, constructing Ditch 8 and three 2 ft. and one 3 ft. automatically closing sluice gates. W. Treichler, Rock Island, engr.

Contracts Awarded

N. Y., Rye—Westchester Co. Park Comn., 72 Pondfield Rd., Bronxville, constructing stone breakwater, dredging, filling and sanding along beach and parking area, at Rye Beach to Merritt Chapman & Scott, 17 Battery Pl., New York City, $249,200. Noted June 23.

Tex., Brownsville—Flume across Rancho Viejo Resaca River to W. W. Vann, Brownsville, and excavation on drainage ditches, to J. Ballinger, San Benito. Engrs. est. $140,000.

Streets and Roads

Bids Desired

Massachusetts—Aug. 23, by Dept. Pub. Wks., Boston, bituminous macadam and rein.-con. paving 8,371 ft. highway in Framingham, Sudbury and Marlboro, 18 ft. W. F. Williams, comr.

N. Y., Hawthorne—Aug. 19, by Boro Comrs., grading, curbing, and guttering Wagaraw Rd., Jefferson, Pasadena Pls., Lincoln, Railroad, Florence Aves., etc. W. Ferguson's Son, 152 Market St., Paterson, engr.

N. Y., Long Island City—Aug. 24, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., grading, guttering, curbing, sidewalks, etc. on portion 90th and 46th Aves., 91st Ave. (Carll St.), National (Louona) Ave., and grading, sidewalks, guttering, curbing, and sheet asphalt and granite block resurfacing portion Corona Ave.; sheet asphalt repaving Central Ave.

N. Y., New York—Aug. 24, by J. Miller, pres. Manhattan Boro, Municipal Bldg., grading, curbing and flagging Ellwood, C. Vestry, East 4th and Tompkins Sts.; granite block paving East 4th St.; sheet asphalt paving, etc. 55th, 65th, 181st., Thayer and 211th Sts.

N. J., Plainfield—Sept. 6, by Common Council, City Hall, grading Watchung Ave. from Charlotte Rd. to Fernwood Ave., A. W. Vars, City Hall, engr.; adv. E. N.-R. Aug. 18.

Pennsylvania—Sept. 1 and 2, by State Hy. Comn., Harrisburg, grading, rein.-con. paving, etc., approximately 51 mi. 26 projects in Beaver, Blair, Butler, Cambria, Chester, Crawford, Dauphin, Erie, Green, Huntingdon, Lawrence, Lebanon, Lycoming, McKean, Monroe, Northampton, Northumberland, Somerset, Tioga, Washington, Westmoreland and constructing bridge in Bicks Co. J. L. Stuart, secy. highways.; adv. E. N.-R. Aug. 18.

Del., Dover—Aug. 22, by Town grading and concrete paving, etc. 1,350 cu.yd. roads Contr. SP-1.

Maryland—Aug. 23, by State Roads Comn., Baltimore, sheet asphalt paving 0.47 mi. Contr. Bc-72, Baltimore City, and concrete curbing 0.3 mi. Contr. AB-10-G, Anne Arunde 1 Co. J. N. Mackall, chn.; adv. E. N.-R. Aug. 18.

Va., Leesburg—Aug. 24, by Bd. Supervs. Loudoun Co., improving 4.29 mi. Hamilton-State Route 32 Rd., Mt. Gilead Dist., 40,360 cu.yd. excav., 4,137 cu.yd. borrow, 10,462 cu.yd. top soil, etc.

W. Va., Elkins—Aug. 24, by City Council, J. W. Graham, city clk., grading, curbing and paving 6,200 sq.yd. Projects 2, 3 and 4.

W. Va., Elkin—Aug. 24, by City Council, at office of Mayor, grading, curbing and paving 11,245 sq.yd. Locust Ave., 1st, Davis, Central, John Sts. Noted June 23.

Ga., Tennille—Aug. 23, by City Council, curbing, guttering and asphalt or concrete paving 10,350 sq.yd. various streets. Harwood Beebe Co., Spartanburg, S. C., municipal engrs.

Louisiana—Sept. 6, by State Hy. Comn., Reymond Bldg., Baton Rouge, constructing, 1.635 mi. road, Sabine Parish, Many-Zwolle-Converse-De Soto Parish Line Hy. from Converse east to Oak Grove School. State Project 398-F. Sabine Parish, N. W. Bowden, State Hy. engr.

O., Cincinnati—Aug. 23, by C. O. Sherrill, city mgr., City Hall, sheet asphalt repaving 16,000 sq.yd. and concrete repaving 33,000 sq.yd. Erie Ave. $227,275.

O., Dayton—Aug. 22, by Comrs. Montgomery Co., Court House, asphalt, rein.-con. or brick paving 2,500 ft. 8 streets in Hills-Dale Plat, 30 ft. $30,000. W. O. Pease, Court House, co. surv.

O., Leetonia—Aug. 25, by City Council, grading and surfacing Lisbon and Walnut Sts. $25,000-$30,000. Noted Feb. 10.

O., Lisbon—Aug. 25, by Comrs. Columbiana Co., resurfacing and widening 1.053 mi Lisbon-Canton Rd., 20 ft. concrete $32,973, brick $32,178; also widening 1 mi. Valley-Damascus Rd., 18 ft., $25,000. L. C. Kirk, Lisbon, engr.

O., Springfield—Aug. 20, by Comrs. Clark Co., paving 5.43 mi. Springfield-Troy Rd., Sect. Q, concrete $176,778; and macadam $176,334. W. H. Sieveling, Springfield, engr.

Michigan—Aug. 25, by R. W. Roberts, resident engr., 504 Eddy Bldg., Saginaw, concrete paving 1.998 mi. FO 29-7 Contr. 1, Gratiot Co.

BY THE DIPPERFUL—

ASPHALT paving blocks by the dipperful—that's the way to handle them. However, make sure that the dipper is on an INDUSTRIAL all-purpose crawler—there's real satisfaction then.

The ease with which an operator can manipulate an INDUSTRIAL crawler is surprising. Exacting controls that operate easily make it possible for the operator to spot his loads with accuracy—thus doing away with unnecessary loss of time so prevalent in average operation.

You owe it to yourself to investigate this INDUSTRIAL all-purpose crawler before you invest.

(Where there's money to be made—INDUSTRIALS make it !)

Ill., Sterling—Remodeling—Sept. 1, by Treas. Dept., at office Supervising Archt. Wash. D. C. remodeling U. S. Post office, here.

Wis., Milwaukee—Barges—Sept. 13, by U. S. Engineer Office, constructing 2 steel barges; adv. E. N.-R. Aug. 18.

Mo., St. Louis — Hospital — Sept. 6, by Treas. Dept., at office Supervising Archt. Wash. D. C. improving U. S. Marine Hospital, here.

Wash., Port Orchard—Dredging—Aug. 31, by U. S. Engineer Office, Seattle, dredging in bay, here.

Federal Government Work (Continued)

Bids Received

O., Cincinnati — Conduits, etc. — Treas. Dept., at office Supervising Archt., Wash. D. C., Aug. 3, conduits, etc. here from Michaels & Co., Flat Iron Bldg., Norfolk, Va., $38,470. Noted July 21.

Mo., St. Louis—Barges—U. S. Engineer Office, 428 Customhouse, Aug. 3, 6 steel barges from Howard Ship Yard & Dock Co., Jeffersonville, Ind. $49,272. Noted July 21.

Calif., Rio Vista—Dredging— U. S. Engineers Office, from Paris Bros., Rio Vista, constructing 30,000 to 39,999 cu.yd. retaining embankment near west bank Sacramento River, near here, $0.14; 40,000 to 50,000 cu.yd. $0.129, over 50,000 cu.yd. $0.119 and per hour for other work $6.00.

Contracts Awarded

Rhode Island and Connecticut — Breakwaters—U. S. Engineer Office, Providence, R. I. repairing breakwaters at Point Judith R. I. and Duck Island Harbor, Conn. to Merritt Chapman & Scott Corp., 17 Battery Pl., New York City, N. Y. $194,760. Noted June 23.

D. C., Wash.—Power Plant Equipment—Spec. 5334—Bureau Yards & Docks, Navy Dept., Wash. D. C. power plant equipment for Naval Hospital, here to M. H. Pagenhardt & Co., 2130 Locust St., Phila., Pa. $17,964. Noted Aug. 11.

S. C., Charleston—Rewinding Motors—Spec. 5443—Bureau Yards & Docks, Navy Dept., Wash. D. C. rewinding dry dock pump motors, here to Keystone Electric Co., 110 East Pratt St., Baltimore, Md., $5,800. Noted July 28.

Ill., Batavia—Post Office—Treas. Dept., at office Supervising Archt., Wash. D. C. constructing U. S. Post Office, here to Ring Constr. Co., 95 South 11th St., Minneapolis, Minn., $71,057. Noted June 9.

Nebraska—Wyoming—Power Plant Unit—Bureau Reclamation, Mitchell, Neb., installing (2nd unit) Guernsey Power Plant, North Platte Project, here to Utah Constr. Co., Eccles Bldg., Ogden, Utah, $20,860.

Wash., Puget Sound—Fence—Spec. 5319—Bureau Yards & Docks, Navy Dept., Wash. D. C. renewing yard fence at Navy Yard, here to Gaddis & Dixon, P. O. Box 967, Medford, Ore. $14,612. Noted July 14.

California — Bridges — Dept. Interior, 5 bridges and earth approach fills in Yosemite Natl. Park to Rocca & Caletti, 185 Stevenson St., San Francisco, $157,758.

Unclassified

Proposed Work

Transit Station—Dorchester (Sta. Boston). **Mass.**—City, Transit Dept., 1 Beacon St., Boston, having plans prepared by W. D. Austin, 120 Boylston St., Boston, 1 story rein.-con., brick and steel, plain foundation, Shawmut Station, here. $100,000. E. R. Springall, 1 Beacon St., Boston, engr.

Golf Course—Hyde Park, (br. Boston) **Mass.**—City of Boston, Dept. Pub. Wks., plans golf course, here. $200,000. J. H. Sullivan, comr.

Airport—Scituate, Mass.—F. Chapman and F. W. Darty, plans 25 acres airport, Branch Ave. $50,000. Private plans.

Airport—Taunton, Mass.—City, A. J. McGraw, mayor, plans airport. $25,000 or more. Engineer not selected.

Bulkhead, Docks, etc.—Elizabeth, N. J.—Elizabeth Sash Door & Supply Co., 663 Livingston Ave., making plans concrete and timber bulkhead and docks on plot 300 x 300 ft., and 240 x 240 ft., here. $500,000. Private plans.

Swimming Pool—Pensauken (mail Merchantville), **N. J.**—See "Buildings—Educational, Religious."

Natural Gas System — Texas — West Texas Gas Co., Lubbock, (subsidiary Prairie Oil & Gas Co., Independence, Kan.) making plans natural gas system in Idalou, Lorenxo, Crosbyton and Ralls, $40,000 each, also loop line out of Lubbock and tie with Floydada line $150,000. Private plans.

Pipe Line—Texas—W. B. Alt Eng. Co., Capps Bldg., Ft. Worth, making plans pipe line from Nocona to Ft. Worth. $800,000.

Power Transmission Line—Texas—Gulf State Utilities Co., c/o J. G. Holtzclaw, vice pres., making plans and soon take bids 33,000 volt high power transmission line from Conroe to Huntsville, Trinity and Groveton, $70,000, 60,000 volt line from Dayton to Cleveland and Conroe, $75,000, and 33,000 volt line from Huntsville to Navasota, Madison and Normangee. $125,000. Private plans.

Transmission Line — Texas — Comal Power Co., New Braunfels, Lone State Power Co. (subsidiary), c/o W. B. Tuttle, San Antonio, plans 40 mi. power transmission line to Floresville, incl. Stockdale, Poth, Falls City, etc. $100,000. Private plans.

Golf Course and Swimming Pool—Abilene, Tex.—J. W. Nance and A. T. Jones, making plans golf course and concrete swimming pool. $50,000. Private plans.

Underpass—Amarillo, Tex.—City and Ft. Worth and Denver R.R. Co., C. Gowdy, Denver, Colo., chn. engr., and Chicago, Rock Island and Pacific R.R., C. A. Morse, La Salle St. Station, Chicago, Ill., ch. engr., soon take bids 140 ft. rein.-con. underpass at 3rd St. Crossing, $75,000, also 110 ft. rein.-con. underpass at North Amarillo Crossing, $75,000. J. D. Bartlett, city mgr.

Airport—Colorado, Tex.—A. L. Miller, purchased site and plans airport on Bankhead Highway 3 mi. east here. $75,000. Private plans.

Golf Course—Corpus Christi, Tex.—S. Robertson and J. M. Parker, purchased 819 acres land on Padre Island complete golf course. $100,000. Private plans.

Grain Elevator—Denison, Tex.—Knaur Grain Co., c/o G. Knaur, making plans 52,000 bu. capacity, 114 ft. high rein.-con. grain elevator, with 8 large circular bins and 4 small bins, each 90 ft. deep. Southwestern Eng. Co., Springfield, Mo., engrs.

Oil Tanks—Ingleside, Tex.—See "Buildings—Industrial."

Wharf, Point Isabel, Tex.—Page L'Hoe, Ltd., New Orleans, La., plans 1,600 lin.ft. x 60 lin.ft. rein.-con. wharf. $250,000. Private plans.

Power Transmission Line—Post, Tex.—Texas Utilities Co., Slaton, making plans high power transmission line. $35,000. Private plans.

Airport—San Antonio, Tex.—City making surveys, etc. airport to be located at Remount Station, $100,000. I. Ewig, city engr.

Golf Course, etc.—San Benito, Tex.—F. L. & B. W. Hinkly, making plans golf course on 45 acres land near here, incl. paving $30,000, and waterworks $25,000. Private plans.

Grain Elevator — South Plains, (mail Lockney) **Tex.**—B. Thornton and G. Bean, Lockney, purchased site and making plans 20,000 bu. capacity, steel and concrete grain elevator. $70,000. Private plans.

Gas Pipe Line—Oklahoma and Texas—Phillips Petroleum Co., Bartlesville, Okla., made preliminary plans 250 mi. gas pipe line from Panhandle, Tex. to Norge, Okla. $10,000.000. A. H. Riney, Bartlesville, Okla., ch. engr.

Pipe Line—Enid, Okla.—Champlin Refining Co., Enid, making plans 8 in. pipe line in Garber-Covington Field. $100,000.

Lighting System—Woodward, Okla.—Plans 30 blocks "White Way" lighting system. $30,000. Black & Veatch, Mutual Bldg., Kansas City, Mo., engrs.

Bids Desired

Retaining Wall—Marblehead, Mass.—Aug. 24, by Town, R. Tute, clk. of Bd. concrete retaining wall.

Underground Electric Cable—Phila., Pa.—Aug. 23, by Dept. City Transit, underground electric cable system between City Hall and Fern Rock Terminal Yard, Contr. 156, for Broad Street Subway.

Wharf Extensions—Lake Charles, La.—Sept. 13, by City, extending 734 ft. concrete wharf. $300,000. E. Shutts, Lake Charles, engr.

Swimming Pool — Columbus, O. — See "Buildings Commercial."

Subway and Approaches—Chicago,Ill.—Aug. 23, by Bd. South Park Comrs., 57th St. and Cottage Grove Ave., M. T. Connolly, secy., inner drive subway at Oakwood Blvd. and east approach to Oakwood Blvd. viaduct, incl. pile foundation, rein.-con., footings, abutments, retaining walls, sidewalks, balustrades, etc.

Oil Pipe Line—Cross Plains, Tex.—See "Contracts Awarded."

Contracts Awarded

Comfort Station—Bridgeport, Conn.—See "Sewers."

Subway—Phila., Pa.—Dept. City Transit, H. E. Ehlers, dir., 1211 Chestnut St., approximately 3,020 ft. subway in South Broad St., Contr. 109, to Heymen & Goodman Co., Inc., 880 8th Ave., New York City. $7,629,880. Noted June 16.

Swimming Pool—Lakewood (br. Cleveland), **O.**—Bd. Educ., C. W. Grill, clk., swimming pool, to J. Grant & Son, 3868 Carnegie Ave., Cleveland $22,737; and bath house, to F. H. Vogel, Ridge Rd., Cleveland $70,987. Noted July 14.

Overhead Crossing — Tennessee — State Dept. Highways & Pub. Wks. Nashville, rein.-con. overhead crossing over tracks Nashville, Chattanooga & Louisville R.R. on State Aid Project 339-D, Hamilton Co., to E. A. Wood & Co., Andrews, N. C., approximately $42,200.

Zoological Buildings—Riverside, Ill.—E. H. Clark, archt., 8 East Huron St., Chicago, general contract entrance group, power house and reptile house, here. to H. F. Friestdt & Co., 435 North Michigan Ave., Chicago; heating, to L. H. Prentice Co., 1048 West Van Buren St., Chicago; plumbing, to Murphy Plumbing Co., 1720 South Michigan Ave., Chicago; electrical work, to Freeman-Sweet Co., 9 West Illinois St., Chicago, and sewers and waterworks to T. H. Iglehart, 166 West Jackson Blvd., Chicago, for Chicago Zoological Society, 35 North Dearborn St., Chicago. Archts. est. $300,000.

Barge Terminal—St. Paul, Minn.—A. E. Eggert, city purch. agt., general contract barge terminal at Pigs Eye, and escalator gallery, truck-hauls and machinery, at Mississippi River Terminal, to Struchen & Romer, 655 Shubert Bldg., approximately $150,000 and $34,491 respectively; also equipment for latter project, to Link Belt Supply Co., Chicago, Ill., $13,916. Noted May 26.

Grain Terminal—St. Paul, Minn.—A. E. Eggert, city purch. agt., grain terminal, incl. sacked and loose wheat loading facilities; incline trestle type cradle and wharf barge, trackage, etc., on Mississippi River, near Chestnut St., to Ganley Bros. Co., 544 Endicott Bldg., $139,128. Noted July 7.

Subway — Springfield, Mo. — Main structure National Avenue Subway, 470 cu.yd. each earth and rock excav., 84,600 lb. reinforcing and 161,000 lb. structural steel, 440 ft. waterproofing, 1,170 ft. gas pipe railing, etc., to Pioneer Constr. C., 270 Glover Bldg., Kansas City $44,299. Noted July 28.

Oil Pipe Line — Cross Plains, Tex. — Prairie Pipe Line Co., Independence, Kan., will build 15 mi. 8 in. oil pipe line by own forces. $75,000.

Gas Distributing System—Dalhart, Tex.—A. D. Morton, Bartlesville, Okla., gas distributing system, mains, laterals, etc., here, to Hope Eng. & Supply Co., Tulsa, Okla., and Mt. Vernon, O., approximately $65,000.

Materials

Bids Desired

Conductor Cable—Phila., Pa.—Aug. 23, by C. E. Walsh, purch. agt. Pennsylvania R.R. Co., 15 North 32nd St., West Phila. conductor cable, Contr. 101.

Sand Clay Gravel—Louisiana — Aug. 30, by State Hy. Comn., Baton Rouge, furnishing 40% sand clay gravel for surfacing Lake Providence-Oak Grove Hy. Federal Aid Project 170-B East Carroll Parish, N. W. Bowden, Raymond Bldg., Baton Rouge, highway engr.

Cast Iron Pipe—Stillwater, Okla.—City in market 37,751 ft. 4 in. Class "B" c.i. pipe in 16 ft. lengths. F. R. Hassler, mayor.

Contracts Awarded

Pipe—Milwaukee, Wis.—Central Bd. Purchases, J. W. Nicholson, ch. buyer, 1,200 ft. 8- to 16-ft. Class "C" pipe, and 47 tons special castings, etc., to U. S. Cast Iron & Fdry. Co., 122 South Michigan Blvd., Chicago, Ill. at $38.40 and $73 per ton respectively. Noted July 21.

Sewerage System—New Jersey

Bids were opened by Passaic Valley Sewerage Commissioners, Newark, Apr. 19, for part of Sect. No. 4, Passaic Valley Sewerage Works, outfall sewerage works, additional sedimentation basins, from (A) Spinnello Construction Co., 493 Monroe St., Orange, (awarded contract); (B) J. L. Sigretto & Sons, Inc., New York City; (C) J. P. White Co., Passaic; (D) J. P. Porter & Sons, St. Catherines, Ont.; (E) J. Sutherland, Inc., Newark; Strange Construction Co., Phila., $892,250; Arthur McMullen Co., New York City, $1,046,600; O'Gara Construction Co., Newark, $1,055,390. The unit bids of the lowest four and highest bidders are as follows:

	A	B	C	D	E
Earth excavation and refilling for sedimentation basins, galleries, etc. (lump sum)	$199,455.00	$52,500.00	$90,000.00	$110,000.00	$115,600.00
50 cu.yd. rock excavation in open excavation	.01	1.50	1.00	3.00	10.00
28,000 cu.yd. concrete masonry with portland cement mortar 1:2:4	12.00	18.00	18.00	18.00	26.00
100 cu.yd. brick masonry with portland cement mortar	35.00	75.00	40.00	40.00	50.00
20 cu.yd. chipping, cutting, and removal of existing concr. and brick masonry	75.00	3.00	50.00	75.00	120.00
For handling and diverting existing sewage flow, etc. (lump sum)	3,000.00	1,000.00	5,000.00	5,000.00	9,800.00
1,200,000 lb. steel reinforcement, complete in place	.06	.07	.06	.04¾	.07¼
2,500 sq.yd. broken stone road surfacing	1.50	2.25	2.50	2.50	1.00
500 cu.yd. broken stone foundation cushion	5.00	6.00	5.00	5.00	5.00
Surface drains, vit. pipe, catch basins, etc., complete in place (lump sum)	1,530.00	200.00	500.00	1,000.00	1,200.00
Gallery piping, cast iron piping, water mains, air mains, etc. (lump sum)	42,000.00	47,000.00	49,937.00	44,500.00	71,000.00
Sluice gates, 40-18 ft. x 24 in., flange type, with wall castings, etc. (lump sum)	16,520.00	14,500.00	13,080.00	18,000.00	23,000.00
Electric wiring and lighting systems in basin galleries, etc. (lump sum)	2,200.00	3,120.00	4,000.00	3,500.00	4,580.00
Miscellaneous iron and steel, including cast iron influent piping, etc. (lump sum)	34,105.00	30,000.00	34,300.00	38,235.00	42,000.00
Timber stop planks, complete with bolts, washers, etc. (lump sum)	3,800.00	3,000.00	4,000.00	3,050.00	4,200.00
Scumboards; twenty sets complete with fittings, etc. (lump sum)	25,000.00	25,000.00	4,000.00	16,500.00	24,800.00
Totals	$746,861	$780,580	$794,617	$815,185	$1,124,080

Engineering News-Record, Issue of August 18, 1927.

Road—Wyoming

Bids were opened by State Highway Commission, Cheyenne, May 10, for constructing Federal Aid Project No. 193-A, 1.14 mi. of Route No. 30 N, Kemmerer Township, Lincoln Co., from (A) A. H. Read Co., Cheyenne, (awarded contract); (B) Wheelright Construction Co., Ogden, Utah; (C) Christensen, Jacobs & Gardner. The unit bids are as follows:

	A	B	C
7956.4 cu.yd. earth excav	$0.65	$1.17	$1.50
50 cu.yd. loose rock excav	.50	1.70	2.00
50 cu.yd. solid rock excav	3.00	2.25	3.00
1,100 cu.yd. gravel surfacing	1.25	2.65	3.00
1,086 lin.ft. 10 in. vitr. pipe culvert	.90	1.15	1.10
104 lin. ft. 24 in. vitr. pipe culvert	3.25	4.35	4.00
3,100 mi. overhaul of surface material	.15	.285	.30
5.08 Class B conc. endwalls	15.00	30.50	32.00
20774.8 sq.yd. conc. pavement	2.60	3.15	2.97
3348.4 lin.ft. curb and gutter	.95	1.25	1.40
489.2 lin.ft. conc. curb	.75	.725	1.00
25 catch basins	25.00	35.00	65.00
7.165 M. ft. b.m. timber headers	60.00	75.00	75.00
3,750 sq.ft. removing walks	.10	.06	.20
3,839 lin.ft. removing curb	.10	.14	.10
Totals	$68,004	$87,317	$88,362

Engineering News-Record, Issue of August 18, 1927.

Paving, Roadwork and Storm Sewers Runnemede, N. J.

Bids were opened by the Boro of Runnemede, July 1, for laying sidewalks, curbs and gutters, improving streets and laying storm sewers, from (A) Pangea Const. Co., Atco, (awarded contract); (B) Riverside Const. Co., Riverside; (C) McCarthy Const. Co., Runnemede. The unit bids are as follows:

	A	B	C
10,792 cu.yd. excav. (roadway)	$0.50	$0.50	$0.50
61,096 sq.ft. sidewalk (4 ft. x 4 in. 1:2:4)	.18	.18	.18
14,234 lin.ft. curb and 24 in. gutter (14x6 in.)	.83	.88	.95
897 lin.ft. curb and 36 in. gutter (14x6 in.)	1.03	1.08	1.10
326 sq.yd. reinforced conc. gutter (8 in.)	2.62	2.90	2.39
198 lin.ft. radius curb (16x6 in.)	.85	.88	1.10
30 drives (drop curb type) (includes 12 lin.ft. curb and gutter, 8x2½ ft. x 6 in. apron, 8x4 ft. x 6 in. walk)	25.00	20.00	20.00
6 No 2 open mouth city inlets	65.00	70.00	60.00
8 No. 3 open mouth city inlets	60.00	70.00	50.00
30 lin.ft. 15 in. C.I.P. in place	5.00	5.00	4.00
20 lin.ft. 8 in. T.C. storm sewer	.75	1.40	.50
10 lin.ft. 12 in. T.C. storm sewer	1.00	1.60	.60
612 lin.ft. 15 in. T.C. storm sewer	2.10	2.25	2.00
756 lin.ft. 18 in. T.C. storm sewer	2.50	2.40	2.30
62 lin.ft. 24 in. T.C. storm sewer	3.00	3.50	2.50
22 lin.ft. 6 in. tile drain	.50	.40	.25
10 trees, remove and dispose (Ave. 31.7 in. diameter)	0.00	27.00	10.00
3 stumps remove and dispose	5.00	10.00	10.00
77.5 lin.ft. stone retaining wall, remove (½ cu.yd. per ft.)	.50	.75	.25
325 lin.ft. wooden guard rail, remove and pile	.10	.15	.05
	$35,497	$36,695	$36,774

Bridge—Alton, Ill.

Bids were opened by Alton-St. Louis Bridge Co., c/o L. E. Anderson & Co., 711 St. Charles St., W. R. Compton Co., 704 Locust St. and Bitting & Co., 316 North 8th St., all St. Louis, Mo., Apr. 1, for constructing substructure for 3600 ft. bridge across Mississippi River at Alton, from (A) Kansas City Bridge Co., Orear-Leslie Bldg., Kansas City, Mo.; (awarded contract); (B) Union Bridge & Construction Co., Kansas City, Mo.; (C) Fruin-Colnon Contracting Co., St. Louis, Mo.; (D) Dravo Contracting Co., Pittsburgh, Pa.; superstructure, from (A) Wisconsin Bridge & Iron Co., 1116 Commerce Bldg., Kansas City, Mo., (awarded contract); (B) Mt. Vernon Bridge Co., Mt. Vernon, O.; (C) Kansas City Bridge Co.; (D) American Bridge Co., St. Louis. The unit bids are as follows:

SUBSTRUCTURE	A	B	C	D
3,500 cu.yd. pier shafts above bases	$21.00	$26.25	$30.00	$30.00
5,160 cu.yd. pier bases	30.00	34.00	33.50	34.50
24,300 lin.ft. timber piles in piers	1.10	.85	1.70	1.10
7,200 lin.ft. creosoted timber piles in approach footings	2.75	.95	1.40	1.50
850 cu.yd. abutment, retaining walls, pedestals, etc, in north approach	30.00	42.00	21.00	50.00
200,000 lb. all reinforcing steel in substructure	.06	.07	.055	.05
Fender complete at pier 7 (lump sum)	4,600.00	3,614.00	5,229.00	4,000.00
2,000 tons all riprap in place	3.20	4.50	5.00	3.50
220 cu.yd. sand fills between retaining walls and abutment	2.25	2.85	3.00	3.00
Totals	$323,550	$357,656	$373,849	$384,560
SUPERSTRUCTURE				
440,000 lb. silicon steel in thru truss spans	$0.0773	$0.0785	$0.0720	$0.0875
3,800,000 lb. carbon steel in thru truss spans	.0593	.0712	.0720	.0760
1,020,000 lb. structural steel in deck truss spans and towers	.0600	.0755	.0720	.0806
310,000 lb. structural steel in so. approach spans and towers	.0636	.0733	.0720	.0767
240,000 lb. structural steel in handrails	.0570	.0600	.0720	.0792
110,000 lb. castings	.1550	.1000	.1000	.1467
1910 cu.yd. concrete—machine finish	22.00	19.00	25.00	23.76
1,840 cu.yd. concrete—asphaltic surface	19.75*	20.00*	24.00*	22.15*
7,300 sq.yd. asphaltic concrete pavement	1.90*	2.25*	2.00*	1.95*
7,300 sq.yd. Kentucky rock asphalt pavement	1.40*	2.05*	1.50*	1.85*
380,000 lb. all reinforcing in superstructure	.0450	.0425	.0550	.0500
Gunite encasement (lump sum)	6,500.00	3,200.00	1,725.00	4,320.00
Totals	$436,618	$485,873	$499,695	$537,136

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Bridge, California, Southern Pacific R.R. making surveys, $10,000,000 or more.

Highway, California, San Francisco, Co., San Mateo Co., and Santa Cruz Co. making surveys, $8,000,000.

Factory, Los Angeles, Calif., Firestone Tire and Rubber Co. having plans prepared, $7,000,000.

Irrigation works, Calif., Fresno Foothill Irrigation Dist. voted bonds, $2,300,000.

Viaduct, Cincinnati, O., Hamilton Co. plans, $2,000,000.

Transmission lines, Texas, West Texas Utilities Co., Abilene, takes bids in September, $2,000,000.

Office, San Antonio, Tex., Smith Bros. soon take bids, $2,000,000.

Club, San Francisco, Calif., Olympic Club having plans prepared, $2,000,000.

Waterworks, San Francisco, Spring Valley Water Co. plans pipe line, $2,000,000 or more.

Apartment Hotel, Toronto, Ont., E. W. C. Godson had plans prepared, $2,000,000.

Apartment, Cleveland, O., Berkner Realty Co. having preliminary plans prepared, $1,500,000.

Causeway, Texas and Louisiana, Sabine Developers take bids about Sept. 1, $1,500,000.

Apartment, Los Angeles, Calif., L. B. Mayer and H. Rapf having plans prepared, $1,500,000.

Machinery Exchange, Los Angeles, Calif., R. Rosenberg having plans prepared, $1,500,000.

Office and store, Chicago, Ill., Syndicate having sketches made. $1,250,000.

Hotel, Chicago, Ill., Syndicate having plans prepared, $1,000,000.

Office, Detroit, Mich., Bd. Water Comrs. having plans prepared, $1,000,000.

Hotel Apartment, Los Angeles, Calif., R. A. Hill preparing preliminary plans, approximately $1,000,000.

Hotel, Long Beach, Calif., L. A. Baker, having plans prepared, $1,000,000 or more.

Bids Desired

Museum, Los Angeles, Calif., Supervs. Los Angeles Co. open bids Sept. 19, $1,250,000.

Public Safety Building, Milwaukee, Wis., Dept. Pub. Wks. opens bids Sept. 8, $1,200,000.

Masonic Temple, Atlanta, Ga., W. C. Spiker & Co. opens bids Sept. 20, $1,000,000.

Paving, Cleveland, O., Bd. Comrs. Cuyahoga Co., open bids Aug. 27, $1,000,000.

Apartment, Chicago, Ill., Huszagh & Hill taking bids, $1,000,000.

Bank and office, Los Angeles, Calif., Bennett and Haskell taking bids, $1,000,000.

Contracts Awarded

Appraisers Stores, New York, N. Y., L. Adler to Shroder and Koppel, Inc., archts. est. $6,000,000.

Civil Courts, St. Louis, Mo., Bd. Pub. Serv. to Seldon-Breck Constr. Co., $2,656,203.

Loft, Phila., Pa., Manufacturers Exchange Realty Co. to Nelson-Pedley Co., $1,500,000.

Hotel and stores, Elizabeth, N. J., Elizabeth Chamber of Commerce Hotel Co. to Deakman Wells Co., Archts. est. $1,000,000.

Apartment, Chicago, Ill., R. De Gaylor & Co. to Linn Constr. Co. and E. B. Kaiser, Archts. est. $1,000,000.

Apartment, Oakland, Calif., Bercovich and Assocs. to Thebo, Starr & Anderton, approximately $1,000,000.

News of the Week

Waterworks

Proposed Work

Mass., Spencer—Appropriated $49,500, relaying 6,000 ft. main water line. Water Dept., Town Hall, engr.

Mo., St. Louis—See "Unclassified."

Tex., Lufkin—Voted $85,000 bonds, extending waterworks.

Calif., Glendale City—P. Diederich, mgr. Pub. Serv., making plans 50 m.g. reservoir in Campbell St., $200,000.

Calif., San Francisco — Spring Valley Water Co., 425 Mason St., plans new main feeder pipe line from San Andreas Lake to companys holding reservoirs, here. $2,000 000 or more.

Calif., San Luis Obispo—San Luis Obispo Co. made plans wrought steel mains with necessary fittings, valves, pumps and motors, etc. in Acquisition & Impvt. Dist. 6. $15,000 or more. W. W. Hughes, San Luis Obispo, engr.

Calif., Santa Clara — Making plans extending mains in various streets, etc. $25,000 or more. H. B. Fisher, Growers Bank Bldg., San Jose, engr.

Bids Desired

Conn., Putnam—Sept. 8, by Bd. Water Comrs., City Hall, 11,900 ft. 8- to 16-in. c.i. waterworks; adv. E. N.-R. Aug. 25.

N. Y., Long Island City—Aug. 30, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in 77th Pl., 66th Rd., 59th, 77th, 78th Sts., 2nd Ward; 13th, 14th, 22nd, 72nd and 88th Aves., Burton, Gettysburg, 160th, 166th annd 223rd Sts., 12th Rd., Cryders Lane, Parsons Blvd., etc., 3rd Ward· Woodhaven Blvd., 158th, 90th and 91st Sts., etc., in 4th Ward, here.

N. Y., New York—Aug. 31, by P. J. Dooling, comr. Purchase, Municipal Bldg., corporation cocks and hydrant repair parts to Dept. Water Supply, Gas & Electricity.

N. J., Denville—Sept. 7, by Twp. Com., Township Hall, concrete foundation for 250,000 gal. storage tank, concrete, brick and steel pump house, also constructing 250,000 gal. water storage tank, D. Sofield, twp. clk.; adv. E. N.-R. Aug. 25.

N. J., Newark—Sept. 8, by North Jersey Dist. Water Supply Comn., B. W. Moore, Jr., chn., 24 Commerce St., wire fence at Wanaque Reservoir. A. H. Pratt, ch. engr.; adv. E. N.-R. Aug. 25.

Pa., Grove City—Sept. 6, by Boro Council, C. A. Black, pres., at office C. H. Foltz, boro mgr., filtration and softening plant. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.; adv. E. N.-R. Aug. 25.

Pa., Phila.—Sept. 1, by Dept. Pub. Wks., Bureau of Water, chlorine apparatus for Belmont mechanical filters, Contr. 893; steam heating, Shawmont Pumping Station, Contr. 894; intake screen house, Shawmont Station, Contr. 895; breeching insulation, Queen Lane Pumping Station, Contr. 896; 6- to 12-in. water pipe, Contr. 897; and steel doors, Shawmont Pumping Station, Contr. 898. G. H. Biles, dir.

Wis., Niagara — See "Contracts Awarded."

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.*

Neb., Lincoln—Aug. 29, by T. H. Berg, city clk., 15,000 ft. 6- to 10-in. mains, 35 valves, seventeen 6 in. hydrants and 8,292 lb. specials, etc. $25,000. D. L. Erickson, city engr.

Okla., Seminole—Aug. 30, by P. Noe, city clk., extending 24,500 ft. 4- to 8-in. c.i. mains, etc., in various streets. $30,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs. Noted June 2.

Calif., Beverly Hills — Salisbury, Bradshaw & Salisbury, Petroleum Security Bldg., Los Angeles, taking bids 6,000 ft. 12 in. and 2,000 ft. 14 in. welded steel pipe, here, for City.

Calif., Soquel — A. L. Andrews, clk. Soquel School Dist., taking bids pneumatic water plant complete, incl. pump with 1,000 gal. per hr., 1,000 gal. steel pressure tank, etc.

Contracts Awarded

Mass., Boston—Metropolitan Dist. Water Supply Comn., 24 School St., 6,750 ft. 20 in. c.i. pipe in Hopkinton, Contr. 13, to Portland Contg. Co., 97 Exchange St., Portland, Me., $54,963. Noted Aug. 4.

N. Y., Brooklyn—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Avenues H, O, and T, etc., to Dragonetti Contg. Co., 1123 Clinton Ave., New York City, $13,627. Noted July 21.

Pa., Phila.—Dept. Pub. Wks., Bureau of Water, Contrs. 890 and 891, to Acme Machine Co., 27 North 38th St., $27,000 and $20,000 respectively. Noted Aug. 11.

Md., Baltimore — Bd. Awards, c.i. pipe and fittings to Bureau Water Supply, for Mayor and City Council, to R .D. Wood & Co., 400 Chestnut St., Phila., Pa., $79,036. Noted Aug. 18.

N. C., Greensboro — See "Streets and Roads."

Tenn., Nashville—Bd. Pub. Wks., at office S. H. McKay, city clk., general contract filtration plant, to Foster-Creighton Co., 4th and 1st Natl. Bldg., $566,968; steel tank, to Chattanooga Boiler & Tank Co., 1011 East Main St., Chattanooga, $3,630. Engrs. est. $760,000. Noted June 30.

O., Cincinnati—Comrs. Hamilton Co. (**e.e. means engrs. estimate**), 8,544 ft. 6 in. c.i. mains in Water Supply Line 55 Dist. 2, to E. Meier, 1983 Cleneay Ave., Norwood, $14,987 e.e. $17,587; 26,558 ft. 6- to 10-in. c.i. mains Water Supply Line 13, Dists. 2, 4 and 5, to Metzel, O'Hearn, Vastine & Lewin, 6th and Craig Sts., Covington, Ky., $52,180 e.e. $62,381; also 36,848 ft. 6 in. c.i. mains in Water Supply Line 62, Dists. 1 and 8, to Crumley, Jones & Crumley, 311 Temple Bar Bldg., Cincinnati, O., $68,461 e.e. $78,717. Grand total $135,628. Noted June 16.

Wis., Milwaukee—For 3,432 ft. 6- to 16-in. c.i. mains in various streets, to H. O. Schaefer, 309 Grove St., $15,755. Engrs. est. $21,600.

Wis., Niagara—Village will construct reservoir, pipe lines, etc. for water supply, by day labor. $50,000. Shields, Jordan & Roe,

See proposal advertising on page 118

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Eliminating Repairs and Maintenance Costs

TRENTON WATER WORKS, Trenton, N. J., has been using Leadite for making joints in c. i. bell and spigot water mains for a great many years with entire satisfaction.

They have laid nearly 75 miles of c. i. pipe of various sizes with Leadite joints.

Trenton has very good paved streets and they have never had to dig up a Leadite joint for repairs during all the time they have been using Leadite. They consider this excellent performance for Leadite joints.

They find the use of Leadite has reduced to a minimum repairs and maintenance costs.

Trenton Water Works has always found Leadite joints efficient and economical.

They keep a check on their distribution svstem by water waste surveys.

During the severe winter of 1917-18 Trenton Water Works had over 2000 frozen services. Many of these services were connected to mains laid with Leadite joints. They had no difficulty in thawing, with electrical apparatus, services connected with mains which were laid with Leadite joints.

Mr. Alvin Bugbee is Superintendent of the Trenton Water Works.

Specify and use LEADITE It saves at least 75%

Be sure it is LEADITE and accept no imitations

The pioneer self-caulking material for c. i. pipe. Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Waterworks (Continued)

6 South Dearborn St., Chicago, Ill., engrs. Noted June 30.

Ia., Marengo — Two tubular concrete wells, to Continental Concrete Well Co., Arkansas City, Kan., $2,800; pump house, to M. O. Burnett, Marengo, $4,400; and pump and suction mains, to C. D. Nolan, Cedar Rauids, $4,876. Grand total $12,076. Noted June 9.

Mo., Columbia — For 2 m.g. rein.-con. storage reservoir, to Simon Constr. Co., Columbia, $31,750.

Calif., Elsinore — Temescal Water Co., Corona, single arch concrete dam in Railroad Canyon, to Nevada Contg. Co., Fallon, Nev., approximately $125,000.

Calif., Monterey Park — To Amer. Cast Iron Pipe Co., Detwiler Bldg., Los Angeles, 800 ft. 4 in. 16 ft. length c.i. water pipe at $0.4382 per ft., 500 ft. 6 in. $0.6149, 4,100 ft. 8 in. $0.8817, 1,100 ft. 12 in. $1.5251, etc.

Calif., Santa Maria—A. H. Drexler, city clk., 18 in. rein.-con. pipe line in connection with waterworks, to F. H. Gates, Inc., Santa Maria, approximately $58,115.

Sewers

Proposed Work

O., Columbus — Franklin Co., Court House, soon takes bids 10,800 ft. 8- to 15-in. vitr. sewer in Marion Dist. 1, Impvt. 82. $44,000. E. G. Bradbury, Court House, annex.

Wis., Lake (St. Francis P. O.)—Making plans 10,000 ft. 8 in. vitr. clay sewers in Norwich, Sheridan, Griffen and Austin Sts., Van Beck Court, Howell, Van Beck, Burdick, Hanson, Jordan, Howard, Howell and Pine Aves. $40,000. H. C. Webster, 216 West Water St., Milwaukee, engr.

Wis., Oconomowoc — Making plans reconstructing sewage disposal plant and sewerage system. W. G. Kirchoffer, Oconomowoc, engr.

Wis., Wauwatosa—Plans 12,000 ft. 8- to 12-in. vitr. clay sewers in Ravenswood Subdivision. $30,000. J. E. Lowther, Wauwatosa, engr.

Ia., Marshalltown—Soon takes bids 17,064 ft. 15- to 48-in. vitr. clay, concrete or segment block sewers in Dists. 1, 2, 7, 8, 9 and 10.

Mo., St. Louis—See "Unclassified."

Ark., Corning—Making preliminary plans 8- to 15-in. vitr. clay sewerage system. J. R. Rhyne, City Hall, engr.

Tex., Amarillo—Making plans sewage disposal plant. To exceed $100,000. H. B. Jones, city engr. Wynkoop, Kiersted, 614 Interstate Bldg., Kansas City, Mo., consult. engr.

Tex., Lufkin—Voted $50,000 bonds, extending sewerage system.

Calif., Los Angeles—Los Angeles Co., D. D. 21, made plans 24- to 84-in. cement and rein.-con. sewers in Montebello Dist. C. E. Arnold, Hall of Records, drainage constr. engr.

Calif., Manhattan Beach (Manhattan P. O.)—L. Price, city clk., making plans vitr. sewers, house connections, etc. in Home and 2nd Sts., etc. To exceed $25,000.

Calif., Redwood City—South San Francisco D. D. 1, San Mateo Co., made plans rein.-con. drainage canal, 36 in. concrete storm sewer, rein.-con. bridges, etc. To exceed $100,000 . G. A. Kneese, Redwood City, co. surv.

Bids Desired

N. Y., New Yofk — See "Streets and Roads."

N. J., Trenton—Aug. 30, by Twp. Com., W. C. Hart, clk., 3,802 lin.ft. 12- to 22-in. vitr., and 838 lin.ft. 30 and 33 in. rein.-con. sewers, paving, walks, etc., in Davis Tract. C. S. Sincerveaux, 135 East State St., engr.

Pa., South Williamsport (Williamsport P. O.)—Sept. 8, by W. S. Larson, boro secy., Town Hall, 3,000 ft. 15 and 18 in. sewers, etc. in various streets. M. C. Krause, 333 Pine St., engr.

D. C., Wash.—Aug. 30, by Dist. Commissioners, 13,726 lin.ft. 10 in. to 4½ x 4½ ft. sewers in various streets.

La., New Orleans—Oct. 21, by Sewerage & Water Bd., at office A. G. Moffat, secy., 526 Carondelet St., three 4,000 hp. water tube boilers; forced and induced draft fans and air preheaters; also coal pulverizers and burners, etc. G. C. Earl, genl. supt.; adv. E. N.-R. Aug. 25.

Tenn., Chattanooga—Sept. 6, by R. H. Crox, comr. Dept. Streets & Sewers, sanitary sewers and appurtenances in various streets; adv. E. N.-R. Aug. 25.

Tenn., Knoxville — Aug. 29, by Director Pub. Sewers, 12,100 ft. 8- to 15-in. rein.-con. or vitr. clay trunk and lateral sewers in Lincoln Park. W. W. Mynott, City Hall Park, engr.

Ky., Georgetown—Sept. 1, by Town, 6.5 mi. sewers, etc. in various streets. J. Nichols, city clk.; adv. E. N.-R. Aug. 25.

Ky., Louisville—Sept. 9, by Commissioners of Sewage, M. T. Crawford, chn., 5,800 ft. 5¾ x 5½ ft. semi-elliptical rein.-con, sewer, incl. junction chamber, manholes, etc., in Bahannan Ave. Interception, Contr. 34. J. B. F. Breed, Bd. of Trade Bldg., engr.

O., Alliance—Sept. 20, at office F. D. Miller, dir. Pub. Serv., City Hall, Sewage Treatment Works, Contr. "A," Outfall Sewer, Contr. "B," and Sewage Treatment Works and Outfall Sewer, Contr. "C;" adv. E. N.-R. Aug. 25.

O., Columbus—Sept. 6, by W. H. Duffy, dir. Serv., 1,050 ft. 96 in. and 1,367 ft. 78 in. monolithic concrete or brick sewer in Denune Ave., Weber Rd. and Brement St. (North Linden Storm Sewer). $95,000. R. H. Simpson, City Hall, engr.

Ill., Chicago—Sept. 8, by C. W. Laubenheimer, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., North Side Sewage Treatment Works, Div. W. J. W. Crowe, pres.; adv. E. N.-R. Aug. 25.

Ill., Libertyville—Aug. 30, by Bd. Local Impvts., 14,460 ft. 8- to 15-in. sewers, 49 manholes, etc. in Kenloch Park; also 15,150 ft. 6 and 8 in. watermains, 39 hydrants, in Sayre Ave., etc. Kelker, De Leuw & Co., 111 West Washington St., Chicago, engrs.

Ill., Springfield—Sept. 13, by Bd. Trustees Sanitary Dist., City Hall, G. T. Cresse, pres., sewage treatment plant, clarifier mechanisms, sludge pumps, etc., Div. J. Pearse, Greeley & Hansen, 6 North Michigan Ave., Chicago, engrs. Noted May 26.

Mo., Cape Girardeau—Sept. 6, by W. C. Kaempfer, city clk., 6- to 60-in. vitr. clay combined sewers in Dist. 3; adv. E. N.-R. Aug. 25.

Okla., Seminole — Aug. 30, by P. Noe, city clk., sewage disposal plant, Imhoff tank, filter and 18,800 ft. 12- to 15-in. vitr. clay sewers in various streets. $65,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs. Noted June 2.

Calif., Hayward City — City Trustees taking bids 13,800 ft. 21- to 33-in. double strength vitr. or cement pipe, etc., for outfall sewer. $65,000. J. B. Holly, city engr.

Calif., Los Angeles—Bd. Pub. Wks. taking bids constructing 2nd section Santa Monica-Venice outfall sewer. J. D. Davidson, Venice, div. engr.

Calif., Oakland—F. C. Merritt, city clk., taking bids vitr. sewer and rein.-con. culvert with appurtenances in Shafter Ave. between Bway. and Presley Way. To exceed $25,000. G. N. Randle, city engr.

Contracts Awarded

Conn., Bristol—For 8,500 ft. 8 in. drain tile sewers in various streets, to J. De Paola, Rocky Hill, Hartford. Engrs. est. to exceed $25,000.

Conn., Middletown—State, sewage disposal plant at Connecticut State Hospital for Insane, to O'Neil Bros., 22 Preston St., Hartford, $31,550. Engrs. est. $35,000.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, branch sewers in Cherokee and Hawthorne Sts., to A. Bonitatibus, 300 Mt. Pleasant Ave. $4,279 and $1,106 respectively; Ditman St., to Vattieri Pontarella, 300 Mt. Pleasant Ave. $2,482; D St., to F. C. Garofoli Co., 517 West Tioga St., $6,054; Frankford Ave., to McCoal Constr. Co., 5033 Duffield St., $4,959; Garland St., to P. Pinciatti, 4103 Roosevelt Bldg., $6,460; Josephine St., to V. S. Campellone, 812 West Venango St., $1,372; Luzerne St., to A. Mattia, 310 North 65th St., $1,040; Ontario St., to A. Casciato, 1602 Wharton Ave., $899; Wheatscheaf Lane, to J. J. McHugh, 1617 Race St., $782; and Whitaker Ave., to Mundy Paving & Constr. Co., 226 South Warnock St., $1,644. Grand total $31,077.

N. C., Greensboro—See "Streets and Roads."

O., Amherst—Sewage treatment plant, revamping and enlarging present one, 2,200 ft. 4 to 18 in. c.i. and 400 ft. 8- to 12-in. vitr. clay pipe, etc., to W. B. Kester Co., 333 North Firestone Blvd., $69,438. Engrs. est. $67,000.

O., Bay Village—To Kassouff & Co., 2400 Althen Ave., sewers in Saddler Rd. $7,422, Oakland Rd. $4,780, and Upland Rd. $8,265; also to Sprague & Burkhardt, 11811 Browning Ave., Cleveland, Parkside Rd. $18,657. Grand total $39,124.

O., Cleveland—For 500 ft. 12- to 15-in. vitr. tile sewer in West 118th St., to Assad Constr. Co., 3129 Scranton Rd. $1,899, 2,195 ft. 12- to 20-in. Carrington Ave., to E. Cesa, 2462 Baldwin Rd. $9,088, 2,125 ft. 15- to 24-in. Bennington Ave., to Yahya Bros., 3333 Woodbridge Ave. $16,019, 905 ft. 15- to 18-in. Beech Ave., and to E. P. Langenhan Constr. Co., Marshall Bldg. $4,703; 370 ft. 6 ft. 3 in. x 4 in. and 445 ft. 6 ft. rein.-con. in Barberton Creek Culvert, to E. Gedney, 14251 Superior Ave. $22,920, and 2,672 ft. 3 ft. x 4 ft. Creek east of Pearl Rd., to H. J. Scott Constr. Co., Brookpark Rd. $31,585; 530 ft. 3 ft. and 640 ft. 2 ft. 6 in. vitr. block sewer in Berea Rd., to J. Kahill & Jackson Co., Prospect 4th Bldg., $16,089; 3,078 ft. 5 ft. "C" sewer in Brooklawn Ave., to Amata Constr. Co., 12506 Union Ave., $54,636; also 1,500 ft. 20- to 27-in. vitr. clay and 1,200 ft. 3 ft. "C" brick sewer in West 157th St., to Kassouff & Co., 2400 Althen Ave., $26,988; sewer in Big Creek at Bellaire Rd., to Freeman & Jones, 5716 Euclid Ave., $21,461. Grand total $205,388.

O., Cleveland—Sewer in Green Creek, to Stevens Constr. Co., 1105 Chester Ave., $94,870.

Mich., Detroit — Hubell, Hartgering & Roth, engrs., 2640 Buhl Bldg., 9,781 ft. 12- to 18-in. vitr. and 6,116 ft. 4 and 6 in. drain tile sewers in Holy Sepulchre Cemetery, Southfield Twp., to Sager Bros., Birmingham, for Catholic Diocese, Washington Blvd. $28,548. Noted Sept. 23.

Mich., East Lansing—B. A. Faunce, city clk., 7,400 ft. 24 in. to 30 in. concrete interceptor sewer in various streets, to Central Michigan Constr. Co., Lansing, $62,641. Noted July 14.

Ill., Chicago—H. C. Laubenheimer, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., Salt Creek Intercepting Sewer Contr. 1, to States Corp., 38 South Dearborn St., $759,810. Noted June 9.

Wis., Fond du Lac — Sewage disposal plant building, to Immel Constr. Co., Fond du Lac, $107,000; pumps, to Fairbanks Morse & Co., 900 South Wabash Ave., Chicago, Ill., $7,025; c.i. pipe, to U. S. Cast Pipe & Fdry. Co., 122 South Michigan Blvd., Chicago, Ill., $8,500; and meters, to Simplex Valve & Meter Co., 68th and Upland Sts., Phila., Pa., $1,600. Grand total $124,125. Noted June 9.

Wis., Milwaukee — To Zimmermann & Zimmermann, 90th St. and National Ave., West Allis, main sewers in Blue Mound Rd. $5,838, Fairview Ave. $10,720, and 64th St. $6,552; to Wenzel & Henoch, 49th and State Sts., East Ohio Ave., $7,394; to Rousch & Busse, 321 17th Ave., Mt. Vernon Ave. $43,188; and to Clayton Constr. Co., Port Washington and Gruber Aves., St. Paul Ave. $11,926. Grand total $85,618.

Kan., Abilene — Sewer extension and pumping plant, to R. G. Tripp Constr. Co., Herington, $29,579.

Neb., Curtis—D. C. Bancroft, city clk., 20,685 ft. 8- to 12-in. concrete sewers, etc., in various streets, to Chambers Constr. Co., 1st Natl. Bank Bldg., Lincoln, $26,300. Noted July 28.

Ore., Portland—O. Laurgard, city engr., 2.5 mi. vitr. or cement sewers in 55th Ave. and 67th St. S. E., to Western Constr. Co., Ry. Exch. Bldg., $196,983. Engrs. est. $252,467.

Calif., Los Angeles—Sewers in Westgate Ave., Santa Monica Blvd., etc. (Sawtelle Storm Drain System), to Baruch Corp. & R. E. Cooney, Lincoln Bldg., $593,507, storm drain in La Brea Ave. between Hollywood and Sunset Blvds. to M. Simunovich, 3305 West 66th St., approximately $25,552; also sanitary sewers in Westwood Blvd. between Santa Monica and Pico Blvds., to S. C. Kruly. 326 North Hill St., $82,020. Grand total $701,079. Noted June 30.

Calif., Los Angeles—Sewer in Colorado Blvd. between Dahlia Dr. and Maywood Ave., to Radich & Grancich, 2810 Dobinson St., $91,818.

Waste Disposal

Proposed Work

Tex., Lufkin—Voted $20,000 bonds, incinerator.

Contracts Awarded

Wis., Shorewood (Milwaukee P. O.)—Village Bd., 30 ton per day, high temperature destructor Dutch oven type garbage incinerator, to Jones Oderless Garbage Crematory, Syndicate Trust Bldg., St. Louis Mo., $12,369. Noted July 21.

Bridges

Proposed Work

Mass., Cambridge (Boston, P.O.)—Appropriated $95,000, concrete and iron bridge, on 3rd St. Private plans.

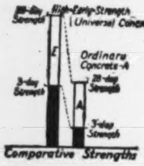
When time is money . . .
use High-Early-Strength concrete
made with standard (not special)
Universal Cement



Comparative Strengths

(Copyright U.P.C.Co.
All rights reserved)

Cold-weather concreting, always practicable, is made more feasible than ever by the use of *High-Early-Strength* Universal Concrete which shortens the period during which protection from freezing is required and makes possible the early removal of forms. For full details send in the accompanying coupon.

Name ....

Address ....

UNIVERSAL PORTLAND CEMENT CO.
210 South La Salle Street, Chicago

Without obligation, please send me detailed information on methods for securing strong concrete in *3 days* with the usual materials.

ENR 8-25-27

Don't Let Winter Months Interfere With Building Plans

Now winter concreting is even more practicable than before. *High-Early-Strength* Universal Concrete (which has a 3-day strength equal to the 28-day strength of ordinary concrete) shortens the period during which protection from freezing is necessary. It hastens removal of forms.

Having a greater *ultimate* strength in addition to a higher *early* strength, it also is *permanently* better and stronger concrete, as shown in the diagram.

Don't postpone your plans because they carry construction into winter! Take advantage of plentiful materials and good labor conditions during cold weather. Then in the spring, when other buildings are being started, your job will be completed or well under way.

For full details on *High-Early-Strength* Universal Concrete, made with the *usual* materials, *usual* labor, *usual* equipment and standard Universal cement, all applied according to fully tested methods, send in the accompanying coupon.

California—State Hy. Comn., Sacramento, 3 rein.-con. bridges across Arcade Creek, at points approximately 3½, 6½ and 7½ mi. east of Ben Alj, incl. one 34 ft. and one 36 ft. span bridge at Station 399-65, one 30 ft. span bridge at Station 559-82, and two 26 ft. span bridge at Station 614-92, all in Sacramento Co., to P. F. Bender, North Sacramento, $33,093. Engrs. est. $34,750.

Calif., Vernon—Concrete arch bridge, on Soto St., to Lynch-Cannon Eng. Co., Chapman Bldg., Los Angeles, $142,176. Noted Aug. 11.

Ontario—Dominion Government, Ottawa, 2 bridges in Welland, to Canadian Bridge Co., Walkerville, $739,691; and new bridge in Port Colborne, to Hamilton Bridge Wks. Ltd., Hamilton, $368,250, all over Welland Canal.

Dams

Proposed Work

Okla., Overbrook—A. Grotto, Ardmore, made preliminary plans impounding reservoir, 200 ft. dam and lake, near here. $75,000. S. Mathews, Ardmore, engr.

Contracts Awarded

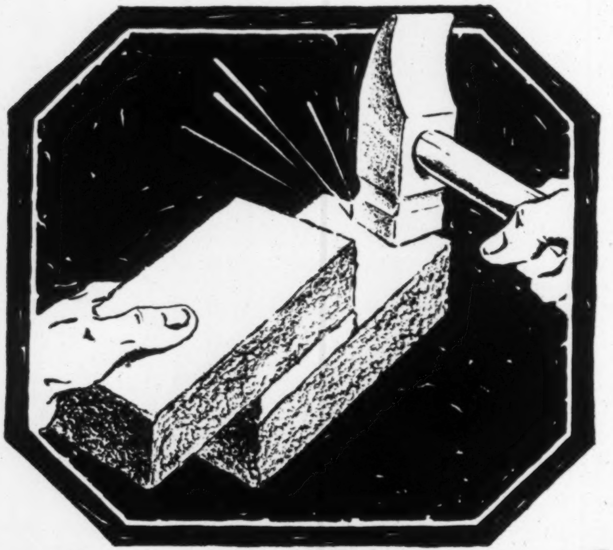
S. C., Columbia—General Gas & Electric Co., W. S. Barstow, pres., 50 Pine St., New York City, N. Y., dam on Saluda River, here, to Arundel Corp., Pier 2, Pratt St., Baltimore, Md., $6,000,000. Noted Mar. 10 under "South Carolina.

Railways

Proposed Work

Mississippi—North Division of Gulf & Ship Island R.R. Co., M. F. Mann, counsel constr., Decatur, plans 25 mi. railroad from main line in Mendenhall to Palahatachie.

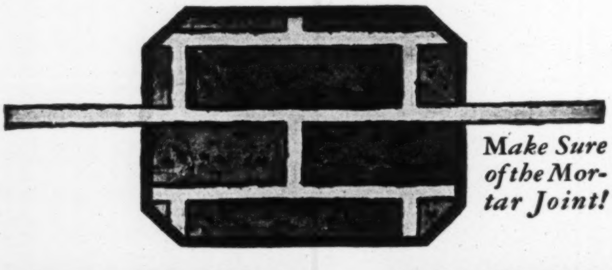
Texas—Texas & Pacific Ry. E. F. Mitchell, ch. engr., Dallas, soon lets contract extending 37 mi. standard gage railroad from Breckenridge to Throckmorton. $600,000.



Tighter Bonds!

BRIXMENT is ground much finer than portland cement. It is more plastic. Mortar made with BRIXMENT works deeper into the pores of the brick and makes a tighter, stronger bond—*a bond that grows harder and stronger than the brick it binds.* Architect's handbook on request. Louisville Cement Company, *Incorporated*; General Offices: Louisville, Kentucky.

MILLS: BRIXMENT, NEW YORK, *and* SPEED, INDIANA



Make Sure of the Mortar Joint!

Use

BRIXMENT

for Mortar

Excavation, Drainage, Irrigation, Levees, River and Harbor

Proposed Work

Mass. Fall River—Plans concrete retaining walls on Summit Ave. $25,000. M. Monks, City Hall, mayor. Engineer not selected.

Ill., Edwardsville — Chouteau Island Drainage & Levee Dist., c/o G. W. Crossman, Edwardsville, judge Madison Co., making preliminary plans repairing levee and drainage ditches in district Mississippi River at Chouteau Island. $26,000.

Ark., Bridge Junction—St. Francis Levee Dist. rejected bids Aug. 1, approximately 700,000 cu.yd. sub-levee work. H. N. Pharr, Bridge Junction, ch. engr. Noted July 28.

Calif., Fresno—Foothill Irrigation Dist. voted $2,300,000 bonds, irrigation works. M. Enderlein, Brix Bldg., engr.

Bids Desired

N. Y., Corona — Lewis Development Co., 47 West 34th St., New York City, taking bids 400,000 cu.yd. earth fill, etc., New Nassau Blvd. adjacent to Flushing River, here. O. E. Anderson, 47 West 34th St., New York City, engr.

N. J., North Bergen (Ind. br. Weehawken)—Sept. 1, by Bd. Educ., Town Hall, Hudson Blvd., excavation for School 9, 3 story and basement, 150 x 175 ft., brick and steel, plain foundation, 38th and 39th Sts. between Hudson Blvd. and Midway Pl. $850,000. F. Hensel, 254 Summit Ave., Union City, archt. W. Weir, 254 Summit Ave., Union City, associated archt. Noted May 26.

Ark., Pine Bluff—Aug. 29, Commissioners Linwood & Auburn Levee Dist., c/o Jones & Hooker, attys., Citizens Natl. Bank Bldg., raising and repairing levees, 100,000 cu.yd. embankment, blanket form, and 2,333 cu.yds. earth excav. in 3 ft. x 6 ft. ditch. E. Hale, Natl. Bldg., engr.

Wash., Kelso—Sept. 6, by Comrs. Cowlitz Co., raising dike in Diking Dist. 2, 86,555 cu.yd. embankment, constructing 2 ditches, 16,000 cu.yd. excav., 730 ft. 30 in. rein.-con. pipe, etc. $43,000. W. A. Middlebrooks, Kelso, engr.

Calif., Byron—Sept. 6, by G. A. Howard, secy. Byron-Bethany Irrigation Dist., 2⅝ mi. concrete canal lining.

Bids Received

N. Y., Syracuse—Bd. Contr. & Supply, City Hall, Aug. 15, covering Harbor Brook between Richmond Ave. and State Fair Blvd., from J. H. Corbett, Jr., S. A. & K. Bldg., $70,998. Noted Aug. 11.

Tex., Houston — Houston Port Comn. making plans constructing Wharves 14 and 15, at Ship Channel, from C. W. Ennis, 1401 Dowling St., $402,000. Engrs. est. $300,000.

Contracts Awarded

N. Y., New York—M. Cosgrove, comr. Docks, Pier A, Battery Pl., bulkhead wall, at East 17th St. and East River, to General Contg. & Eng. Co., 40 Rector St., $15,090. Noted July 28.

Ill., Granite City—Bd. Trustees East Side Levee & Sanitary Dist., Metropolitan Bldg., East St. Louis, straightening and revetting levee on Mississippi River, near here, incl. spreading 26,000 cu.yd. slab, and 700 cu.yd. excav. for footings, also cleaning out Harding Ditch, incl. 63,000 cu.yd. excav., to H. H. Hall, Murphy Bldg., East St. Louis, $69,780 and $31,437 respectively. Noted June 9.

Ia., Jefferson—Auditor Green Co. (Jefferson) improving Joint D. D. 18 and 35, Greene Co. (Jefferson) and Webster Co. (Ft. Dodge), tile work, to Humboldt Gravel Co., Humboldt, $39,722; laying tile, to P. Reiman, Manson, $20,275; and open work, to A. R. Eno, Rockwell City, $5,334. Grand total $65,331. Noted July 14.

California—State Harbor Comn., Sacramento, 600,000 cu.yd. dredging in Islais Creek from 3rd St. to bridge to water front line, to F. C. Franks Dredging Co., 260 California St., San Francisco, at $0.11 per yd.

Streets and Roads

Proposed Work

Mass., Boston—Dept. Pub. Wks. plans laying out and constructing Nashua and Lowell S's. as highway. To exceed $25,000. J. H. Sullivan, comr.

Mass., Brighton (Boston P. O.)—Dept. Pub. Wks., Boston, plans laying out and constructing Brooksdale Rd. and Lane Park as highway, here. $250,000. J. H. Sullivan, comr.

Mass., Cambridge (Boston, P. O.)—Appropriated $25,600 widening 3rd St. Private plans.

N. Y., Brooklyn—J. J. Byrne, pres. Brooklyn Boro, Boro Hall, rejected bids July 27, grading and granite block on 6 in. concrete paving, etc. Columbia St.; grading, sheet asphalt paving Benson, Flatlands, Gravesend and Utica Aves., East 5th, East 98th and Meserole Sts., etc. Noted July 21.

N. Y. Brooklyn—J. J. Byrne, pres. Brooklyn Boro, Boro Hall, rejected bids Aug. 8, sheet asphalt paving Gravesend Ave. Noted July 28.

N. J., Elizabeth—Union Co. plans concrete paving 1.6 mi. Burnet Ave., near here. $222,000. J. L. Bauer, Elizabeth, engr.

Kentucky—State Hy. Dept., Frankfort, **(S.P. means State Project)** rejected bids July 22, improving S.P. 21-B, Campbell Co., S.P. 58½-D Bracken Co., S.P. 21-D Pendleton Co., S.P. 61-C Bath Co., S.P. 32-L Scott Co., and S.P. 299-A Bell Co. E. N. Todd, highway engr.

Ohio — G. F. Schlesinger, dir. Hys. & Pub. Wks., Columbus, cancelled bids to have been opened July 29, brick or concrete paving 3.399 mi. Sect. "F" Mansfield-Cresline Rd., Richland Co.; and waterbound macadam, bituminous macadam or concrete, paving 4.667 mi. Sects. "E" and "I," Clermont Co. Noted July 28.

Ohio — G. F. Schlesinger, dir. Hys. & Pub. Wks., Columbus, received no bids July 29, brick or concrete paving 0.634 mi. Sect. "Kirkersville" Natl. Rd., Licking Co. (Dept. Pub. Wks. furnishing brick, etc., $7,042). Noted July 28.

O., Akron—W. F. Peters, dir. Pub. Serv., postponed curbing, walks and vitr. brick repaving 31,215 sq.yd. East Exchange St. $199,000. Noted July 14.

O., Hamilton—Made plans grading and asphaltic concrete or bituminous macadam paving, etc., 4,500 ft. Grand Blvd., Ludlow, 2nd, Walnut, Francis, Washington and Frankfort Sts., Shuler and Kahn Aves., also Central Ave. from Walnut St. to Walnut Alley, Central Ave. Alley B from Hanover to Washington Sts., and Central Ave. Alley A from Washington St. to Washington Alley. W. Willard, city engr.

Ia., Sioux City—Soon takes bids curbing, paving, etc. 18,000 sq.yd. Clark, 22nd, Lowell, Lafayette, Grand, Dace, Fowler and South Helen Sts. $41,108.

Minn., Fergus Falls—Ottertail Co., plans expending $210,000, improving various roads. O. Skramstad, Fergus Falls, co. engr.

Minn., Minneapolis—Hennepin Co. plans paving 1.5 mi. France Avenue Extension to Minnesota Trunk Highway 5 to Shakopee, $60,000; grading East River Rd. between city limits-junction of St. Paul, Anoka Highway at Coon Creek, $70,000; grading, graveling, etc. 13.65 mi. Monticello Rd. between Jefferson Highway-Crow River Rd. $48,000 and 4.77 mi. Rockford Rd. between Greenwood town and Crow River Rd. $28,500. E. E. Terrell, Court House, co. engr.

Minn., Minneapolis—A. P. Erickson, aud. Hennepin Co., plans grading and graveling Cedar Lake-Wayzata Rd. approximately, $52,000; approximately 6 mi. Lake Independence-Hassan Rd., $34,000; 7.45 mi. Corcoran-Rockford Rd. $32,000; 3.75 mi. Excelsior-Maple Plain Rd., $29,000; 4.2 mi. North Shore Rd., $21,300; 6 mi. Carol Settlement Rd., $21,000; and 11 mi. Dayton-Shakopee Rd., $33,000. E. E. Highways, Albany, constructing 17.78 mi. highways in Dutchess, Montgomery and Sullivan Counties; also reconstructing bridges on highways in Albany, Chenango, Dutchess, Greene, Franklin, Madison, Ontario, Steuben, Ulster, Saratoga, Schenectady and Washington Counties; adv. E. N.-R. Aug. 25.

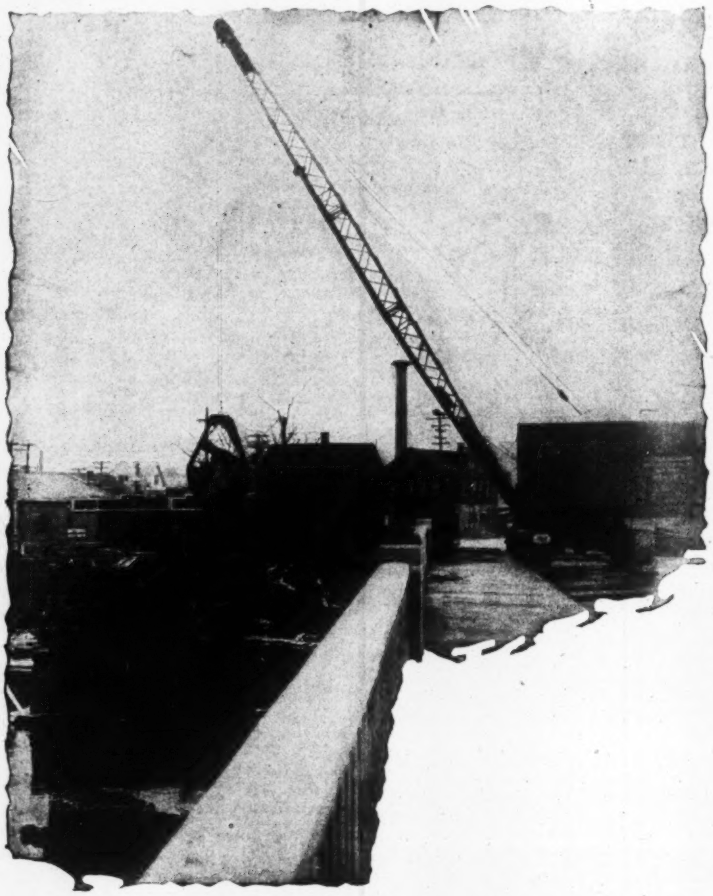
N. Y., Brooklyn—Aug. 31, by J. J. Byrnes, pres. Brooklyn Boro, Boro Hall

Constr. News page 96



MOBILITY

THIS contractor says, "The high speed of the INDUSTRIAL is great for moving from one job to another over city pavements." That's another version of the contractor's problem of getting profit from all jobs—not just high spotting the big ones and losing on smaller work. INDUSTRIALS cut the costs between jobs as well as on material handling.

You, too, can profit by using INDUSTRIALS. Speed, ease of operation and adaptability to all kinds of work are factors in "INDUSTRIAL" material handling that make the day shorter for the operator and profit longer for you.

The limited space forbids telling the many points that have caused hundreds of satisfied users to write us about the performance of their INDUSTRIALS.

Your work is no exception. Let us prove it by putting an INDUSTRIAL to work on one of your tough jobs.

Write for Catalog 120-C for complete mechanical details.

Crawling Tractor Cranes, Shovels, Draglines, Locomotive Cranes, 5 to 75 tons, Wrecking Cranes 75 to 200 tons, Freight Cranes, Transfer Tables, Railsaws, Pile Drivers, Clamshell Buckets, Steam Pile Hammers.

Raising the Flag of Victory

The flag-raising ceremony is an interesting and important function in the building of America's longest railroad tunnel—the new Cascade Tunnel on the Great Northern Railway.

The flag of the Mountain Goat, the symbol of the Great Northern Railway, is awarded to the crew driving the tunnel the farthest during a single month. The award is made each month, but the flag continues to float over the headquarters of the most recent winner until its record is bettered by some other crew.

The spirit of competition that is aroused has resulted in unusual progress and the making of many records.

984 Feet of 10 x 10 Tunnel in 31 Days

This record was made in the East Portal of the Cascade Tunnel in September, 1926; and this was achieved with "Leyner-Ingersoll" R-72 Drifters. An advance of 984 feet of 10 x 10 tunnel through hard rock is a world's record. Greater footage has been made in tunnel driving for a 31-day period, but never before has greater distance been made in a tunnel of this size.

The amount of rock removed from 984 feet of 10 x 10 tunnel is equivalent to 3644 cars of 2-yd. capacity.

The Ingersoll-Rand R-72 Drill was selected because of its power and great drilling speed. Four drills mounted on a horizontal bar put in rounds of 30 holes in record time. Because it could stay on the job shift after shift over long periods the R-72 was made the choice for the EastPortal and Mill Creek sections of this tunnel, where hard rock has generally been encountered.

The work on the Great Northern Tunnel is being done by A. Guthrie & Co., Inc., of St. Paul, Minn., and Portland, Ore.

The R-72 Drifter

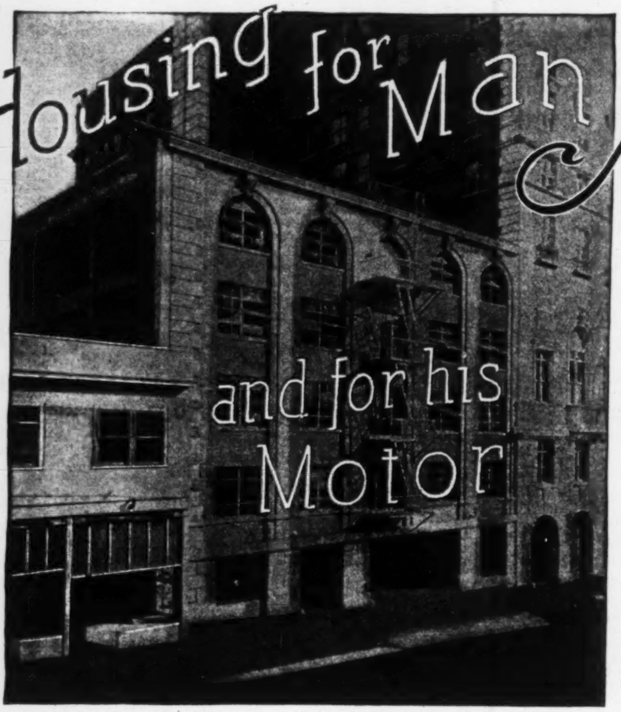
AMERICA NEEDS MORE GARAGES IN HER CITIES



A Club
is like an Apartment House in needing a Garage

Jonathan Club Garage adjoining the Jonathan Club, Los Angeles, Calif.

Capacity 500 cars

Schultze & Weaver Architects

"HOUSING for man and his motor car"—the two are inevitably linked together in thought of modern America, and must be linked together in architectural planning.

d'Humy Motoramps have made it possible, for their employment permits the design of a garage with maximum storage capacity (equal to an elevator equipped structure or better) and practically no operating expense for interfloor travel. Instant egress draws enthusiastic comment from patrons.

America needs more garages—more than any one type of building. Have you a "Ramp" file of garage information? Write us

Removal of the south span of the Sixth Street Bridge, Pittsburgh, Pa. The span has been lowered and placed on pontoons ready for floating down-stream. The removal of this 440-foot truss span intact is an amazing tribute to the flexibility of structural steel.

ABOLISHING SPECIFICATION EVILS

The American Institute of Steel Construction has cleared up a dozen problems which have vexed specification writers for years. The Institute's data on these problems will be found in the Institute's Code of Standard Practice.

The Code segregates steel and iron items in standard classifications. It includes sections fully covering invoices, drawings and specifications, workmanship, instruction and delivery, erection, extra work, proposals and contracts.

The Code supplements the Institute's Standard Specification, which is estimated to be saving more than $30,000,000 a year for owners and taxpayers. Send for the Code and Standard Specification and for the informative fact-book, "STEEL NEVER FAILS." We will mail both free of charge or obligation on your part.

AMERICAN INSTITUTE OF STEEL CONSTRUCTION, INC.

The co-operative non-profit service organization of the structural steel industry of the United States and Canada. Correspondence is invited. Address: 285 Madison Avenue, New York City.

Increase the *Life and Serviceability* of Your Concrete Floors!

GRINDING use will wear down and break the surface of the best concrete floors *unless they are specially hardened.*

In selecting a hardener it is wise to consider its reputation for service. Lapidolith is the original concrete floor hardener. It was widely used for years before the "just as good" imitations appeared on the market. When you treat your floors with Lapidolith you can be certain of satisfactory results.

Not only is the reputation of this product your guarantee of lasting protection, but you have an additional safeguard in the standing of the concern behind it. Any architect or builder knows the worth of Sonneborn products.

Lapidolith can be applied by your own workmen for it goes on the floor like water. If desired, our own service crew will apply it.

This liquid, chemical compound penetrates cement pores, arresting the wear on old floors and preventing any wear on new ones. Makes floors hard for a life-time.

In your own city we can show you floors that are Lapidolith-treated so you can see for yourself how it protects and saves.

The coupon below will bring you literature and samples.

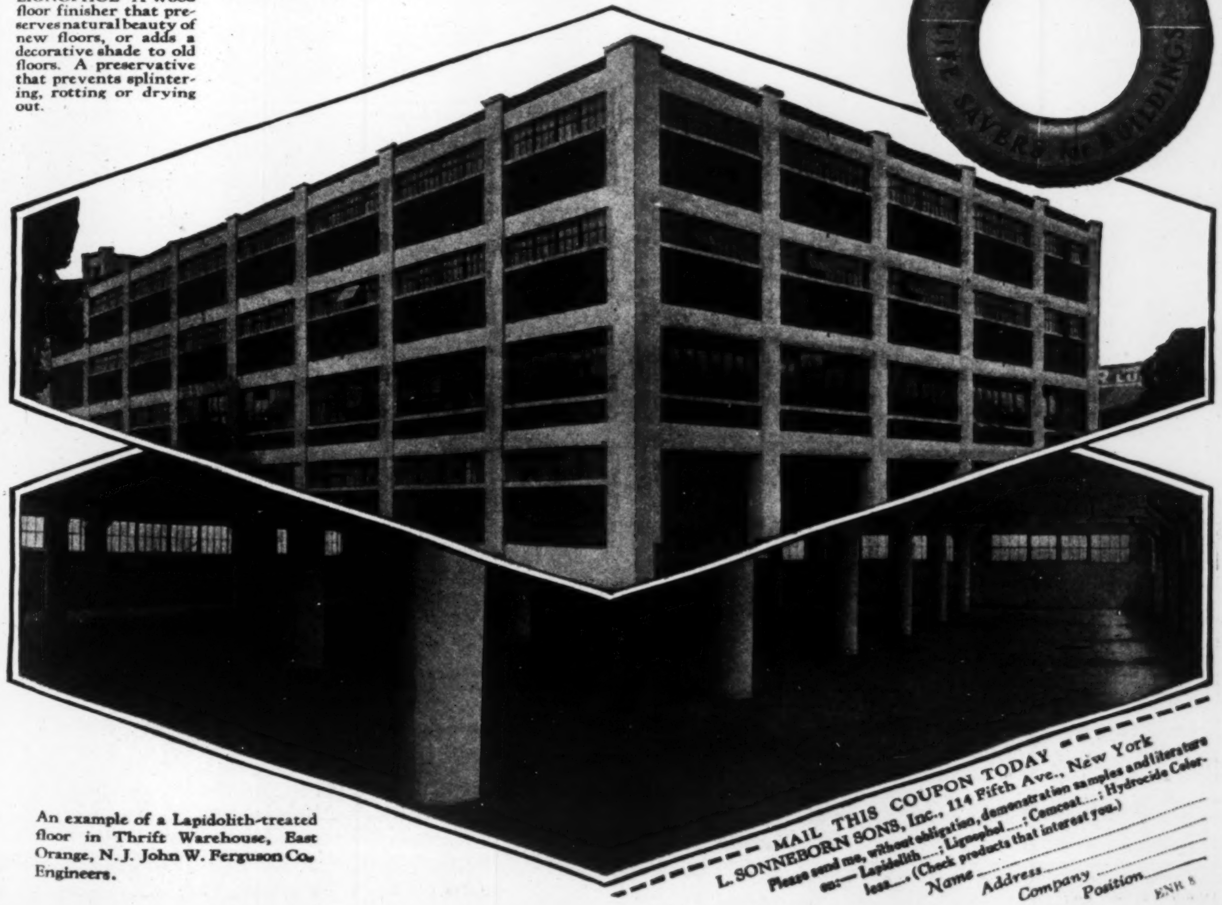
SONNEBORN
LIFE SAVERS for BUILDINGS

Other Sonneborn *Life-Savers* for Buildings

HYDROCIDE—A complete line of water and damp-proofing products for walls, copings, foundations.

LIGNOPHOL—A wood floor finisher that preserves natural beauty of new floors, or adds a decorative shade to old floors. A preservative that prevents splintering, rotting or drying out.

CEMCOAT—A white paint that stays white longer than similar paints. Can be washed over endlessly. Adheres to brick or concrete as easily as to wood.



An example of a Lapidolith-treated floor in Thrift Warehouse, East Orange, N. J. John W. Ferguson Co., Engineers.

518 sq.yd. vitrified block gutter pavement, including cement sand bed, cement grout filler and bituminous expansion joints	2.38	2.65	2.49	2.65
15 sq.yd. adjusting existing asphalt roadway pavement	1.65	1.50	1.50	1.55
60 sq.yd. asphalt adjustment to existing macadam roadway pavement	1.00	1.50	1.50	1.55
15 sq.yd. adjusting existing vitr. block roadway pavement	.50	.50	1.00	.75
15 sq.yd. adjusting existing redressed granite block roadway pavement, including cement grout joint filler	1.00	1.00	1.00	1.00
9,960 lin.ft. filling rail channel with cement mortar	.02	.03	.02	.04
8 No. 2 brick and stone inlets, including 3 ft. 15-in. vitr. clay pipe and excavation	150.00	193.00	170.00	190.00
9 constructing No. 3 brick and stone inlets including 3-ft. 12-in. vitr. clay pipe and excavation	140.00	185.00	160.00	170.00
2 reconstructing No. 2 brick and stone inlets, using new castings, including 3-ft. 15-in. vitr. clay pipe	140.00	185.00	150.00	180.00
65 lin.ft. furnishing and placing 24-in. vitr. clay pipe, including excav. and backfilling	3.15	6.55	4.00	12.00
285 lin.ft. furnishing and placing 15-in. vitr. clay pipe, including excav. and backfilling	1.85	3.80	3.00	3.50
280 lin.ft. furnishing and placing 12-in. vitr. clay pipe, including excav. and backfilling	1.60	3.00	2.60	3.00
515 lin.ft. furnishing and placing 6-in. vitr. clay pipe, including excav. and backfilling	1.35	2.00	.72	1.50
2 conc. water valve boxes (Bureau of Water Standard) including frames and covers	35.00	35.00	35.00	36.00
90 lin.ft. 3-ft. 6-in. diam. brick sewer, including excav. and backfilling	11.00	20.00	22.00	18.00
75 sq.yd. cement conc. footway pavement, including cinder sub-base	2.10	2.75	3.00	2.00
120 lin.ft. 8-in. straight granite curbing	2.70	3.00	4.20	4.00
313 lin.ft. 8-in. curved granite curbing	3.90	4.00	3.80	5.00
13,875 lin.ft. 8-in. straight unarmored 1:2:4 cement conc. curbing	.75	.85	.78	.90
1,185 lin.ft. 8-in. curved unarmored 1:2:4 cement conc. curbing	.95	.95	.88	1.00
55 lin.ft. resetting straight curbing, any kind or size	.40	.50	.50	.50
28 lin.ft. resetting curved curbing, any kind or size	.50	1.00	.50	.60
44,000 hauling old granite block 1 mi. or fractional part thereof, including loading	3.50	3.00	7.00	6.00
44,000 hauling old granite block each additional mile	2.50	2.00	3.00	2.25
2 cu.yd. furnishing and placing brick masonry, including excav	18.00	25.00	20.00	12.00
6 cu.yd. furnishing and placing rubble masonry, including excav	12.00	18.00	10.00	15.00
700 lin.ft. furnishing and laying 12-in. c.i. pipe (Bureau of Water Standard) including excavation and backfilling	3.35	4.60	3.00	3.25
800 lin.ft. furnishing and placing 6-in. c.i. pipe (Bureau of Water Standard) including excavation and backfilling	1.75	2.50	1.80	1.65
2,600 lin.ft. furnishing and placing 8-in. c.i. pipe (Bureau of Water Standard) including excavating and backfilling	2.20	2.50	2.37	2.10
12 ton furnishing and placing specials (Bureau of Water Standard) including excav. and backfilling	160.00	155.00	100.00	155.00
9 8-in. valves (Bureau of Water Standard) including excav. and backfilling	45.00	40.00	70.00	40.00
1 12-in. valve (Bureau of Water Standard) including excav. and backfilling	75.00	70.00	100.00	70.00
10 conc. water valve boxes (Bureau of Water Standard) including frames and covers	35.00	35.00	35.00	36.00
Totals	$246.354	$247.254	$252,658	$256,668

Engineering News-Record, issue of August 25, 1927

Itemized building costs on a club house in Ohio are presented on page 227 of the Business Side of Construction, in this issue. If you have some costs that would be interesting to other engineers, please send them to the Editor.

Wood blocks in Boston at $62.81 per M. for 45 M.

$6 *per sq.yd for asphalt* resurfacing 27,980 sq.yd in Syracuse, N. Y.

$4.80 *per yd. for granite* blocks on concrete repaving for 1709x69 ft. of Broad St., Philadelphia.

Deep wells in Bedford, Mass., at $6 per lin.ft. for depth exceeding 300 ft. but not 450 ft.; for 300 ft. well, $7.

$17.50 *per lin.ft. tunnel* 2,000x8x10 ft., in Vancouver.

Pipe line in Texas, 150 mi. of 15-in. main is estimated to cost $12,000.

CONSTRUCTION NEWS

Some of the Week's Large Projects

Among the announcements for the current week are the following:

Proposed Work

Tunnel, Michigan and Ontario, Detroit River Subways Co., making plans, $10,000,000.

Hotel and store, Chicago, Ill., Allied Building Corp., having plans prepared and takes bids about Sept. 23, $1,000,000.

Office, Birmingham, Mich., J. Couzens, having sketches made, $1,000,000.

Power plant, Rochester, N. Y., Rochester Lake Ontario Water Co., having plans prepared, $1,000,000.

Church, Wash., D. C., Allen & Collins, archts., takes bids about Sept. 1, for Universalist Nat'l Memorial Church, $1,000,000.

Factory, Mississippi and Tennessee, Kraft Cheese Co., plans, $1,000,000.

Bids Desired

Y.M.C.A., Philadelphia, Pa., Sept. 12, by L. E. Jallade, archt., $1,500,00.

Office, Philadelphia, Pa., Sept. 9, by R. B. Bencker, archt., for N. W. Ayer & Son, $1,000,000.

Contracts Awarded

Factory, Old Hickory, Tenn., Dupont Rayon Co., will build by day labor, $4,000,000.

Mercantile and office, San Antonio, Tex., Smith Bros. Properties, Inc., to McKenzie Constr. Co., $1,500,000.

Club, Washington, D. C., Queensbury Building, to Miller Engr. Co., archts., est., $1,250,000.

News of the Week

Waterworks

Proposed Work

N. C., Raleigh—Making plans concrete settling basin. $50,000. C. C. Page, city comr.

N. C., Wilson—See "Sewers."

Miss., Magee—Making preliminary plans complete waterworks and distribution system, also sewers in various streets. $75,000. M. L. Culley, 1st Natl. Bank Bldg., Jackson, engr.

O., Barberton—Bd. Control takes bids about Oct. 17, mains in various streets. $75,000.

O., Columbus—B. A. Young, asst. clk. Bd. Comrs. Franklin Co. soon takes bids 7,845 ft. 8 in. and 860 ft. 6 in. c.i. mains, etc., in Sewer Dist. Marion 1, Impvt. 90, Marion Twp. $15,000. E. G. Bradbury, Court House Annex, co. engr.

Ill., Columbia — Making preliminary plans complete waterworks and distribution system. $75,000. W. A. Fuller Co., 1912 Railway Exch. Bldg., St. Louis, Mo. engrs.

Ill., Waverly—Making preliminary plans complete waterworks and distribution system. $50,000. W. A. Fuller Co., 1912 Railway Exch. Bldg., St. Louis, Mo., engrs.

S. D., Huron—City, M. F. Walt, aud., making plans filtration plant addition, incl. equipment. $75,000. L. P. Wolff, 900 Globe Bldg., St.. Paul, Minn., engr.

Tex., Devine—City plans 50,000 gal. elevated tank and 100,000 gal. earth reservoir. $50,000.

Okla., Chickasha—Voted $90,000 bonds, extending mains in various streets. R. O. Bradley, Chickasha engr. Noted Feb. 17.

Okla., Fairfax—Made preliminary plans extending 6,500 lin.ft. 6 and 8 in. mains in Donelson Addition. $15,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Okla., Fairview — Voted $38,500 bonds, 20,700 ft. 6 and 8 in. mains in various streets. J. Francis, Fairview, engr.

Okla., Wewoka—Voted $125,000 bonds, new gravity type filter plant, 3 motor driven centrifugal pumps, main extensions, etc. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Calif., Santa Ana—E. L. Vegely, city clk., making plans mains in South Bway., South Main and South Burch Sts., etc. $25,000 or more.

Bids Desired

R. I., Providence—Sept. 12, by Bd. Contr. & Supply, City Hall, pumping station, on Bath St. $30,000. Thomas J. Hill Pierce, City Hall, engr.

N. Y., New York — Sept. 6, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Beach, Cromwell, Fowler, Grosvenor, Harper, Harrods Sts., etc., Bronx Boro.

Pa., Allentown—Sept. 27, by M. W. Gross, mayor, 301 Central Fire & Police Station, low lift pumping equipment and piping for Dept. Parks & Pub. Property, Bureau of Water. Morris Knowles, Inc., 507 Westinghouse Bldg., Pittsburgh, engrs.; adv. E. N.-R. Sept. 1.

S. C., Lancaster — Sept. 27, by Comrs. Pub. Wks., complete filter plant, 1 m.g.p.d. 9,700 lin.ft. 6- to 12-in. c.i. pipe, one 1,000 g.p.m. electrically driven centrifugal pump, also 150,000 or 200,000 gal. steel tank and tower. H. S. Jaudon Eng. Co., Lancaster, engrs.

La., Monroe—Sept. 21, by City Comrs., Town Hall, improving waterworks, Contrs. 1 to 7 (inclusive). Burns & McDonnell Eng. Co., Interstate Bldg., Kansas City, Mo., engrs.; adv. E. N.-R. Sept. 1. Noted Aug. 11.

La., Shreveport—Taking bids probably in October, sewers draining into Red River, pumping station, also water mains in west side $200,000. Private plants. Noted Mar. 24.

These reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.

Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.

O., Cleveland—Sept. 2, by City, mains in West 12th St., Irving Pl., South Hills Dr., Flamingo, Garwood, Mayview, Plymouth and Redding Aves. To exceed $25,000. R. Hoffman, City Hall, engr.

Ill., Niles Center — Sept. 6, by Village, Laramie-Brummel Water Mains, incl. 6- to 12-in. c.i. pipe, etc. $26,700. Consoer, Older & Quinlan, 140 South Dearborn St., Chicago, engrs.

Neb., Comstock—Sept. 8, by C. D. Wardrobe, city clk., 40,000 or 50,000 gal. tank on 100 ft. to balcony tower, erected on foundations; 11,184 ft. 4- to 8-in. Class B, McWane open bell, De Lavaud Class 120, or Mono Class 150 c.i. pipe; approximately 4.5 tons c.i. specials f.o.b. Comstock, 23 hydrants, etc. Henningson Eng. Co., Natl. Bldg., Omaha, engrs.

Neb., Union—Sept. 12, by C. B. Smith, village clk., 40,000 or 50,000 gal. tank on 90 ft. tower, 6,864 ft. 4- to 8-in. Class B, DeLavaud Class 150 or Mono Class 150 c.i. pipe, approximately 2.5 tons c.i. specials f.o.b. Union, one 8 in. or 10 in. tubular well 125 ft. deep, 12 ft. strainer, etc. To exceed $15,000. Henningson Eng. Co., Natl. Bank Bldg., Omaha, engrs. Noted June 30.

B. C., Vancouver — See "Contracts Awarded."

Contracts Awarded

Conn., Hartford—Bd. City Water Comrs., Municipal Bldg., laying 3 mi. 30 in. mains in various streets, to Lock Joint Pipe Co., Ampere, N. J., $153,375; c.i. pipe, to R. D. Wood & Co., 514 Walnut St., Phila., Pa., $6,280; c.i. pipe, to Amer. Cast Iron Pipe Co., Acipico St., Birmingham, Ala., $5,686; valves, to Ludlow Valve Mfg. Co., Troy, N. Y., $2,599; special castings, to United Cast Iron and Fdry. Co., $4,244; also wrought iron pipe, to Cohoes Rolling Mill Co., Cohoes, N. Y., $2,338. Grand total $174,522. Noted July 28.

N. Y., Poughkeepsie — Bd. Pub. Wks., Eastman Park Mansion, rein.-con. structure, and placing pipe, valves, strainers, etc., for additional scrubbers, Poughkeepsie Waterworks, to W. W. Kingston, 1 Washington St. Noted July 21.

N. J., Belmar—Mains in Rhode Island Point Sect., to W. G. Fritz Co., 69 Main St., West Orange, $23,630. Noted Aug. 18.

O., Dayton—Montgomery Co., 25,270 ft. 4- to 12-in. c.i. mains, etc. in H. McKinley Water Supply System, to F. Krumholtz, 1020 Superior Ave., $52,816.

Ill., Monmouth—City, 120 x 70 x 12 ft. rein.-con. storage reservoir, to H. C. Holmes, Macomb, $19,967. Engrs. est. $20,000. Noted July 28.

Ill., Niles Center—Waterworks improvements, incl. hydrants, valves, basins, 6 and 8 in. c.i. pipe, etc., in various streets, to N. Santucci, Niles Center, $36,698; and 22,500 ft. 1 in. water service pipe, etc., to O'Brien Bros., 152 North Central Ave., Chicago, $21,813.

Ill., Villa Park—Waterworks supply, to S. B. Geiger & Co., 1435 Old Colony Bldg., Chicago, $80,000.

Wis., Waunakee—M. Helt, city clk., waterworks, to Camden Constr. Co., Minneapolis, Minn., $18,509; and drilling 12 in. well, to Gray Well Drilling Co. 209 3rd St. Milwaukee. Engrs. est. $20,000.

Kan., Topeka—Extending 43,082 ft. 4- to 10-in. c.i. mains, etc. in various streets, to C. B. Ramsey, 931 North Main St., $73,030.

Ark., Springdale—For 14,000 ft. 8 in. McWane pre-caulked pipe, and 1 m.g. filtration plant, to Rowan & Rickard, Harrison, at $0.34½ per ft. and $11,595 respectively; two 350 g.p.m. low stage pumps with motors, one 350 g.p.m. turbine pump and 45 h.p. electric motor, to Fairbanks-Morse & Co., 900 South Wabash Ave., Chicago, Ill. $1,783; also filter plant equipment, to Roberts Filter Co., Darby, Pa., $7,750. Noted Aug. 11.

Tex., Odessa — Improving waterworks, 100,000 gal. tank and tower, to Chicago Bridge & Iron Wks., and 40,000 ft. c.i. pipe, to Central Fdry. Co., both Praetorian Bldg., Dallas.

Wash., Chehalis—For 5 m.g. concrete reservoir, to Graham Bros. & Medley, Chehalis, $65,001. Engrs. est. $75,000. Noted May 19.

B. C., Vancouver—Greater Vancouver Water Dist. Bd., will excavate (1st unit) 30,000 cu.yd. for storage reservoir, at Van-

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Even under the most rigorous conditions of service Leadite proves its efficiency

—where a line is subjected to constant vibration the joints must be tight and remain tight

In installing the 12" bell and spigot bridge line illustrated here the element of constant vibration was a serious consideration.

Leadite was used for jointing and has given perfect satisfaction throughout the 5½ years since this Bridge Line was installed—working pressure approximately 105 lbs. per sq. in.

This water department has laid many miles of cast iron water mains with Leadite joints—sizes 6" to 30"—pressures ranging from 40 pounds to 170 pounds per square inch. They say their experience with Leadite has been extremely satisfactory. Their experience with Leadite extends over 20 years.

The ease with which Leadite can be used is another consideration with waterworks engineers in making their specifications for unusual and difficult installations, as well as for general work.

The speed of jointing with Leadite is of great importance to Contractors in helping them complete their work promptly. From experience they know how much time they can save by using Leadite.

Everywhere waterworks engineers specify and use Leadite for the satisfaction it gives, its safety, security and economy.

Twelve-inch c. i. bell and spigot water main —Bridge Line—over 500 feet long—subject to severe vibration—carrying approximately 105 lbs. pressure per square inch.

couver Heights, by day labor. $125,000. Total $650,000. E. A. Cleveland, 500 Beatty St., engr.

Sewers

Proposed Work

Pa., Laurelton—Laurelton State Village plans sewage disposal plant. G. S. Idell, 1510 Chestnut St., Phila., engr.

N. C., Wilson—Plans approximately 24,000 ft. sewer and 16,000 ft. waterworks extensions. R. D. Gladding, Wilson, engr.

Miss., Magee—See "Waterworks."

O., Kenmore — Bd. Control takes bids about Sept. 17, approximately 36 in. sewers in Foust Rd., 4th St., 16th Ave. and Kenmore Blvd.

O., Marion—Bd. Control plans extending and constructing new sewers in various streets. $800,000.

O., New Boston (sta. Portsmouth)—Made plans 4,550 ft. 18 and 20 in. vitr. sewer in North Moreland St., $27,000; also main sewer outlet, 1,035 ft. 66 in. double ring brick pipe, $39,000. J. D. Wilson, 1417 Grandview Ave., Portsmouth, engr.

Ill., Columbia — Making preliminary plans complete sewerage system, incl. sewage disposal plant. $75,000. W. A. Fuller Co., 1912 Railway Exch. Bldg., St. Louis, Mo., engrs.

Ill., Waverly—Making preliminary plans complete sanitary sewerage system, incl. disposal plant. $50,000. W. A. Fuller Co., 1912 Railway Exch. Bldg., St. Louis, Mo., engrs.

Wis., Milwaukee—Metropolitan Sewerage Comn., 508 Market St., made plans 5,286 ft. 15 and 18 in. vitr. clay main sewer through Washington Highlands. $50,000. R. Cramer, 508 Market St., ch. engr.

Minn., Perham—A. W. Lotterer, city clk., making plans combined sewerage system. $80,000. Druar & Milinowski, 500 Globe Bldg., St. Paul, engrs.

Neb., Fremont—Soon. takes bids storm sewers, etc. in various streets. $200,000. Burns & McDonnell Eng. Co., 401 Interstate Bldg., Kansas City, Mo., engrs. Noted June 23.

Neb., Prague—Making preliminary plans 8- to 12-in. sewers in various streets, and sewage disposal plant. $25,000. Henningsom Eng. Co., Natl. Bank Bldg., Omaha, engrs.

Okla., Wewoka — Voted $60,000 bonds, sewers in various streets. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Okla., Shawnee—Made preliminary plans 16,000 ft. 8- to 12-in. vitr. clay sewers in Belmont Addition. $36,000. F. D. Brown, Shawnee, engr.

Calif., San Mateo—Made plans 11,960 ft. 4- to 10-in. vitr. sewer in portions South B St. ,Tulip Ave., etc. O. F. Weissgerber, city engr.

Bids Desired

Mass., Salem—Sept. 7, by South Essex Sewerage Bd. Fort Ave., Sect. 7 of Trunk Sewer 4,150 lin.ft., 30 x 42 and 33 x 34 in. concrete sewer, in Beverly and Danvers. Private plans.

Mass., Wellesley—Taking bids sewers in various streets. $60,000 appropriated. Private plans. Noted Mar. 31.

Mass., West Roxbury (br. Boston) — Sept. 2, by Dept. Pub. Wks., Boston, sewerage works in Nikisch Ave., Stimson, Grove and Birchwood Sts., here. $25,000. J. H. Sullivan, comr.

N. Y., Long Island City—Sept. 6, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., sewer in Roosevelt Ave. from 79th (22nd) to 84th (27th) Sts.

N. J., Hammonton—Sept. 12, at Town Hall, W. R. Seely, clk., approximately 2,831 lin.ft. storm sewer, etc. in various streets. J. A. Baker, engr.; adv. E. N.-R. Sept. 1.

Ia., Marshalltown—Sept. 7, by A. McMahon, city clk., City Hall, 16,524 ft. 15- to 48-ft. vitr. clay, concrete or segmental block sewers in Dists. 1, 2, 7, 8, 9 and 10. Noted Aug. 25.

Mo., St. Louis—Sept. 20, by Bd. Pub. Serv., 208 City Hall, constructing Highland Joint Sewer, 5,970 ft. 12- to 66-in. vitr. clay, brick or segmental block pipe, etc., $66,000; and Arloe Sewer Dist. 5, 3,060 ft. 8- to 42-in. pipe, $9,200. W. W. Horner, 300 City Hall, engr.

Ark., Conway—Sept. 8, by W. D. Cole, chn. comn., 17,180 ft. 8- to 12-in. vitr. clay and 18,343 ft. 12- to 18-in. c.i. sewers, etc. in Impvt. Dist. 2. W. L. Winters, Fort Smith, engr. Noted July 14.

Calif., Fullerton—F. C. Hezmalhalch, city clk., taking bids 2 mi. 12 in. vitr. or concrete sewer in West Commonwealth Ave., etc. C. M. Thorpe, city engr.

Ont., Stamford—Sept. 2, by M. F. Ker, engr., Niagara Falls, 4 mi. 9- to 33-in. vitr. tile and concrete sewers in various streets, here. $100,000.

Bids Received

Mich., Detroit—Dept. Pub. Wks., Fisher Ave. Storm Sewer in Fisher Ave. and Memorial Park, from Lennane & McIlvenna, 7777 West Chicago Blvd., $579,979; and Connors-State Fair Arm, Connors Creek Sewer, from Central Contg. & Eng. Co., 17576 Wyoming Ave., $195,327.

Contracts Awarded

Conn., Mansfield — Trustees Mansfield Training School, sewers, sludge and filter beds, also concrete tank, to L. Suzio Constr. Co., State and Brooks Sts., Meriden, for State. $55,529. Noted July 28.

N. Y., Long Island City—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., regulator chamber, incl. automatic regulator, repairing and cleaning overflow chamber at Rust St. and Clark Ave., etc., to Moore Eng. & Contg. Co., 1 Bridge Plaza North, $11,660. Noted July 21.

N. Y., Rye — Westchester Co. Sanitary Sewer Comn., 192 Martine Ave., White Plains, contracts for construction Sects. A, B, C, D and E, comprising Blind Brook Sewer Project, have been signed as follows: Sect. A, to A. Di Marco, Park Ave., White Plains, $30,437; Sect. B, to Merritt, Chapman & Scott, 17 Battery Pl., New York City, $273,000; Sect. C, to Shevlin Eng. Co., Maspeth; and Sects. D and E, to H. L. O'Dell, Rye, $4,786 and $726 respectively. Noted July 21.

N. J., Bridgeton—C. P. Corey, city clk., City Hall, new sewage disposal plant, here, to Mazzolan & Marano, 739 South 7th St., Phila., Pa., $280,000. Noted July 2.

N. J., Teaneck (mail West Englewood) —Tw~ Comn., Municipal Bldg., Teaneck Rd., 10,000 ft. 8- to 12-in. sewers in various streets, Contr. Y, to J. Cestone, Montclair. Noted July 21.

Md., Baltimore—Bd. Awards, 2,460 ft. 12 ft. 1 in. x 15 ft. 8 in. brick and concrete arch drain, 4,068 ft. 18 and 21 in. vitr. sewer, 4,060 lin.ft. 4- to 8-in. underdrain, etc., in Sewer Dists. 3 and 48, Contr. 209, to Catalano & Percora, Oldtown Natl. Bank Bldg., $135,669.

O., Columbus—O. Moore, clk. Franklin Co., Minerva Lake Sanitary Sewerage Disposal Plant, 27,590 ft. 8- to 20-in. vitr. clay pipe, etc., in Mifflin Twp., to H. B. Watters & Co., 180 North High St., $57,791. Noted July 21.

O., Dayton — Montgomery Co., Court House, 21,893 lin.ft. 8 and 10 in. vitr. sewers, etc. in McKinley Sanitary Sewer Dist. Sect. B, to V. Smith, 209 South Perry St., Dayton, $44,352.

O., Parma (br. Cleveland) — Sewers in Group "J," to Langenhan Constr. Co., Marshall Bldg., Cleveland, $44,200.

Ill., Niles Center—For 12 in. sewers in various streets, to N. Santucci, Niles Center, $17,195; and 17,730 ft. 8 in. vitr. sewers in various streets, to P. J. Collins, Chicago, $19,525.

Wis., Milwaukee—Sanitary sewers in Ames Terrace, Silver Spring Rd., Como Pl., Ralph Ave., etc., to H. T. Teget, Webster City, Ia.

Wis., Waunakee—Sewerage system, to J. D. Bernadi, Sault Sainte Marie, Mich., $24,710. Engrs. est. $25,000.

Mo., Springfield—Sewer in Dist. 12, Sect. 6, to R. L. Langston, R.R. 3, $23,112.

Ark., Pine Bluff — Complete sewerage system, in Sewer & Water Dist. 2, to J. R. McNulty, 2121 Cherry St., $29,500. Noted June 23.

Tex., Galveston—Main trunk sewer, etc., in 47th St. between Avenues U and J, and 46th St. between Avenue J and outfall at Slip C, to W. A. Kelso, 2215½ B St., $74,486. Noted Aug. 25.

Okla., Oklahoma City—For 14,000 ft. 8 and 10 in. lateral sewers in Sunrise Addition, to H. M. House, 1206 West Main St., $24,945. Engrs. est. $27,000.

Calif., Los Angeles — Los Angeles Co. Sanitation Dist. 1, for Mt. View-Belle View Vernon trunk sewer, to Bebek & Brkich, 425 West 78th St., $45,405; also Bullis Road-Temple St. trunk sewer, to Dalmatin & Nikcevich, 1105 West E St., Wilmington, $36,275.

Calif., Los Angeles—Main sewer, house connections, etc. in Fox Hills Dr. between Missouri and Lauriston Aves., to J. Chutukk Wilcox Bldg., $40,845; also sanitary sewer in Keswick Ave. between Fox Hill Dr. and Beverly Glen Blvd., to L. Miletich, 610 West 54th St., $37,225.

Calif., Redwood City — Vitr. sewers in southern section city, to R. B. McNair, 3819 Rhoda Ave., Oakland, $69,425.

Calif., Sacramento—Sewerage system in Sect. 2-A, to J. E. Tempest, 1450 44th St., $154,533; also in Sect. 2-B, to Pollock & Gould, Forum Bldg., $154,383.

Calif., Los Angeles—Sewer in Indiana St. between 1st St. and Mines Ave., to P. J. Akmadzich, 320 Wilcox Bldg., $221,178 engrs. est. $301,427; also in 105th Ave. between Figueroa and Vermont Aves., to J. Chutuk, 343 Wilcox Bldg., $43,400 engrs. est. $52,241. Noted May 19.

Bridges

Proposed Work

Miss., Aberdeen—Monroe Co. plans rein.-con. and steel bridge across Tombigbee River, $60,000.

O., Canton—Stark Co. plans new concrete bridge, 12th St. N.W. $50,000. A. M. Wise, Canton, engr.

O., Dresden—Muskingum Co. (Zanesville) —plans 150 ft. steel and concrete bridge over Wakatonik Creek, here. $35,000. A. Connor, Zanesville, engr. State appropriates toward cost.

Oklahoma—State Hy. Dept., Oklahoma City, making preliminary plans 1 span 116 ft. steel truss bridge on piers over Cooper Creek, near Stillwater, Payne Co., $45,000; and 1 span 96 ft. steel truss bridge on piers over Brush Creek near Yale, Payne Co., $35,000, both on Highway 1. C. R. Mandigo, Capitol Bldg., Oklahoma City, engr.

Okla., Hinton—Caddo Co. making preliminary plans 1 span 80 ft. steel truss bridge on piers over Piney Creek, near here. $35,000. C. Riggins, Anadarko, engr.

Okla., Tulsa—Making preliminary plans 1 span 88 ft. viaduct, over Midland Valley R.R. tracks, on Woodward Blvd. in South Tulsa. $42,000. C. Schultz, City Hall, engr.

Calif., Stockton—San Joaquin Co. making plans 750 ft. steel and rein.-con. bridge, 20 ft. roadway. $35,000. F. E. Smith, Stockton, co. surv.

Ont., Walkerville—Making plans new steel and concrete bridge over railway tracks, on Sandwich St. $100,000. H. W. Patterson, Imperial Bldg., engr.

Bids Desired

Rhode Island—Sept. 14, at office Washington Bridge Comn., A. L. Atwood, chn., Providence, Washington Bridge over Seekonk River between Providence and East Providence; adv. E. N.-R. Sept. 1.

N. Y., St. George — Sept. 7, by J. A. Lynch, pres. Richmond Boro, Boro Hall, constructing bridge at Arthur Kill Rd. south of South Richmond Valley Rd.

Maryland — Sept. 6, by State Roads Comn., Baltimore, rein.-con. arch bridge over Morgan Run, Contr. C1-71, Carroll Co., and one over Little Antieta Creek, Contr. W-50, Washington Co.; 3 bridges over Georges Creek, Contrs. A-49, A-50 and A-51, all in Allegany Co. J. N. Mackall, chn.; adv. E. N.-R. Sept. 1.

Fla., Sanford—See "Streets and Roads."

Ohio—Sept. 9, by G. F. Schlesinger, dir. Highways & Pub. Wks., Columbus, bridges in Adams, Allen, Ashland, Champaign, Columbiana, Hamilton,Muskingun, and Washington Counties.

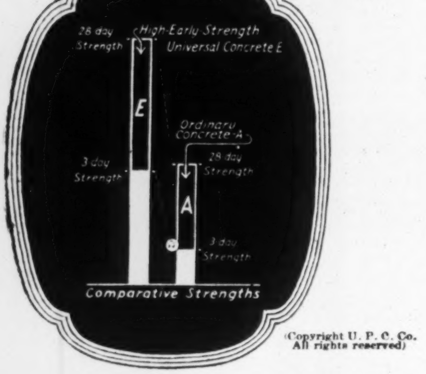
When a Thousand Motorists Say "HURRY"



(Copyright U. P. C. Co. All rights reserved)

WHEN you realize that repaving of a road cannot be delayed

—and you have visions of a thousand motorists a day inconvenienced by the detour

—and you wonder how you can answer their "Hurry" call without sacrificing the quality of the pavement

—use *High-Early-Strength Universal Concrete!*

Made with the *usual* materials, *usual* labor, *usual* equipment and standard Universal cement, this concrete has a *3-day* strength equal to the *28-day* strength of ordinary concrete.

Having a higher *ultimate* as well as a higher *early* strength, it also is *permanently* better and stronger than ordinary concrete as shown in the diagram.

For full details, send in the accompanying coupon.

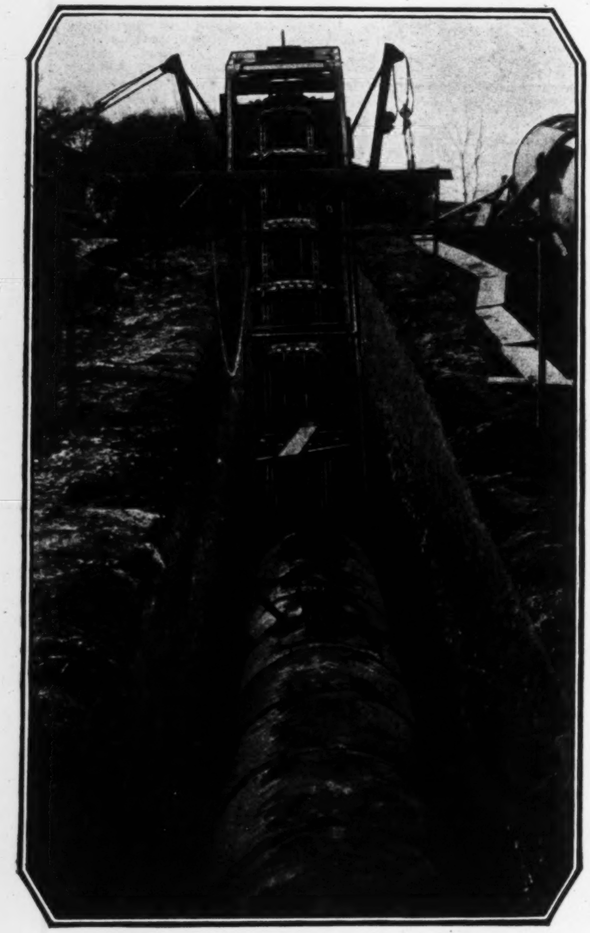
Brooklyn Boro, Boro Hall, grading, sidewalks, etc., parking space at Dreamland, Coney Island, Avenue U, Powell St. and Benson Ave.; restoring and repaving where directed in various streets; grading and granite block repaving Atlantic Ave.; grading and sheet asphalt on concrete paving Bulwer and Hinckley Pls., Farragut, Glenwood, and Rutland Rds., Avenues S, O and M, Flatlands, Gravesend, Lefferts, Narrows, Utica, and 6th Aves., East 5th, East 8th, East 98th, Junius, North 15th, West 12th Sts., etc.

INDEPENDENT

Reinforced Concrete Pipe

Builds PERMANENT Sewers at Low Cost



Laying an INDEPENDENT 42-inch concrete sewer at Niles, Ill. Note how closely pipe-laying follows the excavating.

SEWERS built of INDEPENDENT Reinforced Concrete Pipe are unusually economical to construct, and remarkably permanent in service.

ECONOMY begins in the special local plant where the pipe units are built. The work is done at lowest cost, by advanced methods and equipment, under expert supervision. Economy continues in laying the sewer, where the exclusive "Recessed" joint facilitates placing the pipe and sealing the joints. And the final economy is a sewer system that will serve efficiently for generations.

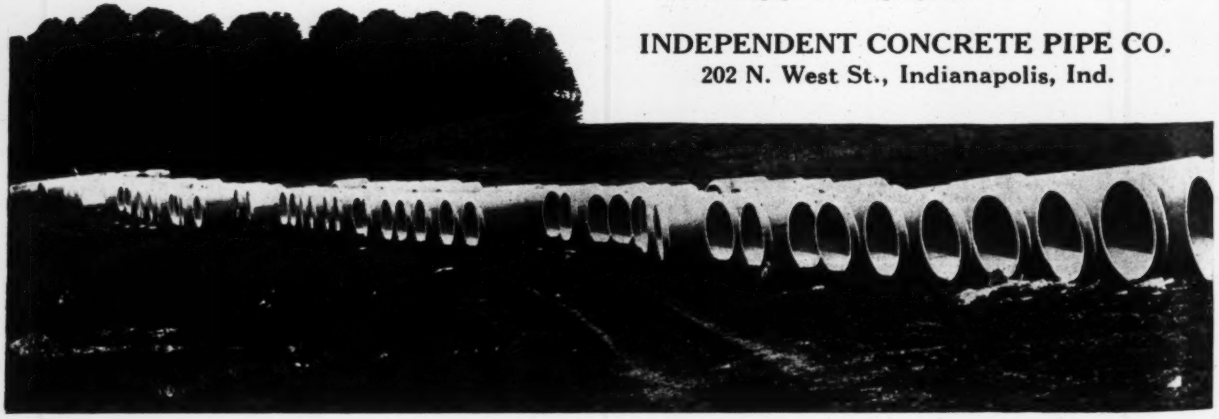
PERMANENCE is proved by the long and successful record of concrete pipe sewers—some of which date back to 1850. And "INDEPENDENT" means concrete pipe at its best—backed by America's largest exclusive manufacturer of reinforced concrete sewer pipe.

Hundreds of miles of INDEPENDENT Concrete Pipe Sewers are giving good service, in cities and towns throughout the country. The strength of this pipe meets all load requirements and its durability resists all ordinary causes of deterioration.

Send for engineering data, or estimates on your concrete pipe sewer projects.

INDEPENDENT CONCRETE PIPE CO.
202 N. West St., Indianapolis, Ind.

INDEPENDENT 48-inch Concrete Pipe delivered along the line of a trunk sewer at South Bend, Ind.



Streets and Roads (Continued)

N. Y., Long Island City—Sept. 6, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., grading, curbing, sidewalks, etc., in Stanley Ave. from Blackstone to Connecticut Aves.

N. Y., New York—Sept. 9, by B. M. Patten, comr. Pub. Markets, Municipal Bldg., grading, paving, etc., Bronx Municipal Terminal Market, Exterior and 151st Sts., Bronx Boro.

N. Y., Ridgewood (sta. Brooklyn)—Sept. 6, by W. R. Herrick, pres. Park Bd. Dept. Parks, Arsenal Bldg., Central Park, New York City, improving Anawanda Park, here.

New Jersey — Sept. 19, by State Hy. Comn., Trenton, grading and 8 in. double line rein.-con. paving 11,156 sq.yd. Route 18 (South) and Route 20, Malaga Relocation and grade crossing elimination, Gloucester Co. A. L. Grover, ch. clk.; adv. E. N.-R. Sept. 1.

Pa., Phila.—Sept. 6, by Dept. City Transit, H. E. Ehlers, dir., 1211 Chestnut St., repaving Broad St. between Loudon St. and Wagner Ave.; and replacing 1,720 ft. existing granite blocks on concrete base (with bitulithic mastic filler), 69 ft. in Broad Street Subway.

Pa., Uniontown—Sept. 7, by E. Huston, controller Fayette Co., grading, etc., 11,500 ft. road, in Menallen Twp.; rein.-con. paving, etc., 5,157 ft. streets Connellsville Twp., and 9,371 ft. in Upper Tyrone Twp.; all foregoing 16 ft. wide; also Kentucky rock asphalt on 10 in. crushed stone or crushed slag paving, etc., 5,300 ft. streets, 18 ft., in Washington Twp.

Maryland — Sept. 6, by State Roads Comn., Baltimore, graveling 1.2 mi. Contr. AA-48, Anne Arundel Co.; concrete shoulders on 2.32 mi. Contr. 48-B, Allegany Co.; concrete paving 0.5 mi. Contr. P-79 Prince George's Co., and 1 mi. Contr. M-75, Montgomery Co.; also Amiesite and Kentucky rock asphalt paving 0.54 mi. Contr. A-47, Allegany Co. J. N. Mackall, chn.

Md., Baltimore—Sept. 7, by Bd. Awards, sheet asphalt surfacing 17,190 sq.yd. streets, listed in Contr. 429, also concrete paving 7,440 sq.yd., listed in Contr. 430. N. L. Smith, City Hall, acting highway engr.

W. Va., Charleston—Sept. 8, by Court Kanawha Co., grading, etc. 5.27 mi. Cabin Creek-Marmot Rd., Project 206. $80,000. C. Ross, Charleston, engr.

Fla., Sanford—Sept. 6, by Bd. Comrs. Seminole Co., clearing, grading, bridging and paving 200,000 sq.yd. various roads. F. T. Williams, Sanford, engr.

YOUR BANK BOOK IS AT STAKE!

INDUSTRIAL
AVEL

—UNLESS HANDLING COSTS ARE LOW

To show a profit on your work you must get the most out of every dollar you have invested in material handling machinery.

INDUSTRIAL all purpose crawlers enable you to get the most out of your material handling dollars because of their ease of operation, their brute strength and their ability to *WORK* faithfully for years and years.

When one buys an INDUSTRIAL they have invested money in a piece of equipment that will last—an investment that will reap dividends in the form of increased profits at such a fast rate as to soon pay back the investor his entire investment. The increased profits will continue and *that means gravy!*

It will pay you to investigate these INDUSTRIAL cost cutting crawlers. They are built in three sizes, covering a range of capacities in buckets and dippers of ½ yard capacity up. Write today for particulars.

THE FEDERAL SYSTEM of TRUCK EXPENSE CONTROL
Prepared by
M.L. PULCHER
PRES.

I have a plan on my desk that will help Contractors cut their hauling costs and it's free—

M. L. Pulcher
President

What's the use of keeping elaborate records of truck expense if they don't really tell you anything—if they don't help you do your hauling at less cost?

Federal offers you—without cost and without any obligation on your part—a very simple plan. It tells you how to know every day what each of your trucks costs to operate—and what the cost *ought* to be. It tells you how to keep your truck expense within bounds.

It's a plan designed for busy executives who wish a sensible basis for managing fleet operation. You have your finger on other departments—why not on transportation.

The Federal System of Truck Expense Control will stop all "guessing." It makes use of your own experience as a reliable guide in judging which type and make of truck to buy. It's yours for the asking, no matter how few or how many trucks you own, or what nameplate they bear.

Clip the coupon to your letterhead and mail it today. Get this money-saving plan. Follow the lead of some of the biggest fleet operators in the country who use and indorse this system.

Sewage Treatment Works—Chicago, Ill.

Bids were opened by Sanitary District of Chicago, July 7, for constructing West Side Sewage Treatment Works, Divisions D and J, pumping station, tanks, grit chambers, etc., from (A) T. J. Forschner Contracting Co., 5201 West Pershing Rd., (awarded contract); (B) Mid-Continent Construction Co.; (C) Tully & Costello, 30 North LaSalle St.; (D) E. W. Sproul Construction Co., 310 South Michigan Ave. The unit bids are as follows:

Division D	A	B	C	D
50,000 cu.yd. earth excavation in open cut	2.10	1.50	3.00	1.25
3,500 cu.yd. earth excavation in tunnel	16.00	11.00	15.00	5.00
5 cu.yd. rock excavation in open cut or tunnel	5.00	5.00	5.00	5.00
75,000 cu.yd. backfilling and embanking	1.50	1.00	2.00	1.10
2,000 cu.yd. replacing top soil	2.00	1.75	2.00	1.77
1,000 cu.yd. sand or gravel fill	4.50	4.00	4.00	3.32
2,400 portions of concrete piles, 18 ft. or less in length	60.00	72.00	54.00	58.75
23,000 lin.ft. additional lengths of concrete piles over 18 ft	3.60	4.00	3.00	2.03
1,500 cu.yd. enlarged concrete pile footings	30.00	28.00	25.00	23.40
100 portions of timber piles, 20 ft. or less in length, used in composite piles	30.00	30.00	20.00	31.84
1,000 lin.ft. additional lengths of timber piles, over 20 ft. used in composite piles	1.25	1.50	1.00	1.30
100 tests for supporting capacity of piles	200.00	100.00	192.50	227.50
6,000 cu.yd. concrete, Class A	18.00	19.00	17.50	18.14
8,500 cu.yd. concrete, Class B	28.00	30.00	27.50	40.26
15,500 cu.yd. concrete, class C	28.00	32.00	28.50	50.00
500 cu.yd. concrete, Class D	14.00	14.00	14.00	14.00
1,000 bbl. additional cement, as ordered	3.00	3.00	3.00	3.00
3,600 sq.ft. granolithic finish	.25	.30	.35	.19
500 cu.yd. brick masonry	40.00	35.00	40.00	32.40
5,000 sq.ft. sheet mastic, ¾-in	.60	.50	.45	.52
3,700,000 lb. reinforcement steel	.06	.055	.07	.09
160,000 lb. miscellaneous wrought-iron, ingot-iron and steel	.1[illegible]	.15	.13	.18
75,000 lb. subway grating	.16	.17	.15	.21
60,000 lb. miscellaneous iron castings	.15	.18	.15	.22
5,000 lb. galvanizing	.06	.05	.05	.04
5,000 lb. miscellaneous brass, bronze and copper	1.00	.80	1.00	.33
1,000 lin.ft. 8-in. vitrified sewer pipe	1.00	.75	1.25	2.79
1,000 lin.ft. 12-in.	1.50	1.25	1.50	3.31
1,000 lin.ft. 24-in.	4.00	3.00	6.00	6.80
240,000 lb. cast-iron pipe, bell and spigot	.08	.10	.10	.11
63,000 lb. cast-iron pipe, flanged	.10	.13	.12	.16
100,000 lb. cast-iron specials, bell and spigot	.12	.14	.15	.23
120,000 lb. cast-iron specials, flanged	.15	.19	.15	.26
1,500 lin.ft. wrought-iron pipe and fittings, 1-in. and smaller	.60	.50	.50	.92
1,000 lin.ft. 1¼ and 1½-in	.75	.65	.70	1.19
4,500 lin.ft. 2-in	1.00	.85	1.20	1.28
1,500 lin.ft. 3 and 4-in	3.00	2.25	5.00	3.86
150 lin.ft. 5 and 6-in	6.00	4.50	8.00	9.71
1,000 lin.ft. 8-in	9.00	7.50	9.50	11.97
1,000 lin.ft. 14-in	18.00	16.50	18.00	24.05
5,500 lin.ft. pipe railing	3.00	2.25	3.00	2.91
125 valves, 1-in. and smaller	2.00	2.00	3.00	4.35
150 1¼ and 1½-in	3.00	2.75	4.00	7.00
100 2-in	4.50	4.75	5.00	10.00
10 3-in	20.00	18.00	18.00	29.50
10 4-in	30.00	26.00	30.00	42.80
10 5 and 6-in	60.00	52.00	52.00	61.60
5 8-in	80.00	69.00	70.00	102.00
1 12-in	150.00	125.00	115.00	230.00
5 sluice gates, 6-in	140.00	110.00	135.00	136.00
10 8-in	175.00	165.00	155.00	157.20
30 floor stands	50.00	45.00	47.50	99.00
1,000 lin.ft. insulation for cold water piping, 2-in. and smaller	.30	.25	.50	2.10
1,000 lin.ft. 2½ to 4-in	.60	.45	.75	2.99
1,000 lin.ft. 6 and 8-in	1.00	.75	1.00	4.61
100 sq.ft. sidewalk lights	5.00	4.00	6.00	4.68
300,000 lb. installing sewage meter tubes furnished by Sanitary District	.04	.06	.05	.12
21 installing sewage meter registers furnished by Sanitary district	150.00	100.00	85.00	123.81
400,000 lb. installing gates and valves furnished by Sanitary District	.06	.07	.05	.13
30,000 lb. installing sludge ejectors and air receivers furnished by Sanitary District	.06	.08	.05	.10
Timber gates and miscellaneous wood work (lump sum)	4,500.00	3,850.00	5,380.00	3,885.00
Sump pump (lump sum)	1,500.00	1,750.00	1,345.00	1,139.00
Sludge and scum conveyors (lump sum)	55,000.00	49,750.00	62,000.00	46,000.00
Screenings, ejectors and storage tanks (lump sum)	45,000.00	38,300.00	42,800.00	27,000.00
Coarse screens (lump sum)	45,000.00	49,275.00	58,975.00	38,000.00
Division J	A	B	C	D
1,300,000 lb. structural steel	.09	.085	.075	.10
40,000 lb. reinforcement steel	.06	.055	.07	.09
500 cu.yd. concrete in superstructure	30.00	45.00	46.00	39.00
4,500 sq.ft. granolithic finish	.25	.30	.50	.19
100 cu.yd. concrete in sub-pier. cap	22.00	24.00	23.50	39.00
4,000 cu.ft. sub-piers	2.50	2.25	1.95	.97
Pumping station superstructure (lump sum)	796,925.00	788,200.00	831,700.00	603,000.00
Chimney superstructure (lump sum)	30,000.00	23,400.00	37,800.00	17,000.00
Electrical work (lump sum)	825,000.00	948,750.00	958,000.00	1,072,500.00
Erection of pumping equipment and air compressors (lump sum)	20,000.00	23,500.00	31,250.00	16,250.00
Thirty-five ton traveling crane (lump sum)	20,000.00	18,700.00	22,250.00	16,952.00
Ten-ton traveling crane (lump sum)	6,500.00	6,100.00	6,825.00	5,140.00
Passenger and freight elevator (lump sum)	7,000.00	5,800.00	5,250.00	8,273.00
Sewage screens	30,000.00	32,400.00	35,000.00	32,500.00
Floor grating (lump sum)	3,500.00	3,700.00	3,150.00	3,046.00
Service-water and gas piping (lump sum)	5,000.00	3,875.00	6,300.00	5,877.00
150 lin.ft. wrought-iron pipe, 2 in	.90	.75	1.00	1.56
125 lin.ft. 2½ in. and 3 in	1.80	2.00	1.75	3.02

125 lin.ft. 8 in	7.00	6.50	6.25	10.23
3,000 lb. cast-iron fittings, for wrought-iron pipe	.12	.10	.11	.24
600 lb. chemical lead pipe and floor drains	.75	1.50	.80	.35
Transformer trucks (lump sum)	1,100.00	975.00	785.00	390.00
Totals by contractor	$3,827,120	$4,091,997	$4,253,743	$4,396,539
Totals by Sanitary District	$3,827,120	$3,995,997	$4,165,767	$4,414,769

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Irrigation, Salem, Oregon, state irrigation engineer made estimates and plans, $17,500,000.

Railway, San Antonio, Texas, R. W. Morrison organizing company and making surveys, $15,000,000.

Hydro-electric plant, Placerville, Calif., J. L. McNab plans, $10,000,000.

Office building, Pittsburgh, Pa., Grant Building, Inc., having plans prepared, $8,500,000.

Grade crossing eliminations, Phila., Pa., City and Reading R.R. Co. making plans, $3,000,000.-$4,000,000.

Apartment, Chicago, Ill., Rosenthal, Mayer & Lewis, $2,000,000.

School, New York, N. Y., Bd. Educ. having plans prepared, $1,500,000.

Amusement Pier, Toronto, Ont., Provincial Impvt. Corp. made plans, $1,000,000-$1,500,000.

Railway, Ohio, Toledo & Cincinnati R.R. Co. plans extension, $1,305,000.

Packing Plant, Seattle, Wash., Barton & Co. plan, $1,000,000.

Contracts Awarded

Apartment, Chicago, Ill., Syndicate, to A. Lindstrom. Archts. est. $3,000,000.

Apartment, Chicago, Ill., R. S. De Goyler & Co., to Fridstein & Co. Archts. est. $2,500,000.

Apartment, Los Angeles, Calif., Fletcher Syndicate, to C. Thoren, approx. $1,250,000.

Viaduct, Newark, N. J., State Highway Dept., to C. Meads & Co., New York City, $1,147,405.

Garage, Milwaukee, Wis., J. T. Cellinson, to R. L. Reisinger. Archts. est. $1,100,000.

Apartment, Phila., Pa., McIlvaine & Roberts, to Roberts & Roller. Archts. est. $1,000,000.

Apartment Hotel, Portland, Ore., Claremont Hotel Co., to Hanson & Hammond Co. $1,000,000.

News of the Week

Waterworks

Proposed Work

Mich., Detroit—Dept. Water Supply, G. H. Fenkell, genl. mgr., 176 East Jefferson Ave., making plans 37,000 ft. 6- to 16-in. mains in Ford Highway, Warren, Francisco, Mansfield, Curtis, Biltmore, Ashton and Thornton Aves., Seven Mile, Southfield, and Dunn Rds., etc.

Mich., Halfway—Made plans extending 39,641 ft. 6- to 12-in. mains, etc. in various streets. H. R. O'Mara, Halfway, engr.

Mich., Royal Oak (Ind. br. Detroit)—Making plans extending 6- to 24-in. c.i. mains, etc. in various streets. $500,000. E. M. Shafter, Royal Oak, engr.

Neb., Plattsmouth—Making plans waterworks. To exceed $25,000. Bruce & Grupe, 710 Bankers Reserve Life Bldg., Omaha, engrs.

Mo., Ironton — Takes bids in spring 100,000 gal. concrete reservoir, deep well, pump house and plunger type pump, 28,225 ft. 4- to 8-in. c.i. mains, 30 gate valves and boxes, 37 fire hydrants, etc. $90,000. W. A. Fuller Co., Ry. Exch. Bldg., St. Louis, engrs. Noted June 16.

Tex., Houston—Making plans 12 in. main from North Main Plant on Little White Oak Bayou to Houston Heights, $40,000; also new mains from North Main Plant on Little White Oak Bayou to Woodland Heights, $40,000. J. C. McVea, city engr.

Okla., Boswell—Pub. Serv. Co., 510 South Boston St., made preliminary plans new water pumping station for power plant, near here. $60,000. W. D. Parks, Hugo, engr.

Okla., Marshall — Making preliminary plans extending 15,000 ft. 4- to 8-in. c.i. mains, etc. in various streets. $20,000. G. F. Ingle, mayor. Engineer not announced.

Wash., Bellingham — Approved $250,000 bond issue, improving and extending waterworks.

Calif., Santa Cruz—J. P. Sweeney, 14 Montgomery St., San Francisco, plans water distributing system, 12,000 ft. 4 ft. metal wood or concrete flume, storage reservoirs, etc., here. $350,000.

Ont., Hamilton—Plans new reservoir and improving Ferguson Ave. pumping station. $800,000. W. L. McFaul, City Hall, eng.

Ont., Richmond Hill—Plans extending 1 mi. c.i. mains, etc. in various streets. $15,000-$20,000. James, Proctor & Redfern, 36 Toronto St., Toronto, engrs.

Bids Desired

N. H., Epping—Bd. Selectmen taking bids waterworks, incl. power house, standpipe, etc. $30,000. Private plans.

N. Y., Brooklyn—Sept. 16, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Avenues J, L, M and Q, Benson, Stanley, Canal, Flatlands and Hegeman Aves., and Crescent, Ford, Lombardy, Navy and Sackett Sts., etc., here.

N. Y., Long Island City—Sept. 13, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Bleecker, Greene, Grove, Harman, Himrod, Linden Aves., etc., here.

N. Y., Long Island City—Sept. 16, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Borden, 38th, 80th and Himrod Aves., 22nd, 48th, 127th, 170th and 202nd Sts., etc., here.

N. Y., New York—Sept. 16, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Adee, Bryant, Commonwealth, Hering, Lafayette Aves., etc., Bronx Boro.

D. C., Wash.—Sept. 13, by District Comrs., District Bldg., constructing Water Tower 2, Reno Reservoir.

Michigan—Sept. 12, by D. W. Beauvais, clk. Ira Twp., Anchorville, 803 tons c.i. pipe, 11.5 tons c.i. specials, gates, hydrants, 75,000 gal. elevated steel tank, pumping station, intake crib and suction line in Anchorville and Fairhaven. Ayres, Lewis, Norris & May, Cornwall Bldg., Ann Arbor, engrs.

> ***THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired; etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.***
>
> ***Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.***

Tex., Devine—City, c/o F. C. Hemphill, secy., taking bids improving waterworks, incl. 20,000 ft. various sized pipe, elevated tank, etc. $50,000. Private plans.

Tex., San Benito — See "Contracts Awarded."

Cali., El Segundo—Sept. 16, by V. D. McCarthy, city clk., 3,100 ft. 2 in. galvanized standard screw and 23,200 4 to 10 in. B & S c.i. pipe, etc.

Calif., Escondido—Sept. 16, by R. T. Huchins, city clk., 3,100 ft. 2 in. galvanized standard screw and 23,200 ft. 4- to 10-in. B. & S. c.i. pipe, etc.

Calif., Los Angeles—Sept. 19, by Supervs. Los Angeles Co., constructing Sierra Madre Dam and 1,400 ft. 7 x 10 ft. rein.-con. Channel, incl. concrete arch dam, retaining walls, etc. E. C. Eaton, 202 North Bway., engr.

B. C., Vancouver—Sept. 20, by City Council, 5,000 ft. 24 in. lap welded steel or c.i. pipe, or 26 in riveted steel pipe. C. Brackenridge, City Hall, engr.

See proposal advertising on page 160

Contracts Awarded

Md., Baltimore—Bd. Awards, copper pipe for Bureau Water Supply, to Baltimore Tube Co., 1301 Wicomico St., $13,080. Noted Aug. 11.

Ia., Indianola—To Continental Concrete Well Co., Wichita, Kan., two 50 ft. wells at $45 per ft. and one well at $40 per ft.

Ia., Ogden—Deep well, etc., to Thorpe Bros., 224 Atlas Bldg., Des Moines, $20,175. Noted July 7.

Mo., Carthage — See "Buildings — Industrial."

Tex., San Benito—Central Power & Light Co., c/o Frost Bldg San Antonio, will build 1 story, brick and stucco filtration plant, 1 m.g. capacity, and concrete reservoirs, by day labor. $50,000. Alvord, Burdick & Howson, 8 South Dearborn St., Chicago, Ill., Engrs. Noted Aug. 4.

Sewers

Proposed Work

N. Y., Brooklyn — J. J. Byrne, pres. Brooklyn Boro, Boro Hall, rejected bids Aug. 24, sewers in Kings Highway; also sewer in West 10th St., to A. W. Matarazzo, 1163 61st St., $7,769. Noted Aug. 25.

N. J., Cliffside Park (mail Cliffside) — Making plans 42 in. sewer in Jassamine Way, Kingsland Lane, Aurora, Lawton and Columbia Aves. $70,000. McClave & McClave, 460 Anderson Ave., engrs.

La., Pineville—Takes bids about Nov. 1, sewerage system, etc. $100,000. Swanson-McGraw Inc., Balter Bldg., New Orleans, engrs.

Mich., Detroit—Dept. Pub. Wks., making plans Connors Creek Sewer Conduit, 7,000 ft. long rein.-con., monolithic construction. P. A. Fellows, city engr.

Ia., Des Moines—Making preliminary plans 10 in. vitr. clay pipe sewers in Windsor Pl. $30,000. J. M. Tippee, City Hall, engr.

Mo., Kansas City—Making plans sewers in street from 37th St. and Gilham Rd. to Harrison St. south to Brush Creek. $550,000. R. Waddell, City Hall, engr.

Ark., Hot Springs—Oakland Natl. Park Sewer Impvt. Dist., takes bids latter part September, 59,250 ft. 6- to 18-in. sewers, disposal plant of Imhoff tank and sludge bed, etc., in 600 acre tract near here. H. S. Moreland, 625 Central Ave., engr. Noted Aug. 11.

Ark., Paris—See "Streets and Roads."

Tex., Freeport—Plans sewerage system. $25,000. Address Mayor.

Okla., Bristow—Plans 7,000 ft. 8- to 12-in. vitr. clay sewers, etc. in Krumrei addition. $28,000. C. L. Wilson, Weatherford, engr.

Okla., Picher—Made preliminary plans sewers in various streets. $66,000. A Holland, city clk. Engineer not selected.

TRADE "LEADITE" MARK

Registered U. S. Pat. Office

"The World's Playground" has used Leadite with complete satisfaction for over 20 years

ATLANTIC CITY, New Jersey, is proud of its well-paved streets. In laying new or additional cast iron mains, the engineers always use Leadite. They know from the experience of nearly one-quarter of a century that Leadite joints are absolutely secure and that the occasion will not arise where paved streets have to be dug up to repair the line.

In addition to the mains under the paved streets, Leadite was used for jointing the 24" main that runs under the famous boardwalk.

Other lines run through salt marshes, over bridges and under numerous railroad tracks.

The sizes of these mains run from 4" to 48".

Mr. L. Van Gilder is Engineer and Superintendent of the Atlantic City water department.

Added to the security and permanence of Leadite joints there is a saving of 75%.

For its economy—permanence—security—and the speed with which jointing can be finished—Water Works men specify and use Leadite.

Laying 24" c. i. water mains, with Leadite Joints, in Atlantic City under paved street.

Specify and use
LEADITE
—it saves at least 75%

Be sure it is
LEADITE
and accept no imitations ~ ~ ~

The pioneer self-caulking material for c. i. pipe.
Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA.

NO CAULKING

Sewers (Continued)

Okla., Rush Springs — Voted $35,000 bonds, 21,600 ft. 6- to 10-in. vitr. clay sewers in all streets. $35,000. J. E. Milliken, Continental Bldg., Oklahoma City, engr.

Calif., Los Angeles — Drainage Impvt. Dist. 21, made plans rein.-con. sewer, etc., in Montebello Dist. along Whittier Blvd. $234,750. C. E. Arnold, Hall of Records Bldg., drainage constr. engr.

(track area) $15,357; to Colcos Steel & Iron Co., 1330 North 30th St., furnish and erecting smoke sheathing Bridge 233 $1,843; to Eastern Asphalt Co., Penna Bldg., asphalt paving mixtures $19,215; to Standard Scale & Supply Corp., 510 Arch St., platform scales $1,274; to J. Dyer Quarry Co., Norristown, furnishing crushed stone $15,349; to J. J. McHugh, 1617 Race St., paving and repaving certain alleys in Highway Dist. 1 $5,751, and to M. and J. B. McHugh, 892 North Markoe St., certain alleys in Highway Dist. 2 $5,731. Grand total $359,868. Noted July 28.

Maryland — State Roads Comn., Baltimore, concrete paving 0.67 mi. road from College Station to College Park, Contr. P-76, Prince George Co., to Thomas, Bennett & Hunter, Westminster, $12,075, and 6 mi. road from end Contr. AA-20 to Gibson, Contr. AA-31, Anne Arundel Co., to Christhilf & Ensey Co., 1625 Ridgely St., Baltimore, $119,000; also graveling 3.3 mi. road from St. Peters Church toward Gallant Green, Contr. Ch-45, Charles Co., to G. B. Mullin Co., 1296 Upshur St., Wash., D. C., $27,867. Grand total $158,942. Noted Aug. 11.

Maryland — State Roads Comn., Baltimore, graveling 1.45 mi. Morganza-Colton State Rd., Contr. Sm-39, St. Mary's Co., and concrete shoulders on 1.5 mi. Georgetown Rd., Contr. M-83, Montgomery Co., to Southern Maryland Constr. Co., 14 East Lexington St., Baltimore, $14,901 and $12,402 respectively; 2.6 mi. road from Wheaton to Four Corners, Contr. M-84, Montgomery Co., to Gosnell, Long Co., Frederick, $22,345, and 1 mi. road from Plummer's Corner to Reedland, Contr. M-79, Montgomery Co., to P. E. Russell, Frederick, $7,952; concrete paving 1 mi. River Rd., Contr. M-58, Montgomery Co., to Corson & Gruman Co., 33rd and K Sts. N. W., Wash., D. C., $56,597, and 1 mi. road from Jarrettsville-Upper Crossroads, Contr. H-51, Harford Co., to Ward & O'Connell, 3114 Presbury St., Baltimore, $20,388; sheet asphalt paving 0.47 mi. Harford Rd., Contr. Bc-72, Baltimore Co., to P. Flanigan & Sons, Harford Rd. and Baltimore & Ohio R.R. tracks, Baltimore, $74,272. Grand total $208,857. Noted Aug. 11 and 18.

Maryland — State Roads Comn., Baltimore, macadam resurfacing 1.16 mi. road from Worthington's Corner to Level, Contr. H-46, Harford Co., to E. F. Murray, 18 Allegany Ave., Towson, $18,308; sheet asphalt paving 0.53 mi. Harford Rd., Contr. Bc-71, Baltimore Co., to Baltimore Asphalt Block & Tile Co., 1320 North Monroe St., Baltimore, $78,155; concrete paving 1 mi. road between Westover and Fairmount, Contr. S-24, Somerset Co., to Hannemann-Burroughs Co., Salisbury, $22,696, and 0.08 mi. Rigg Sect. Baker and Wales Sts., Brentwood, Contr. P-51, Prince George's Co., to E. R. P. Smith, Hyattsville, $3,073; concrete shoulders on 1.2 mi. Riggs Rd., Contr. 208-A, Prince George's Co., to J. P. Maher, 4324 15th St., Wash., D. C., $9,086; bridge on Ager Rd., Hyattsville, Contr. P-75, Prince George's Co., to Potomac Bridge Constr. Co., 229 9th St. N. E., Wash., D. C., $9,828. Grand total $141,146.

Maryland—State Hy. Comn., Baltimore, concrete surfacing 1 mi. Contr. F-100, Frederick Co., and 2 mi. Cont. M-81, Montgomery Co., to E. C. Valentine, Frederick, $20,282 and $41,042 respectively; also 2.44 mi. Cont.-K 31, Kent Co., to Old Line Contr. Co., Chestertown, $41,796. Grand total $103,120.

Md., Baltimore — Bd. Awards, concrete paving 4,300 sq.yd. streets listed in Contr. 425, to Mahoney Bros., 1111 Rutland Ave., $6,965; and 25,500 sq.yd. Contr. 424, to P. Reddington & Son, 2 East Lexington St., $58,852. Noted Aug. 25.

West Virginia—State Hy. Comn., Charleston, to Wiley & Waugh, Logan, grading, etc. 3.56 mi. Project 75, Calhoun Co. $64,456, and to F. H. Herring Constr. Co., Valley Fort, 3 mi. Project 3345 Mingo Co. $27,295; to J. J. Battershill & Son, Huttonsville, stone base surfacing 10 mi. Project 3111-A, Sects. 1 and 2, Gilmer & Co. $152,290, to McArthur & Hood, Huntington, gravel surfacing 4.6 mi. Project 159-D, Nicholas Co. $22,420, to Keeley Constr. Co., Clarksburg, 4.8 mi. Project 159-C, Nicholas Co. $27,623, to G. N. and O. J. Yoho, Cameron, 5.4 mi. Project 159-A, Nicholas Co. $42,930, to Huntington Gravel & Supply Co., Huntington, furnishing gravel and gravel surfacing 3.56 mi. Project 3189, $27,370 7.4 mi. Project 3190, $35,645, and 8.9 mi. Project 3302-A and B $42,263, all Wayne Co., to Hatfield Constr. Co. Huntington, 8.9 mi. Project 3202, Wayne Co. $39,508, and to Pinnell & Meredith, Cottageville, 7.4 mi. Project 3190, Wayne Co. $36,592; to W. H. Armstrong & Co., Fairmont, concrete surfacing 1.5 mi. Project 3396, Wetzel Co. $74,415, to Allied Products Co., Cleveland, O., surface treating 2.25 mi. Project 2202, Logan Co. $2,929, to Southern Oil & Tar Co., Clan and Fulton Sts., Louisville, Ky., 7 mi. Projects 87, 2037 and 3298, Mingo Co. $7,376; to C. G. Fuller & Co., Charleston, asphalt surfacing 5 mi. Project 3248-A, Wyoming Co. $5,075, to F. C. Simmons Co., Huntington, 5.56 mi. Project 3189, Wayne Co. $36,011; to Shaid Constr. Co., Elkins, concrete circular arch culvert on Project 2058 Brooke Co., $18,278. Grand total $680,084. Noted Aug. 11.

W. Va., Grantsville—Calhoun Co., grading Route 35, to Plane Constr. Co., Keyser, $98,000.

Alabama—State Hy. Comn., Montgomery **(e.e. means engrs. est.)**, graveling 14.06 mi. roadway between Seale and Girard, Russell Co., to Newell Constr. Co., Martin Bldg., Birmingham $65,174 e.e. $66,000, and 18.81 mi. roadway between Union Springs and Barbour Co. line, Bullock Co., to C. G. Kershaw, Woodward Bldg., Birmingham $191,062 e.e. $152,500; graveling and sand clay paving 22.4 roadway between Greenville and Luverne, Butler and Crenshaw Counties, to Moore & Law, Tampa, Fla., $99,940 e.e. $100,200; sand clay paving 12.14 mi. roadway between Geneva and Samson, Geneva Co., to H. Foster, Luverne, Ala., $51,456 e.e. $52,100, 9.72 mi. roadway between Ozark and Enterprise, Dale Co., to N. Giddens, Troy, $18,407 e.e. $19,100, 6.77 mi. roadway between Andalusia and Opp, Covington Co., and 18.45 mi. roadway between Samson and Opp, Geneva and Covington Counties, to Gillis Constr. Co., Brewton, $25,717 and $82,474 respectively e.e. $26,300 and $83,000 respectively; grading, etc. 6.57 mi. roadway between Mobile Co. line and Fruitdale, Washington Co., to Z. D. Fountain, Hattiesburg, Miss., $39,696 e.e. $40,200, 13.24 mi. roadway between Demopolis and Moscow, Marengo Co., to B. C. George & Co., Starkville, Miss., $106,286 e.e. $107,000, 16.02 mi. roadway between Foley and Loxley, Baldwin Co., to Simms, Skelley & Chapman, Orlando, Fla., $52,905 e.e. $53,100, 18.5 mi. roadway between Uniontown and Demopolis, Perry, Marengo and Hale Counties, to W. J. Bryson, Montgomery $121,196 e.e. $122,500, 11 mi. roadway between Waverly and Camp Hill, Tallapoosa Co., to J. W. Gwin, Hamilton Station, Birmingham, $76,648 e.e. $77,100, all foregoing 18 ft. wide; also constructing 250 ft. overead concrete crossing, 20 ft. over Atlantic Coast Line R.R. tracks near Snowdoun, Montgomery Co., to Champanois & Blanks, Meridian, Miss., $17,937 e.e. $18,000. Grand total $948,898. Noted Aug. 4.

Alabama—State Hy. Comn., Montgomery **(e.e. means engrs. est.)**, graveling and top soiling 23.34 mi. roadway in Cleburne Co., and chert surfacing 5.33 mi. roadway De Kalb Co., to Newell Contg. Co., 3828 Ave. A, Birmingham, $67,725 and $65,750 respectively e.e. $70,000 and $67,000 respectively; grading, etc. 8 mi. roadway between Pell City and Cook Springs, Bankhead Highway, St. Clair Co., and graveling 5.75 mi. roadway, Lamar Co., to H. N. Donohoo, 510 North 21st St., Birmingham, $84,057 and $57,952 respectively e.e. $85,000 and $60,000 respectively, 11.15 mi. roadway towards Athens, Madison Co., and graveling and chert surfacing, 11.15 mi. Huntsville-Athens Highway, Limestone and Madison Counties, to R. M. Smith Co., Amer. Trust Bldg., Birmingham $103,380 each e.e. $105,200 and $105,000 respectively; graveling 11.44 mi. roadway from Athens to Huntsville, Limestone Co., J. W. Gwin, Hamilton Sta., Birmingham, $101,196 e.e. $102,100, 3.43 mi. roadway through Marion Co., Marion Co., to Nixon & Phillips, Amer. Trust Bldg., $34,418 e.e. $35,500; grading 16.22 mi. roadway, Cherokee Co., to W. C. McCoy, Lincoln Life Bldg., Birmingham, $90,453 e.e. $95,000, and 8.46 mi. Moulton-Decatur Highway, Morgan and Lawrence Counties, to J. B. Turner, Amer. Trust Bldg., Birmingham, $71,211 e.e. $73,500, all foregoing 18 ft. wide. Grand total $779,522. Noted Aug. 4.

Constr. News page 121

LET'S LOOK INTO HANDLING COSTS!

HERE are some material handling costs based on a time study of Industrial Machines operating eight hours a day, with one operator working eight hours a day, at 80c. per hour. The operating cost includes depreciation over a period of ten years, interest on the investment, fuel, labor, oil, grease and maintenance.

The average cost for all kinds of work in operating an Industrial Crane is $2.50 per hour. On this basis, scrap iron costs 4.6 cents per ton to handle, coal costs 1.8 cents per ton to handle, and sand 1.2 cents per ton. Get your material handling heads together. Figure it out on a common sense basis. Then put *your* handling costs down where they ought to be.

There's a copy of catalog 120-C ready to supply you with additional information.

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Dam, California, Los Angeles City and Los Angeles Flood Control Dist. plan dam, $4,600,000.

Hotel and theatre, Brooklyn, N. Y., Shelburne Constr. Co. having plans prepared, $4,000,000.

Land development, Weslaco, Tex., Progress Development Co., Houston, making plans, $3,500,000.

Railway, Texas, Clinton & Oklahoma Western R.R. Co. making surveys, $3,000,000.

Home and hospital, Mayview, Pa., Dept. Charities, Pittsburgh, having plans prepared, $2,500,000.

Wharves, New Orleans, La., Dock Bd. had preliminary plans prepared, $2,000,000.

Store, Seattle, Wash., F. McDermott having plans prepared, $2,000,000.

Women's prison, New York, N. Y., Dept. Correction, $2,000,000.

Apartment, New York, N. Y., Four Hundred Seventy West End Avenue Corp. having plans prepared, $1,500,000.

Sewer, Vancouver, B. C., Vancouver & Dist. Joint Sewage & Drainage Bd. making plans, $1,500,000.

Dam, Ste. Julienne, Que., Gatineau Power Co. soon takes bids, $1,000,000.

Refrigeration plant, Dallas, Texas, Stevenson Engr. Co. soon takes bids, $1,000,000.

Bids Desired

Sewers, St. Louis, Mo., Sept. 27, by Bd. Pub. Serv., $3,071,000.

Exchange and office, Oklahoma City, Okla., Sept. 15, by Southern Bell Telephone Co., $3,000,000.

Apartment hotel and store, Pittsburgh, Pa., P. M. Julian, archt., Washington, D. C., taking bids, $2,000,000.

Hospital, Brooklyn, N. Y., Lord & Hewlett, archts., New York City, taking bids, $1,600,000.

Theatre and commercial building, Rochester, N. Y., Sept. 28, by Graven & Mayger, archts., Chicago, Ill., $1,500,000.

Warehouse, Houston, Texas, A. S. Bergendahl, archt. and engr., soon takes bids, $1,000,000.

Bids Received

Auditorium and library, Los Angeles, Calif., Regents of University of Calif., general contract from J. C. Bannister and F. Gow, $1,490,000; subcontracts, $175,421.

Contracts Awarded

Produce terminal, **Los Angeles, Calif.**, Central Mfg. Dist. Co., 1st unit, to W. P. O'Neil Co., approximately $1,500,000, total, $3,500,000.

Bridge, St. Louis, Mo., J. R. Scott, Jr., substructure to Union Bridge Constr. Co., Kansas City; and superstructure to American Bridge Co. Engrs. est., $2,500,000.

Hotel, Los Angeles, Calif., Central Investment Co. to Scofield Engr. Constr. Co., $2,250,000.

Cement mill, White Cliffs, Ark., Ideal Cement Co., Denver, Colo., will build by day labor, $2,000,000.

Club, Pittsburgh, Pa., Keystone Athletic Club to Mellon Stuart Co., $1,900,000.

Elevator, Montreal, Que., Harbor Comm. of Montreal to E. G. Cope & Co., Ltd., $1,800,000.

Hospital and nurses home, and power plant, Newton, Mass., Newton Hospital to Holt-Fairchild Co., Boston, archt. est., $1,500,000.

Apartment, New York, N. Y., V. Astor to George A. Fuller Co., archts est., $1,000,000.

Temple, Boston, Mass., Congregational Adath Israel Temple, general contract to C. S. Cunningham and subcontracts. Archts. est., $1,000,000.

News of the Week

Waterworks

Proposed Work

Pa., Pittsburgh—Soon takes bids North Side Intermediate Reservoir, Lafayette St. and Biggs Ave., incl. excavation, subfoundation and embankments, drains, manholes, etc. $185,000. Bureau of Water, City County Bldg., engrs.

Ind., Evansville—Bd. Wks., E. Heberer, pres., City Hall, making plans extending waterworks. $1,000,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs. Noted July 7.

Mich., Detroit—Making plans waterworks incl. pumping station, filtration plant and coagulation basin, on Lake St. Clair, $641,000. Hoad, Decker, Shoecraft & Drury, Ann Arbor, engrs.

Ark., Texarkana — City Water Corp., making preliminary plans 110 m.g. storage reservoir, additional fire pumps and distribution mains. $200,000. G. W. Briggs c/o owner, engr.

Tex., Catarina—See "Unclassified."

Tex., Devine — Takes bids after Sept. 17, waterworks, incl. distributing system, pumping unit, etc. $45,000. Walton & Arneson, 618 Gunter Bldg., San Antonio, engrs. Noted Sept. 1.

Tex., Weslaco—See "Unclassified."

Okla., Oklahoma City — Making preliminary plans new conduit line from reservoir to filtration plant, incl. 90,000 ft. 54 in. c.i. pipe. $750,000 bond election soon for same. B. M. Hart, City Hall, engr.

Okla., Perry—Making preliminary plans 13,300 ft. 4- to 8-in. c.i. mains in various streets. $20,000 bond election soon for same. C. A. Wood, Stillwater, engr.

Okla., Rocky—Voted $21,000 bonds, new wate works, incl. deep well pump and motor, etc. W. D. Sanders, mayor. Engineer not announced.

Wash., Aberdeen — C. S. Watkins, supt. Water Dept., making plans industrial water supply from lower Wynooche River. $1,-Apr. 21.

Wash., Port Townsend — Voted $800,000 bonds, waterworks, plant delivers 14 m.g.d., on Quilcene River. Noted Mar. 3.

Calif., Alhambra—Making plans c.i. mains in San Clement and Montezuma Aves., etc. $25,000 or more.

Calif., Redwood City—Ravenswood Water Dist. voted $30,000 bonds, Matheson joint, welded steel or c.i. pipe line. G. A. Kneese, Courthouse, Redwood City, engr. Noted Aug. 4.

Calif., Santa Monica—Plans domestic water and fire protection system in 23rd St., etc. To exceed $25,000.

Calif., Tracy—Making plans enlarging water supply. $15,000 or more. E. T. Bartlett, city engr.

Ont., Brantford—Council plans filtration system, $40,000. N. R. Wilson, Water Dept., engr. R. S. and W. S. Lea, 340 University Ave., Toronto, consult. engrs.

Ont., Hamilton — Plans rein.-con., reservoir west end of city and improving Ferguson Ave. pumping station. $800,000. W. L. McFaul, City Hall, engr.

B. C., Vancouver — Greater Vancouver Water Dist. Bd., making plans extending Seymour main from Rupert St. and 22nd Ave. to Central Park at Boundary Rd. for 5,000 bbl. cement, for above, to Balfour Guthrie & Co., 739 West Hasting St., Evans, Coleman & Evans, Ltd., foot of Columbia Ave. and New Method Coal & Supplies, Ltd., foot of Main St., at $2.80 per bbl.

> *THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.*
>
> *Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.*

Bids Desired

N. Y., Harriman—Sept. 29, by Village Trustees, Harriman School, waterworks, incl. reservoir, mains, etc. H. J. Harder, 129 Market St., Paterson, N. J., engr., adv. E. N.-R. Sept. 15.

N. J., Denville—Sept. 21, by Twp. Comn., Township Hall, water pipe, fittings, hydrants, etc. G. W. Knight, 147 Prospect St., Passaic, consult. engr.; adv. E. N.-R. Sept. 15.

Pa., Phila.—Sept. 19, by Dept. Pub. Wks., Bureau of Water, chlorine apparatus, for Belmont mechanical filters, Contr. 899. G. H. Biles, dir.

Md., Oxford—Sept. 21, by City Comrs., complete pump, motor, etc., for pumping station, excavating and backfilling 3 mi. trenches, laying 6 and 8 in. c.i. main, and 100,000 gal. steel water tank. Kastenhuber & Anderson, P. O. Drawer R, Easton, engrs.; adv. E. N.-R. Sept. 15.

Fla., Bradentop—Sept. 27, by City Council, drilling and completing 12 in. well, approximately 800 ft. deep. R. K. Van Camp, com. Pub. Wks.; adv. E. N.-R. Sept. 15.

Fla., Plant City—Sept. 26, by City, waterworks equipment, E. H. Thompson, city mgr., adv. E. N.-R. Sept. 15.

O., Cleveland—Sept. 21, by Bd. Comrs. Cuyahoga Co., 13,500 lin.ft. 6- to 12-in. c.i. main in Bradley Rd., Impvt. 1257, and 20,000 lin.ft. 6 and 8 in. in Cook Rd., Hamlin St., etc., Impvt. 1452.

Mich., Detroit—Oct. 5, by Bd. Water Comrs., 176 East Jefferson Ave., 10,000 g.p.m. electric motor driven centrifugal pumping unit. G. H. Fenkell, gen. mgr.; adv. E. N.-R. Sept. 15.

Neb., Hastings—Sept. 26, by City, 670 ft. 8 in. Class B mains in Water Dist. 74, and 1,800 ft. 6 in. Class B mains in Water Dist. 75; also 3,800 ft. 8 in. vitr. clay or concrete sewer in Sewer Dist. 117. P. T. Naylor, City Hall, engr.

Tex., Marathon—Borderland Utilities Co., Ft. Stockton, taking bids improving waterworks, here. $15,000. Private plans.

Tex., San Antonio — See "Contracts Awarded."

Colo., Denver—Sept. 20, by Bd. Water Comrs., 1509 Cleveland Pl., approximately 4,581 ft. 66-in. steel or pre-cast rein.-con. conduit known as Conduit 13, along Clayton St., from 1st Ave. to Capitol Hill Reservoir. D. D. Gross, c/o owner, engr.

B. C., Vancouver—Sept. 29, by Greater Vancouver Water Dist. Bd., 4,500 ft. 18 in., 1¼ in. thick plain spigot and faucet c.i. pipe. $30,000. E. A. Cleveland, 500 Beatty St., engr.

B. C., Vancouver—Sept. 29, by E. A. Cleveland, engr., 500 Beatty St., one 72, 60, and 48 in., two 36 in., two 32 in., five

See proposal advertising on page 136

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Laid 10 miles of water main—and satisfactory in every particular!

—said a waterworks engineer of national reputation, referring to this installation

Here is the story:—

THE Second Taxing District, South Norwalk, Connecticut, U.S.A., has just completed the installation of approximately ten miles of cast iron bell and spigot water mains, varying in size from 6" to 18". The work included the placing of about fifty cutting-in-tees on existing piping and their connection to new work.

Leadite was selected for jointing material after receiving competitive bids for laying with lead.

The total amount of the successful bids for all work, excepting the furnishing of the cast iron pipe, specials and valves, was as follows:

Lead Joints	$155,631
LEADITE Joints	142,535
Difference	$ 13,096
Saving in favor of **LEADITE**	8.4%

The work was performed by contractors experienced in the use of this material and was satisfactory in every particular.

Specifications required that after laying, the pipe should be tested for leakage under water pressures varying from 40 pounds to 115 pounds per square inch, and that the leakage should not exceed two gallons per 24 hours per linear foot of joint. The results of the tests were well within this limit.

This work was under the direction and supervision of Mr. Nicholas S. Hill, Jr., Consulting Engineer, 112 East 19th Street, New York, N.Y., U. S. A.

Leadite is used extensively by thousands of water works engineers, superintendents and contractors with excellent results.

Specify and use
LEADITE
It saves at least 75%

Be sure it is
LEADITE
and accept no imitations

The pioneer self-caulking material for c. i. pipe.
Tested and used for over 30 years.

THE LEADITE COMPANY . . Land Title Building . . PHILADELPHIA, PA., U. S. A.

NO CAULKING

Waterworks (Continued)

24 in., five 18 in., eighteen 12 in., ten 8 in., thirty-five 6 in., and thirty-five 4 in. gate valves, for Greater Vancouver Water Dist. $15,000.

Contracts Awarded

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in 59th, 77th, 78th Sts., etc., here, to Pallasino Contg. Co., 1479 Park Ave., New York City, $8,672. Noted Aug. 25.

N. Y., New York — N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., 36 in. steel mains in Central Park and 5th Ave., Manhattan Boro, also in Barker, Brunner, Cambeling Aves., etc., Bronx Boro, to Beaver Eng. & Contg. Co., 51 Chamber St., $115,634 and $8,060 respectively. Noted Aug. 18.

Pa., Phila.—Dept. Pub. Wks., Bureau of Water, Contrs. 894 and 895, to Keystone State Piping & Constr. Co., 738 East Venango St., $6,125 and $4,045 respectively; Contr. 896, to Ehret Magnesia Mfg. Co., 1325 West Cumberland St., $625; Contr. 897, to M. and J. B. McHugh, 892 North Markoe St., $123,938; and Contr. 898, to Acme Machine Co., 27 North 38th St., $2,335. Grand total $137,068. Noted Aug. 25.

Pa., Pittsburgh—Steam turbine driven centrifugal pumps at Ross Pumping Sta., to Dravo Doyle Co., Penn Ave. and 2nd St. $174,200. Engrs. est. $210,000. Noted June 23.

Pa., Pittsburgh — Sub-foundation work grading, etc., for Brashear Reservoir, Montana Ave., to Pitt Constr. Co., Empire Bldg., $50,650. Engrs. est. $85,000. Noted May 5.

N. C., Goldsboro — Pumping station, to A. H. Guion Co., Gastonia, $27,000. Noted Aug. 18.

N. C., Raleigh—Clear water basin, to R. G. Lassiter & Co., Citizens Bank Bldg., $48,352.

N. C., Rockingham — Waterworks, incl. dam, 7,700 ft. main, and filtering plant, to V. B. Higgins, 612 Kingston Ave., Charlotte, $82,500.

O., Cleveland — Cuyahoga Co., 9,000 ft. 12 in. c.i. mains in Hall and Detroit Rds., to Mutual Constr. Co., 239 Bradley Court, $37,065, and 6,000 ft. 6 and 8 in. mains in Elmwood Rd., to Abood & Lewis, 626 Huron Rd., $16,745.

Mich., Detroit—Detroit Fire Dept., 1,000 Detroit Fire Dept. Standard Fire Hydrants, f.o.b. Detroit, to Michigan Valve & Fdry. Co. 3631 Parkinson St., at $56.95 each, total $56,950.

Mich., Detroit — Dept. Water Supply, brick, steel and concrete, weir and control chambers at Water Works Park, to M. Bartholomaie & Son Co., 1574 East Warren Ave., approximately $15,000.

Mich., Royal Oak (Ind. br. Detroit)—To Natl. Cast Iron Pipe Co., Tarrant City, Birmingham, 12,000 ft. 6 in. c.i. pipe at $0.595 per ft., 7,000 ft. 8 in. $0.85, and 180 ft. 16 in. $2.56.

Wis., Wauwatosa—Milwaukee Co. Institutions, 8,989 ft. 16 in. c.i. mains, hydrants, etc. for institutions, here, to W. T. Werner, 675 Hi-Mound Blvd., Milwaukee, $19,660.

Kan., Bonner Springs—A. G. Parker, city clk., waterworks improvements, to Wayne Western Co., 507 Mutual Bldg., Kansas City, Mo., $16,100. Noted Aug. 4.

Mont., Phillipsburg—Approximately 14,400 lin.ft. pipe for water supply line from south fork Boulder Creek to city reservoirs, to W. N. Fesler, Phillipsburg at $0.14 per ft.; constructing above supply line to Amer. Wood Pipe Co., 32nd and Cedar Sts., Tacoma, Wash., $10,724; and 5 concrete dam structures, to G. M. Roberts, Phillipsburg, $950. Noted May 12.

Tex., San Antonio—Will lay 8 and 10 in. additional mains in Highland Park section, by day labor, $16,000 equipment. I. Ewig, city engr.

Calif., Los Angeles—To Crane Co., 321 East 3rd St., 25,000 ft. ½ in. wrought iron pipe at $7.07 per 100 ft., 75,000 ft. ¾ in. $7.75, 100,000 ft. 1 in. $10.90 and 4,000 ft. 2 in. $19.24.

Ont., Goderich—For two-170 hp. gasoline engine, two 750 and one 650 gal. centrifugal pumps with electric motor, to Turbine Equipment Co. Ltd., 73 King St. W., Toronto. Engrs. est. $15,000.

Que., Montreal—Enlarging 2 rapid sand filteration basins, 50,000,000 imp. g.p.d. capacity, to Atlas Constr. Co., Ltd., Belmont St., $1,013,140.

B. C., West Vancouver — New Nelson Creek waterworks, intake, pipes, etc., to Bartholomew & Montgomery, 510 Hastings St., Vancouver, $54,100.

Sewers

Proposed Work

Massachusetts—South Essex Sewerage Dist., Salem, 4,150 lin.ft. 33 x 34 and 30 x 42 in. concrete trunk sewers in Sect 7. Beverly and Danvers, from Welch & Moynihan, Salem, $72,000.

Pa Pittsburgh—Soon takes bids 15 in. terra cotta sewers in Broad, Herrod, Werder, Milford, and Danley Sts., etc. $40,000. Dept. Pub. Wks., City County Bldg., engrs.

N. C., Clayton—Making plans and soon takes bids 2½ mi. vitr. sewers, etc. in various streets. W. N. Pitt, Durham, engr.

O., Cincinnati — Hamilton Co. plans sewage disposal plant for Sewer 31, Dist. 7, $76,219; and 107,565 ft. 6- to 15-in. vitr. clay sewer in above district, $431,187. L. C. Boyatt, Court House, engr.

O., Salem—Plans sewage disposal plant. $193,000 bond election in November for same. E. S. Barckhoff, Salem, engr.

O., Wellsville—Bd. Control plans sewer in McQueens Run. $100,000.

Mich., Muskegon — Pearce, Greeley & Hansen, engrs., 6 North Michigan Blvd., Chicago, Ill., submitted report sewage disposal works, here, for City. $1,000,000. Noted Mar. 24.

Neb., Hastings—See "Waterworks."

Tex., Amarillo—Takes bids about Oct. 1, new sewage disposal plant. $350,000. Wynkoop Kiersted, 614 Interstate Bldg., Kansas City, Mo., engr. H. B. Jones, city engr. Noted Aug. 25.

Tex., Lockney—Hawley & Roberts, engrs., Leader Bldg., Lubbock, and Cotton Exch. Bldg., Ft. Worth, soon take bids sewers in various streets, here, for City, T. Z. Reed, mayor. $55,000 bonds voted.

Tex., Weslaco—See "Unclassified."

Tex., Yakum—Making preliminary plans extending sewers, etc. into outlaying districts. $75,000 bonds election soon for same. Terrell Bartlett Engineers, Calcasieu Bldg., San Antonio, engrs.

Calif., Colton—Plans extending sewers in nothern section city. To exceed $25,000.

Calif., Compton—Making plans 15,000 lin.ft. 8 in. vitr. sewers, etc. in Belle Vernon Acres. G. Rood, city engr.

Calif., Coronado—T. H. Messer, city mgr. making estimates sewage disposal plant. $30,000 or more.

Calif., Fullerton—Made plans 19,974 ft. 6- to 10-in. vitr. sewer, etc. in Basque Ave., etc. C. M. Thorpe, city engr.

Calif., Monterey—Defeated $25,000 bonds, storm sewer in lower section city.

Calif., Pomona—Making plans 8 in. vitr. sewers in 8th and 9th Sts., etc. $25,000 or more. F. C. Froehde, city engr.

Calif., San Francisco—Making plans sewer in Noriega St. $35,000 or more. M. M. O'Shaughnessy, city engr.

Calif., San Gabriel—Voted $55,000 bonds, drains, sewers, culverts, etc. in various streets.

Calif., Southgate—Plans concrete sewer, c.i. water mains, etc. in various streets. To exceed $25,000. E. M. Lynch, Central Bldg., Los Angeles, engr.

Calif., Westmoreland — Westmoreland Sanitary Dist. plans sewer and drainage construction. To exceed $25,000.

B. C., Vancouver — Vancouver & Dist. Joint Sewage & Drainage Bd., making plans 5 to 6 mi. False Creek Interceptor Sewer. $1,500,000.

Bids Desired

Mass., Boston—Sept. 21, by Dept. Pub. Wks., sewerage works in various streets in Dorchester. $25,000. J. H. Sullivan, comr.

Mass., Cambridge—(br. Boston)—Sept. 23, by Pub. Buildings Dept., City Hall, 1 story, rein.-con. offal receiving building, Raymond St. $65,000. Blackall, Clapp & Wittemore, 31 West St., Boston, archts.

N. Y., St. George — Sept. 21, by J. A. Lynch, pres. Richmond Boro, Boro Hall, sewerage system in Linoleumville; temporary storm water system in Victory Blvd.; also granite block paving area 2 ft. wide adjoining trolley tracks on Richmond Terrace.

N. J., Hawthorne—Sept. 30, by Boro Comrs., J. A. Shea, clk., School 1, Lafayette Ave., sewerage eystem. H. J. Harder, 129 Market St., Paterson, engr., adv. E. N.-R. Sept. 15.

Ky., Louisville—Oct. 7, by Commissioners of Sewerage, M. H. Crawford, chn., Bd. of Trade Bldg., 3rd and Main Sts., Emerson Street Sewer, Contr. 35. J. B. F. Breed, ch. engr.

O., Cleveland—Sept. 21, by City, covered sludge drying beds and storm drain in Southerly Sewage Disposal Plant. G. B. Gascoigne, Leader Bldg., engr.

O., Delphos—Nov. 15, by Bd. Control, sewage filtration plant. $185,115.

O., Willowick — Sept. 24, by Village, sewers in Vine Street Dist. $125,000. Sterling Eng. Co., 7016 Euclid Ave., Cleveland, engr.

Ind., Princeton—Sept. 26, by City, 2 mi. sewers in various streets. $100,000. Private plans. Address City Clerk, Princeton.

Mich., Halfway — Sept. 21, by A. J. Wendt, village clk., 13,604 ft. 18- to 66-in. vitr. or concrete sewer, etc. in Sewer Dist. 3; and 29,136 ft. 12- to 37-in. sewers, etc. in various streets. H. R. O'Mara, Halfway engr.; adv. E. N.-R. Sept. 15.

Ill., Chicago—Sept. 22, by M. J. O'Brien, clk. Sanitary Dist. of Chicago, 910 South Michigan Ave., Salt Creek Intercepting Sewer, Contr. 2; adv. E. N.-R. Sept. 15.

Mo., St. Louis — Sept. 27, by Bd. Pub. Serv., 208 City Hall, two 25 x 29 ft. rein.-con. arch sewers, etc. in Sect. D of River Des Peres Project. $3,071,000. W. W. Horner, 300 City Hall, engr.

Tex., Amarillo—Taking bids 2½ mi. 6- to 18-in. vitr. or concrete sewer in San Jacinto, Roberts Pl., Country Club and Old Town additions. $100,000. H. B. Jones, city engr.

Tex., Houston—Oct. 19, at office of City Secretary, monolithic concret sewers, etc., in Reinermann St., etc. O. F. Holcombe, mayor, adv. E. N.-R. Sept. 15.

Okla., Hobert—Sept. 21, by C. R. Williams, city clk., 14,500 ft. 8 and 10 in. vitr. clay sewers, etc. in sewer Dists. 5 and 6.

Ont., Toronto—Sept. 27, by T. H. Foster, mayor, ½ mi. concrete or brick trunk sewer in Eglinton, Tyrol and Ingwell Aves. $100,000. R. C. Harris, City Hall, engr.

B. C., Point Grey — See "Contracts Awarded."

Contracts Awarded

Mass., Beverly—South Essex Sewerage Dist., Fort Ave., Salem, pumping station, inlet and sewers in various streets here, to Engineering Serv. & Constr. Co., 220 Devonshire St., Boston, $27,209. Noted Aug. 18.

Mass., Wellesley — Sewers in various streets, to A. Cefalo, 316 Belgrade Ave., Roslindale, $19,000. Noted Sept. 1.

Pa., Phila.—Dept Pub. Wks., Bureau of Engineering, to D. Delisa, 4842 North Leithgow St., branch sewer in Bouvier St. $7,978, Ontalauna St. $2,469, Sprague St. $3,069, and Willard St. $4,434; to S. Vallone & Co., 1720 South Chadwick St., Chancellor St. $6,584; to A. Bonitatibus, 300 Mt. Pleasant Ave., Clivedon St. $7,500; to A. . . . answering your Questions regarding High-Early-Strength Concrete

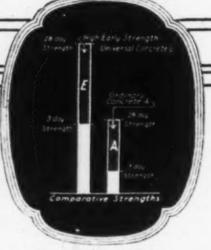
QUESTION	ANSWER
1—What is *High-Early-Strength* Universal Concrete?	Concrete with a *3-day* strength equal to the *28-day* strength of ordinary concrete.
2—Are special materials and equipment needed?	No. It is made with the *usual* materials, *usual* labor, *usual* equipment and standard Universal cement, all applied according to thoroly tested methods.
3—What is its chief advantage?	Saves time! Concrete for foundations, buildings, sidewalks, pavements and improvements of all kinds is made ready for use in *3 days* instead of *3 weeks.*
4—Is there any additional important advantage?	Yes. Such concrete not only has a higher *early* strength, but also a greater *ultimate* strength and therefore is *permanently* better and stronger than ordinary concrete. (See diagram.)
5—Is its use restricted to certain kinds of jobs?	No. Because it may be made as workable as desired, *High-Early-Strength* Universal Concrete is used for any and all kinds of concrete work.
6—Has *High-Early-Strength* Universal Concrete been fully tested?	Yes. Thousands of laboratory tests, years of experiment and hundreds of actual jobs prove the value of *High-Early-Strength* Universal Concrete.
7—What other advantages does *High-Early-Strength* Universal Concrete offer?	It is unnecessary to stock extra brand of material as *High-Early-Strength* concrete is obtained with the *usual* materials, *usual* labor, *usual* equipment and the same quality Universal cement as used for ordinary construction.
8—Where can I get detailed information on *High-Early-Strength* Universal Concrete?	Full details for use on any concrete work will be sent promptly on receipt of the coupon below.



(Copyright U. P. C. Co.
All rights reserved)

High-Early-Strength concrete "E" made by using special methods and standard Universal cement is *permanently* better and stronger than concrete as ordinarily produced as shown in the diagram. More detailed information furnished promptly on request. Just use the coupon.

Highways, Springfield, two 35 ft. spans rein.-con. girder bridges on Route 7, Sect. 4-BL, Henry Co.; one 50 ft. and two 30 ft. spans rein.-con. girder bridge, also two 100 ft. and one 150 ft. rein.-con. substructure on Route 10, Sect. 36-B, two 100 ft. and one 150 ft. span steel superstructure on Route 10, Sect. 36-C, all Vermillion Co.; 28 ft. span rein.-con. slab bridge also 30 ft. and 77 ft. rein.-con. bridge on Routes 122 and 123-B, Mason Co.; 35 ft. and two 40 ft. span rein.-con. girder bridges on Route 126 and 116-B, Montgomery Co.; two 24 ft. and 28 ft. span rein.-con. slab, two 35 ft. and two 45 ft. span rein.-con. girder bridges on Routes 142, 115-B, and 116-B, all Hamilton Co.; 35 ft. rein.-con. girder bridge and 100 ft. rein.-con. substructure on Route 142, Sect. 124-B, and 100 ft. steel superstructure, on Route 142, Sect. 124-C, both Saline Co.; four 35 ft. and three 24 ft. span rein.-con. slab and girder bridges, on Route 64, Sects. 130 and 131-B, Du Page Co. F. T. Sheets, Highway engr.

Iowa — Sept. 20, by State Hy. Comn., Ames **(F.A.P. means Federal Aid Project and B.P. Bridge Project)** 80 x 20 ft. pony truss bridge on B.P. 153, Greene Co.; 40 x 20 ft. I-beam bridge and 16 x 24 ft. I-beam bridge with wood structures, and 60 x 20 ft. pony truss bridge and 6 culverts on F.A.P. 14, Harrison Co.; 80 x 20 ft. pony truss bridge with two 40 x 20 ft. I-beam approaches on B.P. 103, Howard Co.; 130 x 20 ft. high truss bridge with two 40 x 20 ft. I-beam approaches on F.A.P. 230, Linn Co.; 40 x 20 ft. I-beam bridge with two 32 x 24 ft. I-beam approaches; one 40 x 20 ft. skew I-beam bridge with 5 ft. sidewalks, 50 x 20 ft. pony truss bridge addition, two 32 x 24 ft. I-beam bridges, three 32 x 24 ft. I-beam bridges, and 160 x 20 ft. high truss bridge with six 40 x 20 ft. I-beam approaches and 2 culverts, on F.A.P. 276 and 303. Tama Co.; 45 Culverts and extensions on B.P. 538 and F.A.P. 212, Franklin Co.; also 35 culverts on F.A.P. 20, Monroe Co. R. E. White, highway comr.

Kan., Eureka—See "Streets and Roads."

Nebraska—See "Streets and Roads."

Ark., Dardanelle—Sept. 29, by State Hy. Comn., Little Rock, 2,045 ft. steel and concrete bridge over Arkansas River, on Federal Aid Project 244-A, Pope and Yell Counties, here. D. H. Blackwood, chn.; adv. E. N.-R. Sept. 15.

Texas—Washington Co. (Brenham) and Waller Co. (Hempstead) taking bids steel and concrete bridge across Brazos River, on Highway 20 between Washington and Waller Counties. $315,000. Address State Hy. Dept., Austin, or S. A. Bracher, co. engr. Washington Co.

Tex., San Antonio—Sept. 30, by City Engineering Dept., 1 span, 90 ft., rein.-con. bridge across San Antonio River, on Martin St. $35,000. I. Ewing, city engr.

Calif., Hanford — E. F. Pickerill, clk. Kinks Co., taking bids 360 ft. cresoted piling and treated timber bridge over Kings River. R. May, Hanford, co. surv.

Contracts Awarded

Mass., Springfield — Bd. Water Comrs., 32,740 lin.ft. 48 and 54 in. pipe line from Provin Mountain Reservoir to Springfield, Contr. 8, to D. O'Connell's Sons, Inc., Holyoke, $536,810; and river crossing, Contr. 9, to Merritt, Chapman & Scott Corp., 17 Battery Pl., New York City. $346,375.

Connecticut—J. A. Macdonald, Highway Comr., Hartford, one 60 ft. span steel and concrete bridge over Nonewang River, in Woodbury, to L. E. McLaughlin, Inc., 217 Jefferson Ave., New London, $28,102; concrete bridge over Rooster River at Fairfield, to J. Mariani, 106 Hobart St., New Haven, $5,867; and Hollow bridge, 60 ft. span rigid frame, native stone approaches over Farmington River, at Hartland, to Miller Bros. Constr. Co., 151 Earl St., Hartford, $16,493. Grand total $50,462. Noted Aug. 11.

Advantages of Independent Concrete Pipe Sewers

from the ENGINEER'S Point of View

Permanency and economy of concrete pipe sewers are proved by long and successful service.

Pipe built locally—
The special pipe plant becomes a "Home industry." Uses local labor and materials wherever possible. Benefits local business.

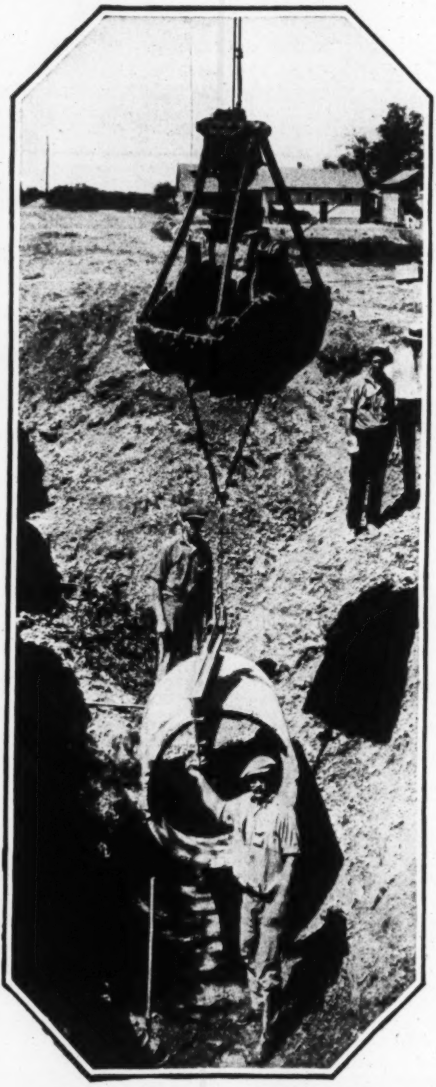
Inspection is facilitated—
Materials, workmanship and pipe units are tested and inspected at every stage of construction.

Pipe is low in cost—due to the economies of "Independent" advanced methods of manufacturing pipe.

Entire joint is visible for inspection, until trench is backfilled.

Completed sewer is strong, tight, permanent and efficient. Provides free flow and maximum capacity. Endures for generations, with little or no upkeep.

Let us send you engineering data.



Placing Independent Concrete Sewer Pipe at Lansing, Mich. One machine does the digging, laying and back-filling.

from the CONTRACTOR'S Point of View

Building the pipe locally—on the job or nearby, assures prompt delivery along the line of work, ready for the construction crew to lay.

"Recessed" Joints make the pipe easier to lay. Lower half of joint is sealed inside the sewer—upper half of joint is filled on top of pipe.

Pipe can be laid easily even where water, caving soil, or other difficult trench conditions are encountered.

Laying can follow excavating closely, and back-fill can be made immediately after pipe joints are sealed, if required. Often one machine can do the three operations.

Finished sewer means a profitable job, and a satisfied "customer."

Get our estimates on your sewer projects.

INDEPENDENT CONCRETE PIPE CO., 202 N. West St., Indianapolis, Indiana.

INDEPENDENT

Reinforced Concrete Pipe

Bridges (Continued)

N. Y., New Rochelle — Westchester Co. Park Comn., 72 West Pondfield Rd., Bronxville, bridge over New Rochelle Park Creek, connecting Glen Island and New Rochelle mainland, here, to J. D. Walsh, 132 4th St., Long Island City, $111,955. Noted Aug. 11.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, Bridge Div., 162 ft. concrete encased steel bridge, 66 ft. over Phila. & Reading R.R. tracks, at Linden Ave., to Robbins Contg. Co., Inc., 1615 Summer St., $128,948. Noted Aug. 18.

Pa., Phila.—Dept. Pub. Wks., Bureau Engineering, Bridge Div., 65 x 96 ft. concrete encased steel bridge on rein.-con. abutments and pier over Chester Branch of Reading Co., on line of 61st St., to G. F. Dobbin, 1020 South 47th St., $174,344. Noted Sept. 1.

Va., Danville—City, C. B. Strange, aud., bridge over Dan River, on Main St., to Concrete Steel Bridge Co., Clarksburg, W. Va., $194,000.

Va., South Norfolk (Norfolk P. O.)—Norfolk-Portsmouth Bridge Corp., Park and Truxton Sts., Norfolk, C. M. Jordon, pres., substructure for Norfolk-Portsmouth Bridge, 1,000 ft. steel truss span with lift span, and 665 ft. rein.-con. trestle over southern branch Elizabeth River, here, to Hardaway Contg. Co., Columbus, Ga., $155,050; and superstructure, to Atlantic Bridge Co., Greensboro, N. C., $315,534. Noted June 16.

O., Cleveland—Cuyahoga Co., rein.-con. bridge over Ridge Rd., to M. S. Nelson, United Bank Bldg., $29,030. Noted Aug. 11.

Indiana—State Hy. Comn., Indianapolis, to D. Jenkins, 501 Gilbert Ave., Terra Haute, three bridges on Road 41, Contr. 145, Lake Co., $23,342; to Wrightsman & Gray, Mooreland, 2 bridges on Road 46, Contr. 156, Owen and Monroe Counties $8,806, and 1 bridge on Road 3, Route 146, Delaware Co. $6,073; to Yost Bros., Decatur 4 bridges on Road 3, Contr. 147, Allen Co. $27,509; to I. E. Smith Constr. Co., Richmond, 1 bridge on Road 27, Contr. 149, Wayne Co. $17,406, and 1 bridge on Road 27, Contr. 151, Jay Co. $15,064; to Clements & Doale, Williamsburg, 1 bridge on Road 29, Contr. 152, Clinton Co. $5,057; to E. F. Apple, Indianapolis, 2 bridges on Road 32, Contr. 153, Madison Co., $20,869; to Vincennes Bridge Co., Vincennes, 1 bridge on Road 39, Contr. 154, Clinton Co. $9,677, 3 bridges on Road 67, Contr. 161, Morgan Co. $16,499, and 1 bridge on Road 46, Contr. 157, Brown Co. $15,740; to Davis Constr. Co., Tipton, 3 bridges on Road 41, Contr. 155, Newton Co. $28,944; and to Ryan & Ryan, Washington, 2 bridges on Road 56. Contr. 159, Washington Co., $17,239. Grand total $212,225.

Illinois—State Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, to A. O. McCoy, Illinois, bridge on Route 10, Sect. 16-B, Sangamon Co. $13,525, to Chernus Constr. Co., Sioux City, Ia., three 38 ft. span concrete girder bridge on Route 49, Sect. 135-B, Iroquois Co. $16,735, 31 ft. and 50 ft. span concrete girder bridge, and 20 ft. concrete slab bridge on same road, Sect. 136-B $15,744, also 22 ft. and 28 ft. span concrete slab bridge and 40 ft. concrete girder bridge, on Route 182, Sect. 101-B, Marion Co. $20,745, to Stephen Bros., 612 Endicott Bldg., St. Paul, Minn., 55 ft. span concrete girder bridge on Route 72, Sect. 113-B, Carroll Co., $11,045, to M. R. Deyo Mfg. & Constr. Co., 801 West Washington St. E., Peoria, 30 ft. concrete girder bridge and 24 ft. span concrete slab bridge, on Route 78, Sect. 134-B, Fulton Co., $32,050, to G. C. Fairclo, Champaign, four 50 ft. span concrete girder bridge on Route 89, Sect. 115-B, Bureau Co., $22,395; to Zimmerly Bridge Co., Pairs, three 40 ft. span concrete girder bridge and 28 ft. span concrete slab bridge, on Route 142-A, Sect. 101-B, Wayne Co., $17,610; to Herrick Constr. Co., Carlinville, three 45 ft. span concrete girder bridge and concrete substructure for two 170 ft. steel and two 59 ft. girder approach spans on Route 148, Sect. 129-B, Williamson and Franklin Counties, $29,683; to Stupp Bros. Bridge & Iron Co., Syndicate Trust Bldg., St. Louis, Mo., steel superstructure for two 170 ft. steel spans on Route 148, Sect. 129-C, Williamson and Franklin Counties, $6,239; to J. P. Lyon, Robinson, one 62 ft. span steel plate girder bridge with two 34 ft. concrete girder approach spans, on Route 12 Sect. 7-V, Clay Co., $23,736. Grand total $209,507.

Kan., Cordell—Rooks Co. (br. Stockton), two 50 ft. steel truss, one 40 deck girder and five 8 ft. multi box span bridges on Project 55-A, near here to Kelly & Johnson Constr. Co., Talmo, $17,596. Noted Aug. 4, under "Stockton."

Nebraska—See "Streets and Roads."

Mo., St. Louis—J. R. Scott, Jr., and T. J. Scott, Merchants Laclede Bldg., sub-structure 5,200 ft. rein.-con. and steel bridge, 40 ft. over Mississippi River, at Chain of Rocks Waterworks Station, to Union Bridge & Constr. Co., 903 Sharp Bldg., Kansas City; and superstructure for same, to Amer. Bridge Co., 1519 Liberty Central Bldg. Engrs. est. $2,500,000. Noted May 12.

Arkansas—State Hy. Comn., Little Rock, 175 ft. rein.-con. bridges and approaches over Mill Creek, Scott Co., and 226 ft. bridge over Fort Smith Rd. to O'Hagan McVicker Co., Kansas City, Mo., $32,948 and $31,683 respectively; bridge, grading, etc. on Thornton-Hampton, Rd., to D. H. Hoard, Little Rock, $42,277; and 200 ft. rein.-con. and steel bridge over St. Francis River, at Marked Tree, to Williams & Williams, Batesville, $111,645. Grand total $218,553.

Arkansas—State Hy. Comn., Little Rock, 4,200 lin.ft., rein.-con. trestles on Harahan Viaduct, Federal Aid Project 300-A, Crittenden Co., to Fuller Constr. Co., Little Rock, $450,339. Noted Aug 11.

Calif., Los Angeles — Bridge over Los Angeles River, on 4th St., to T. Kelly & Sons, 815 South Hill St., $206,755.

Dams

Proposed Work

Tex., Remount (mail Waco) — Marland Oil Co., Big Lake, making surveys dam across White Rock Creek, diverting 20,000 acre ft. water annually from junction of Brazos and Bosque Rivers, etc., McLennan Co., near here. $150,000. Private plans.

Calif., Los Angeles — City and Los Angeles Flood Control Dist., plan dam in Tujunga Canyon. City appropriates $3,000,000 and District $1,600,000 toward cost.

Que., Ste Julienne—Gatineau Power Co., 180 St. James St., Montreal, soon takes bids developing Magnan Falls on Quareau River, incl. dams, powerhouse, etc. $1,500,000.

Bids Received

Wash., Seattle—Bd. Pub. Wks., County-City Bldg., Sept. 9, constructing Diablo Dam, concrete arch type, on Skagit River, Whatcom Co., from Winston Bros., 801 Globe Bldg., Minneapolis, Minn., $2,546,338; from A. M. Guthrie & Co., Ry. Exch. Bldg., $2,770,830; and from Puget Sound Bridge & Dredging Co., 903 Sharp Bldg., $2,940,400. Noted Aug. 11.

Railways

Proposed Work

Michigan — Dept. Street. Railways, St. Jean and Shoemaker Aves., Detroit, D. A. Smith, genl. mgr., making plans extending 1 mi. double track on Livernois Ave. from Davison to Fenkell Aves., also 1 mi. on Fenkell Ave. from Livernois to Wyoming Aves., in Detroit. $140,000. Private plans.

Texas — Clinton & Oklahoma Western R.R. Co., c/o F. Kell, pres., Wichita Falls, making surveys 94 mi. railway from state boundary in Hemphill Co. to Pampa in Gray Co. $3,000,000. Private plans.

Excavation, Drainage, Irrigation, Levees, River and Harbor

Proposed Work

La., New Orleans — Orleans Levee Bd., New Court House, made preliminary plans straightening out and raising St. Andrew St. Levee, Orleans Co. $50,000. R. B. Kohnke, New Court House, engr.

Ark., Atkins—Pope Co. Levee Dist., E. A. Williams, atty., soon takes bids repairing 1½ mi. breaks in levee, 80,000 cu.yd. excav., etc. $40,000. E. Hale, Natl. Bank Bldg., Pine Bluff, engr.

Ark., Dardanelle—Carden Bottoms Levee Dist., D. C. Love, pres., soon takes bids rebuilding Caden Bottoms Levee, $60,000. E. Hale, Natl. Bank Bldg., Pine Bluff, engr.

Tex., Houston — See "Buildings — Industrial."

Tex., Pryor—City, c/o W. R. Terpering, secy., and Fort Bend Co., making preliminary plans irrigating approximately 10,000 acres land. $100,000. Terrell Bartlett Engineers, Calcasieu Bldg., San Antonio, engrs.

Tex., Weslaco—See "Unclassified."

Bids Desired

Mass., Boston—Sept. 23, at office. Metropolitan Dist. Water Supply Comn., 24 School St., clearing approximately 30 acres and excavating 20,000 cu.yd. for 1 mi. open channel, in Hopkinton. F. E. Winsor, ch. engr. comn.

New York—Sept. 23, by M. Cosgrove, comr. Docks, Pier "A", foot of Battery Pl., New York City, dredging in Manhattan and Brooklyn Boros.

Miss., Greenwood — Sept. 26, by Comrs. Big Sand D. D. of Le Flore and Carroll Counties, c/o E. L. and H. C. Mounger, attys., Greenwood, 42,000 cu.yd. fill from canal, 10,000 cu.yd. levee repairs, 300 ft. ditch excav., etc.

Mo., Bloomfield—Sept. 20, by S. Wilson, engr. D.D.5, Stoddard Co., removing, etc. 173,803 cu.yd. earth from main ditch D.D.5.

Calif., Tracy—See "Contracts Awarded."

Que., Riviere du Loup—Sept. 16, by S. E. O'Brien, secy. Dept. Pub. Wks., Ottawa, Ont., reconstructing and repairing wharf, here. $20,000.

Que., Roberval—Sept. 22, by S. E. O'Brien, secy. Dept. Pub. Wks., Ottawa, Ont., reconstructing breakwater, here. $15,000.

Contracts Awarded

Mass., Marlboro — Sisters of St. Anne Academy, Broad St., grading and two 185 ft. concrete retaining walls, 12 ft. high, and two 300 ft. walls, 10 ft. high, Broad St., to T. Fahey, 16 South St.

Mass., Medford (br. Boston)—For 360 ft. rein.-con., retaining wall, Fulton St., to T. Mulcare, Inc., 64 Western Ave., Brighton.

Louisiana—Bd. State Engineers, New Orleans Court Bldg., New Orleans, to W. A. Marcotte, Moreauville, levee work, at Coco Point, Line A, $3,889; to Clopton & Rushing, Melville, at Norman $5,464, and Bowden $5,272; to Picard Constr. Co., Hicks Bldg., New Orleans, Firmont $738, Catholic Church $4,920, Bennett $16,875 and Zimmer $3,444; to E. E. Rabalais, Bunkie, Marshall $10,000 and St. Romain $2,375; to G. Hoggsett, Mansura, Ellis Coco $560 Cain $3,900; to H. J. Mayeaux, Moreauville, Willard Coco $510, all above on bank Bayou $3,600, Tilden School House $490, and Barre des Glaizes in Avoyelles Parish. Grand total $61,477.

Ill., Lockport—Clerk Sanitary District of Chicago, 910 South Michigan Ave., Main Channel Wall, near here, Contr. 3, to Green & Sons Co., 6 North Michigan Ave., Chicago, $769,500. Noted Aug. 4.

Calif., Tracy—Banta-Carbona Irrigation Dist. will line canal by district forces.

N. S., La Have — Dept. Pub. Wks., Ottawa, Ont., dredging Areas 1 and 2, Le Have River, here, to Beacon Dredging Co. Ltd., Halifax, $66,600.

N. B., Escuminac—S. E. O'Brien, secy. Dept. Pub. Wks., Ottawa, new breakwater, here, to K. McLaggan & Co., Devon, $48,000. Noted July 21.

Que., Varennes — S. E. O'Brien, secy. Dept. Pub. Wks., Ottawa, dredging channel and basin, here, to Les Chantiers Masseau, Sorel, $48,700.

Ontario — Dept. Pub. Wks., Ottawa, repairing harbor at Saugeen River, to R. M. Hunter, Kincardine, $32,000.

B. C., Victoria—Dept. Pub. Wks., Ottawa, Ont., dredging channel at Hospital Rock, here, to North Western Dredging Co. Ltd., Vancouver, $35,028.

Streets and Roads

Bids Desired

Massachusetts—Sept. 20, by Dept. Pub. Wks., Boston, W. F. Williams, comr., grading and bituminous macadam paving 8,150 ft. highway in Agawam.

Mass., Boston—Sept. 19, by Dept. Pub. Wks., J. H. Sullivan, comr., sheet asphalt or bitulithic paving various streets in Wards 11, 14, 15 and 18. $25,000.

Mass., Framingham — See "Contracts Awarded."

Rhode Island—Sept. 21, by State Bd. Pub. Roads, State House, Providence, bituminous macadam paving (penetration method) approximately, 2.697 mi. Federal Aid Project 39, Contr. 2708, and rein.-con.

INDUSTRIAL

NOT MERELY A MACHINE

But An Earning Power

STILL another customer writes that in addition to paying for itself in a short time, his Industrial is earning over $100.00 a day.

Wouldn't you be enthusiastic about your machine if it showed a profit at the end of each day of $100.00 or more?

Surely sturdy construction, ease of operation and speed contributed heavily to the profit making qualities of the Industrial on this work.

You may not be able to show such startling results on all your work, but an Industrial will do more work, with less maintenance and show a profit where there's one to be had.

Write for circular or let our representative point out some of the major features of the Industrial. Which will it be?

INDUSTRIAL WORKS, BAY CITY, MICHIGAN

Atlanta, Ga. Hurt Bldg.
Chicago, Ill. McCormick Bldg.
Cincinnati, Ohio Dixie Terminal Bldg.
Detroit, Mich. Book Building
New Orleans, Louisiana Whitney Central Bldg.
New York City 50 Church St.
Philadelphia, Pa. Packard Building
Pittsburgh, Pennsylvania Federal Reserve Building
San Francisco, Calif. Monadnock Building
St. Louis, Mo. Railway Exchange Bldg.

Streets and Roads (Continued)

paving approximately 3.531 mi. Federal Aid Project 31, Contr. 2711.

Rhode Island — Sept. 21, by State Bd. Pub. Wks., Providence, grading and bituminous macadam paving highway in North Smithfield and Cumberland. To exceed $25,000. Noted June 23.

N. Y., Long Island City—Sept. 19, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., grading and sidewalks on 74th, 137th, 49th (19th Ave.) and 59th (Holmes Ave.) Sts.; also sidewalks, etc. on 47th and 48th Aves.

N. Y., Long Island City—Sept. 21, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., grading, curbing, etc. Catalpa Ave., Fremont and Woodward (Ave.) Sts.; grading and sheet asphalt on concrete repaving Woodside Ave., etc.

N. Y., St. George — Sept. 21, by J. A. Lynch, pres. Richmond Boro, Boro Hall, grading and bituminous concrete paving Watchogue Rd. from Jewett to Wolly Aves.

N. J., Hammonton—Sept. 26, at Town Hall, W. R. Seely, town clk., concrete curbing and sidewalks on various streets. J. A. Baker, town engr.; adv. E. N.-R. Sept. 15.

Pa., Swissvale—Sept. 20, by Boro at office H. D. Caldwell, secy., improving February, Way, Milligan and Patterson Aves., 3,950 cu. yd. earth excav., 3,813 sq.yd. brick on 6 in. concrete paving, etc. A. Hutchinson, boro engr.

Maryland — Sept. 20, by State Roads Comn., Baltimore, concrete paving 1.33 mi. Contr. M-91, Montgomery Co.; amiesite paving 0.91 mi. Contr. S-4-A, Somerset Co. J. N. Mackall, chn.

Maryland — Sept. 20, by State Roads Comn., Baltimore, concrete paving 1.4 mi. Contr. M-82, Montgomery Co., and 1 mi. Contr. Q-41, Queen Anne Co.; also graveling 2 mi. Contr. SM-40, St. Marys Co. J. N. Mackall, chn.; adv. E. N.-R. Sept. 15.

Md., Baltimore—Sept. 21, by Bd. Awards, curbing and sheet asphalt paving 5,870 sq.yd. Contr. 434; and concrete paving 6,200 sq.yd. Contr. 435. N. L. Smith, City Hall, acting highways engr.

Virginia—Sept. 27, by State Hy. Comn., Richmond, grading, bridging, surfacing, etc. Projects S-208-B, S-297-A, S-424-A, S-464-C and D, S-468, S-511 and S-512.

W. Va., Clarksburg—Sept. 22, by Harrison Co. Court, Bermudez hot mixed macadam surfacing 1.5 mi. Brushy Fork Rd., Simpson Dist., 2 mi. Marshville Rd., and 1 mi. Salem Rd., both Tenmile Dist. M. L. Loudin, co. clk.

W. Va., Harrisville—Oct. 4, by Ritchie Co. Court, clearing right-of-way, grading, etc. 2.16 mi. Pennsboro-Pullman-White Oak Rd., D. W. Shock, co. road engr.

W. Va., Wayne—Sept. 19, by Wayne Co. Court constructing 1.5 mi. Twelve Pole Creek Rd., 1 mi. Dock Creek Rd., both 22 ft., Cerodo Dist. H. Wiles, co. road engr.

Illinois—Sept. 21, by State Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, concrete, vitr. brick or bituminous concrete surfacing 8.65 mi. Route 122, Sect. 123, and 1.64 mi. Route 122, Sect. 124, both Mason Co. 5.99 mi. Route 126, Sect. 116 Montgomery Co., 5.57 mi. Route 130, Sect. 122 Jasper and Richland Counties, 5.39 mi. Route 142, Sect. 124 Saline Co., 3.68 mi. Route 148, Sect. 130 Williamson Co., 2.7 mi. Route 160, Sect. 135 Madison Co., and 0.71 mi. Route 78, Sect. 135 Fulton Co., grading 1.26 mi. Route 10, Sect. 36-A Vermilion Co., 1.26 mi. Route 10, Sect. 20-A, Pike and Scott Counties, 6.97 mi. Route 142, Sect. 115-A and 6.5 mi. Route 142, Sect. 116-A, both Hamilton Co., 0.85 mi. Route 142, Sect. 124-A Saline Co. F. T. Sheets, highway engr.

S. C., Lancaster—Sept. 28, by City, curbing, guttering, paving, etc. 103,000 sq.yd. various streets. H. S. Jaudon Eng. Co., Elberton, Ga., engrs.

Florida—Sept. 20, by State Roads Dept., F. A. Hathaway, chn., Tallahassee, surface treating on 8 in. Florida Lime rock paving, Project 659, Road 3, Clay Co.; clearing, grubbing and grading 8.83 mi. Project 722, Road 43, Jefferson Co.; and 110 ft. creosoted timber overpass, on Project 717, Road 28, Bradford Co. J. L. Cresap, highway engr.

Alabama — Oct. 5, by State Hy. Dept., Montgomery, concrete paving 2.44 mi. roadway from Ft. Deposit to Butler Co. line toward Greenville; paving and graveling 18.09 mi. roadway between Tuscaloosa and Eutaw, Tuscaloosa and Green Counties; chert surfacing 9.913 mi. roadway between Bessemer and Tuscaloosa Co. line towards Tuscaloosa, Jefferson Co.; gravel surfacing 17.15 mi. roadway between Brewton and Perdido Station Escambia Co., 12.25 mi. roadway between Perdido Station and Bay Miniette, Baldwin Co., 17,865 mi. roadway between Belleville and Monroeville, Conecuh and Monroe Counties; also bridges, etc. on roadway between Marion and Greensboro, Perry and Hale Counties. W. Finnell, hy. dir.

Ala., Birmingham — Oct. 10, by City Comn., grading, curbing, guttering, walks and 2 in. bitulithic on 6 in. concrete paving 5 blocks Finley Ave., 24 ft., $31,300; also grading and 2 in. bitulithic on 6 in. concrete paving 4 blocks same avenue, 30 ft., $27,675. A. J. Hawkins, city engr.

Louisiana—Sept. 28, by State Hy. Comn., Baton Rouge, graveling 11.439 mi. Winnsboro-St. Joseph Highway, Federal Aid Project 180-B, Franklin Parish; and 14.074 mi. Alexanderia-Leesville Highway, Federal Aid Project 157-B, Rapides Parish. N. W. Bowden, Reymond Bldg., Baton Rouge, highway engr.

Louisiana—Sept. 29, by State Hy. Comn., Baton Rouge, grading, graveling and broken stone paving 13.942 mi. Winfield-Olla Highway, Federal Aid Project 177-A, Winn Parish. N. W. Bowden, Reymond Bldg., Baton Rouge, highway engr.

Kentucky—Sept. 23, by State Hy. Dept., Frankfort, **(S.P. means State Project)**, surfacing 4 mi. Middleboro-Pruden Rd., S.P. 5-F Bell Co., 3.07 mi. Pineville-Clear Creek Springs Rd., S.P. 112-A Bell Co., 14.2 mi. Salyersville-Paintsville Rd., S.P. 34-D, Magoffin and Johnson Counties; grading, etc. 4 mi. Greenup-Fullerton Rd., S.P. 106-B Greenup Co., 4.5 mi. same road, Sect. C, and 13.106 mi. London-Manchester Rd., S.P. 28-A Laurel Co. E. N. Todd, highway engr.

O., Cincinnati—Sept. 23 (extended date), by Comrs. Hamilton Co., grading, guttering and concrete repaving, etc. 55,800 sq.yd. Cleves and Warsaw Rd. $406,345. E. A. Gast, Court House, engr. Noted Aug. 25.

O., Hamilton—Sept. 20, by E. E. Roll, clk. Butler Co., surface treating 63,304 ft. Millikin, D and Wood Sts., etc., in St. Clair Twp., 16-20 ft. $62,500. W. Willard, Court House, engr.

MAKING BUILDING CODES UNIFORM

AMERICAN INSTITUTE OF STEEL CONSTRUCTION INC. AISC FOUNDED 1921

IT SOUNDS impossible. Perhaps it is. Yet continued efforts are being made to bring about this highly desirable standardization—and it's more than a dream in the field of steel construction. The A. I. S. C. Standard Specification is already being used in more than one hundred cities in the United States and Canada. This specification is estimated to be saving owners and other taxpayers more than $30,000,000 a year!

The Institute's Code of Standard Practice is clearing up all misunderstandings between buyers and sellers of structural steel. A Department of Architectural Relations and a competent engineering staff are aiding in the solution of technical steel construction problems everywhere. Our educational publicity marks the first concerted effort to tell the public all the facts about steel construction. Send for full information and your copy of the valuable fact-book, "STEEL NEVER FAILS."

AMERICAN INSTITUTE OF STEEL CONSTRUCTION, INC.

The co-operative non-profit service organization of the structural steel industry of the United States and Canada. Correspondence is invited. Address: Lee H. Miller, M. Am. Soc. C. E., Chief Engineer, 285 Madison Avenue, New York City

CONSTRUCTION NEWS

Some of the Week's Large Projects

AMONG the announcements for the current week are the following:

Proposed Work

Reservoirs and hydro-electric plants, Bryan, Tex., Brazos River Reclamation Ass'n. making plans, $50,000,000.

Schools, Chicago, Ill., Bd. Educ. having plans prepared, seven new high schools, $20,000,000.

Oil pipe line, Texas, Humble Pipe Line Co. making preliminary plans, $10,000,000.

Waterworks, Fort Worth, Tarrant Co., Tex., Water Control League, bond election Oct. 8, $6,500,000.

Apartment hotel and club, Chicago, Ill., Bryn Mawr Beach Hotel Co. plans, $5,000,000.

Temple, San Francisco, Calif., Islam Temple of Mystic Shrine plans Masonic Temple, $5,000,000.

Railway, Houston and Port Arthur, Tex., W. Doherty, pres., made plans, $4,000,000.

Paper mill, Port Townsend, Wash., Zellerbach Paper Corp., plans, $4,000,000

Street, Los Angeles, Calif., City plans paving, $3,145,000.

Apartment, Philadelphia, Pa., M. A. Bernhardt, archt., preparing plans, $3,000,000.

Irrigation, Grass Valley, Calif., Nevada Irrigation Dist., making plans, $2,200,000.

Bridge, Texas, J. W. Billingsley, New Orleans, La., plans, $2,000,000.

Hotel, Oklahoma City, Okla., Syndicate having preliminary plans prepared, $2,000,000.

Apartment, Chicago, Ill., P. F. Reynolds, having plans prepared, $2,000,000.

Club, San Francisco, Calif., Decimo Club having plans prepared, $2,000,000.

Hotel, club, gymnasium and garage, San Antonio, Tex., San Antonio Turn Verein had plans prepared, $1,500,000.

Office, Tulsa, Okla., R. T. Daniels, having preliminary plans prepared, $1,500,000.

Office, Tulsa, Okla., C. C. Cole, having preliminary plans prepared, $1,500,000.

Hotel, Seattle, Wash., H. A. Vance, had plans prepared, $1,500,000.

Hotel, Cleveland, O., Cleveland Hotel Co., having plans prepared, $1,500,000.

Sewage treatment plant, Chicago, Ill., Sanitary Dist. of Chicago, plans, $1,500,000.

Studio, Hollywood, Calif., L. West having preliminary plans prepared, $1,400,000.

Sewers, Oklahoma City, Okla., made preliminary plans, $1,100,000.

Apartment hotel, Fort Worth, Texas, G. T. Vickers, having plans prepared, $1,000,000.

Street lighting system, St. Louis, Mo., Bd. Pub. Serv. takes bids in November, $1,000,000.

Hotel, Oklahoma City, Okla., L. W. Wentz having preliminary plans prepared, $1,000,000.

Roundhouse, machine shop, etc., Tecumseh, Ont., Canadian Nat'l Ry., having plans prepared, $1,000,000.

Apartment, Charlotte, N. C., Charlotte Apartment House Corp. plans, $1,000,000.

Bids Desired

Aquarium, Chicago, Ill., Graham, Anderson, Probst and White, archts., taking bids, $3,000,000.

Bids Received

Theatre, San Francisco, Calif., H. A. Minton, associated archt., from MacDonald & Kahn, approximately $1,600,000.

Contracts Awarded

Dam, Seattle, Wash., Bd. Pub. Wks. to Winston Bros., Minneapolis, Minn., $2,546,388.

Bridge, Paducah, Ky., Paducah-Ohio Bridge Co. to Union Bridge & Constr. Co., Kansas City, Mo.; Wisconsin Bridge Co., North Milwaukee, Wis., and Rouse Constr. Co., Cape Girardeau, Mo. Grand total, $1,285,000.

Power plant, Beaumont, Tex., Gulf States Utilities Co. to Stone & Webster, Boston, Mass.; Westinghouse Elec. & Mfg. Co., East Pittsburgh, Pa.; Babcock & Wilcox Co., New York, N. Y., Engrs. est., $1,000,000.

Apartment, Fordson, Mich., J. Schaefer, to Blair Constr. Co. Archts. est., $1,000,000.

News of the Week

Waterworks

Proposed Work

Pa., Pittsburgh—See "Unclassified."

Mich., Detroit—Dept. Water Supply making preliminary plans rein.-con., brick, steel and stone auxiliary pumping station, Water Works Park. $500,000. G. H. Fenkell, 176 East Jefferson Ave., gen. mgr.

Mo., Deepwater—City postponed indefinitely waterworks, distribution and sewerage system. $75,000. W. B. Rollins & Co., 521 Ry. Exch. Bldg., Kansas City, engrs. Noted June 16.

Mo., Lockwood — Making preliminary plans complete waterworks and distribution system. To exceed $25,000. Engineer not selected.

Mo., Marceline — Making preliminary plans modernizing and extending waterworks and distribution system, incl. filtration plant. Black & Veatch, 700 Mutual Bldg., engrs.

Tex., McCamey—Pecos Valley Power & Light Co. made plans diversion 4,000 acre ft. water from Pecos River in Crockett Co., for generation pumping plant. $100,000 incl. machinery. Private plans.

Tex., Quanah—Northern Texas Utilities Co., Wichita Falls, making plans 50 x 300 ft., concrete and steel pumping plant, near here. $200,000. Private plans.

Tex., Rio Hondo—Voted $15,000 bonds, waterworks, incl. mostly equipment, pumping unit, pipe, etc. Address C. E. Mallern, Rio Hondo. Noted Aug. 18.

Okla., Crescent—Voted $15,000 bonds, digging well and installing pump, motor and extending 10,000 lin.ft. 4 and 6 in. c.i. mains in various streets. F. B. King, Grain Exch. Bldg., Oklahoma City, engr.

Okla., Sentinel—Making plans new water supply. $75,000. C. A. Wood, Stillwater, engrs. Noted July 7.

Colo., Pueblo — Trustees Pueblo Water Wks., c/o D. P. Porter, supt., 4th St. and Grand Ave., soon takes bids 8,500 ft. 40 in wood stave, concrete or iron mains from Reservoirs to pumping plant.

Wash., Port Townsend—City and Zellerbach Paper Corp., 1254 1st St., Seattle, plan 30 mi. 30 in. pipe line delivering 16 m.g.d. Baar & Cunningham, Spaulding Bldg., Portland, Ore., engrs. Noted Sept. 15.

Ont., Brampton—Making plans extending waterworks, new mains, valves, hydrants, centrifugal pumps, etc. $50,000. Gore, Nasmith & Storrie, Confederation Life Bldg., Toronto, engrs.

Ont., Markham—Made plans 100,000 gal. rein.-con. reservoir. $15,000. James, Proctor & Redfern, 36 Toronto St., Toronto, engrs.

Ont., Niagara Falls—F. A. Dallyn, engr., 71 King St. W., Toronto, making plans rein.-con. and concrete waterworks filtration system, 20 m.g.p.d., pumps, piping, pumphouse, valves, filters, filter beds and reservoirs, here, for City. $500,000.

THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.

Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.

Bids Desired

N. Y., Brooklyn — Sept. 27, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Avenues O, R and V, Albany, Nostrand, and Voorhies Aves., Dikeman, Harling, Lake Sts., etc., here.

N. Y., Long Island City—Sept. 27, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in 39th, Borden, Elliot, and 31st Aves., 85th, 156th, 162nd, 168th, 211th, 213th Sts., etc., here.

N. Y., New York—Sept. 27, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in West 182nd St., Amsterdam and St. Nicholas Aves.

Md., Baltimore—Sept. 28, by Bd. Awards, 6,084 lin.ft. 10- to 42-in. mains, etc., in Argonne Dr. E. G. Rost, City Hall, acting water engr.

Va., Victoria—Oct. 4, by Town, G. R. Marshall, town clk., waterworks and sanitary sewerage systems, incl. 2 deep wells and pumps, steel tower and tank, 20,064 ft. 6- to 20-in. c.i. and 27,000 ft. 1½ in. galvanized steel pipe, 50 fire hydrants, 94 valves, 67,035 ft. sewer pipe, 2 duplex sewer pumping stations, 1 septic and 2 Imhoff tanks, 3 sludge beds, etc. J. B. McCrary Eng. Corp., Citizens & Southern Bank Bldg., Atlanta, Ga., engrs.

O., Bay (br. Cleveland)—Sept. 27, by Village, mains in Donald Dr. and Russell Rd.; also sewer in Donald Dr., and walks on Woodland Rd. Wight-O'Rourke Co., Guarantee Title Bldg., Cleveland, engrs.

O., Cleveland—Sept. 28, by Bd. Comrs. Cuyahoga Co., 8,500 ft. 6- to 12-in. c.i. mains in Hall, Walter and Florence Rds. To exceed $25,000. F. Williams, Court House, engr.

O., Fostoria—Oct. 6, at office E. A. Shuman, dir. Pub. Serv., improving waterworks plant. J. N. Chester Engineers, Union Bank Bldg., Pittsburgh, Pa., engrs.; adv. E. N.-R. Sept. 22.

O., Trenton—Sept. 23, by Village Council, P. Schumacher, acting clk., pump house and connections, two 35,000 gal. motor driven pumps, 16,000 ft. 4- to 8-in. c.i. pipe, and elevated tank, 75,000 gal. capacity, $47,000. C. Wright, 806 Dayton Savings Bldg., Dayton, engr.

Ill., Lake Forest—Oct. 11, by City Clerk, waterworks pumping equipment; adv. E. N.-R., Sept. 22.

Wis., Janesville—Oct. 5, by Comm. Pub. Wks., rein.-con. reservoir, 250 ft. diam. and 26 ft. high, for Water Dept. B. M. Palmer, chn.; adv. E. N.-R., Sept. 22.

Ia., Osage—Sept. 29, by A. S. Wright, city clk., 400 g.p.m. air lift pumping station, etc.; adv. E. N.-R., Sept. 22.

See proposal advertising on page 123

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Waterworks engineers and superintendents prefer to use Leadite for joints—*It assures them that the pipe line will be completed and a revenue producer well within the time allowance.*

THE speed and simplicity of use of Leadite is a big factor in rapidly expanding communities.

This illustration shown here is a scene from an installation where Leadite was used with c. i. bell and spigot pipe.

These lines are in one of the fastest growing cities in the South. The speed of Leadite jointing makes it possible to lay pipe fast enough to keep up with the new building and real estate expansion.

In addition, Leadite joints are permanent. For over 30 years Leadite has been tested and used under all pipe laying conditions and has proven completely satisfactory.

The saving of labor time and advantages of using Leadite produce a saving of over 75% of the cost of making the joints.

Benefit by the experience of thousands of engineers, superintendents and contractors who have used Leadite.

Specify
and use
LEADITE
It saves at least 75%

Waterworks (Continued)

Tex., Galveston—Taking bids 1 deep well, not less than 1 m.g.d., near Alta Loma pumping station. Address A. T. Lange, Galveston, city water comr.

Okla., Ryan—Taking bids waterworks equipment and mains, pumps, etc. in various streets. $15,000. Address Mayor. Noted Aug. 18.

Ont., Thorold—Sept. 27, by J. A. Clark, twp. clk., Fonthill, 13,800 ft. 4- to 8-in. c.i. main, special castings, gate valves, fire hydrants, etc., Contr. A; reservoirs and pumphouse, Contr. B; and main drain, Contr. J. $40,000. Ross & Scott, Welland, engr. W. Chipman, Mail Bldg., Toronto, consult. engr.

Bids Received

N. Y Brooklyn—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, Sept. 16, mains in Avenues J, L, M and Q, Benson, Stanley, Canal, Flatlands, Hegeman Aves., etc., here, from Draganette Constr. Co., 1123 Clinton Ave., New York City, $15,940. Noted Sept. 8.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Bleecker, Greene and Grove Sts., etc., here, from Norton Constr. Corp., 21 East 40th St., New York City, $39,100. Noted Sept. 8.

Calif., San Luis Obispo—San Luis Obispo Co., c.i. mains, etc., in San Miguel Rd., etc., to C. Fisher, Chapman Bldg., approximately $32,000.

Contracts Awarded

Mass., Westfield—Dept. Pub. Wks., earth dam and Granville Reservoir, to C. & R. Constr. Co., 75 Bradeen St., Roslindale, $429,775. Noted Aug. 18.

O., Cleveland—Cuyahoga Co., 6,900 ft. 6 and 12 in. c.i. main in Dover Center Rd., Impvt. 1256, and main in Chipewa Rd., to Great Lakes Constr. Co., 1120 Chester Ave., $30,528 and $23,542 respectively; also 6,800 ft. 6 and 8 in. c.i. in Washington Blvd. and Sunset Rd., Impvt. 370, to George & Ameen Co., Erie Bldg., $17,434. Grand total $71,504.

Ill., Libertyville — Bd. Local Impvts., 15,150 ft. 6 and 8 in. mains, etc. in Sayre Ave., to J. Brogan & Son, Green Bay, Wis., $26,509. Noted Aug. 25 under "Sewers."

Ill., Niles Center — Laramie-Brummel Water Mains, incl. 6- to 12-in. c.i. pipe, etc., to O'Brien Bros., 152 North Central Ave., Chicago, $20,969. Noted Sept. 1.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., 18,016 ft. 6- to10-in. c.i. mains in various streets, to Meirswa & Helms, 577 Jefferson St., Oshkosh, $14,650.

Neb., Lincoln—For 15,000 ft. 6- to 10-in. c.i. mains, 17 hydrants, 30 valves and 8,292 lb. special castings, etc. in Dist. 109, to Knudson Co., Bankers Life Bldg. $21,186.

Neb., Union—C. B. Smith, village clk., to E. C. Archibald, Omaha, 8 in. tubular well, 125 ft. deep, 12 in. strainer, etc., $1,000, 80 g.p.m. single stroke pump $1,664, 15 hp., 3 phase, 220 volt, 60 cycle auto motor $244, and install pump and motor $393; to Omaha Steel Works, 48th and Leavenworth Sts., Omaha, 40,000 gal. tank on 90 ft. tower $5,600; to United States Cast Iron Pipe & Foundry Co., 604 Interstate Bldg., Kansas City, Mo., 8,164 ft. 2- to 8-in. c.i. pipe $2,230 and pump house, etc. $750; to Crane Co., 323 South 10th St., Omaha, 10 hydrants, etc. $646. Grand total $16,620. Noted Sept. 1.

Mo., Macon—W. A. Tibbs, city clk. improving waterworks, 90,000 cu.yd. earth embankment, 1,050 cu.yd. concrete, two 700 g.p.m. pumps, 9,708 ft. 12 in. c.i. pipe, also rein.-con. and brick pumping station, to B. F. Brooks Constr. Co., Slaughter Bldg., Dallas, Tex., $108,439. Noted Aug. 18.

Okla., Seminole—Waterworks improvements, incl. 500 g.p.m. motor driven unit, 13,700 ft. 2- to 6-in. main extensions, etc., to Bensen & Farrar, Guthrie, $30,315. Engrs. est. $50,000. Noted Aug. 25.

Calif., Alhambra — To Natl. Cast Iron Pipe Co., Hellman Bank Bldg., Los Angeles, 2,300 ft. 14 in. c.i. pipe $4,600, and 2,400 ft. 4 in. $1,096, etc.

Ont., Elmvale—For 60,000 gal. steel tank, to Horton Steel Co., Bridgeburg; hydrants and gate valves, to Kerr Engine Wks., Walkerville ;mains, to Natl. Iron Co., Cherry St., Toronto; laying mains, etc., to G. Simone, 10 Coleridge Ave., Toronto. Engrs. est. $35,000.

Ont., London—Utilities Comn., drilling test wells, casing and pumps for increasing water supply 1 m.g.p.d., to Layne & Bowler, Chicago Co., 37 West Van Buren St., Chicago, Ill.

Sewers

Proposed Work

N. J., Perth Amboy—Bd. City Comrs. plan 8- to 15-in. sewer in Colgate Ave. $36,000. P. P. Costello, city clk.

D. C., Wash. — Dist. Comrs., District Bldg., rejected bids May 24, sewers in various streets. Noted May 12.

O., Alliance—Bd. Control will not open bids Oct. 1, sewage disposal plant. Bids were opened Sept. 20. This corrects report in Sept. 8th issue.

Mich., East Grand Rapids (mail Grand Rapids)—Making plans sewage treatment plant addition, incl. tanks, housing structure, etc. $75,000. Pearse, Greeley & Hanson, 6 North Michigan Ave., Chicago, Ill., engrs.

Ill., Chicago—Sanitary Dist. of Chicago, 910 South Michigan Ave., making plans North Branch Sewage Treatment Plant, addition, $1,500,000; also miscellaneous buildings, electrical work and equipment for West Side Sewage Treatment plant; and new section Salt Creek Sewer, incl. 12 in. vitr. pipe to 7 ft. monolithic pipe, etc. E. J. Kelley, 910 South Michigan Ave., engr.

Ill., Marion—Bd. Local Impvts. takes bids about Oct. 3, complete sewage disposal plant, incl. pipe, pumping machinery, etc. $83,207. G. F. McCarthy, city engr. P. B. Wilson, 1st Natl. Bldg., consult. engr. Noted Mar. 17.

Ill., Mt. Vernon—Bd. Local Impvt. postponed indefinitely, 80,900 ft. 8- to 36-in. vitr. clay sewers, 219 manholes, 16 drop manholes, 82 lamp holes, sewage disposal plant, etc., in Sewer Dist. 41. H. C. Hammond, city engr. P. B. Wilson, 1st Natl. Bldg., Marion, consult. engr. Noted Mar. 17.

Ill., Woodriver — Making preliminary plans sewerage system, incl. disposal plant, etc. $200,000. Black & Veatch, Mutual Bldg., Kansas City. Mo., engrs.

N. D., Jamestown—State Bd. Administration, E. G. Wanner, secy., Bismarck, making plans sewage disposal plant at State Hospital for Insane. $40,000. J. M. Roherty, Capitol, Bismarck, state engr.

Mo., Hannibal—Making preliminary plans sewers in various streets, also straightening Bear Creek. G. W. Farrell, City Hall, engr.

Mo., Springfield—Soon takes new bids 18,011 ft. 8 and 10 in. sewer in Dist. 7, Sect. 8. S. R. Fisher, City Hall, engr.

Tex., Spearman — Voted $50,000 bonds, complete sewerage system. Devlin Eng. Co., 127 Central Bldg., Amarillo, engrs.

Okla., Crescent — Voted $25,000 bonds, sewerage system. F. B. King, Grain Exch. Bldg., Oklahoma City, engr. Noted Nov. 4.

Okla., Edmond—Defeated $35,000 bonds, extending sanitary sewers in various streets. F. H. Peckham, 227 West Grand St., Oklahoma City, engr. Noted May 12.

Okla., Ft. Cobb—Plans sewage disposal plant, and 20,000 ft. 8- to 12-in. sewers in all streets. $25,000. J. J. McLane, mayor. Engineer not announced.

Okla. Oklahoma City—Made preliminary plans 3 mi. storm sewers in northwest section city. $1,100,000. B. M. Hart, City Hall, engr.

Okla., Seminole—Made preliminary plans 14,000 ft. 8 and 10 in. vitr. clay sewers in Vernon Heights and Terrace Garden. $31,000. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Wash., Walla Walla—Making plans sewage disposal plant. $200,000. Pearce, Greeley & Hanson, 6 North Michigan Blvd., Chicago, Ill., consult. engrs. W. R. Rehorn, Walla Walla, city engr. Noted Feb. 24.

Bids Desired

N. Y., Brooklyn—Sept. 28, by J. J. Byrne, pres. Brooklyn Boro, Boro Hall, sewers in Kings Highway, 90th 67th, and 59th Sts.

N. Y., New York—Sept. 28, by H. Bruckner, pres. Bronx Boro, Crotona Park, 3rd and Tremont Aves., sewers in Eastchester Rd., Young, Edwards and Ellison Aves.

Pa., Chester—Oct. 7, at office Supt. Streets and Pub. Wks., concrete relief sewer in 8th St., Contr. 3. R. C. Wheeler, 36 State St., Albany, N. .Y, consult. engr.; adv. E. N.-R., Sept. 22.

Pa., Phila.—Sept. 28, by Dept. Pub. Wks., Bureau Engineering, main sewers in Hellerman and Large Sts., Taber Ave. between Sanger St. and Cheltenham Ave., and Taber Ave. between point north of Comly St. and Benner St. G. H. Biles, dir.

Md., Baltimore—Sept. 28, by Bd. Awards, sanitary sewers and storm drains in Dist. H-6 and H-13, Sanitary Contr. 245. M. J. Ruark, City Hall, sewerage engr.

Va., Victoria—See "Waterworks."

Ala., Birmingham—Oct. 3, by City Comn., approximately 1.5 mi. brick and concrete sewers in 10th Ave., 57th Alley, 53rd and 60th Places, 57th, 55th, 59th, 60th and 54th Sts. $264,900. A. J. Hawkins, city engr.

Tenn., Knoxville—Sept. 26, by Div. Pub. Service, trunk and lateral sewers, etc., incl. 25,000 ft. 8 in. concrete or vitr. clay sewers in Mountain View Sewer Dist. $50,000. L. Brownlow, city engr.

Mich., Detroit—Sept. 26, by Dept. Pub. Wks., 2,896 ft. 6¼ ft. to 8 ft. cylinder monolithic concrete sewer in Goethe Ave. Arm east of Fisher Ave. P. A. Fellows, city engr.

Mich., Detroit—Sept. 26, by Dept. Pub. Wks. 5,511 ft. 4 to 7½ ft. cylinder monolithic concrete sewer in Vernor Highway Arm west of Fisher Ave. P. A. Fellows, city engr.

Ill., Chicago—Sept. 23, by Bd. Local Impvts., brick sewer with brick manholes in East 72nd and East 74th Sts., Merrill and Paxton Aves. M. J. Faherty, pres.

Calif., Los Angeles—Supervs. Los Angeles Co., taking bids sewers in Drainage Impvt. Dist. 21 (Montebello Dist., along Whittier Blvd.) $235,000. C. E. Arnold, Hall of Records, drainage engr. Noted Sept. 8.

Bids Received

N. Y., New York—J. Miller, pres. Manhattan Boro, Municipal Bldg., Sept. 15, sewer in Payson Ave., from J. V. Timoney Constr. Co., 220 East 201st St., $12,670. Noted Sept. 8.

N. J., Vineland—Bd. Boro Comrs., Boro Hall, Sept. 13, trunk sewer and settling tanks, from E. R. Morehouse Co., 315 Market St., Camden, $80,723. Noted Sept. 8.

Mo., Moberly — Sewage disposal plant, incl. Ludlow sluice and shear gates, vitr. clay valve boxes and sewer pipe, inceptors, Dorr clarifier and digester, etc., from Repass Bros., 502 Frankel St., Des Moines, Ia. $32,900; and brick repaving 5,040 sq.yd. Reed St., from Lynch-McDonald Constr. Co., Moberly at $2.19 per sq.yd. Total $13,104.

Calif., Los Angeles—Los Angeles Co., vitr. sewer in Cudahy St., Impvt. 548, from M. N. Guho, 5316-8th Ave., $186,858.

Contracts Awarded

Mass., Boston—Dept. Pub. Wks., sewerage works in various streets, to C. Struzziery, 115 Kittredge, St., West Roxbury. Engrs. est. $25,000.

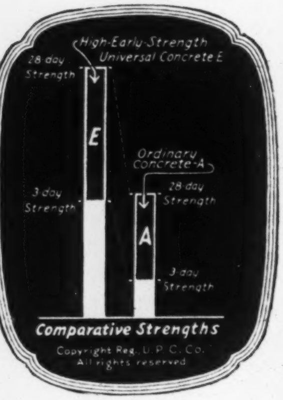
Pressed for Time?

Use *High-Early-Strength* Universal Concrete



Comparative Strengths

Copyright Reg., U. P. C. Co.
All rights reserved

Maybe the owner insists upon quick occupancy.

Maybe the improvement is of such public importance that delays are costly.

Maybe thru unavoidable conditions a scheduled completion date is hard to meet.

In any case you can crowd *weeks* into *days* in your concrete work thru the use of *High-Early-Strength* Universal Concrete.

High-Early-Strength Universal Concrete is made by using fully tested methods with the usual materials, usual labor, usual equipment, and standard—not special——Universal cement. And it not only is as strong at *3 days* as ordinary concrete at *28 days*, but as it also has a higher *ultimate* strength it is *permanently* better and *stronger* concrete. (See diagram.)

Such concrete may be made as workable as desired, and so is suitable for any kind of concrete work. Thousands of tests and hundreds of jobs of all types prove its practicability. For details send in the accompanying coupon.

PREFERRED STOCK

THERE is a reason why operators prefer INDUSTRIAL equipment.

It's because manipulation is exceedingly simple and without fatigue. The operator is not called upon to exert all of his energy in order to get maximum efficiency out of his work.

Therefore, with a contented operator and an Industrial All-Purpose Crawler, you have a combination that can't be beat for producing results.

Ask an Industrial Operator in your locality if you would know. Then call our nearest office.

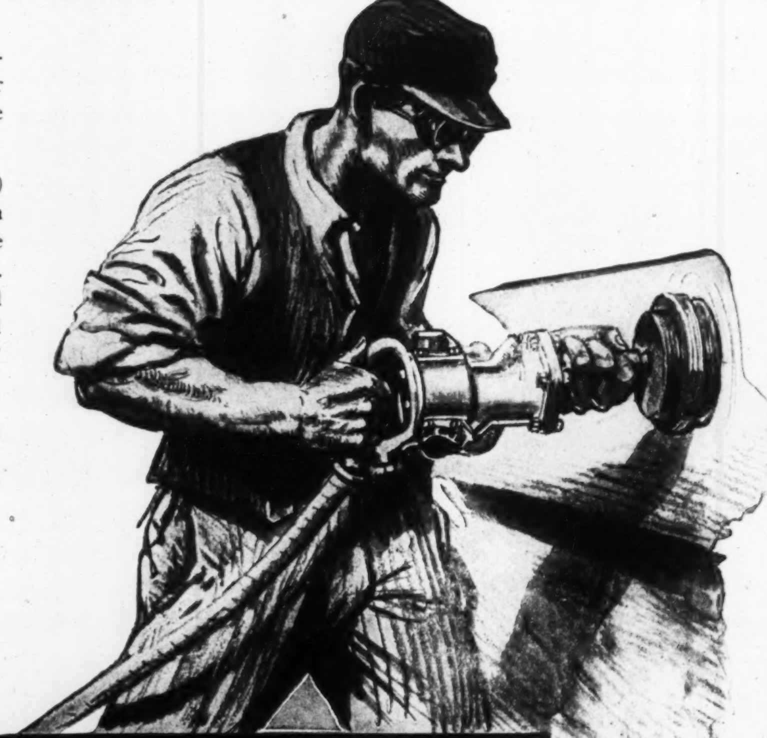
For surfacing concrete — quicker, better, and at less cost



Ingersoll-Rand Company has developed a new lightweight air tool for use in finishing the surfaces of concrete and stone.

This machine (known as Size 6G) will quickly and easily remove all form marks from concrete and prepare the surface for a flat finish or for painting. It is ideal for cleaning, smoothing, and finishing concrete walls, bridges, and buildings. It will surface either "green" or old concrete.

It saves time and labor and does a far better job than other devices. The machine weighs only 13¾ lbs. with wheel and is easy to handle in any position. Ask for complete information.
